

SAP Datasphere

Unleash the power of business data

Abani Pattanayak
Principal Solution Advisor

October 2023

INTERNAL – SAP and Customer Only

AGENDA

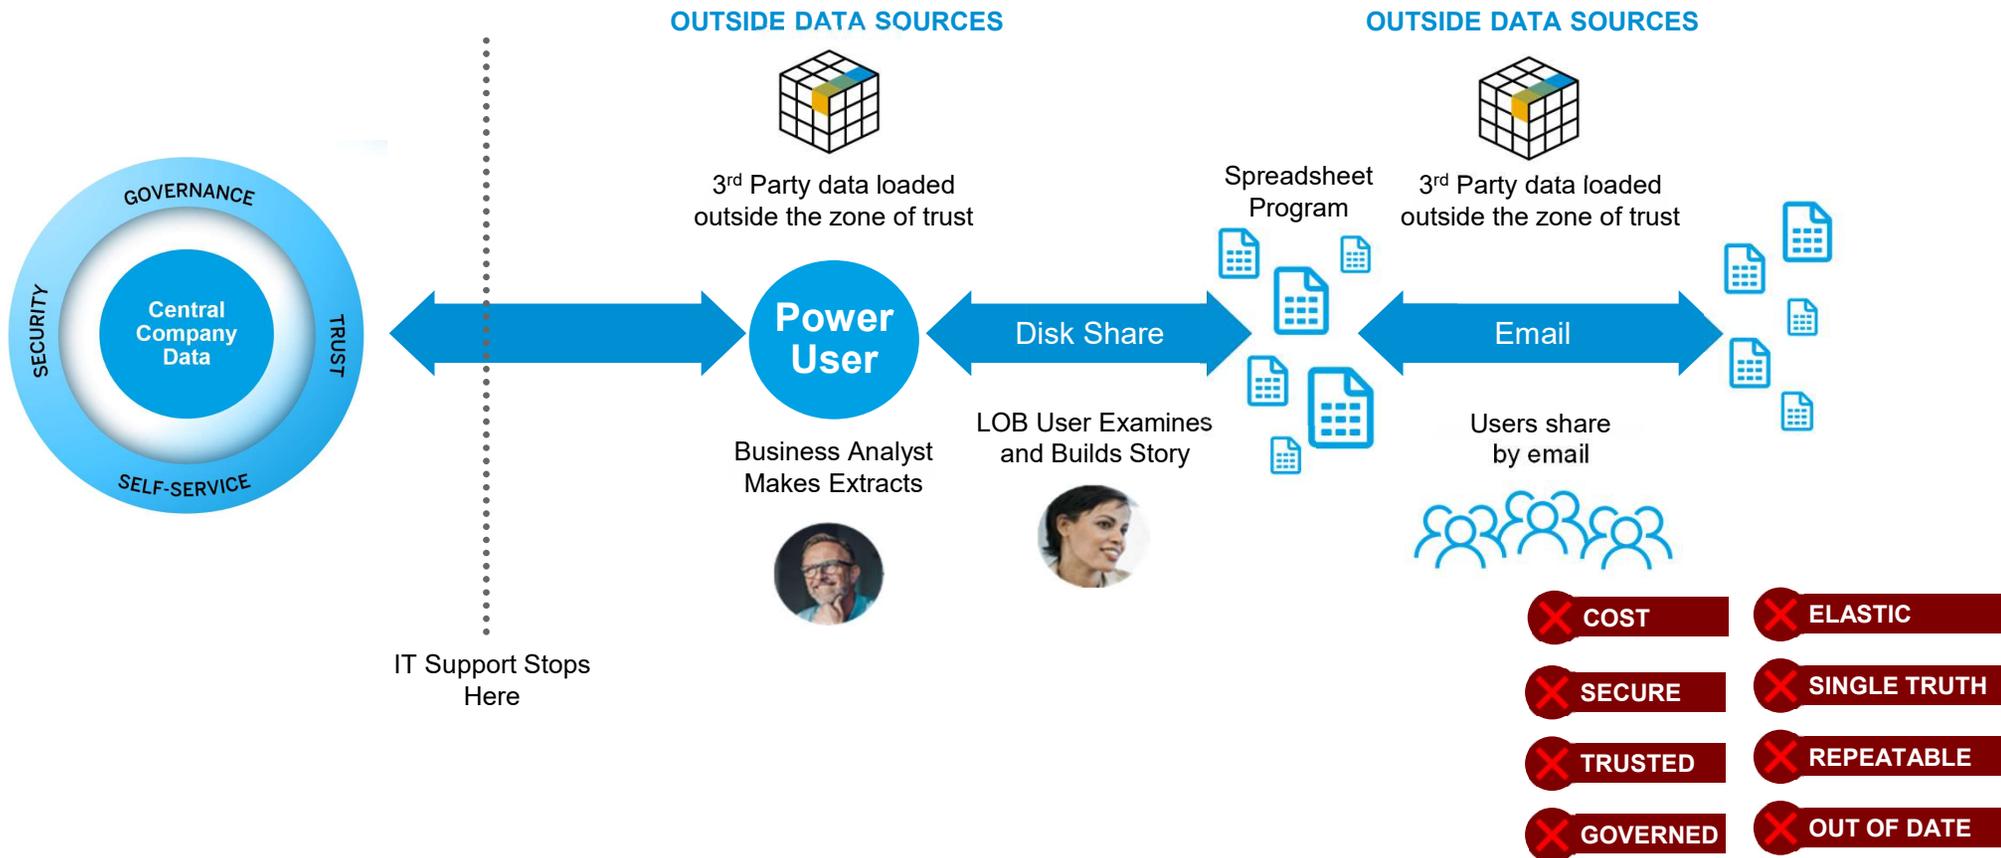

- 01** Data & Analytics Challenges
- 02** SAP Datasphere
- 03** Business Value
- 04** Q&A

