Abbott Material ledger implementation –  
to meet complex accounting requirement  
Beth Ann Chudy  
Sai Nalagandla

Session ID # 83538

# About the Speakers:

## **Beth Ann Chudy**

Sr. Functional Process Manager Finance  
BTS Business Solutions & Services  
Abbott  
28 years in Finance and IT

## **Sai Nalagandla**

Sr. Finance IT Lead  
BTS Business Solutions & Services  
Abbott  
15 years in Finance and IT

# DIVERSE BUSINESSES

## Nutrition

Nourishing bodies at every stage of life

## Medical Devices

Life-changing technologies in cardiovascular, diabetes and neuromodulation care

## Established Pharmaceuticals

Delivering high-quality, trusted medicines to help people get and stay healthy

## Diagnostics

Providing accurate, timely information to better manage health

*life. to the fullest.*

# Session Abstract

- By partnering with SAP to implement material ledger functionality, Abbott was able to manage business complexity and support continuity.
- Use of parallel valuations by material enables efficiency, consistency, enhanced control procedures and analytical capabilities in Russia implementation.

# Key Outcomes and Objectives

1. Utilize parallel valuation and material ledger to meet local legal requirements and Abbott Performance requirements
2. Evaluate the influence of Legacy processes on SAP enterprise design
3. Optimize reporting/reconciliation through use of SAP Material Ledger BOBJ reports

# What is Material Ledger?

## Material Ledger Definition:

- Submodule of Controlling
- Subsidiary ledger for materials
- Two Key Functions:
  - Multiple Valuation:
    - Enable material movement valuation in three currencies
    - Standard price in three currencies
  - Actual Costing:
    - Cost absorption at the individual material level
    - Variances to standard are allocated to cost of product (amortization) or inventory (deferral)

# Inventory Valuation

## Materials

- Valuated annually
- Standard price

## Currency Types (Valuations)

- Legal cost @ local currency
- Legal cost @ USD (Plan rate)
- Group cost @ USD  
(Net consolidated cost)

**Display Material 7-200288-01 (ABT - Spare Parts)**

Additional Data   Org. Levels

Quality management   Accounting 1   Accounting 2   Costing 1

Material: 7-200288-01   RAIN REPAIR KIT  
Plant: 1531   Wiesbaden Mfg & Commercial

