SAP S/4HANA Cloud Licensing

- Direct User Access
- Industry & LoB Solutions
- Digital Access
- Infrastructure Services

The 4 Dimensions of S/4HANA Cloud Licensing (subscription)

One SAP S/4HANA: the right solution for each customer cloud journey

*according to Gartner Cloud (SaaS) Definition

Cloud ERP*

ERP in the Cloud

ERP OP

SAP S/4HANA Cloud

**SAP S/4HANA Cloud,
single tenant edition**

SAP S/4HANA
(Private cloud managed by SAP)

SAP S/4HANA
(On-premise managed by cloud providers or customers)

Highly standardized, multi-tenant cloud services covering selected LoB- and industry scenarios and a comprehensive ERP scope

Standardization, TCO and scalability of the cloud combined with the full functional scope, extensibility and reach of the S/4HANA solution

Individually sized infrastructure and application management services moving your system to the next generation

Standardized next generation ERP solution that can be run and extended according to customer preferences

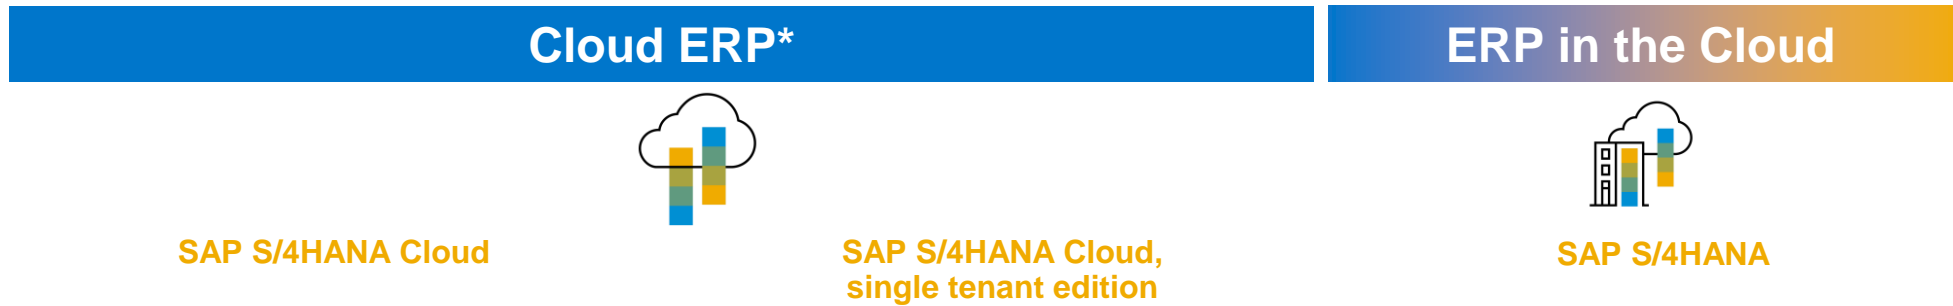

Rapid innovation at the lowest TCO

Cloud standardization at attractive TCO

Your SAP guided elevation to the public cloud

Next generation ERP system for on premise use

One SAP S/4HANA: the right solution for each customer cloud journey

Implementation	Greenfield with data migration	Greenfield with data and configuration migration	Greenfield or conversion of existing implementations
Functional Scope	Business configuration of standardized core ERP and select LOB processes	Full functional S/4HANA scope of core ERP and extended LOB and industry processes	Full functional S/4HANA scope of core ERP and extended LOB and industry processes
Industries Supported	In-depth support for professional services and component manufacturing; more industries on roadmap	All industries supported	All industries supported
Extensibility	S/4HANA Extensibility Framework and extensions via SCP, using whitelisted APIs	S/4HANA Extensibility Framework and extensions via SCP, with full extensibility option	Customization, modification, and extensibility possible
Innovation Cycle	Quarterly	Up to 2 upgrades a year	Annual; speed of adoption on customers' schedule
Deployment Benefits	Multi-tenant environment, Lowest TCO and fastest time to value	Single-tenant environment Low TCO and fast time to value	Customer controlled deployment and implementation efforts
Licensing	Subscription licensing	Subscription licensing	BYOL + infrastructure subscription
Infrastructure	Shared public cloud	Dedicated system landscape on cloud infrastructure	Customer specific system landscape Runs on SAP HANA Enterprise Cloud

SAP S/4HANA Cloud Licensing – Multi Tenant Edition

Details on Direct User Access to Digital Core

NEW as of
January
2019

SAP S/4HANA Cloud for advanced use

This license allows performing all role required operations including self-service configuration tasks.