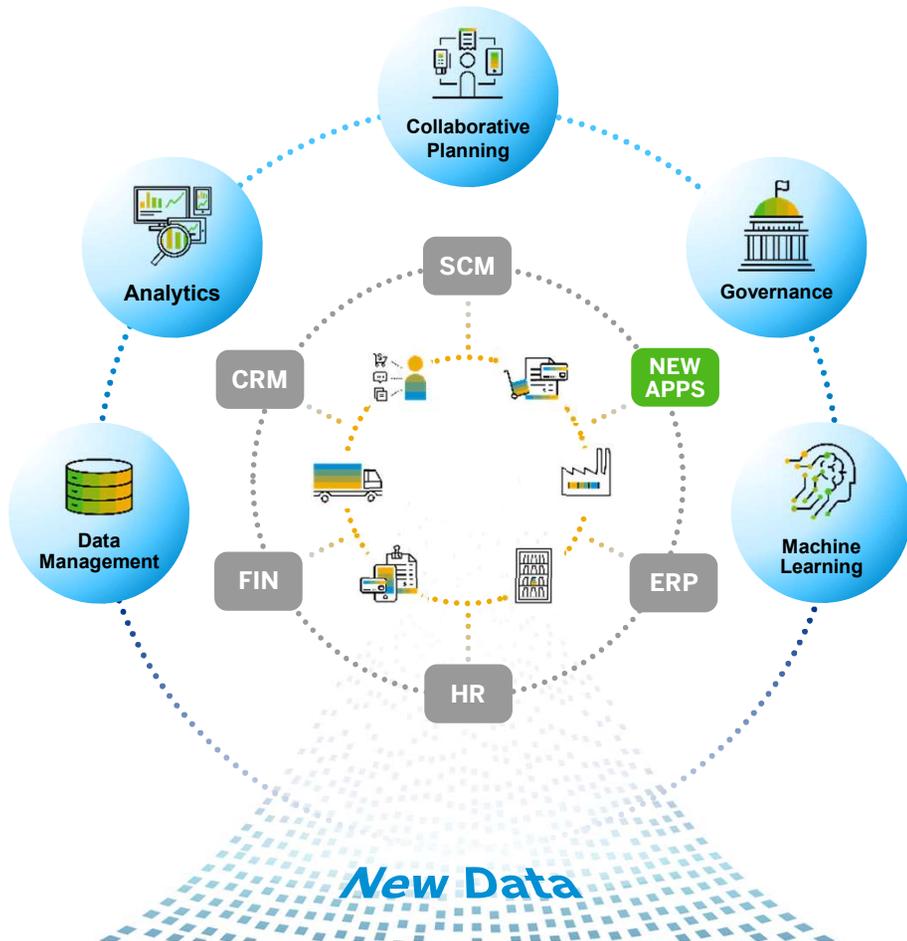

Universal yet opposing data needs for business and technology stakeholders

The Problem with "Just give me the data"

The Solution: Business Data Fabric

Bring new data into the context-rich environment of existing systems

Retain the full business perspective of SAP data – up to date and authoritative

Enable collaborative insights and planning across the enterprise

- ✓ ELASTIC
- ✓ SECURE
- ✓ TRUSTED
- ✓ GOVERNED
- ✓ SINGLE TRUTH
- ✓ REPEATABLE
- ✓ REAL-TIME

SAP Datasphere is the foundation for a business data fabric architecture

Data consumers

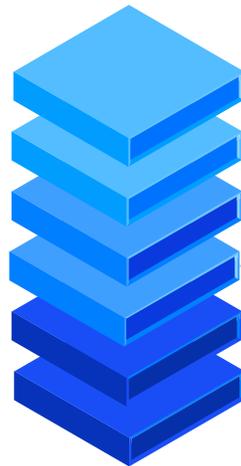

Planning and analytics

Intelligent data apps

Data science

SAP Datasphere
running in SAP BTP

Security
Access control
Availability

Self-service data access | Virtual data products

Data discovery | Business content, data marketplace, recommendations

Orchestration | Data transformation and data ops

Processing and persistency | Warehousing, business semantics (analytic/relational models), knowledge graph

Data governance | Metadata management, catalog, lineage, privacy, quality

Data ingestion | Data replication, data federation, real-time data, application integration

SAP and non-SAP data

Applications

On-premises
Data Warehouses

Cloud Data Warehouses
and Lakehouses

Relational
Databases

Unstructured/
Semi-structured Data

Unleash the power of business data with SAP Datasphere

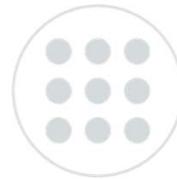

Access authoritative data

Deliver business data in its business context

Make it effortless to model your business

Ensure governance throughout the data lifecycle

Enrich all data projects

Virtually access or physically store data from anywhere

Leverage trusted data partners and securely share data across the organization

Integrate with industry-leading data and AI platforms to capitalize on data investments

