# Power of Blockchain: Solving Complex Business Problems

Nitin Singh, Pravin Lewis  
Session ID 84432

# About the Speakers

## Pravin Lewis

Director, Business Transformation Services

Led large transformations at strategic customers across the globe. Deep solution and process expertise across supply chain disciplines ranging from planning, order management, manufacturing, logistics execution and distribution

### Fun fact:

Long time Ballroom dancer (smooth and rhythm). Regularly participate at various competitions around the US

## Nitin Singh

Enterprise Architect & Practice Lead-Innovations,  
Business Transformation Services

Enterprise architect and Practice Lead for Intelligent Enterprise Innovations at Business Transformation Services, Expert in planning & executing complex transformations and passionate about Innovations

### Fun fact:

Loves to travel ( completed 25+) & hopes to cover 50 countries before retirement

## Take aways

- ❑ Discuss Relevance of Blockchain for Enterprises
- ❑ Understand Potential of Blockchain for business optimization
- ❑ Demonstrate blockchain use cases
- ❑ Listen to your needs!

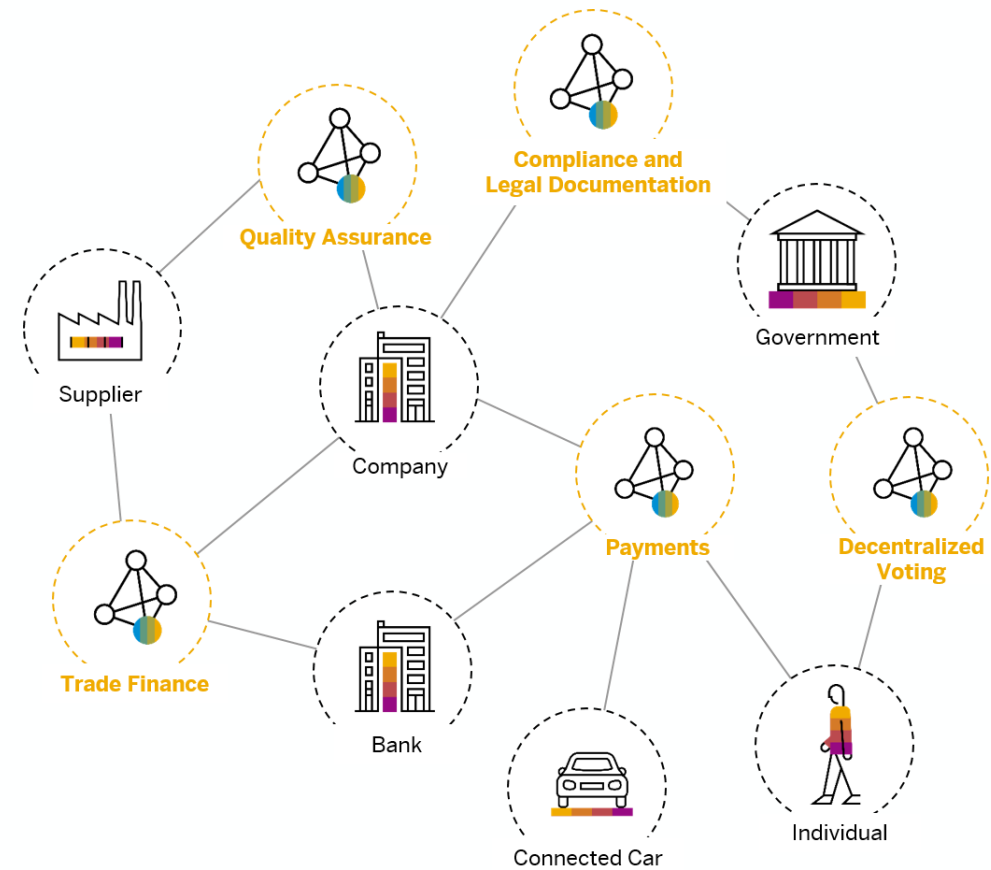

# Agenda

- ❑ Enterprise Blockchain
- ❑ Blockchain use cases
- ❑ Retail Authenticity Demo
- ❑ Blockchain as an enabler for Business Model Innovations
- ❑ Business Model Impact: Retail Authenticity
- ❑ Example Blockchain use cases
  - ❑ Sellable Traceability
  - ❑ Farm to Consume
- ❑ Blockchain Trends
- ❑ Future of Blockchain- IoT-Blockchain Integrations
- ❑ Conclusion

# Enterprise Blockchain

Blockchain is a new protocol for **decentral ledgers** in multi-party business processes.