Period 004/2016   Period 003/2016   Period 012/2015   Future costing run

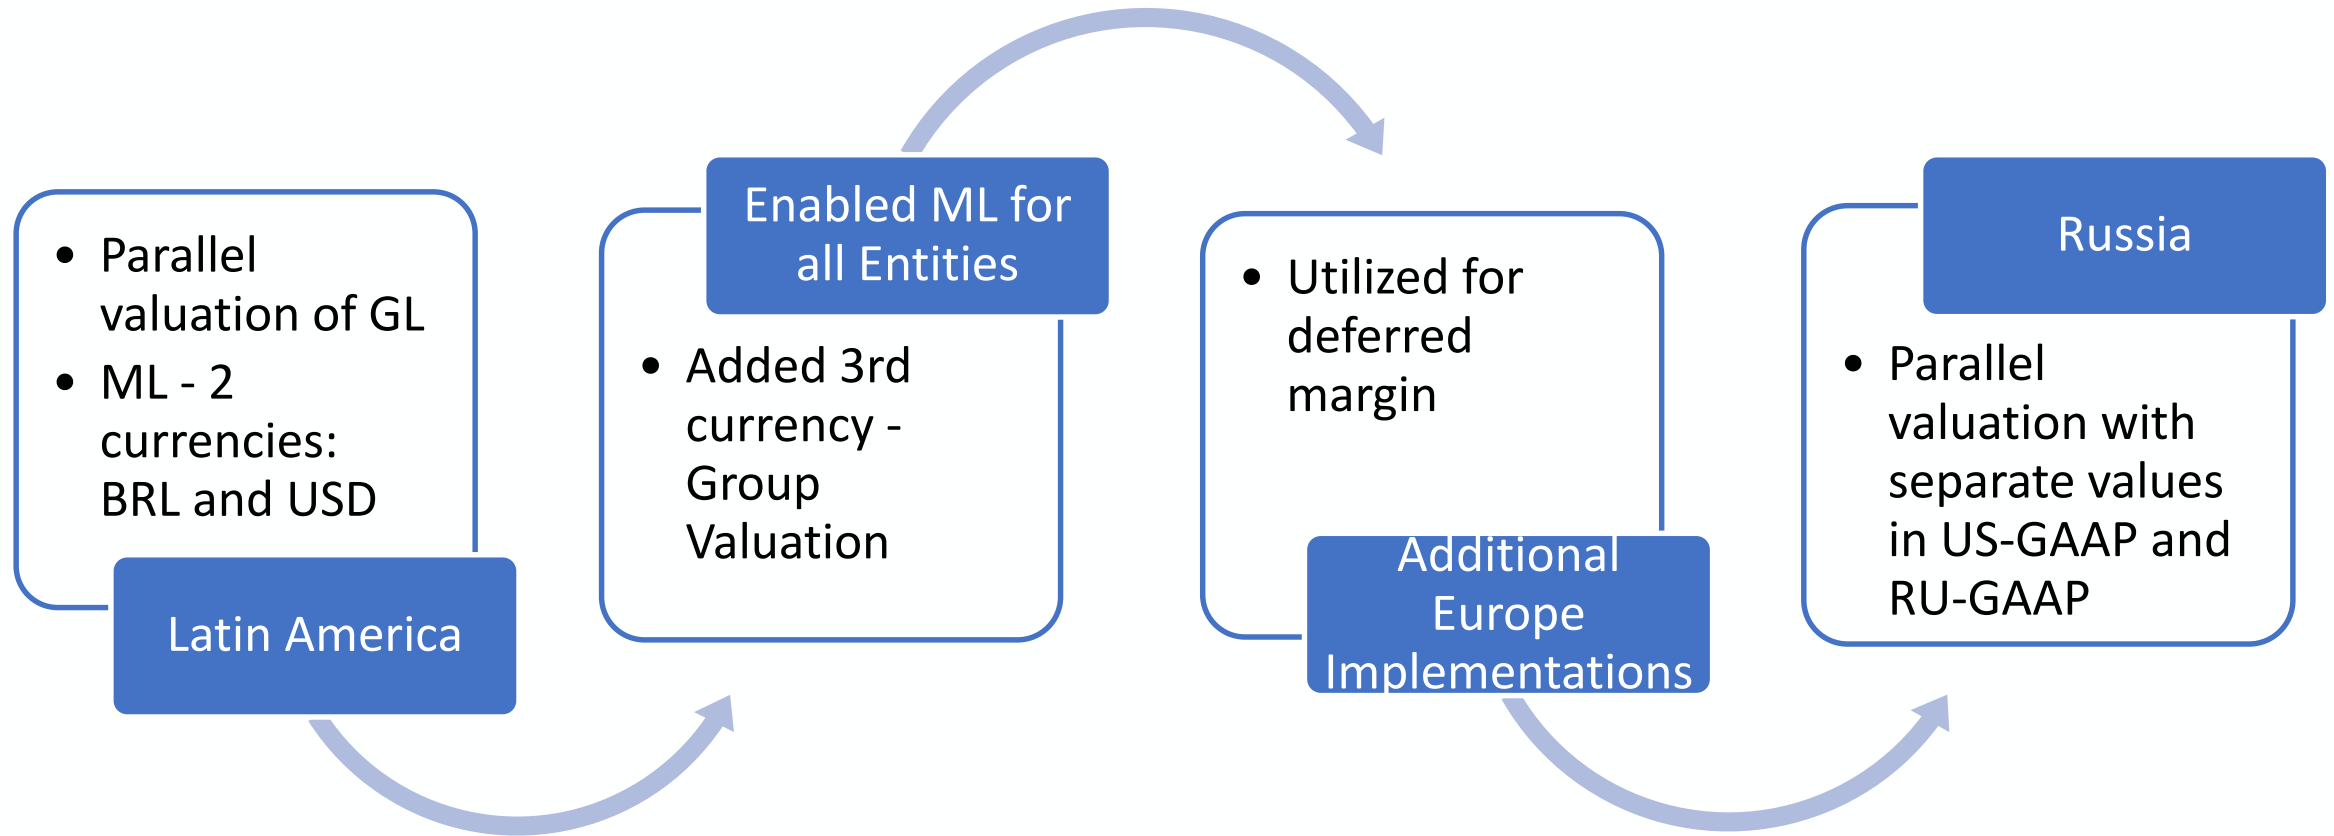

**General Valuation Data**

Total Stock	2	Base Unit	EA	each
Division	15	Valuation Cat.		
Valuation Class	3110	<input type="checkbox"/> Valuated Un		
VC: Sale Ord. Stk		<input checked="" type="checkbox"/> ML act.		Mat. Price Analysis
Project Stock VC		Price Determin.	3	Single-/Multilevel

**Prices and values**

	Currency: EUR Company code currency	USD Group currency	USD Group currency, group...
Standard Price	53.18	57.97	46.75
Per. unit price	53.18	57.97	46.75
Price Unit	1	1	1
Prc. Ctrl	S	S	S
Inventory Value	106.36	115.94	93.50
Value/per.unit pr	106.36	115.94	93.50

# Abbott ML Evolution & Approach:

# Abbott Legacy System and Process Landscape:

**Division Requirement:** Consistent methodology of consolidation for performance reporting/US GAAP

# Legacy Process Landscape - Russia

Legacy process through large acquisition:

- Multiple systems
- Multiple entities
- Manual interventions
- Multiple spreadsheets
- Month-End Close
  - 8 days for submission
  - Up to 30 days for reconciliation

# Actual Costing Requirements

## Russia Local Legal Requirement:

- Actual cost **by material**
- Depreciation value for Local Russia GAAP
- Standard cost plus amortization/deferral of variances **by material**
- Material movements automatically create financial transactions

## US GAAP / Performance Requirements:

- Actual cost
- Depreciation value for US GAAP
- Standard cost plus amortization/deferral of variances topside
- Material movements automatically create financial transactions