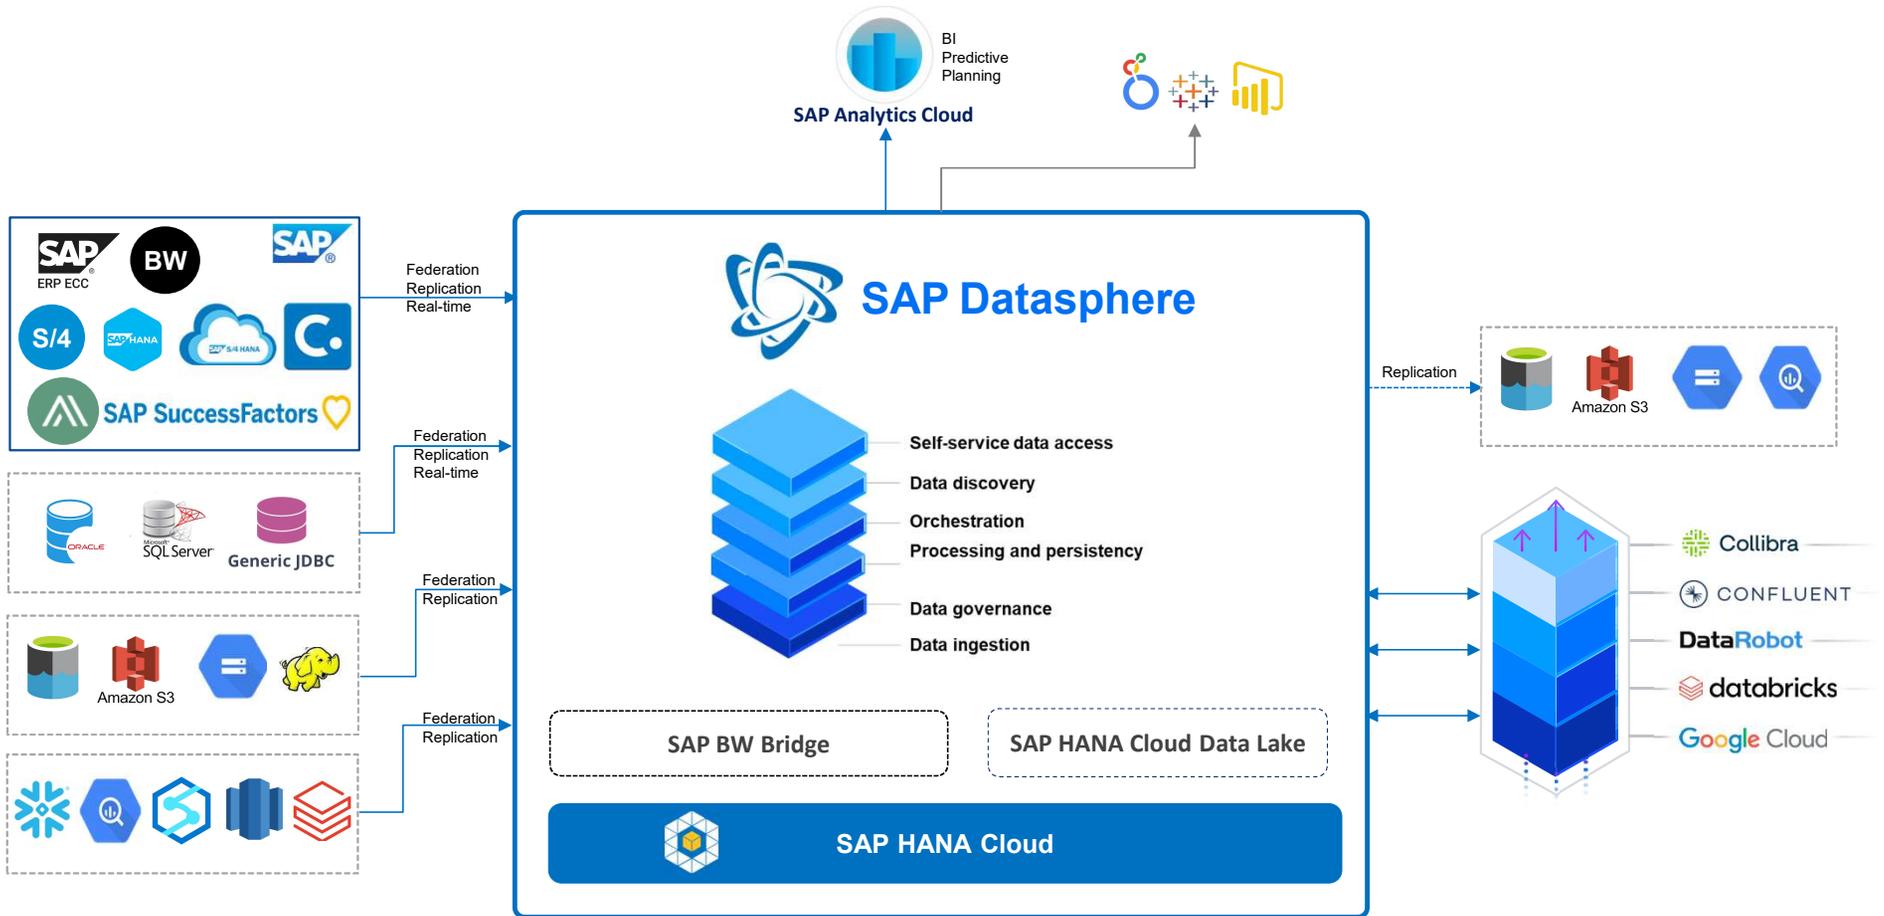

Simplify the data landscape

Innovate across hybrid architectures leveraging existing SAP models

Enable self-service data access

Leverage existing SAP BW models and transformations to innovate in the cloud

SAP Reference Architecture

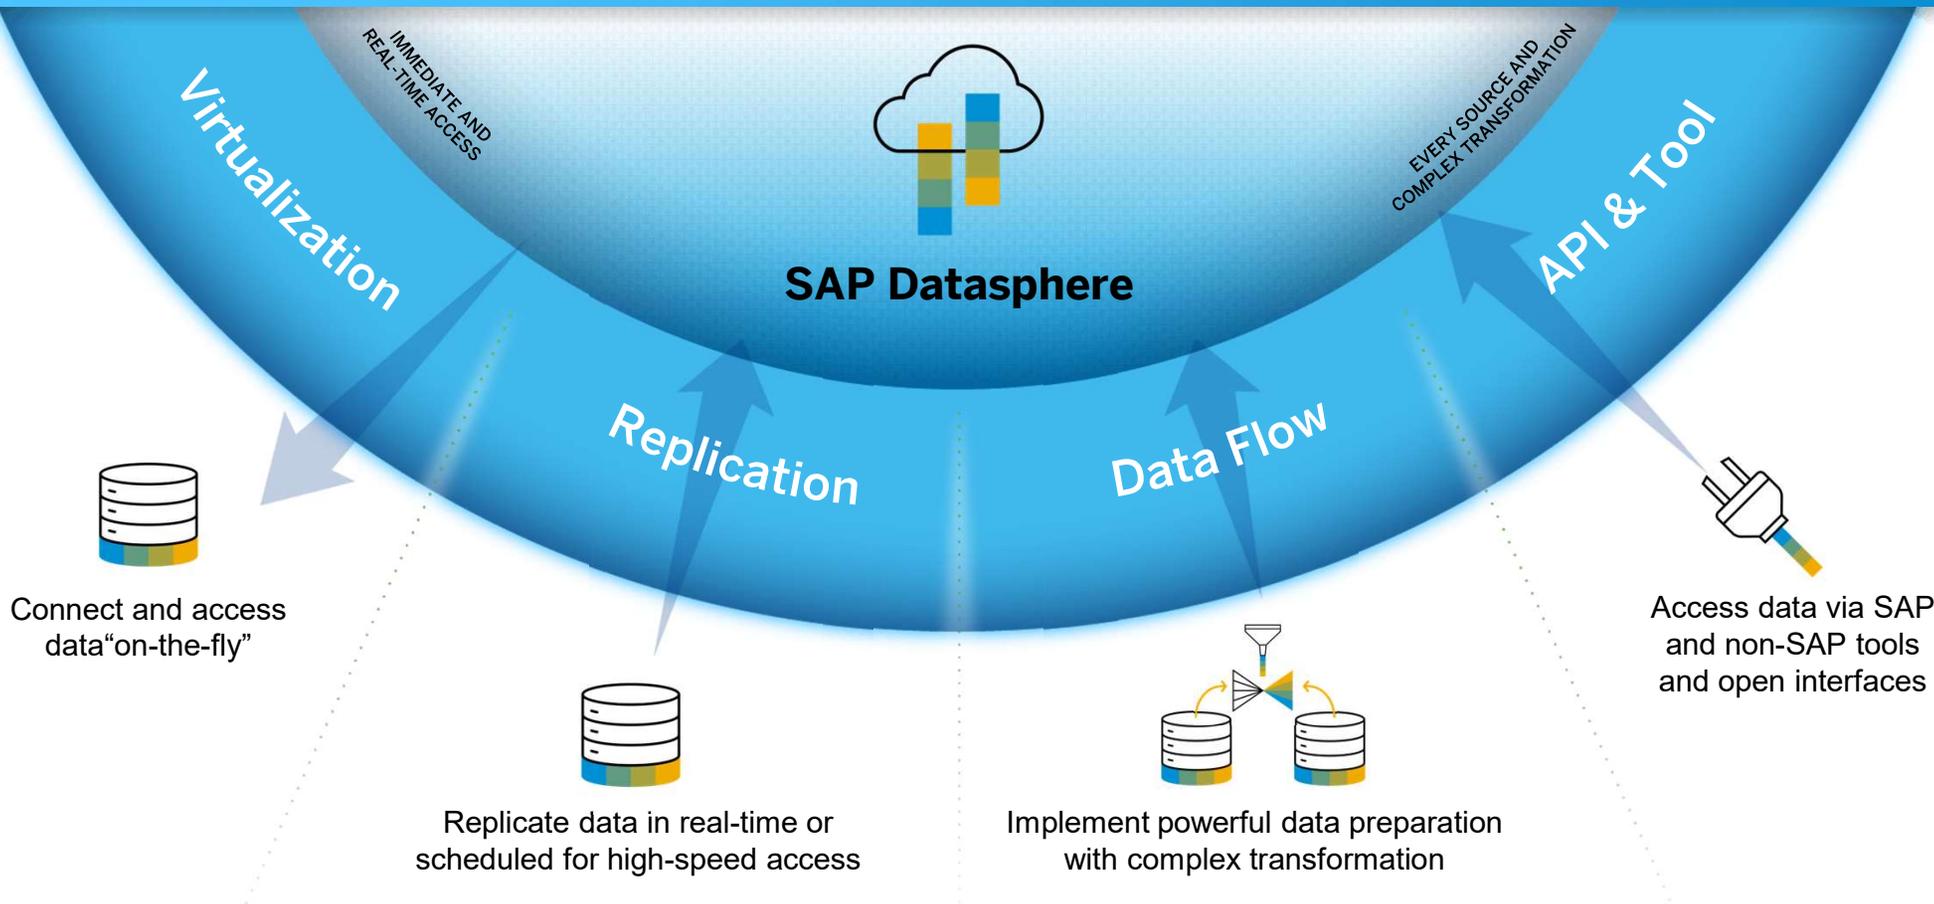

AGENDA

- 01** Data & Analytics Challenges
- 02** SAP Datasphere
- 03** Business Value
- 04** Q&A

Connect and collect data flexibly – catering to all styles of data integration

Integrate. Data Sources Overview

SAP Applications

- SAP S/4HANA
- SAP S/4HANA Cloud
- SAP ECC
- SAP ABAP
- SAP BW/4HANA Model Transfer
- SAP BW
- SAP HANA Data Lake
- SAP HANA, Data Lake Files
- SAP SuccessFactors
- SAP Fieldglass
- SAP Marketing Cloud

Databases & Generic Connections

- SAP HANA on-prem & Cloud
- Oracle
- Microsoft SQL Server
- Generic JDBC
- Generic OData
- Generic SFTP
- Local CSV File
- Generic Cloud Data Integration

Hyperscaler & Cloud Apps

- Google Cloud Storage
- Google BigQuery
- Azure SQL Database
- Azure Blob Storage
- Azure Data Lake Store Gen1
- Azure Data Lake Store Gen2
- Amazon S3
- Amazon Athena
- Amazon Redshift
- HDFS
- SAP Open Connectors

