

## A Customer's Journey When Plants Merge or De-merge

Ashet Kikani, Associate Director-Business Systems  
United Technologies (Carrier)

Session ID # ASUG82254

# About the Speaker

## Speaker Name

Ashet Kikani, Associate Director – Business Systems,  
United Technologies (Carrier)

- 30+ years of industry experience and 24+ years of SAP and ERP consulting experience focusing on Materials Management, Demand Planning, Production Planning, Workflow, Accounts Payables and Cross Applications
- Experience in various industry verticals like Building and Construction, Hi-Tech, Oil & Gas, Consumer Durables, Financial Services, Food & Beverage, Automobiles etc.
- Consulted to companies like General Electric, General Motors, Ford, Anheuser Busch, Avery Denison, British Petroleum, Comark Computers, Oracle-Storagetek, Helene Curtis, Owens Corning, Bank of America, Coca-Cola, Abbott Labs and Sargento
- Considerable experience in leading teams in different geographies and diverse background
- Platinum Consultant at SAP America, Inc.

# Key Outcomes/Objectives

1. Role of Special Procurement Key
2. How demand gets moved from one plant to other
3. Steps at go-live

# Agenda

- Company Background
- Current Process
- Make-to-Stock
- Make-to-Order/Engineer-to-Order
- Post Transition
- Questions?

# United Technologies

**A global leader in building systems and aerospace industries**

**Our large investments in technology enable us to develop new and improved ways to keep people safe, comfortable, productive and on the move**

**ASUG**

## OUR BUSINESSES

[UTC At A Glance](#) →

**Otis**

**Carrier**

**Pratt & Whitney**

**Collins Aerospace**

## BY THE NUMBERS

**240,200**

**Employees**

**\$66.5B**

**Net sales**

**\$7.61\***

**Adjusted diluted earnings  
per common share from  
continuing operations**

**\$4.0B\*\***

**Total R&D investment  
includes company- and  
customer-funded**

\*As of December 31, 2018. Adjusted diluted earnings per share from continuing operations is a non-GAAP financial measure. For more information on this measure, please refer to the tables in our [Fourth Quarter 2018 Results press release](#).

\*\*As of December 31, 2018.