- ✓ **Business network**
- ✓ **Decentral control**
- ✓ **Immutable audit log + some shared data**
- ✓ **Trust and Transparency**

# Blockchain Use Cases

Across different LoBs and Industries

**Secured Authorization  
Procedures in Public Sector**

**e-Bill of Lading**

**Asset Management  
(Digital Twin)**

**Distributed  
Manufacturing  
(3D-printing)**

**Trusted Digital Credentials**

**Secure Bidding in  
Procurement**

**Guarantee Network**

**Real-Time Payments**

**Drug Supply Chain  
Security**

**Disaster Operations**

# Retail Authenticity Demo

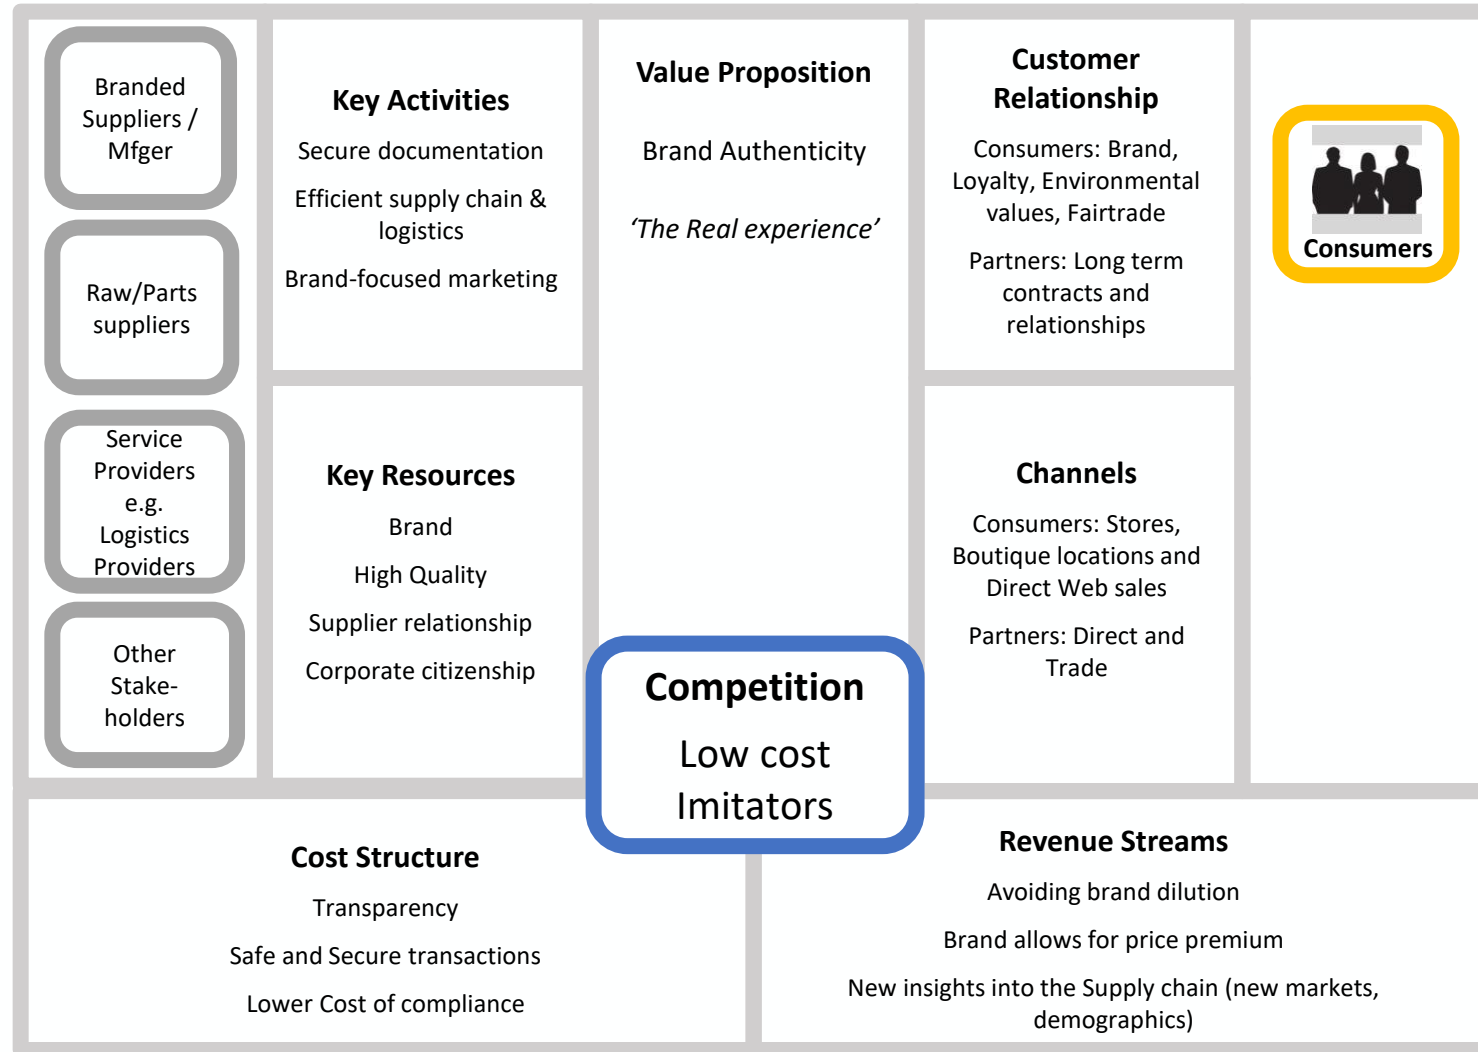

# Business Model Impact :Retail Authenticity

## Challenge - Brand Erosion

Changing the way we interact with our partners and customers!

Less cost in tracing a Supply Chain Issue

Lost Revenue  
Legal Implications & Cost

Trusted relationships with customers and Partners on a digitized platform  
Additional Digital Channel for Authentication

Trust ensures additional Brand Value and the revenue!

■ My Company   
 ■ My Customers   
 ■ My Partners   
 ■ My Competition

# Identification & Verification of Sellable Returns

## Purpose

Help secure the health of patients by fighting fraudulent activities

## Legal requirement

Drug Supply Chain Security Act demands companies to both identify and verify sellable returns

## Business Challenge

2-3% of total sales are sellable returns (58.7 million units a year)