SAP S/4HANA Cloud for core use

- External Processing
- Inspection Planning
- Inventory Analytics and Control
- Just-in-time Inbound Processing
- Kanban
- Maintenance Planning & Scheduling
- Product Development Foundation
- Production Control
- Production Execution
- Project Financial Control
- Quality Engineering
- Quality Improvement
- Quality Inspection
- Sales Order Management and Processing
- Service Order Management
- Subcontracting

+ capabilities of S/4HANA Cloud for self-service use

SAP S/4HANA Cloud for self-service use

- Available to Promise
- Delivery Management
- Goods Movement
- Maintenance Execution
- Material Requirements Planning
- Production Control
- Production Execution
- Self-Service Requisitioning
- Time Sheet
- Transportation Management
- Warehouse Management

SAP S/4HANA Cloud 1902 – User Capabilities for Multi Tenant Edition

Chapter 3, 4: scope of S/4HANA
LoB- and Industry Solutions

SAP S/4HANA Cloud Licensing

Licensing User Access to Digital Core via Full Usage Equivalents

NEW as of
January
2019

Full Usage Equivalents

- Full Usage Equivalent is a kind of **flexible user** and can be **used for all type of users**
- Different user types can be **converted with specific ratio** in FUE
- Concept of Full Usage Equivalents currently available for S/4HANA Cloud, single tenant edition
- SAP plans to extend this concept also to S/4HANA Cloud

S/4HANA Cloud user types

0,5	SAP Developer User
1	S/4HANA for advanced use
3	S/4HANA for core use
30	S/4HANA for self-service use

Example – how to use the FUE for different user types

40 Prof Users	= 40 FUE
75 Functional Users	= 25 FUE
270 Productivity Users	= 9 FUE

SUM	= 74 FUE

**NEW as of
January
2019**

Customers benefit from the FUE model

FUE can be seen as flexible users

By adding up all user types customers can reach a higher tier and a better price

Example:

2018 Licensing Model

License Material	# users	FUE ratio	# FUEs	Tier
S/4HANA Cloud Advanced Use	70	1:1	70	1
S/4HANA Cloud Core Use	210	1:3	70	2
S/4HANA Cloud Self-Serve Use	600	1:30	20	2

2019 Licensing Model

License Material	# FUEs	Tier
S/4HANA Cloud for Enterprise Management	160	2

Customer can re-allocate their users to avoid shelf-ware during their lifecycle

Example:

Before re-allocation

User type	# users	FUE ratio	# FUEs	Swap FUEs	Swap Users
Advanced Use	70	1:1	70	-10	-10
Core Use	210	1:3	70	+10	+30
Self-Serve Use	600	1:30	20		