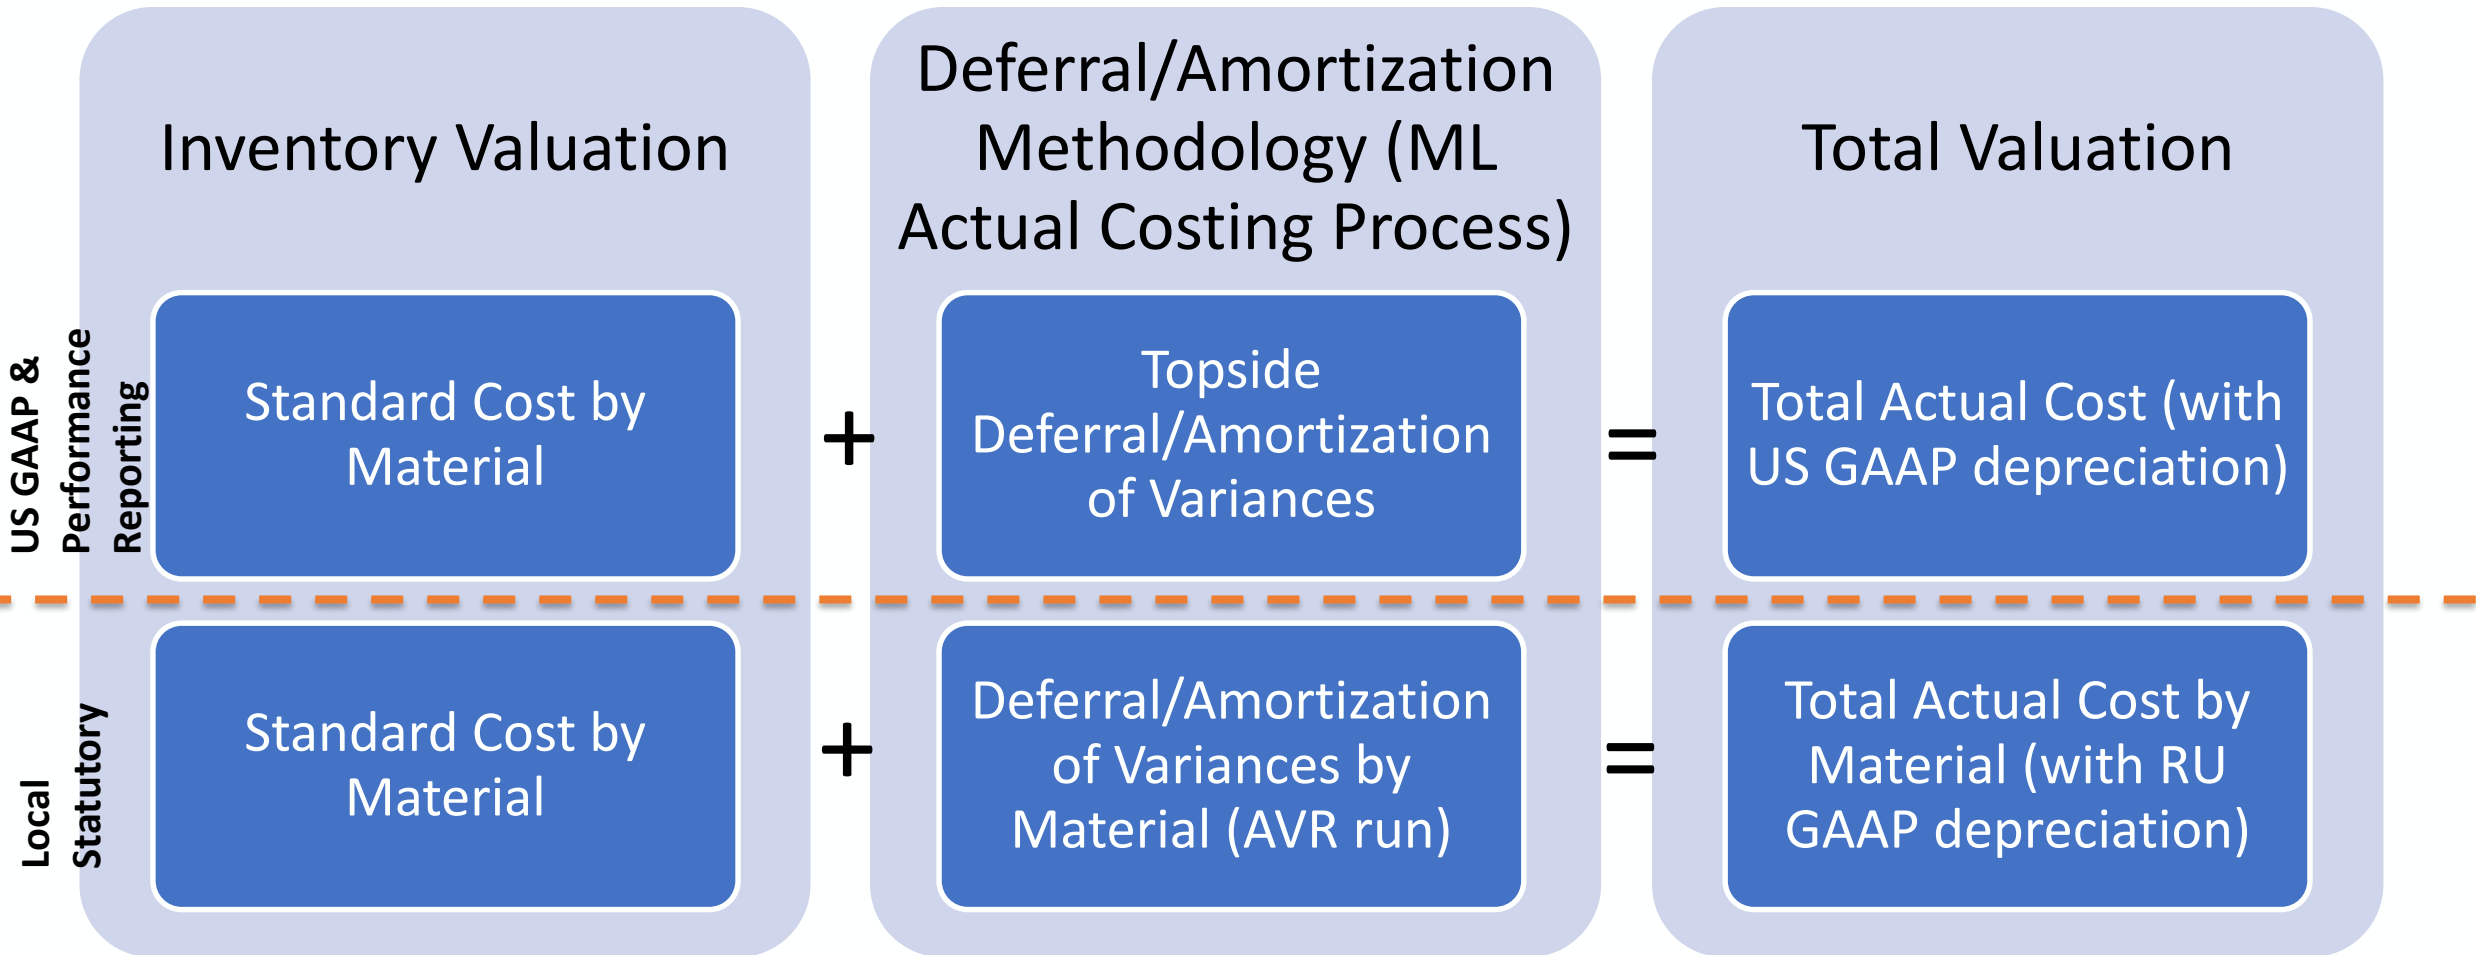

# Russia Business Requirement

Require both:

# Summary of Russia Business Requirements

# Abbott & SAP solution

## Standard SAP:

- Source transactions book same valuation in both ledgers
- Standard ML (CKMLCP) posts same actual values by material in both ledgers (US GAAP / RU GAAP)
- Manual journal entries to book separate valuation
- Not meeting business requirement because Russia unable to submit month end close on time

# Detailed Abbott Requirement

Monthly actual costing runs generate different values in material ledger, by material:

- Parallel valuation – separate ledgers
- Separate valuation
  - Different depreciation values
  - Variance cost absorption by material
- Different GL Accounts utilized for each ledger

# How we met both requirements with Parallel Ledger

## Leading Ledger

ML Periodic Costing Run:

CKMLCP – posts closing in currency type 10

- Posts GAAP standard value by material
- Post variance by material
- *Automated Job - Manual Reversal of Variance by Material*
- *Manual Deferral/Amortization of Variance*

## Local Statutory Ledger

ML Alternative Valuation Run:

CKMLCP AVR - Activate ML periodic costing run (full posting)