# Our brands

Iconic brands delivering  
smart, sustainable solutions  
the world needs

**OTIS**

**ASUG**

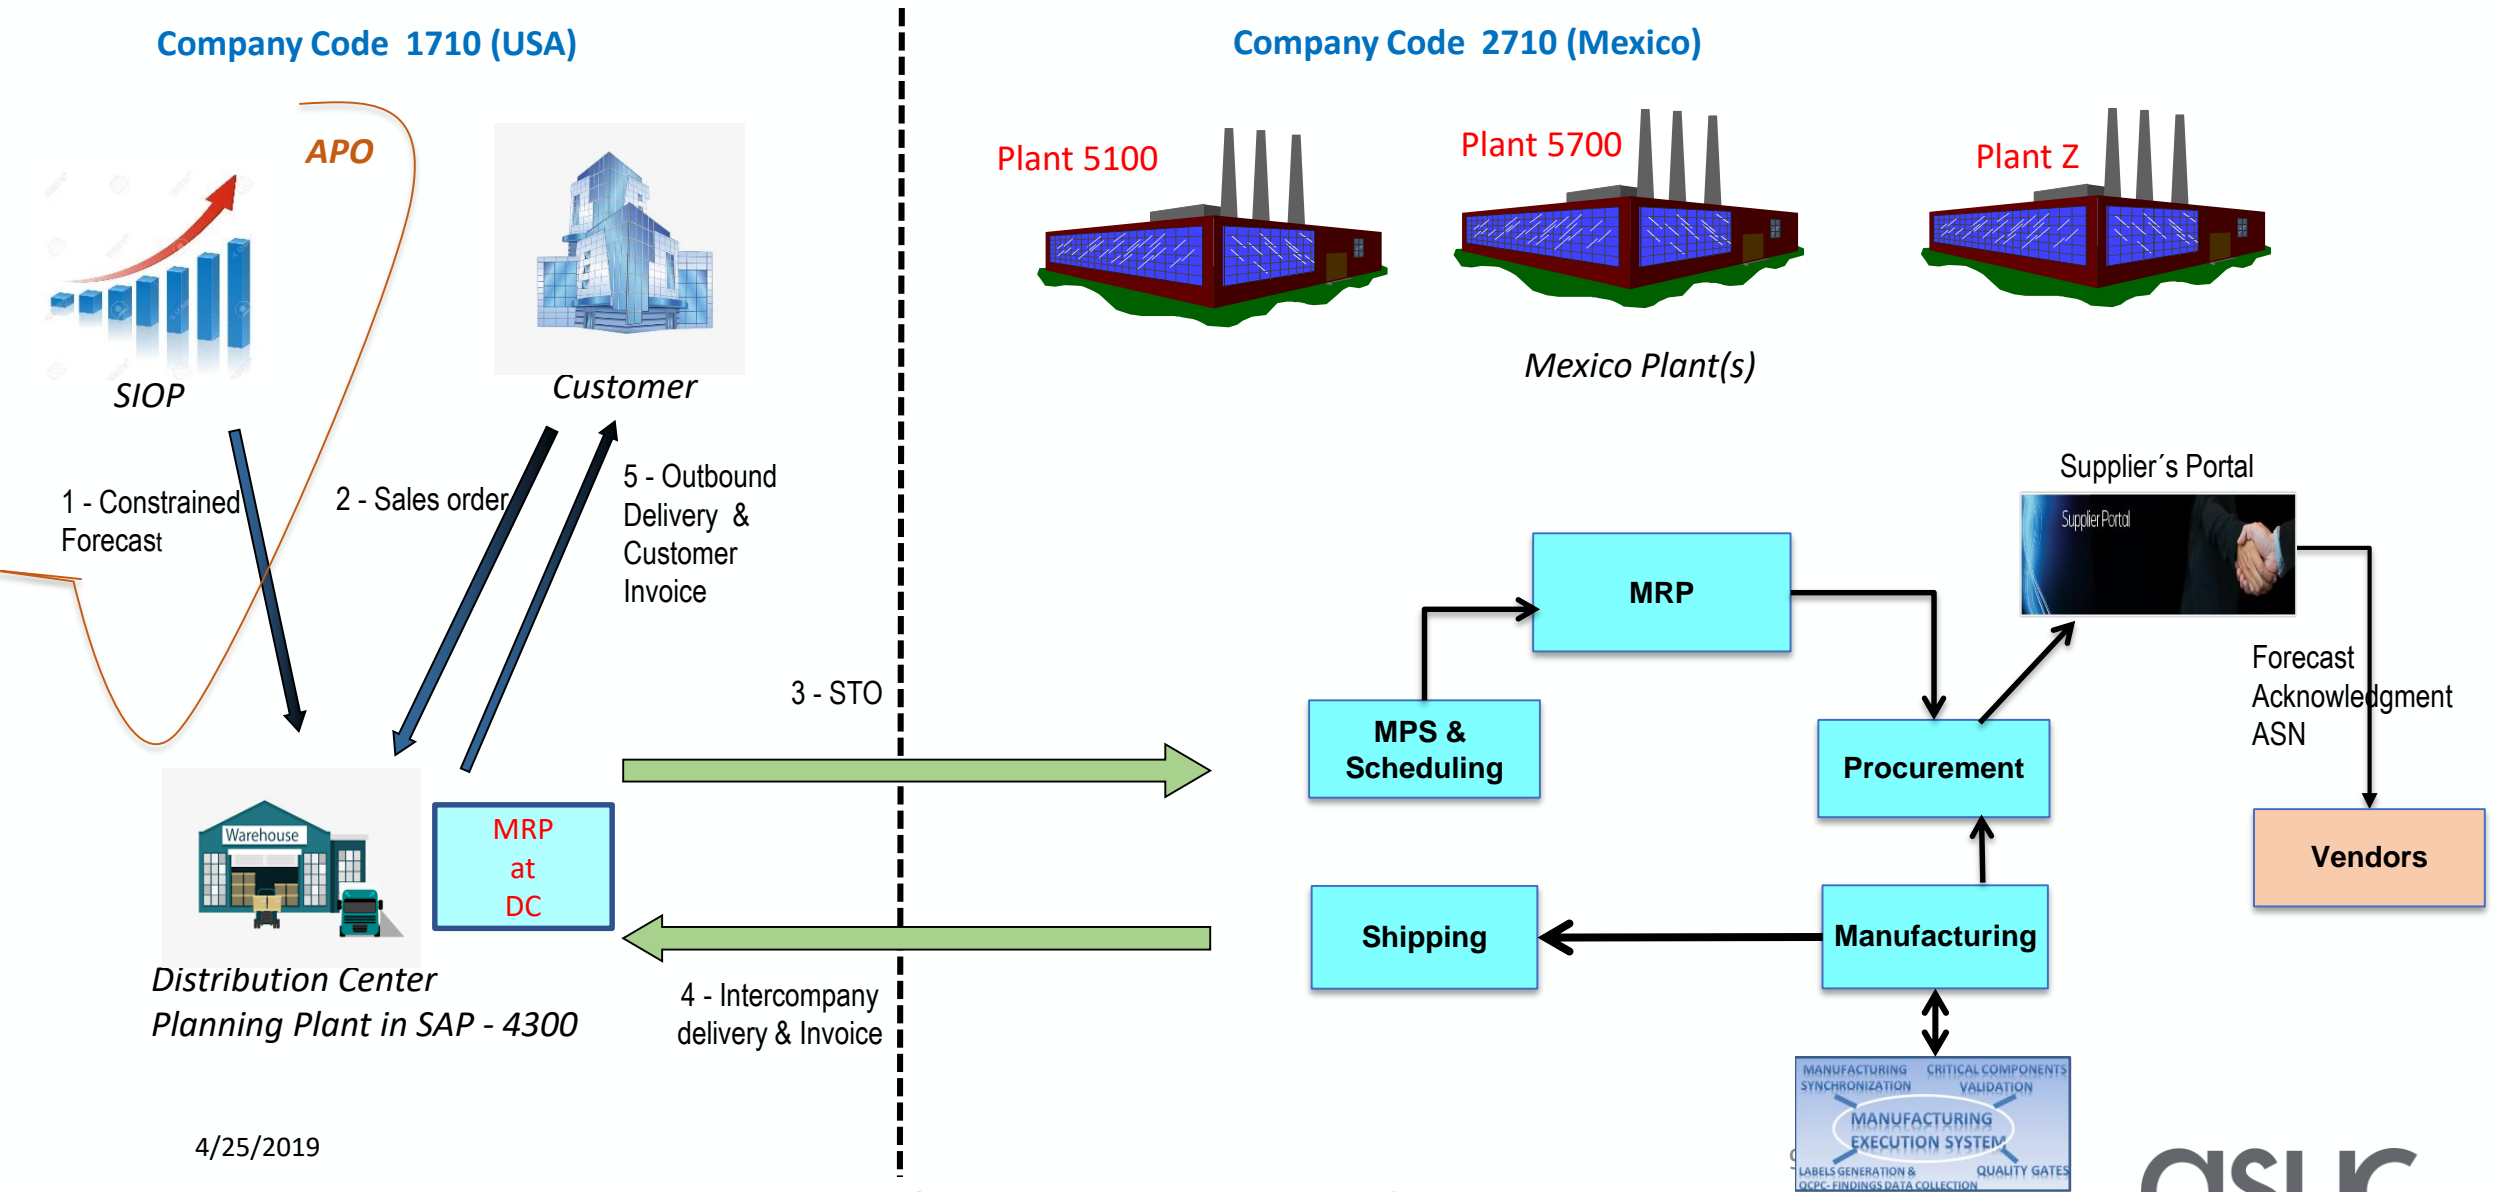

What if you have a cross-company/cross-country fulfillment model?

How does SAP handle it? Can SAP handle it?

What happens if you have MTS and MTO/ETOs?