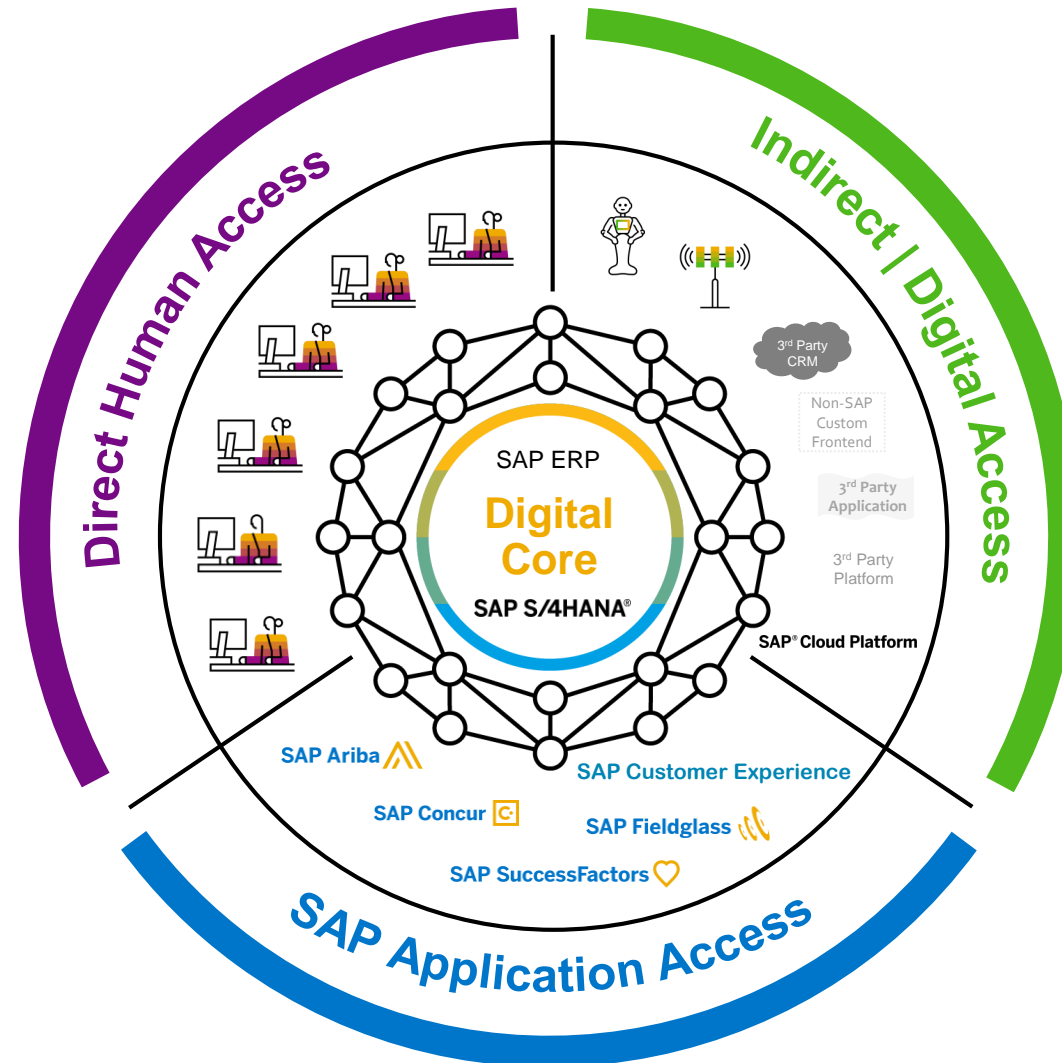

After re-allocation

User type	# users	FUE ratio	# FUEs
Advanced Use	60	1:1	60
Core Use	240	1:3	80
Self-Serve Use	600	1:30	20