### SAP Advanced Track & Trace for Pharmaceuticals

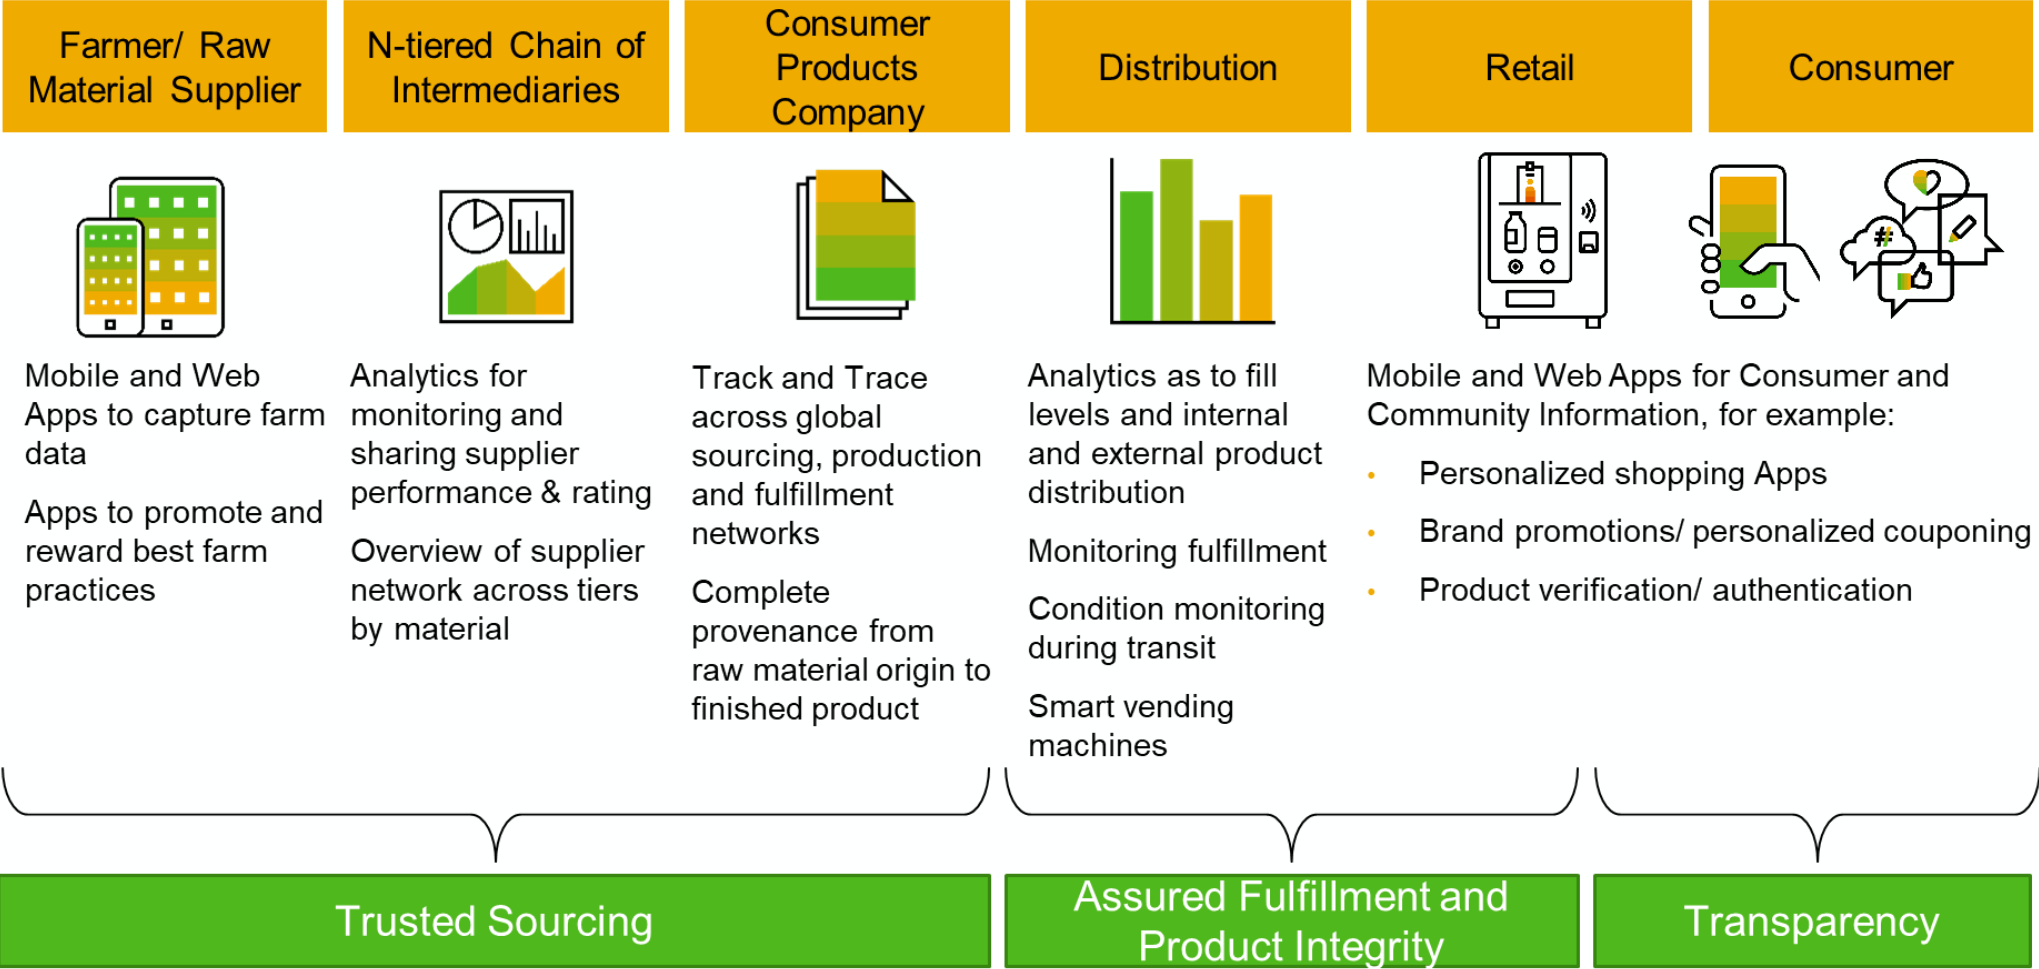

### Scanning System

ASUG

# Farm to Consumer

## End-to-end blockchain-based traceability solution for the agri-food

# Blockchain Trends

- ❑ Decentralized Apps ( DApps): Applications that can interact with underlying blockchain! Focus on personalized Job to be done based on underlying chain of blocks
- ❑ Hybrid Blockchains
- ❑ Off chain calculations: Limit of number of transactions per second
- ❑ Authencity of a product: Food, Pharma, Retail, Art
- ❑ Supply Chain Traceability, Pharma, Food, Shipping, Transportation

# Future Innovations: IOT- Blockchain integration

- ❑ Blockchain would transform the way in which enterprises interact with each other or with customers/ consumers for business operations
- ❑ IoT is a great enabler to provide real time data or insight which can lead to more efficient collaborative business processes
- ❑ Visualize a totally connected world with trust!
- ❑ \*Use of blockchain technology to secure data and devices in the internet of things (IoT) doubled during 2018

\*<https://www.gemalto.com/press/Pages/Almost-half-of-companies-still-can-t-detect-IoT-device-breaches-reveals-Gemalto-study.aspx>

## Key challenges

- ❑ whether or not data is relevant/ trustworthy
- ❑ Whether or not data is secure

