

BC Hydro

Platform Approach to Mobility

Mike Seblani
Manager, Enterprise Analytics, Mobility and
Integration

March 7, 2024

Our integrated system

- Hydro Dam and Generating Station
- Hydro Dam - no Generating Station
- ▲ Thermal Generating Station
- ◇ Diesel Generating station
- 230 kV Substation
- 287 kV Substation
- 500 kV Substation
- 500 kV Bulk System Transmission Line
- 287 kV Bulk System Transmission Line
- 230 kV Bulk System Transmission Line

30
Hydro
Plants

Over 300

substations

BC Hydro has a network of approximately **80,000 kms** of transmission & distribution lines

Powering a cleaner more sustainable future for all British Columbians

BC Hydro's Five-Year Strategy

Fiscal years 2022—2026

Recruit, administer employees

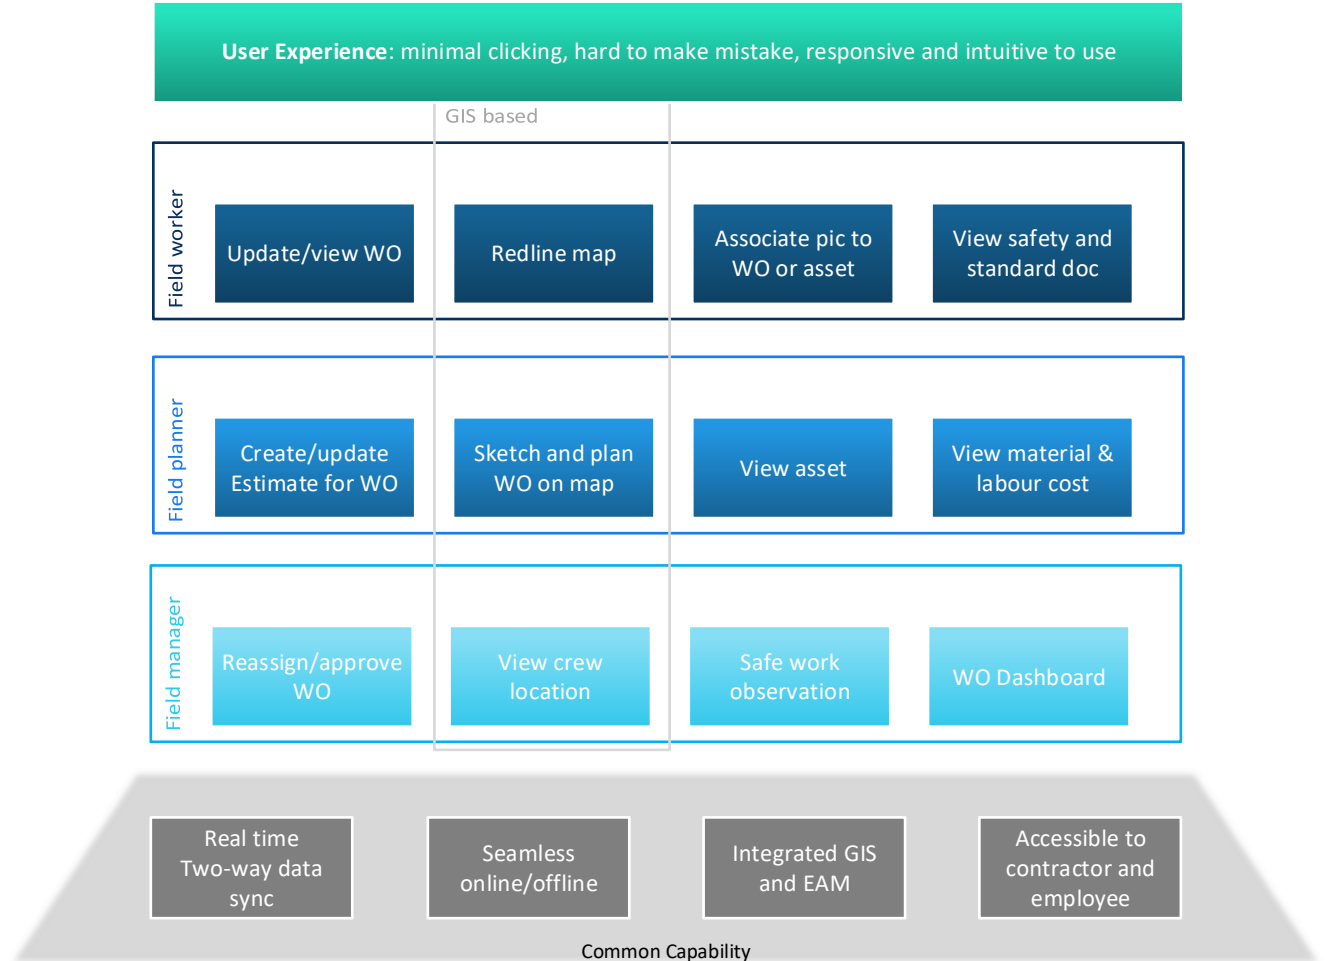

~ 3600 BW Users

Report and Analyze Business Information

Principles

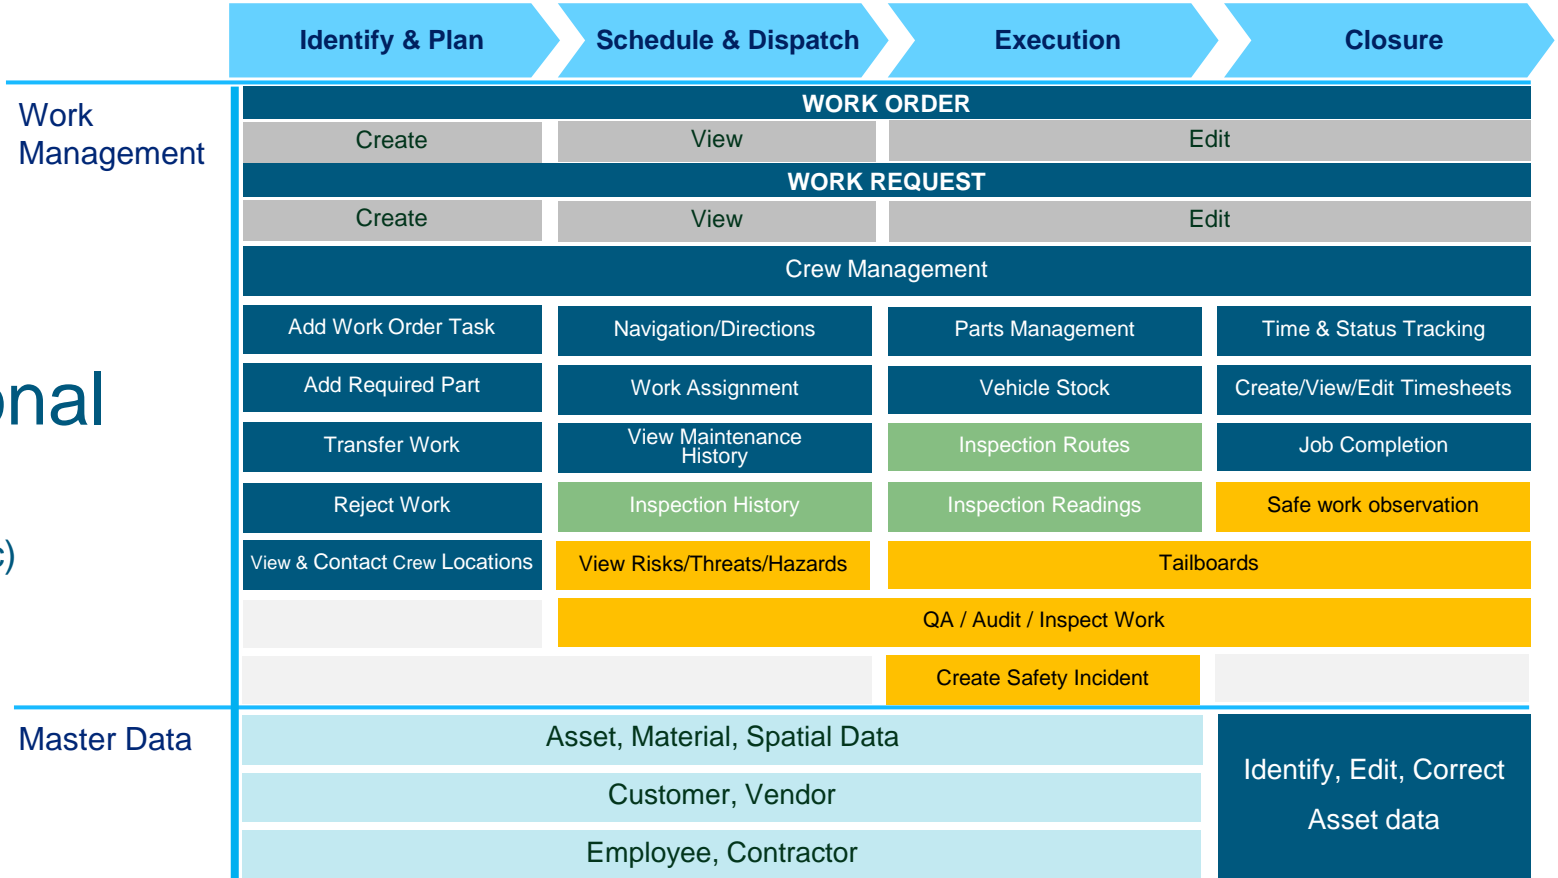

1. Ease of use for field workers
2. **Consolidated platform** addressing critical business needs
3. Platform and **vendor maturity**
4. Efficiency of Technology **integration with SAP**
5. Cross-functional **GIS compatibility**
6. Home grown mobile apps and other inspection solutions replaced with a **Commercial Off-The-Shelf (COTS)** evolving solution
7. Robust **security**
8. **Flexible** and **scalable**
9. **Cross-Platform** (mobile, tablet, desktop web)
10. **Easy to customize** and tailor to different business group's requirements
11. Modernized architecture promoting **mobile shared services** (composable services packaged into targeted mobile experiences)

What does success look like for field users?

DATA

Mobile Services, Service and Asset Manager, Mirata and Locana Limur

- Different user workflows (e.g., Field Technician, Safety Technician, Inventory Clerk, Supervisor)
- Different types of work orders (e.g., restoration, inspection, damage assessment)
- Integrated or standalone compliance, QA and safety Inspections
- Different types of labour (e.g., contractor, employee)
- Ability to enable seamless online/offline work
- Advanced GIS capabilities
- Modern open architecture allowing integration beyond SAP and GIS systems using BTP