Indirect Use / Digital Access

Use of ERP and types of access

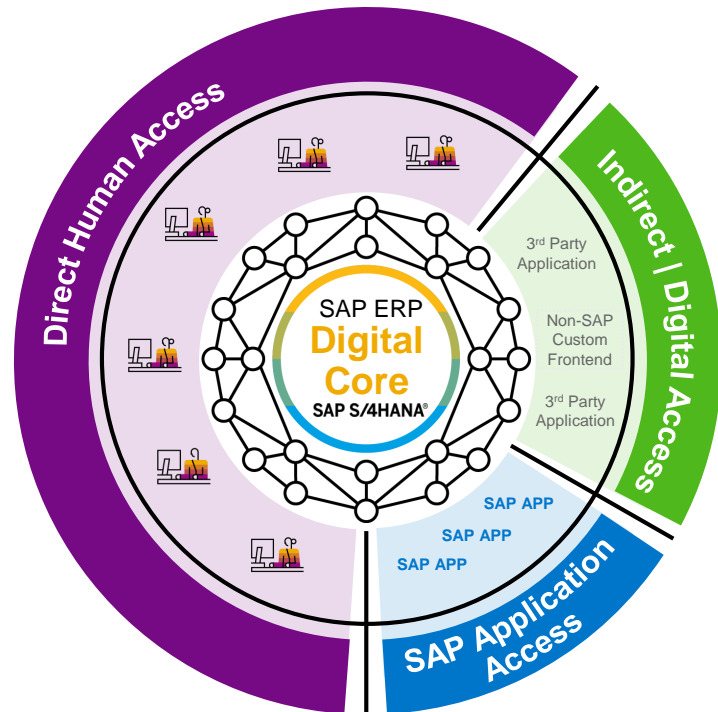

One definition of use and three types of access

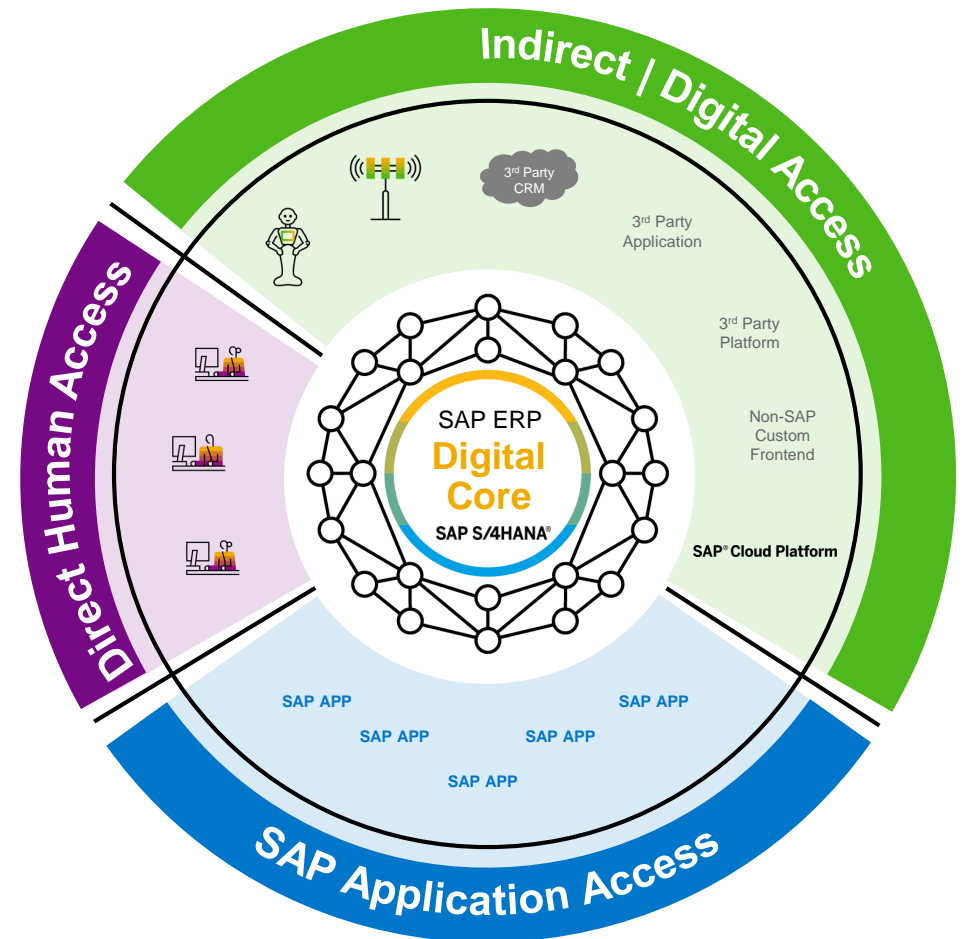

Technology landscape is evolving and so is the way customers access ERP

Indirect/Digital Access is growing due to proliferation of devices, machine learning, AI, etc.