External Tool Support

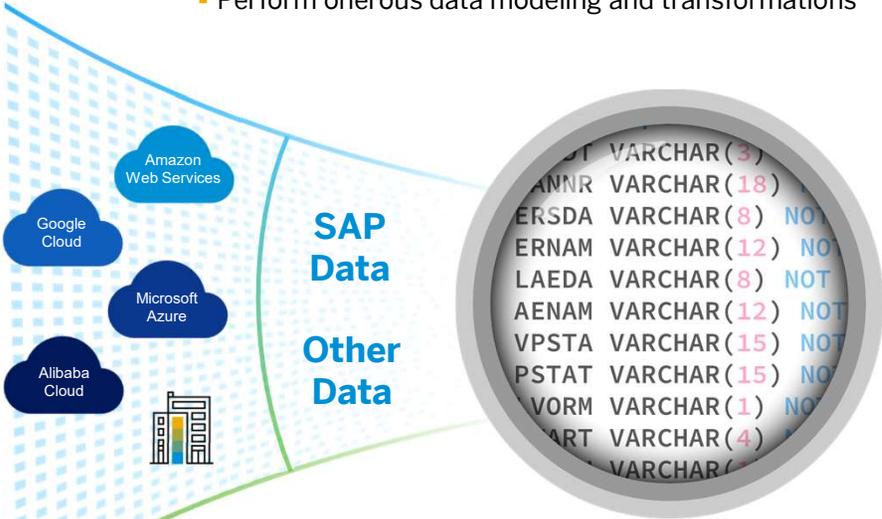

- SAP Data Intelligence*
- SAP Data Services*
- SAP HANA Smart Data Integration*
- SAP Landscape Transformation*
- Adverity
- APOS*
- Datazeit*
- Informatica*
- Precog
- Snaplogic*

SAP Help: [Connection Overview](#)

Connect data with **business context**

Typical Approach

- Copy and move data to meet performance thresholds
- Make sense of obscure data structures and labels
- Perform onerous data modeling and transformations

Copy data and lose context

SAP Datasphere

- Connect or collect data with optimized performance and TCO
- Insight on real-time data across clouds and on prem
- Out-of-the-box semantic understanding of SAP data