## Blockchain can improve upon these aspects by enabling trust with IoT communications

- ❑ HDAC IoT Contract & M2M transaction platform based on blockchain
- ❑ Traceability applications can hugely benefit with this interaction

# Conclusion

- ❑ Blockchain has the potential to solve some key business problems , however select the use cases wisely- its not a panacea for all ills!
- ❑ Technology will mature immensely in the year ahead! Ideate today to understand what can it do for you!
- ❑ It's a key focus area for SAP and you will see continuous innovations in coming months , please do leverage them!

# Thank you

**Pravin Lewis**

Director, Business Transformation Services

**Nitin Singh**

[Ni.Singh@sap.com](mailto:Ni.Singh@sap.com)

Enterprise Architect & Practice Lead-Innovations,  
Business Transformation Services

# Take the Session Survey.

We want to hear from you! Be sure to complete the session evaluation on the SAPPHIRE NOW and ASUG Annual Conference mobile app.

# Presentation Materials

Access the slides from 2019 ASUG Annual Conference here:

<http://info.asug.com/2019-ac-slides>

# Q&A

For questions after this session, contact us at  
[Ni.Singh@sap.com](mailto:Ni.Singh@sap.com), [Pravin.Lewis@sap.com](mailto:Pravin.Lewis@sap.com)

# Let's Be Social.

Stay connected. Share your SAP experiences anytime, anywhere.