ERP Use in 20th Century

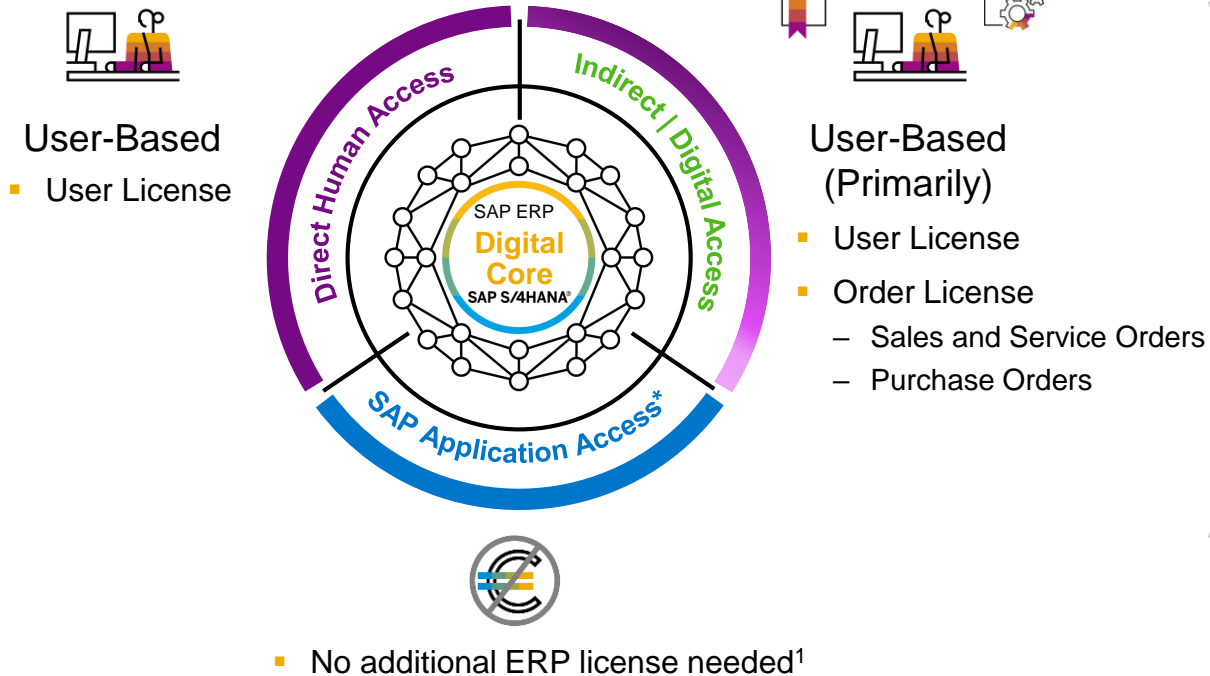

ERP Use in 21st Century

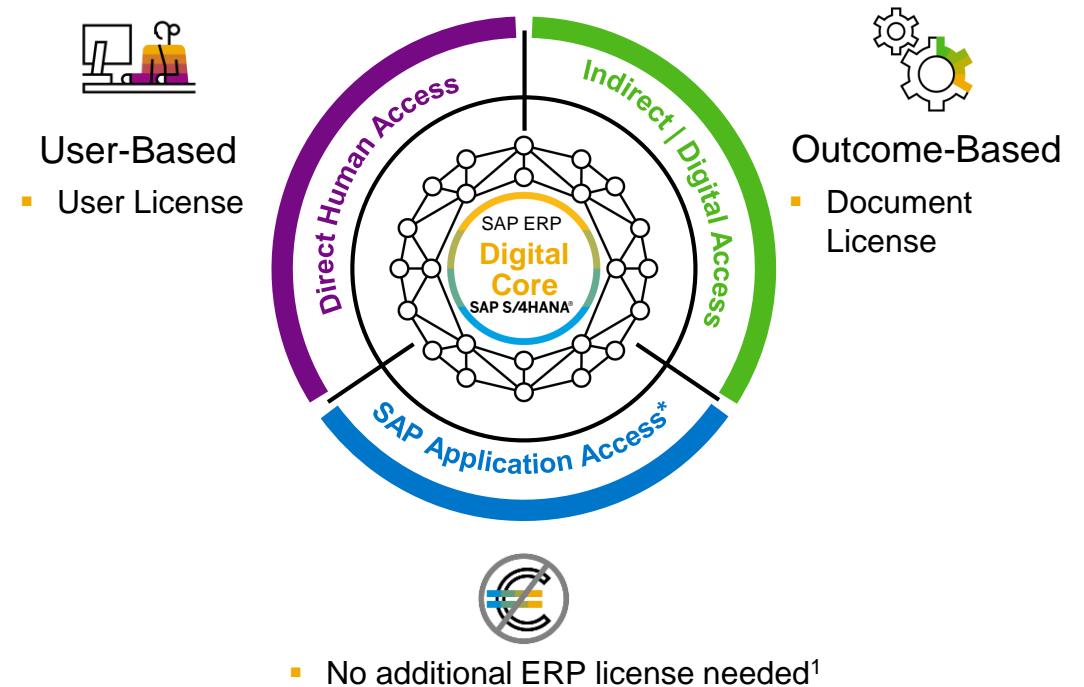

SAP is modernizing ERP pricing

Direct and SAP Application Access remains unchanged, new pricing model for Indirect/Digital Access

Legacy Model

New Model Available April 2018 Onwards

¹SAP applications refer to line of business and industry applications (cloud and on premise), as well as SAP Solution Extensions containing the required measurement functionality. This does not apply to technology solutions, such as platform, database, middleware integration and Enterprise Information Management. Provided ERP is otherwise licensed, no additional ERP User license is needed for use resulting from access by properly licensed SAP applications.

NEW Indirect | Digital Access Licensed Using Documents

Nine document types that represent system generated records and cover most valued outcomes from SAP ERP.