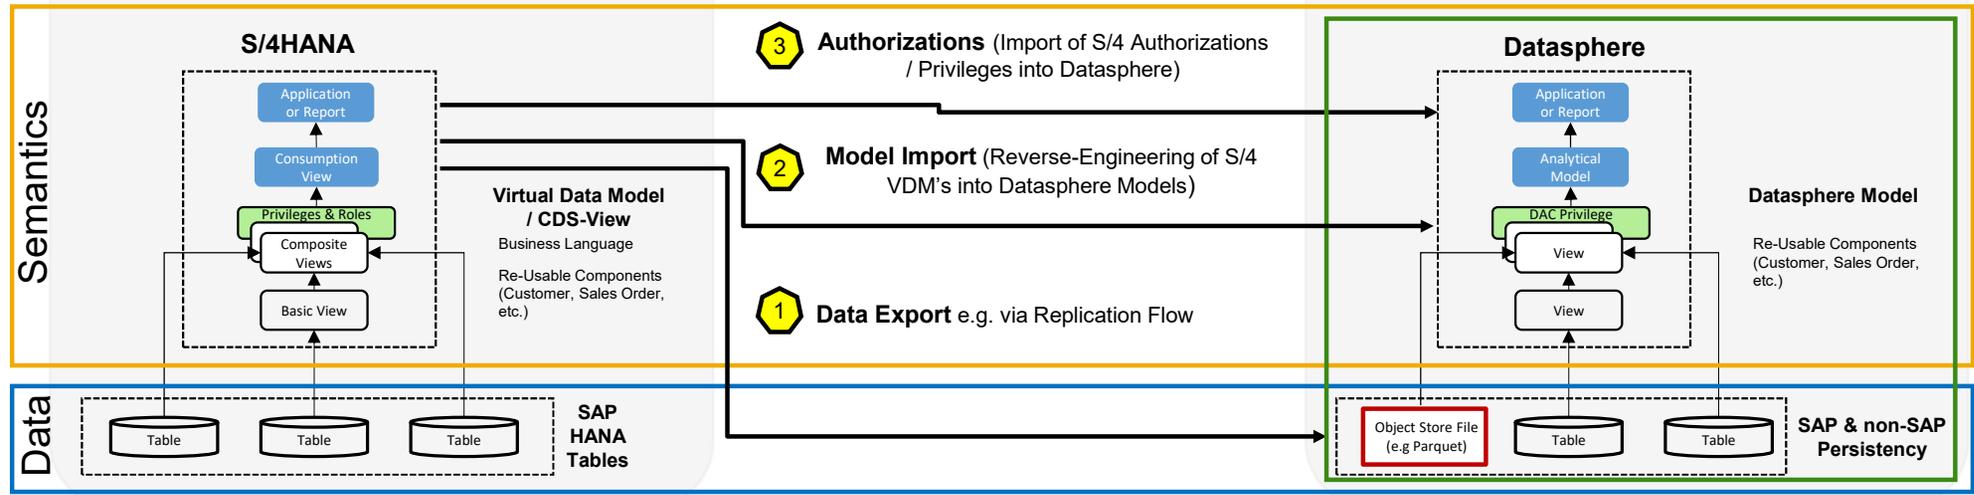

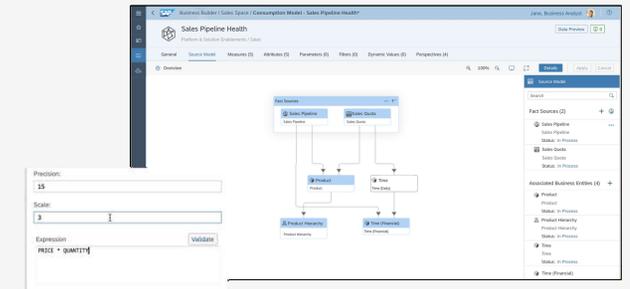

Give meaning to data instantly

SAP Business Semantics

SAP Datasphere: Mapping of