COGM Service Pack – creates 2<sup>nd</sup> valuation

- Posts Local standard value by material
- Post variance by material

# Actual Costing - Parallel Valuation

## Depreciation Postings :

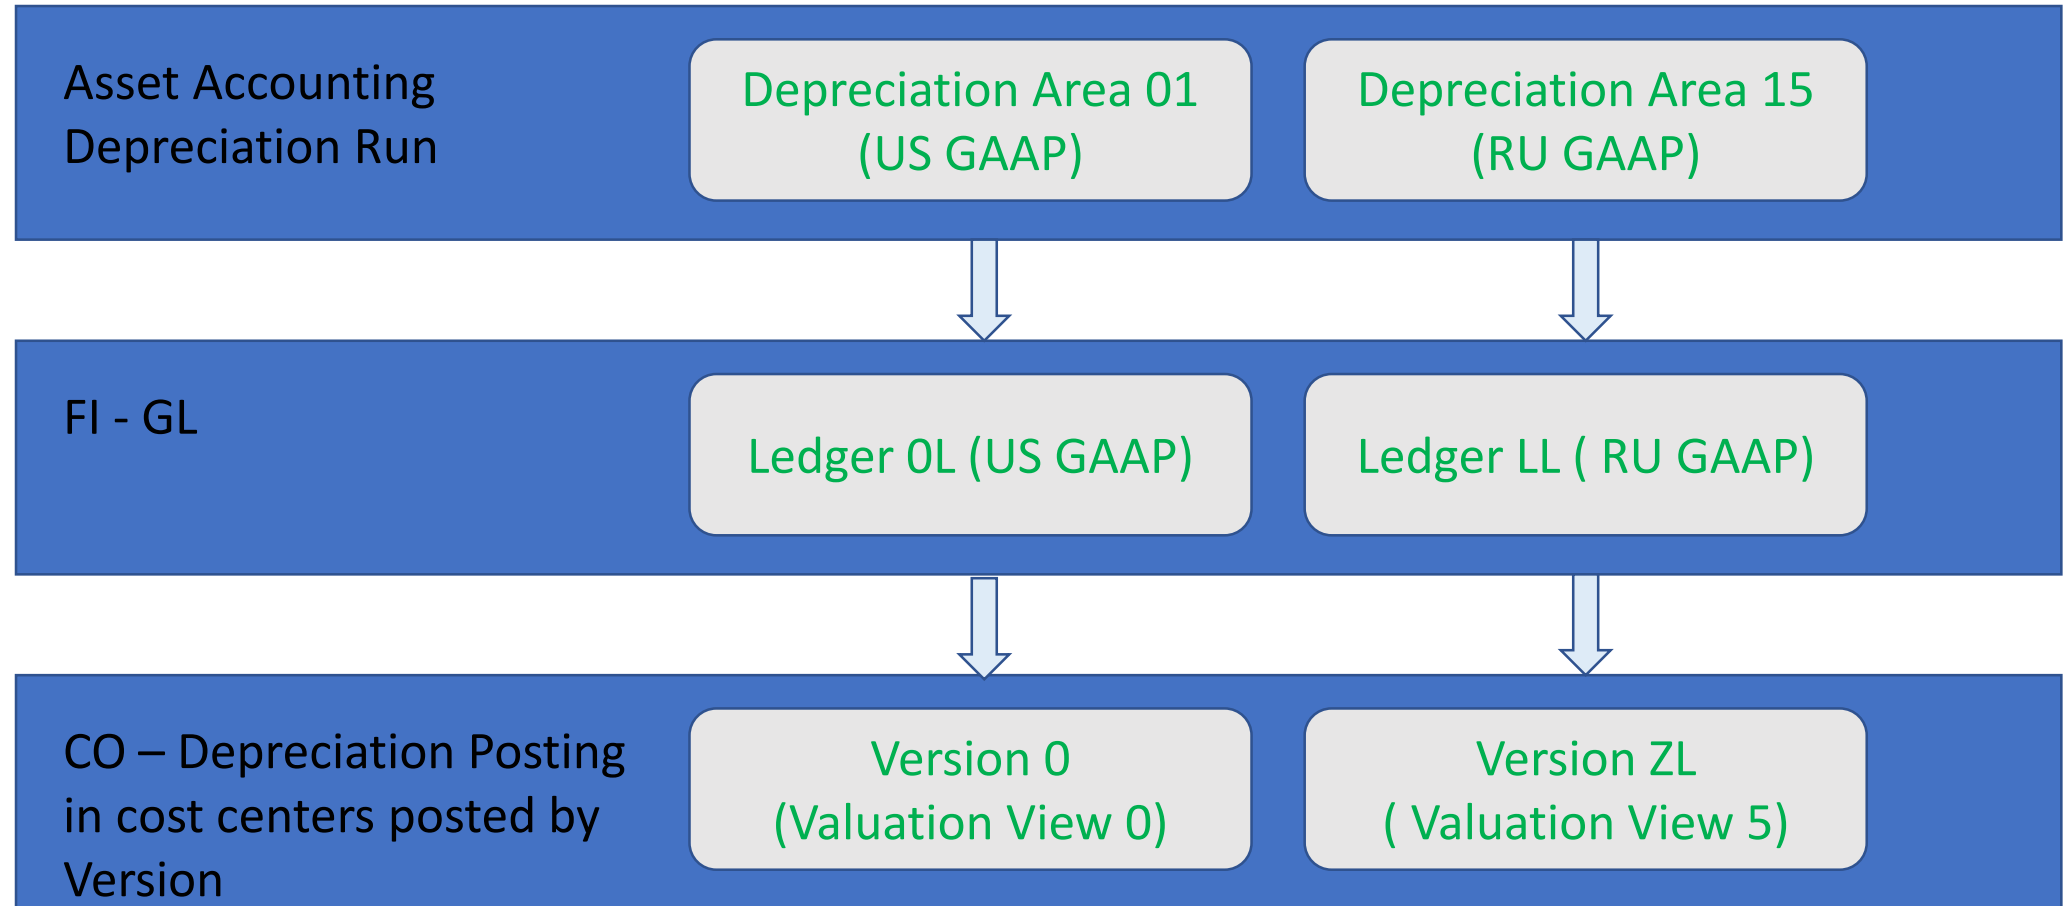

- Depreciation Amounts in Depreciation Area 01 (Book 01) are calculated per US GAAP. Depreciation Area 15 calculates per local RU GAAP
- Book 01 Depreciation is transferred to CO into the leading version “0” (Valuation view 0) from AA
- Book 15 Depreciation is transferred to CO into the COGM Version (Valuation view 5) from AA

## Actual Activity Prices :

- Depreciation Expenses are calculated differently for the US GAAP and RU GAAP
- Same Production Cost Centers have different amounts for depreciation based on US GAAP and RU GAAP
- The different amounts in cost centers are stored using different versions (version 0 for US GAAP and custom Version ZL for RU GAAP)
- As the cost center expenses are different for US GAAP and RU GAAP, Actual Activity Prices have to be calculated differently