Document Types

- Sales Document (counted at line item level)
- Invoice Document (counted at line item level)
- Purchase Document (counted at line item level)
- Service & Maintenance Document
- Manufacturing Document
- Quality Management Document
- Time Management Document
- Financial Document (counted at line item level)
- Material Document (counted at line item level)

Multiplier

1.0

0.2

License Calculation

License calculation based on **initial Document created**
Read, Update, or Delete Documents are not counted

$$(\text{Document (\#)} * \text{Multiplier}) + \dots + (\text{Document (\#)} * \text{Multiplier})$$

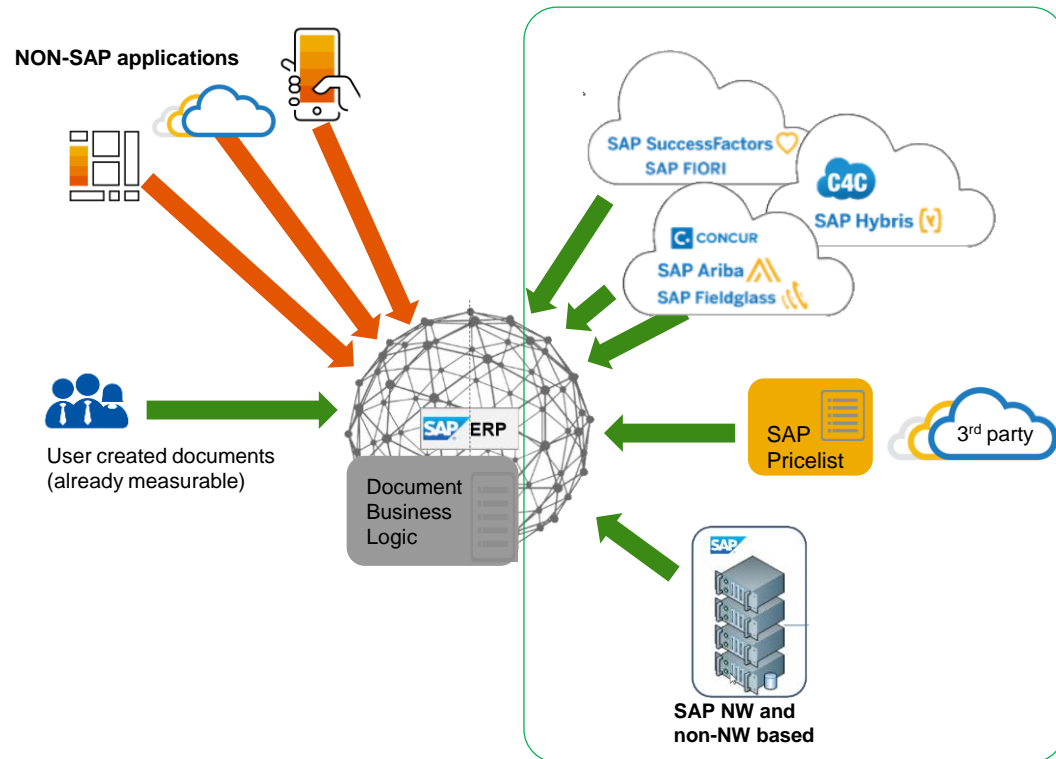

Where (#) is the Document Type from 1-9

Nine documents types cover most valued outcomes from SAP ERP

Document Type	Document Item	Remark
1	Sales Document	Sales Order Line Item Sales Contract Line Item Sales Quote Line Item Sales Scheduling Agreement Releases
2	Purchase Document	Purchase Order Line Item Purchase Requisition Line Item Purchase Scheduling Agreement Releases
3	Invoice Document	Billing Document Line Item Billing Document Request Line Item Supplier Invoice Line Item S/4HANA Cloud and S/4HANA On Premise only, ECC not applicable
4	Manufacturing Document	Production Order Process Order Repetitive Manufacturing Confirmation
5	Material Document	Material Document Line Item
6	Quality Management Document	Defect Quality Notification Inspection Result Inspection Point Result S/4HANA Cloud and S/4HANA On Premise only, ECC not applicable
7	Service & Maintenance Document	Maintenance Order Maintenance Notification Maintenance Confirmation Service Order Service Notification Service Confirmation Warranty Claim
8	Financial Document	Financial Document Item S/4HANA and ECC implementation different due to different data model
9	Time Management Document	Time Sheet Record Time Management Record S/4HANA On Premise and ECC only. S/4HANA Cloud not applicable Time Management Record includes Remuneration, Absence, Attendance, Substitution

Digital Access – Measurability and Audit

Brief Recap of Technical Approach

Built-in Functionality

- Technical identifier („SAP Passport“) is sent to distinguish calls from SAP and non-SAP sender applications
- Within Digital Core (both S/4H and legacy ECC) call is logged and documents are counted in case technical identifier is missing

Estimation Note

- Estimation based on how documents have been entered into the system (via technical users)
- In cases of doubt, results will lean higher versus lower to avoid being misleadingly optimistic

Digital Access – Measurability & Audit

Readiness Status for Built-in Functionality

Measurability Functionality Available			Measurability Functionality planned for Q1/2019

Description Software Components Attributes Languages

Symptom

From User to Usage Based Pricing – SAP's New Pricing Approach for Digital and Indirect Access

SAP's initial ERP pricing model was designed in the 20th century and counted customer employees logging directly into the SAP ERP to use it. Hence, the pricing model was based on users accessing the SAP ERP system and required identification and licensing of every individual using the software as a user.