Join the ASUG conversation on social media: **@ASUG365 #ASUG**

# Appendix ( Extra Optional slides)

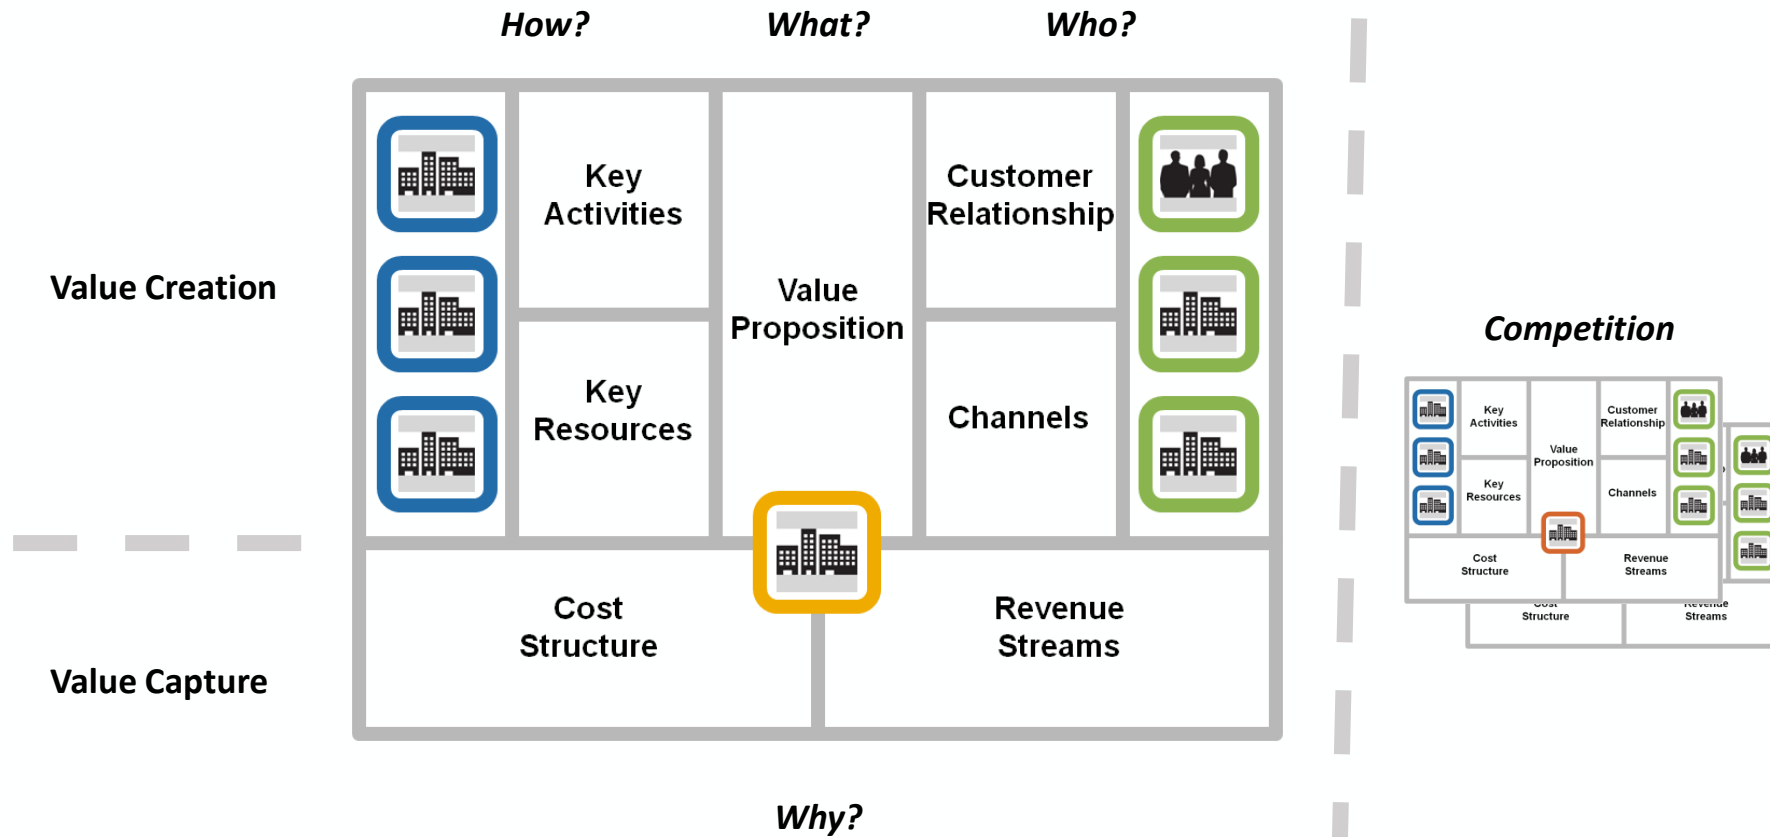

# What is Blockchain?

- **Composition of Existing Technologies**
  - Decentralized peer-to-peer technology
  - Private / Public key cryptography + hashing algorithms
  - Consensus algorithm
- **Shared Information Storage**
  - Distributed
  - Transparent
  - Immutable

Cryptographically Linked Blocks

# Blockchain as an enabler for Business Model Innovation

**DESIGNED BY:** Business Model Foundry AG  
*The makers of Business Model Generation and Strategyzer*

■ My Company   ■ My Customers   ■ My Partners   ■ My Competition

# Example Business problems blockchain can potentially solve

- ❑ Sellable traceability is a legal requirements impacting about 2 % of total volume
- ❑ Counterfeit products exist the supply chain resulting into lost revenue
- ❑ Pharma products authenticity: Adverse impact to individual health and brand erosion
- ❑ Inefficient communications with the supply chain participants
- ❑ Lack of trust & transparency on multi party transactions