# Cross-Company, Cross-Country Fulfillment Model - MTS

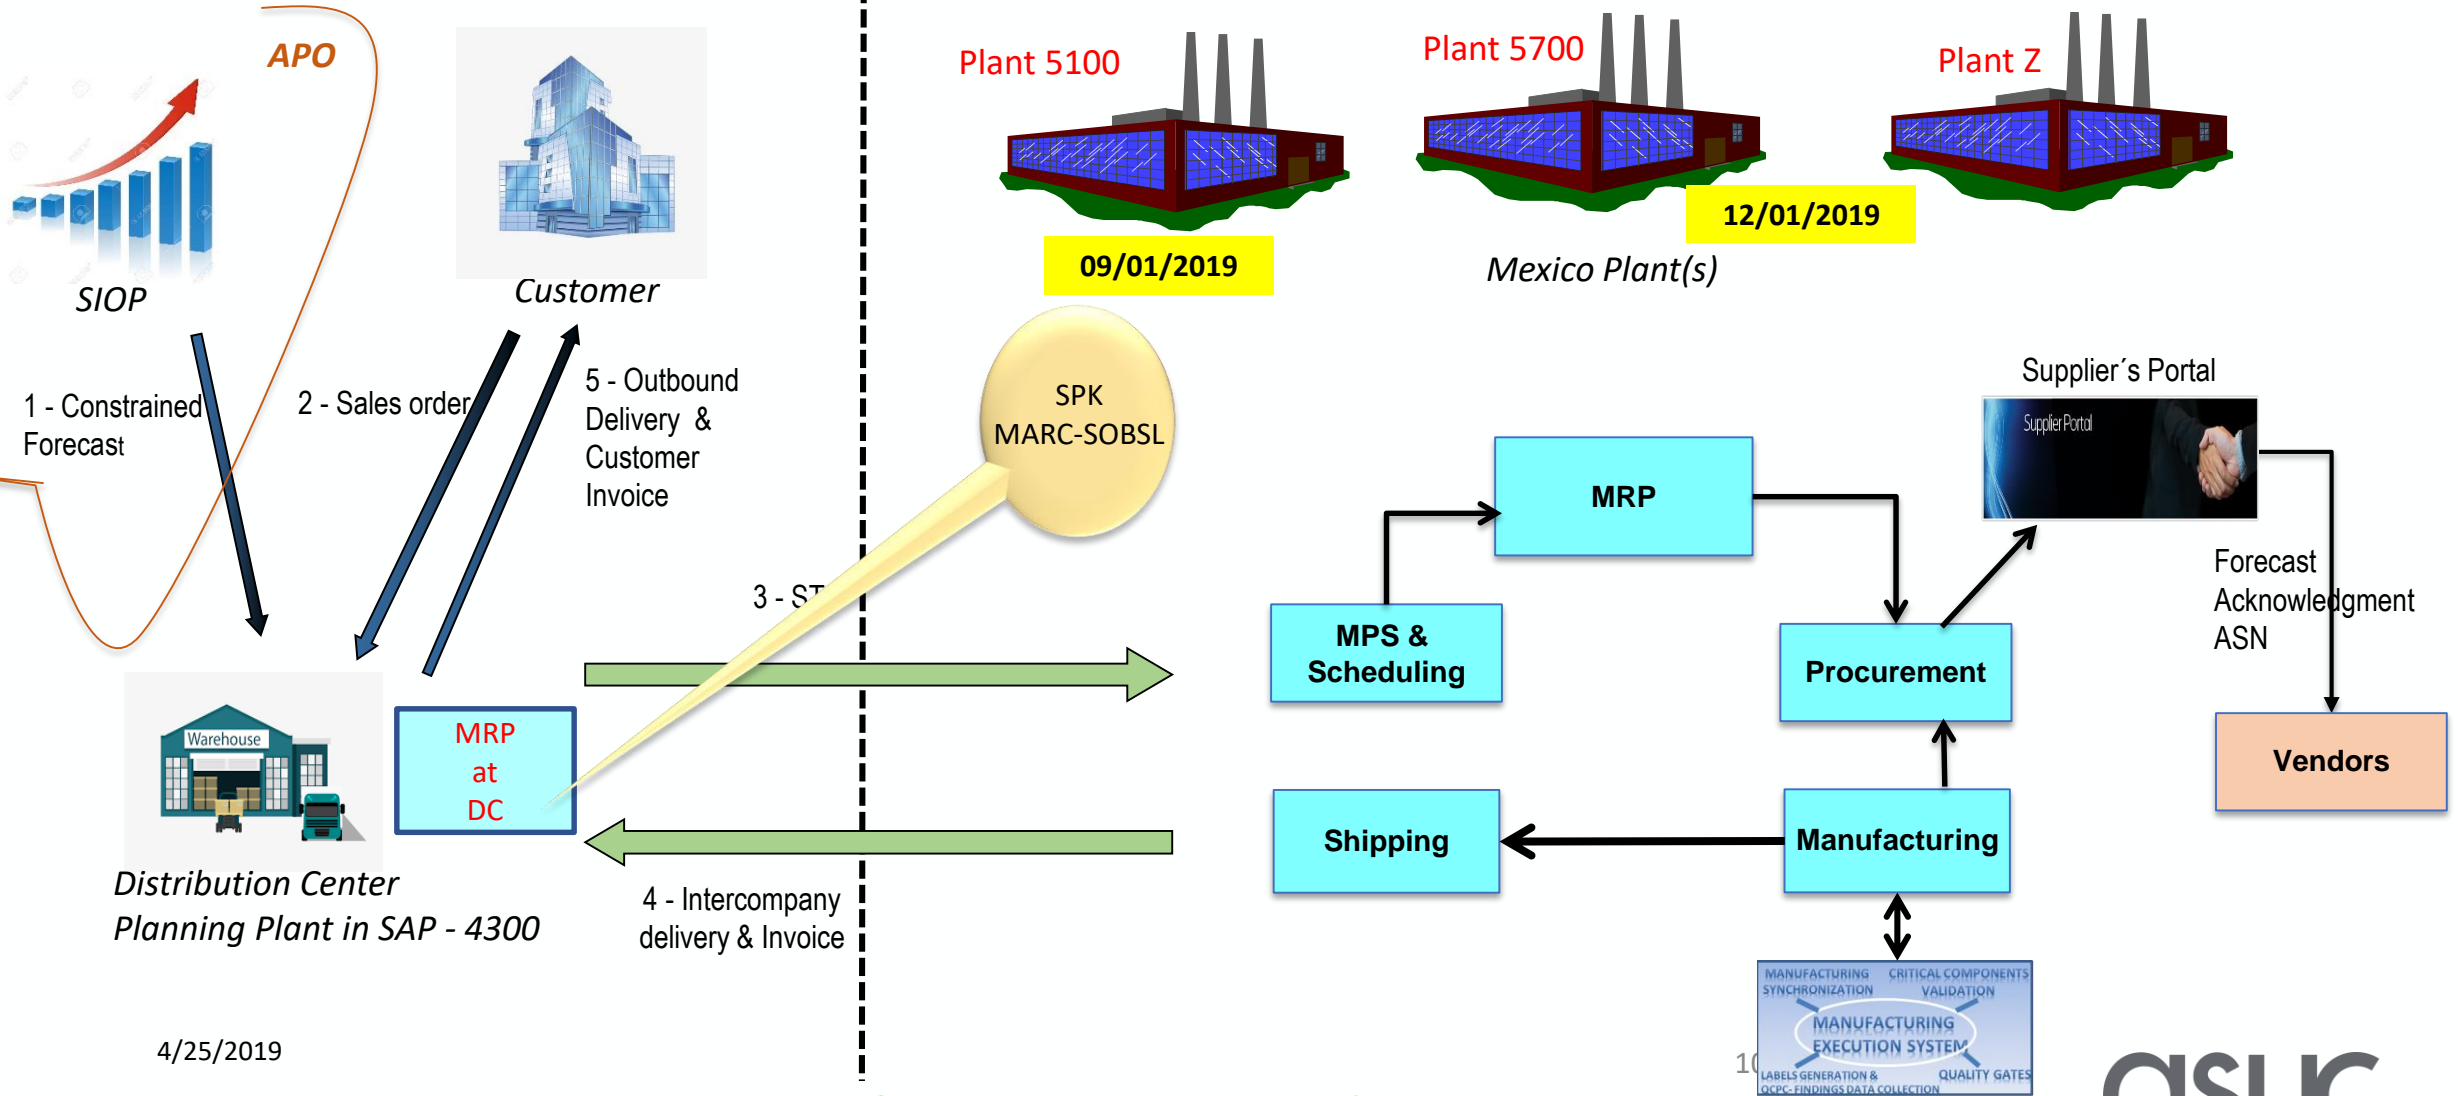

4/25/2019

# Cross-Company, Cross-country Fulfillment Model - MTS

Company Code 1710 (USA)

Company Code 2710 (Mexico)