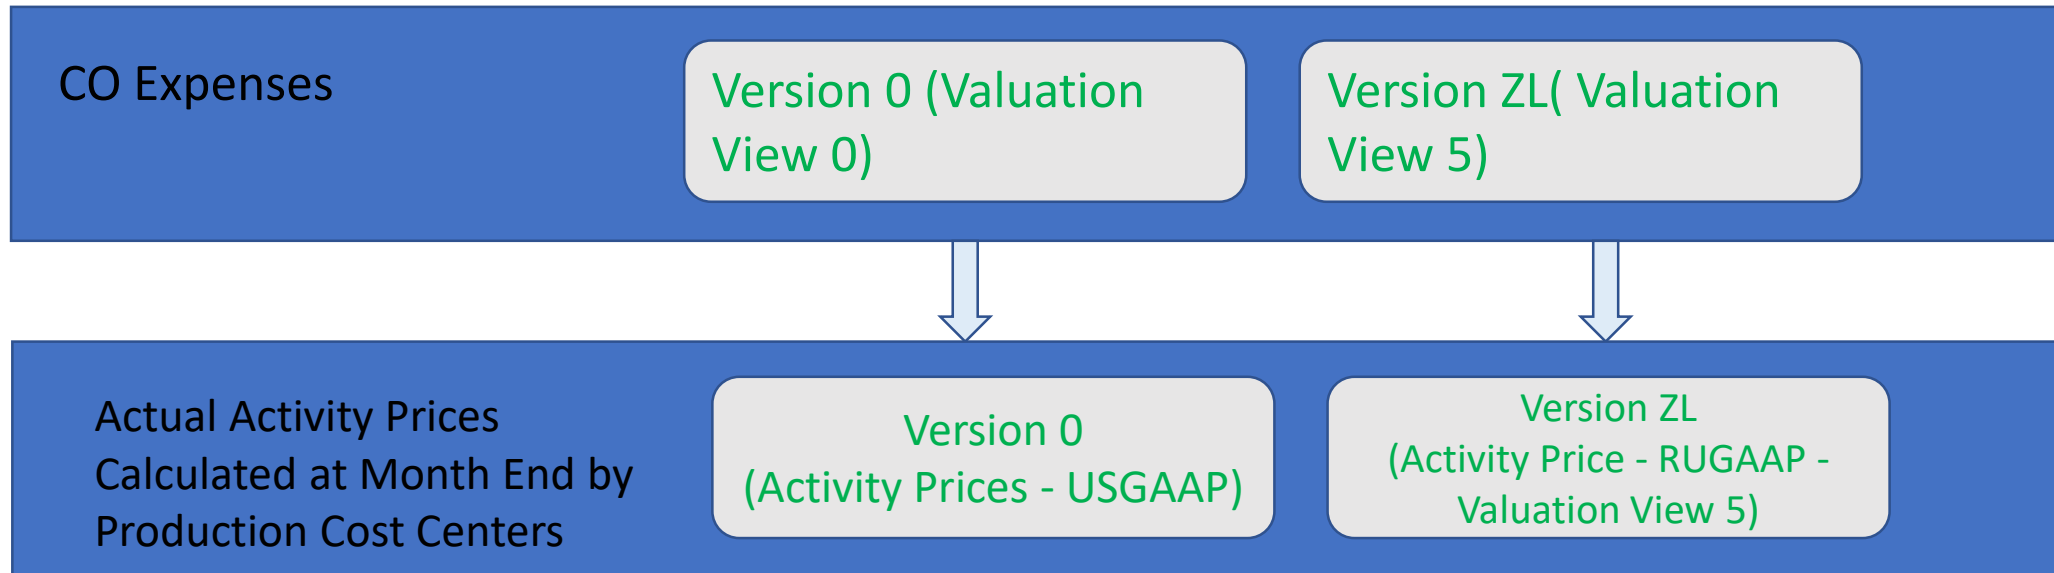

# Actual Costing - Parallel Valuation

## Flow of Depreciation Values

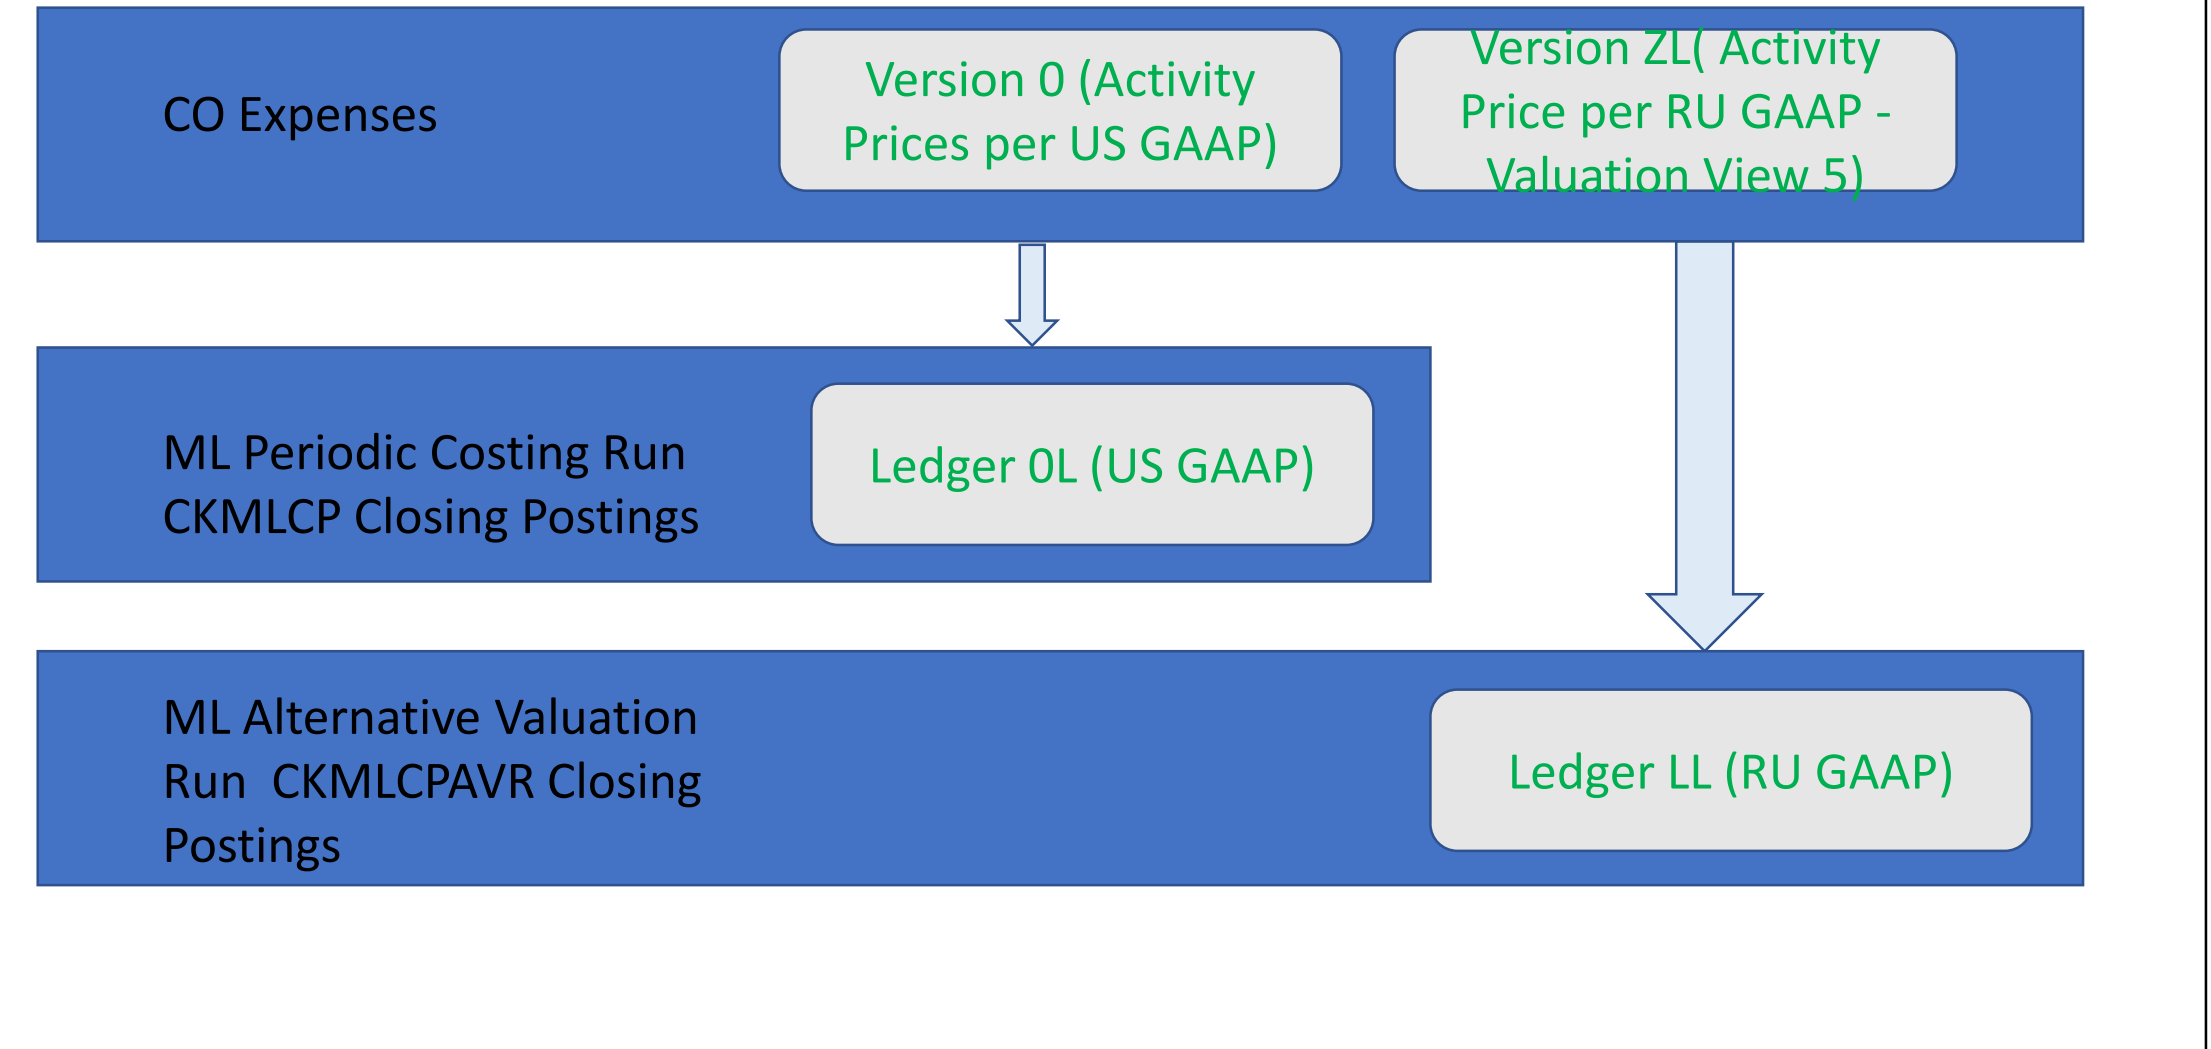

# Actual Costing - Parallel Valuation

## Activity Price Calculation

# Actual Costing - Parallel Valuation

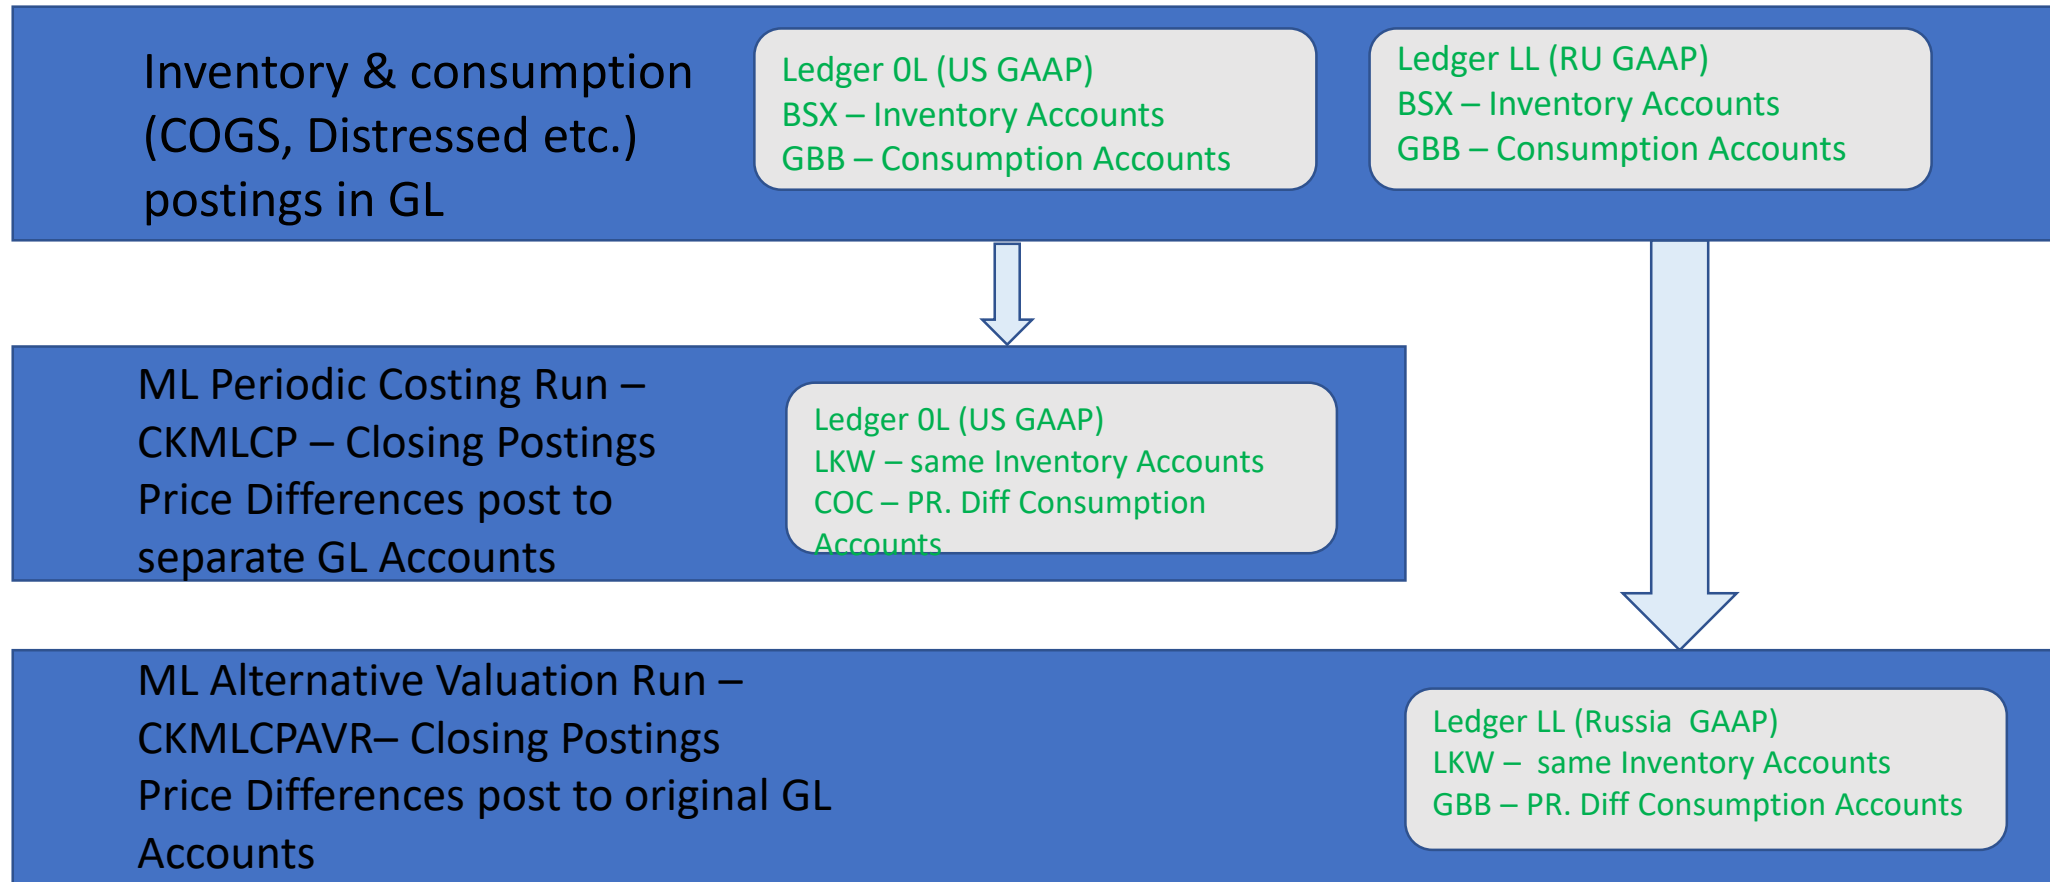

## Material Ledger Month End Close

# Actual Costing - Parallel Valuation

## Account Determination

# Abbott Reporting Requirement

## Example of Custom BOBJ Material Ledger Report

Material	Category	Cost Component Key Figures					Total	Direct Labor Quantity	Direct Labor Standard Value	Direct Labor Differences (other)	Direct Labor Differences (exch)	Direct Labor Total

# Session Recap - Business Benefits

- Automated standardized model from error prone legacy process
- Speed of financial closure
- Speed of financial reconciliation between local and US GAAP
- Efficient, precise reporting of financials
- Accurate manufacturing cost and margin calculation by material
- Statutory reporting of actual cost by material

# Session Recap - Business Result

- In Russia implementation - use of parallel valuations by material enabled
  - Efficiency
  - Consistency
  - Enhanced control procedures
  - Analytical capabilities

# Take the Session Survey.

We want to hear from you! Be sure to complete the session evaluation on the SAPPHIRE NOW and ASUG Annual Conference mobile app.