Data Integrity

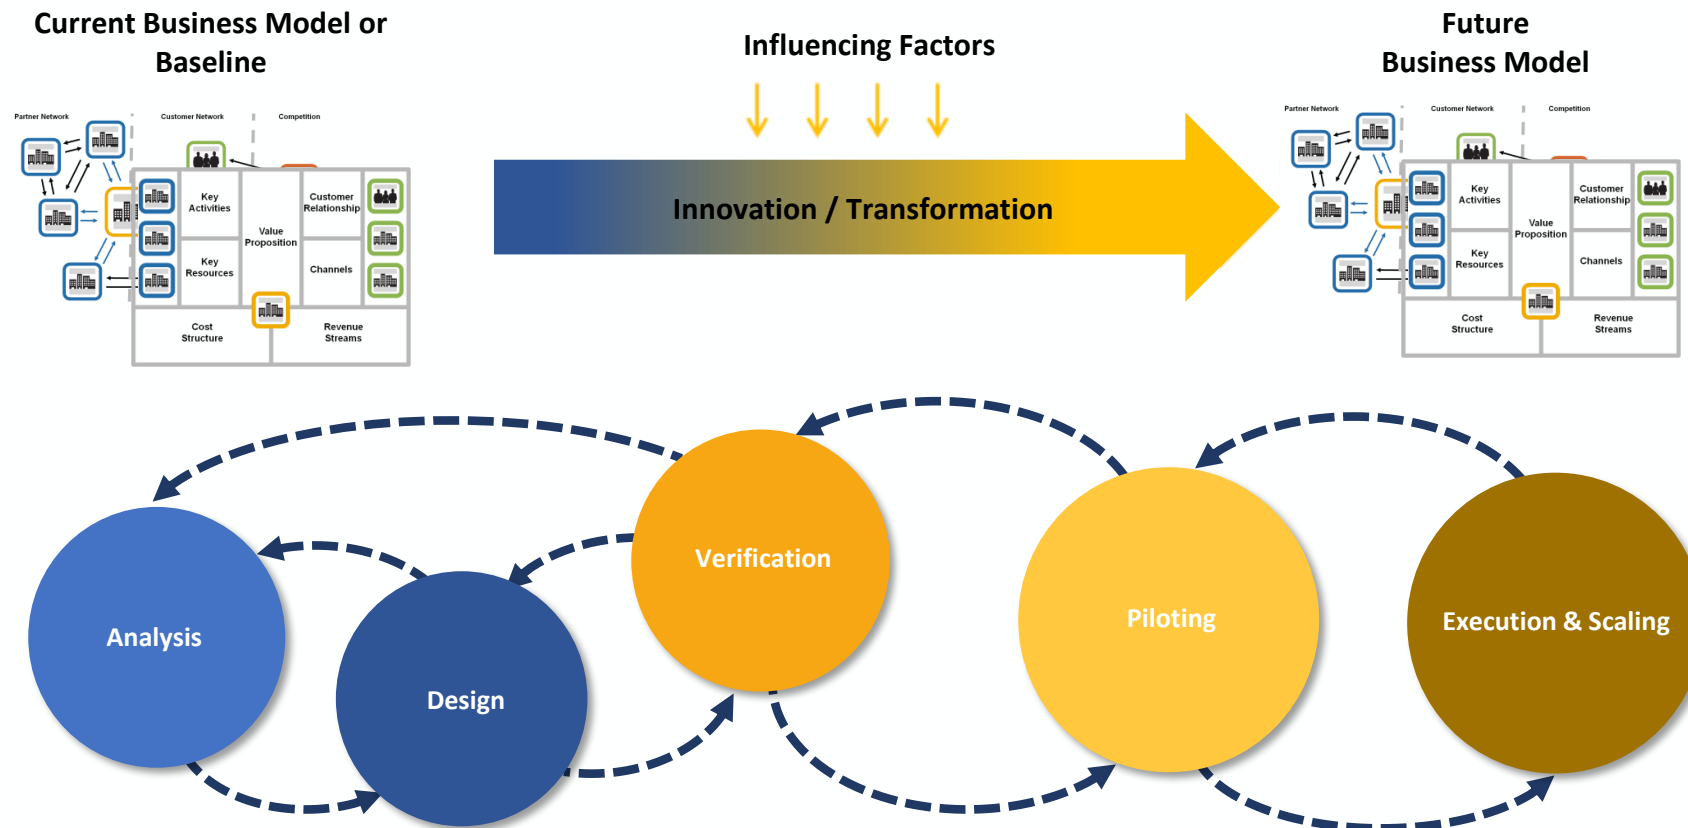

Multi-Party  
Collaboration

Digital Assets

# Business Model Development & Innovation

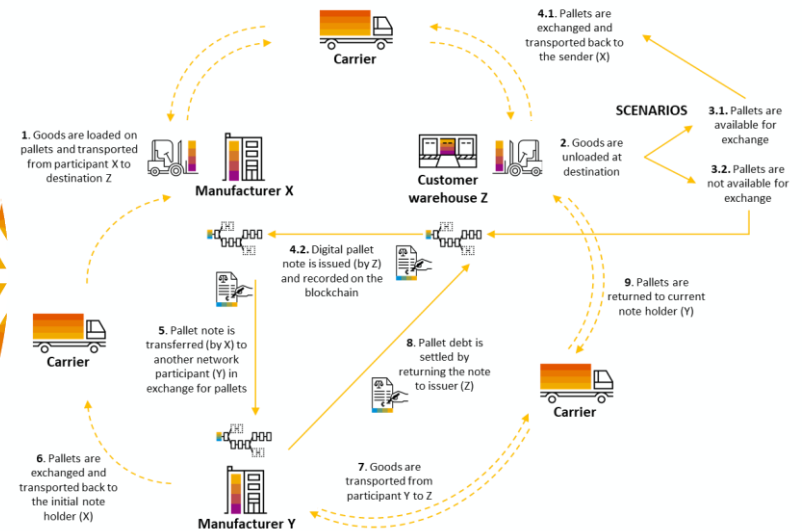

An iterative process resulting in a suitable business model adding economic value to the company.

# Programmable Economy: Blockchain Powered Network of Networks

Bank

# Supply Chain Provenance: POC application example