## Cross-Company, Cross-country Fulfillment Model - MTS

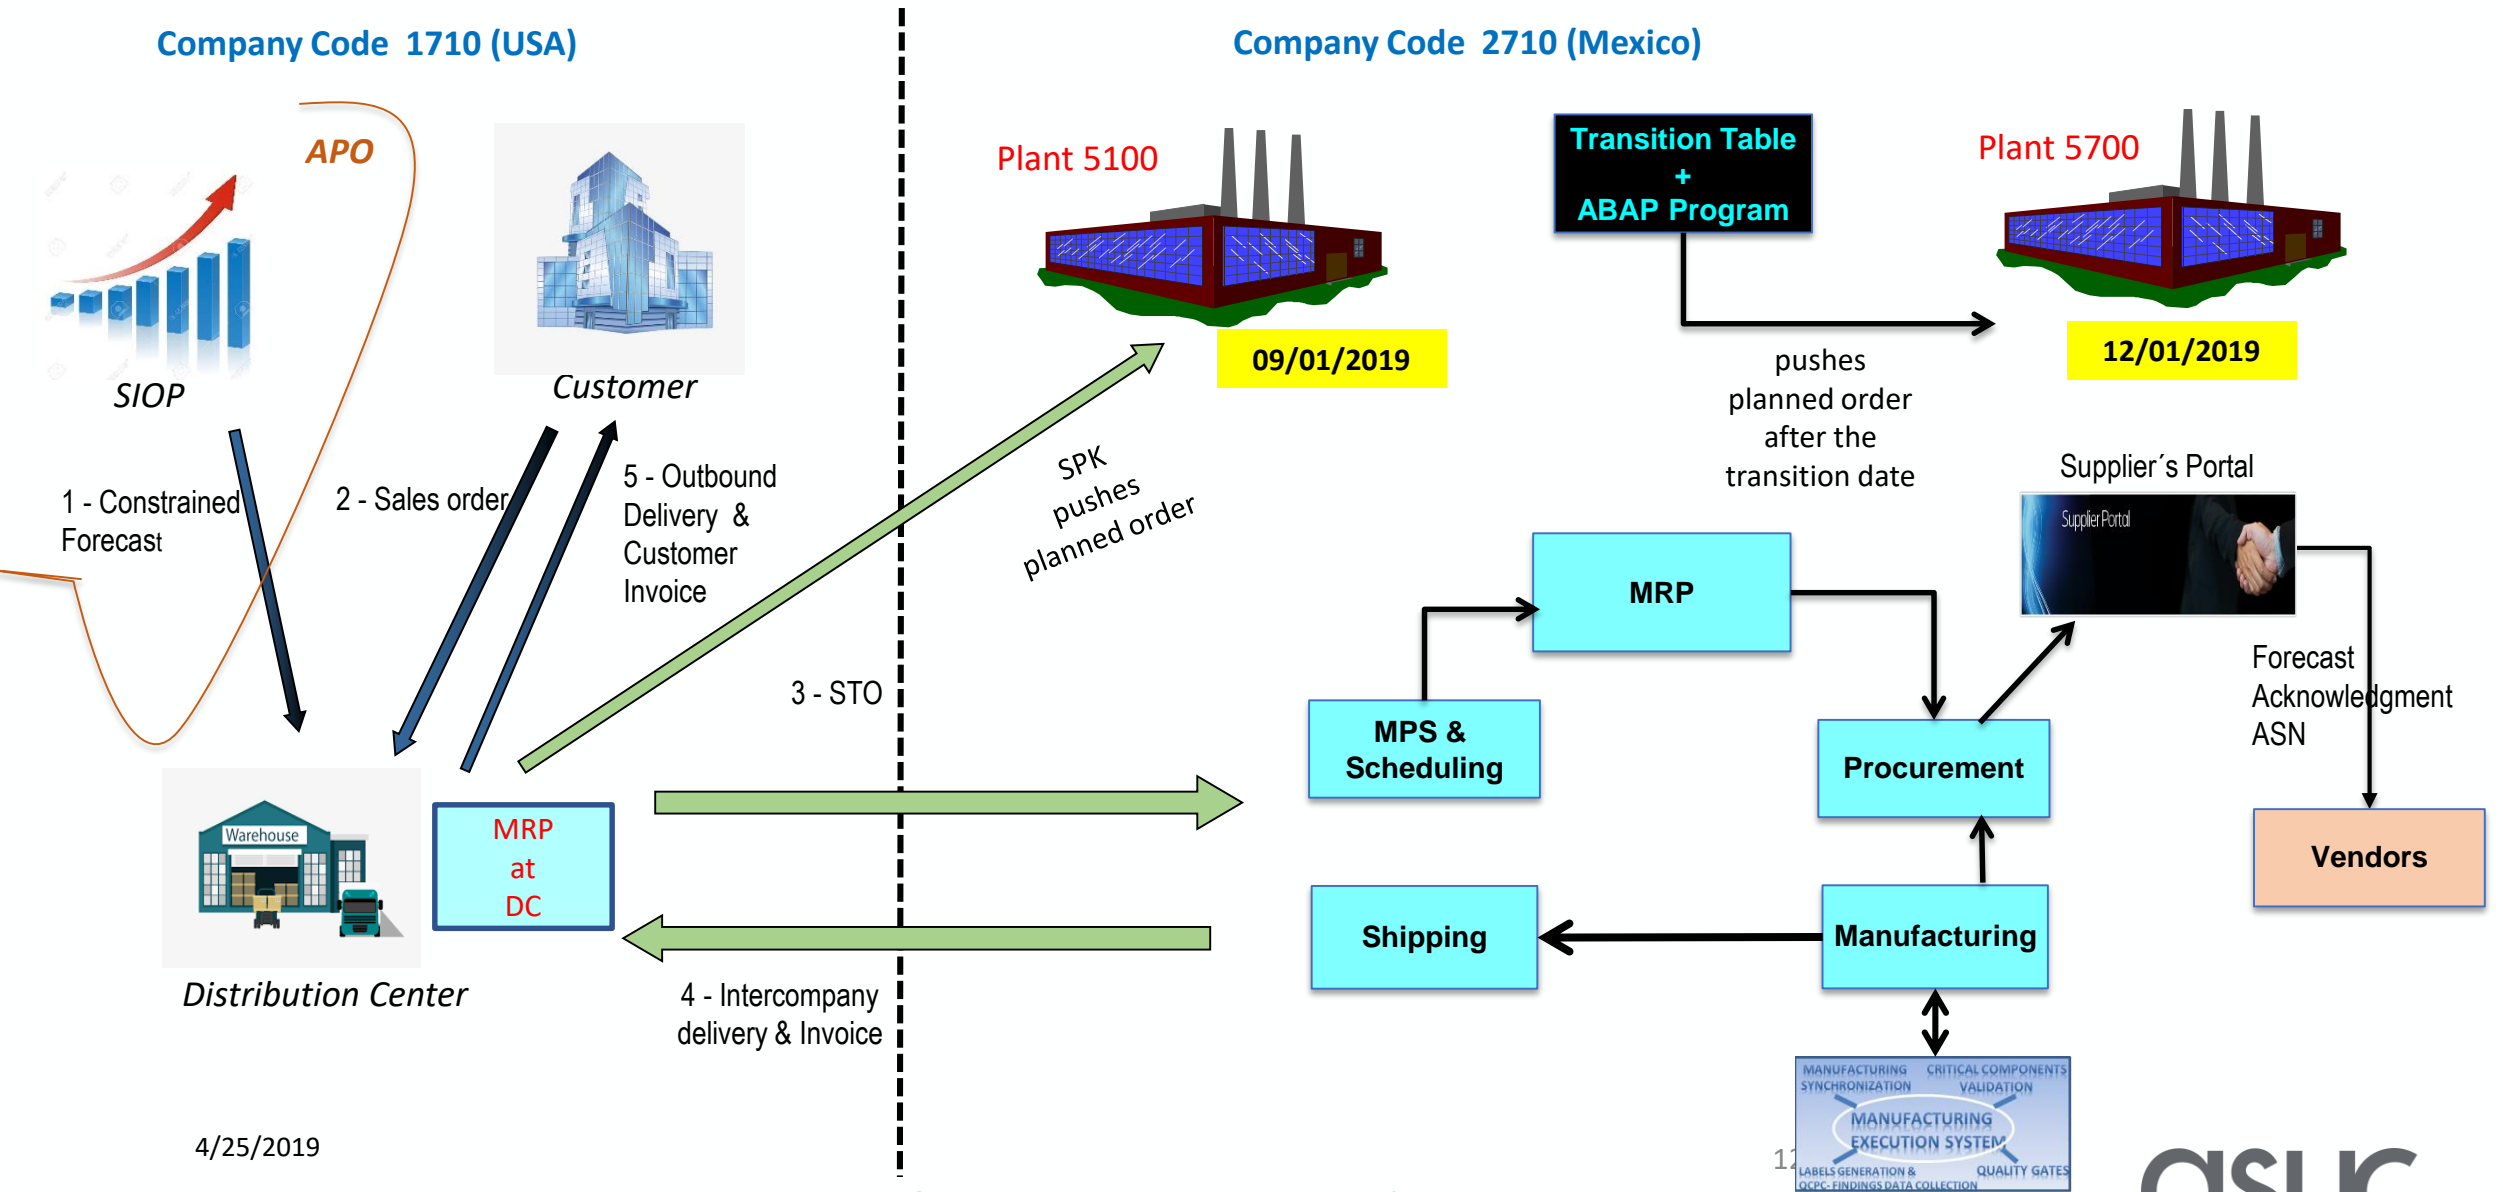

- Running forecast from APO to ECC is for 16 months, sent once a week after adjustments
- Till 09/01/2019, production will happen in Plant A (5100)
- From 12/01/2019, production will start in Plant B (5700)
- Due to long lead times of components, planners/schedulers in Plant B (5700) need visibility to forecast and planned orders much before the production start date of 12/01/2019
- SPK (in planning plant) cannot be changed till go-live as Plant X needs to know what they have to manufacture till 09/01/2019

4300 - Planning Plant

5100 - Current Manufacturing Plant

5700 - Future Manufacturing Plant

Planned Orders converted to Prd Orders in Manufacturing Plant (future)