During the past 20-plus years, the technology landscape and the methods how customers are using SAP software has changed dramatically. SAP ERP software (both legacy SAP ERP and SAP S/4HANA) has established itself as the Digital Core.

Not only are our customers' employees using the Digital Core, but business partners, consumers, third-party applications, IoT devices, automated systems, and bots are also accessing the Digital Core.

With the Digital Access Licensing Model, SAP has created an answer to tackle aforementioned challenges.

This note summarizes the technical prerequisites for on-premise solutions to enable measurability for Digital Access. SAP's cloud solutions have been enabled via the regular cloud maintenance activities.

Other Terms

Digital Access; DA; Indirect Use

Solution

The following list summarizes the technical requirements for SAP's on-premise solutions:

On-premise Solution	Needed SP/FP/Note
S/4H OP 1809 and above	no additional SP
S/4H OP 1709	SP03
S/4H OP 1610	SP05
S/4H OP 1511	SP07
ECC 6.0 EhP 8	SP11
ECC 6.0 EhP 7	SP17

SAP Application Access

SAP Application Access: Summary of Key Points

SAP Application Access occurs when humans, devices or RPA/bots use the Digital Core via another licensed SAP application.

SAP Application Access does not require any additional ERP licenses provided (1) ERP is otherwise licensed, and (2) use of ERP results from access by properly licensed SAP applications.

“**SAP applications**” refers to line of business and industry applications (**cloud and on premise**), as well as SAP Solution Extensions. This **does not** apply to technology solutions such as platform (e.g., **SAP Cloud Platform**), database, middleware integration (e.g., **XI, PI, PO**) and Enterprise Information Management.

Value of SAP Indirect / Digital Access Outcome Based Pricing

Value based – pay for system activity

Eliminates the need to count “users” accessing ERP, addresses concerns around IOT (devices, bots, etc.)

Outcome Focused

9 Document types address most valuable business outcomes
No additional charge for other document types

Transparent

Counts creation of documents by Indirect/Digital Access

- Cost for read, update, and delete actions via Indirect/Digital Access included in creation
- Subsequent document types created, as a result of the automatic processing of the original document created via Indirect/Digital Access, are not counted

