

About the Speakers

Jeff Stenger

- Corporate Controller, Shepherd Chemical
- 24 years at Shepherd Chemical
- Father of 5, Grandfather of 2, so far

Brian Everett

- Industry Solution Principal, itelligence
- 19 years at itelligence, 23 in SAP ecosystem
- Industry business development and sales support, North America
- Avid sports fan and musician

CISUG

Agenda

- Industry Perspectives and Challenges
- Shepherd Chemical Company Spotlight
 - Overview and Company Heritage
 - Moving to the intelligent enterprise
 - Lessons learned
- Open Discussion/Questions

Key Outcomes/Objectives

- 1. <u>Understand</u> Impacts of Digital Transformation and the Intelligent Enterprise
- 2. <u>Learn</u> approaches on how to embark on evaluating and deploying SAP's Intelligent Enterprise Platform
- 3. <u>Enable</u> your organizations to transform and be successful in the future

Industry Perspectives

The World In Which We Live – Early 2019

Last 2 years	Per Day	Per Minute
90% 6	2.5 quintillion	16 million
Of the world's data has been generated	Bytes of data are generated every day	Text messages per minute and 456,000 tweets per minute
In 2018	End of 2020	By 2020
33 million	212 billion	9 billion
Of voice-first devices in circulation	"Things" will be connected	Mobile users in the world

S/4HANA – Migration Scenarios

Why Move to SAP S/4HANA Now?

SAP Client Distribution Business Results

Higher Sales Achievement Real time access to sales and pipeline data

Higher Capacity Utilization Due to better allocation of equipment, machinery, and tools

Lower Supply Chain Planning Due to 'what-if' modeling capabilities

Greater Precision Better Visibility into KPIs Gartner Advice Oct 2018

Shepherd Chemical Spotlight

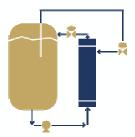

Shepherd Chemical Overview

- Focused on metal-based chemistries serving a variety of industries (chemical, automotive, oil and gas, consumer products, etc.)
- 45% of the portfolio co-developed and custom products
- 8 of the top 10 chemical companies are Shepherd customers
- Multi-divisional
 - Chemical division
 - Color/pigments division
 - Glass coatings division
- Global company

Why Shepherd Chemical?

*

Operational Excellence Custom Co-Development

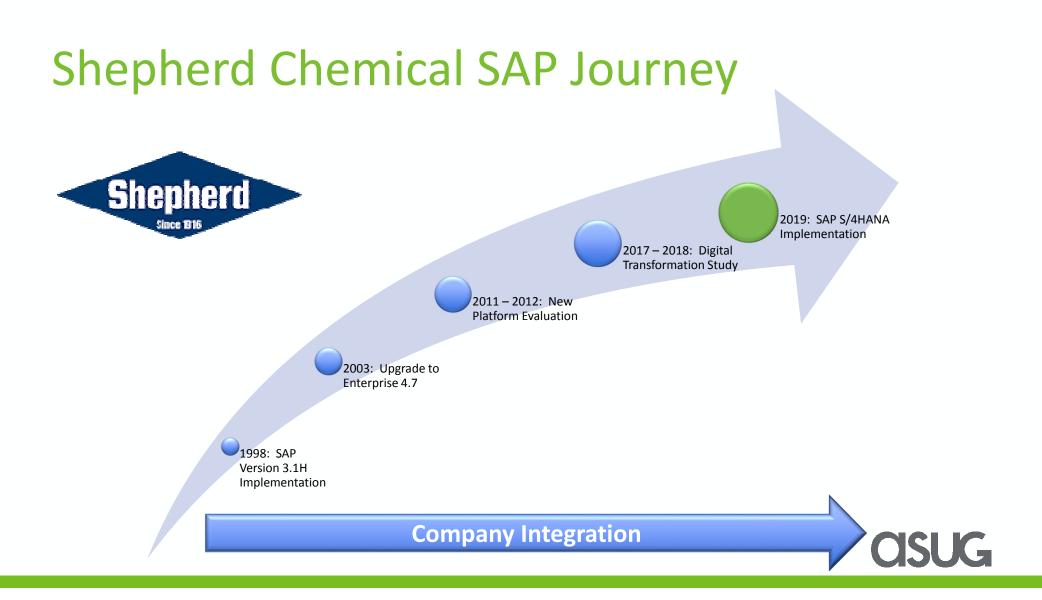

Multi-National

Customer Experience

Approach Toward Solution Evaluation

Best Value Strategy

Create value by continually increasing the spread between the benefit we deliver and the cost of doing so

Value = f (Benefit – Cost)

Current Project and Roadmap

We have decided to implement SAP S/4HANA as our Shepherd Group ERP solution.

And...

Our approach will be to use SAP's best practices and not introduce customizations to the base software.

Program Critical Success Factors

Why a single ERP?

- The cost to maintain two ERPs is much higher than maintaining one.
 i.e. Licenses, upgrades, hosting, resources, training
- Collaboration across the group in areas such as Supply Chain and Purchasing offer great value creating opportunities with a single ERP platform.

Why SAP?

- SAP is the chemical industry leader for ERPs and their software utilizes best practices for businesses.
- Capabilities of the newest version of SAP (S4/HANA), that Chemical, Color and Glass Coatings & Concepts will move to, offer much greater benefit than other ERP options or older SAP versions.

Why now?

- Continuity of resources both Shepherd and SAP (itelligence).
- We can quickly leverage the learning from The Chemical implementation
- We are dependent on the ERP platform for many other technical solutions we are currently working on (supply chain, inventory management).
- The sooner we are on a common platform the quicker we can leverage one ERP and realize the benefits

Lessons Learned

Why default to "out of the box" best practices rather than conforming SAP to how we work?

- It is costly to install and maintain customizations.
- We have discovered that the costs to implement and manage customizations outweigh the benefit we gain.

Why is it better for Color to switch to SAP rather than Chemical implementing Color's solution?

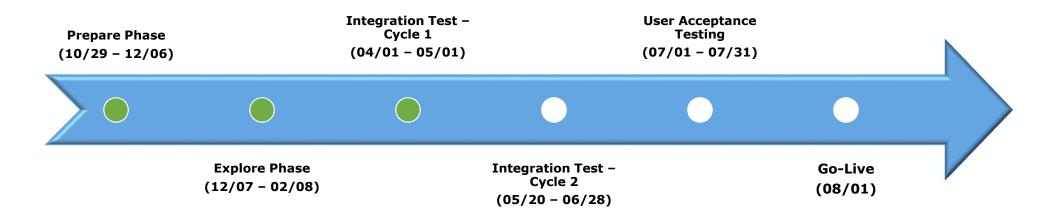

- SAP, especially with their latest version, are clearly the industry leader and have the best practices in the chemical industry.
- Much of the "heavy" implementation work will be completed during the Chemical install, and the Color and Glass Coatings teams will have as much visibility into their work as possible.
- Chemical business process owners and subject matter experts will provide valuable assistance to their Shepherd Color and Glass Coatings & Concepts peers during their respective installations.

SAP Activate Deployment Approach