### MTO/ETO are different

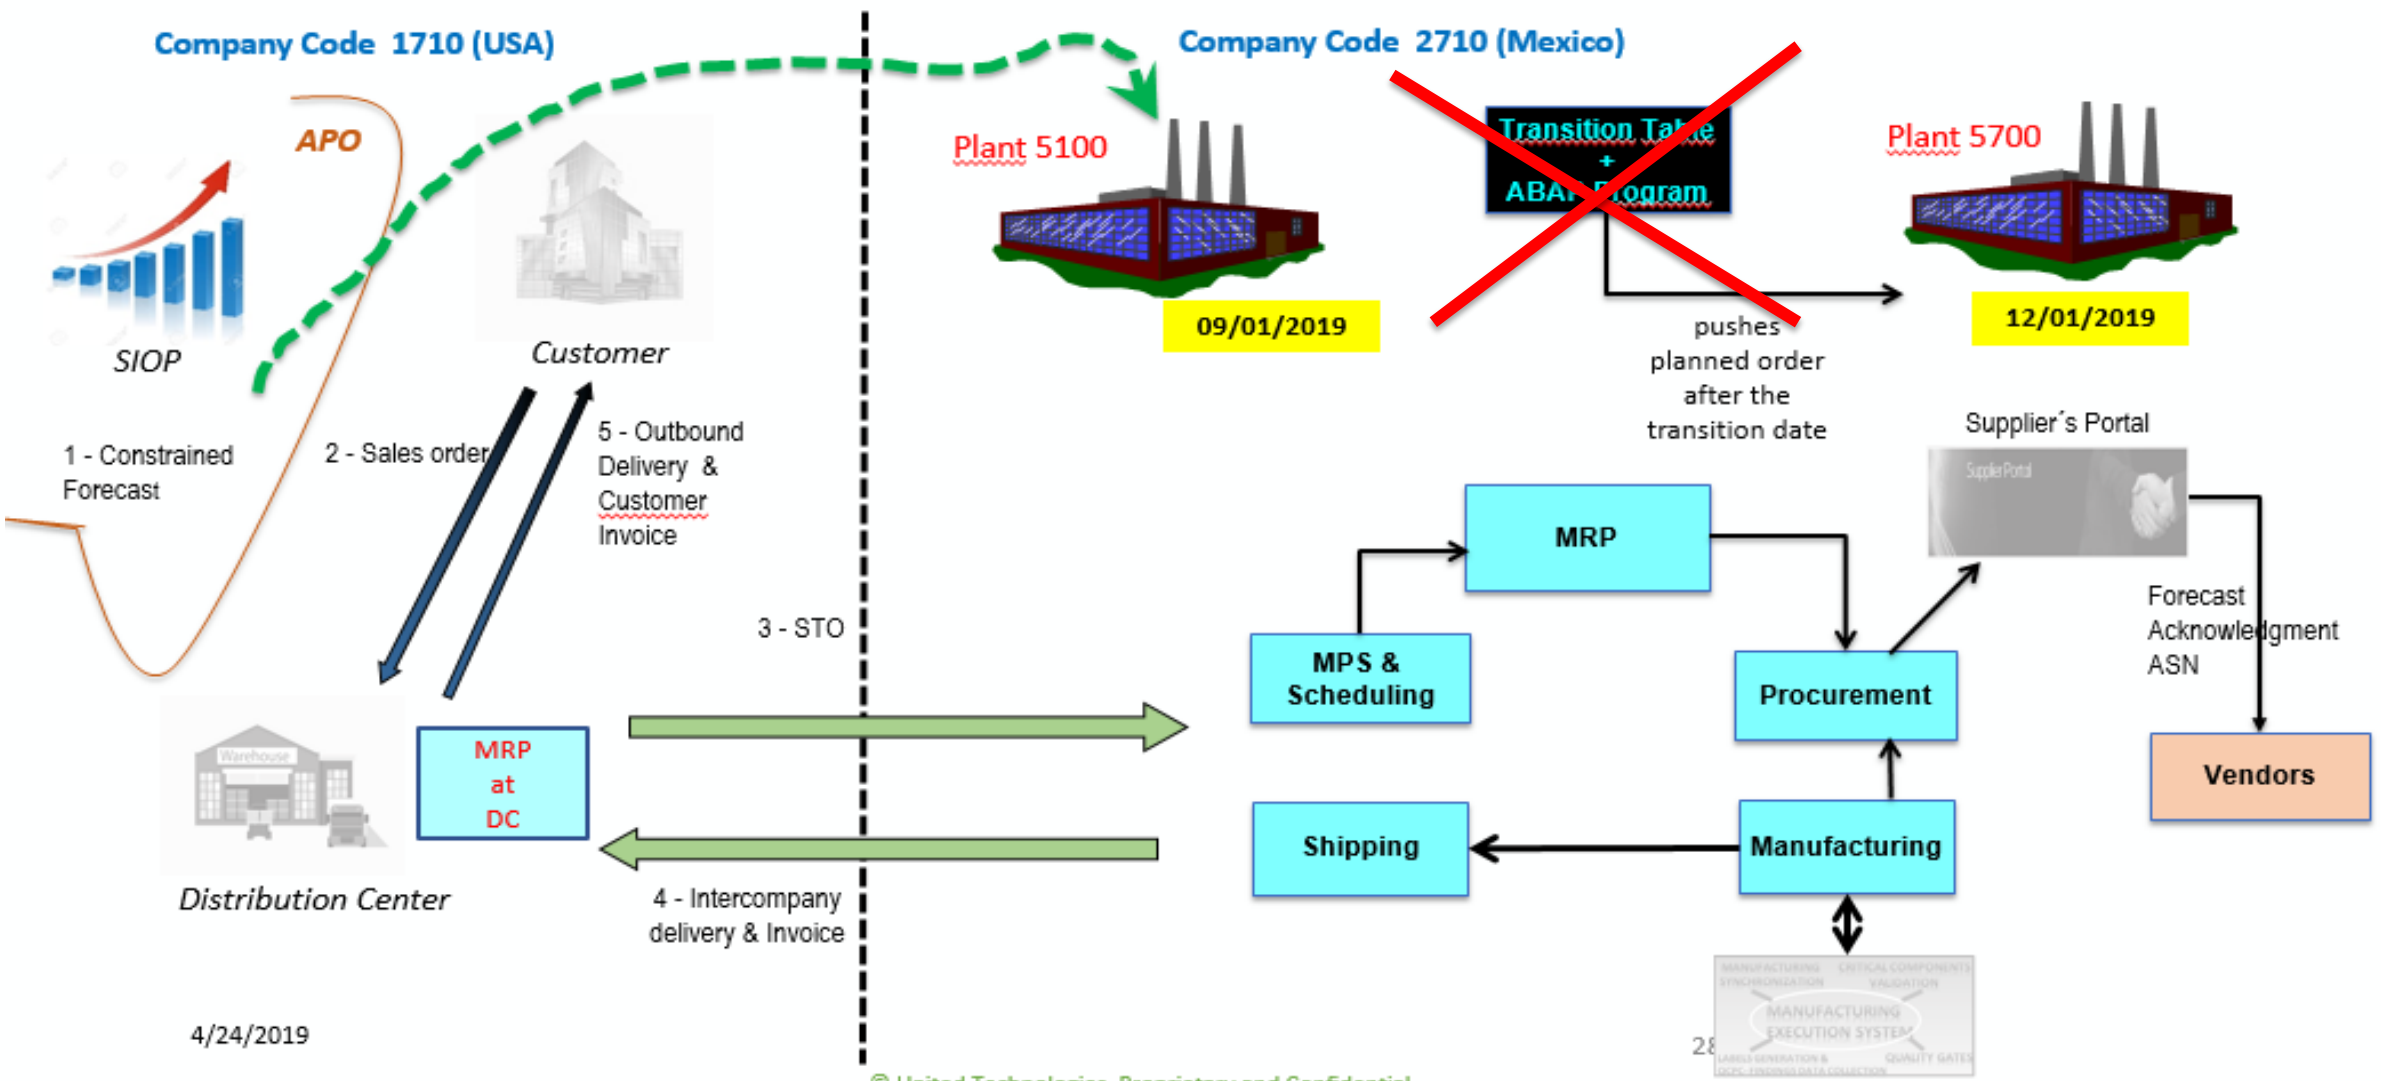

- We have KMATs and nested KMATs
- We use Super BOMs
- Extensive use of VC
- VC drives the BOMs
- By some estimate, we can make an ETO in about 500 billion combinations
- For forecasting L1 components, we use the concept of Planning Materials
  - KMATs are not forecasted, planning materials tied to the KMAT is forecasted
  - Planning Materials have super mini-BOMs, KMATs have super BOMs
- **Forecast for Planning Materials gets exploded into multiple L1 components and goes directly to manufacturing plant, not to the planning plant**