Flexible - Interchangeable Document Capacity

Counts total documents created - regardless of type

Built-in volume discounts

Tiered pricing – the more you buy, the less you pay per unit

Measurable

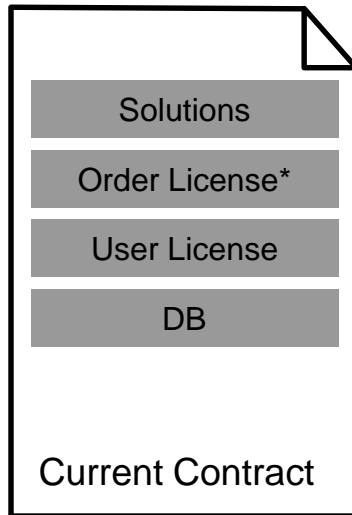

Entitlement to consumption dashboard planned

Options for existing SAP ERP customers

Status Quo – Do Nothing

For customers happy with their contract and who do not want to change

Option 1

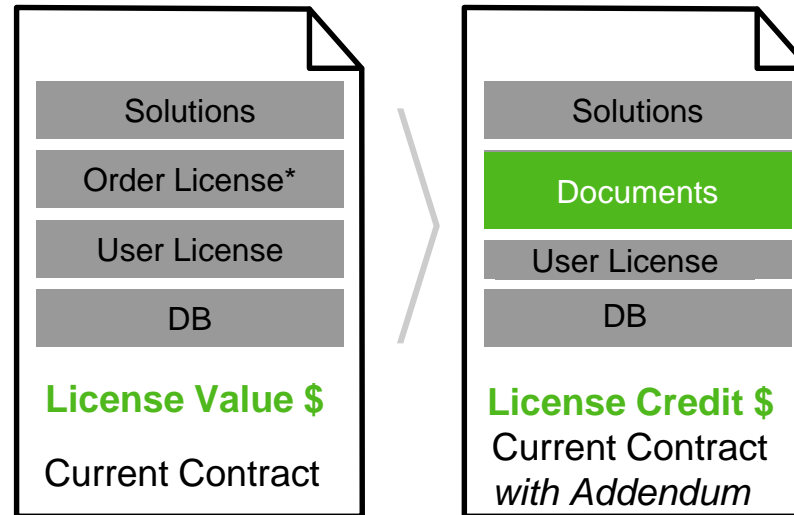

- Continue with current contract. No change.
- Continue to use User and Order* Licenses for all types of use and access
- SAP will waive back-maintenance for indirect access to SAP software for customers who proactively engage with us in good faith

License Exchange

For customers wanting improved transparency for Indirect/Digital access & remain in existing contract

Option 2

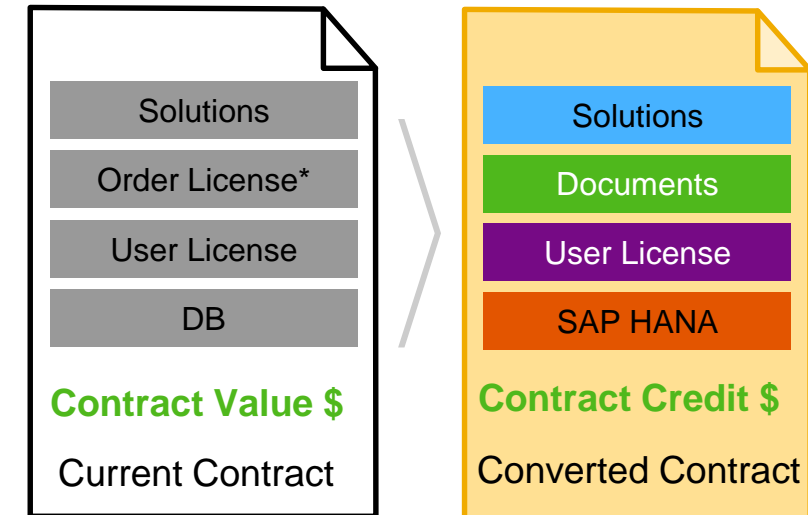

- Continue with current contract with addendum
- Up to 100% credit for User and/or Order license value** applied to new Document license value
- 100% of the maintenance base of the converting licenses is carried forward.
- SAP will waive back-maintenance for indirect access to SAP software for customers who proactively engage with us in good faith

Contract Conversion

For customers licensing SAP S/4HANA and wanting to consolidate / simplify old contracts

Option 3

- Replace current BOM with new BOM that includes a simplified licensing structure
- Opportunity to reconfigure solution landscape (new bill of material)
- Up to 100% credit for old contract value** applied to new S/4HANA contract value
- 100% of the maintenance base of the converting licenses is carried forward
- SAP will waive back-maintenance for indirect access to SAP software for customers who proactively engage with us in good faith

*Sales & Service Order Processing/Execution and Purchase Order Processing/Execution; ** Conditions apply

Nine documents types cover most valued outcomes from SAP ERP

Document Type	Description
Sales Document (counted at line item level)	A record that represents the material or service being sold or quoted (e.g., sales order line item, sales quote line item or a sales scheduling agreement release).
Invoice Document (counted at line item level)	A record that represents the material or service being billed (e.g., billing document line item or supplier invoice line item).
Purchase Document (counted at line item level)	A record that represents the material or service being ordered or requested (e.g., purchase order line item, purchase requisition line item or a purchase scheduling agreement release).
Service & Maintenance Document	A record that represents the details of work to be performed, a reported problem or the status of processing, (e.g., service or maintenance order/notification) or a record that represents a claim (e.g., warranty claim).
Manufacturing Document	A record which represents the production-related details associated with manufacturing (e.g., production or process order or a manufacturing confirmation).
Quality Management Document	A record that represents the details of a nonconformance (e.g., defect or quality notification) or the results of an inspection (e.g., inspection result).
Time Management Document	A record that represents an employee's time worked (e.g., time sheet record)
Financial Document (counted at line item level)	A record that represents accounting information in a financial journal (e.g., journal entry line item).
Material Document (counted at line item level)	A record that represents a specific material being received, issued or transferred to, from or within a storage location or plant (e.g., material document line item).