Business Semantic to Data

```

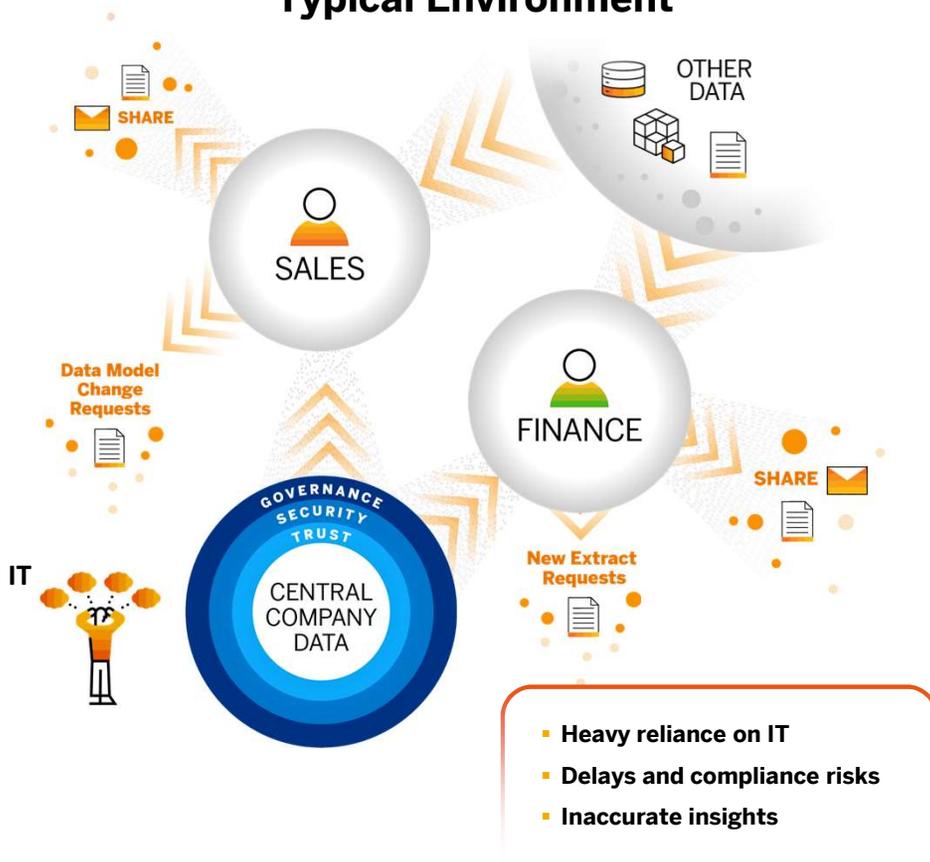

@C: |ZFIELDNAME |
1 @AbapCatalog.sqlViewName: 'ZIFLDMH'
2 @endUserText.label: 'Table Field'
3 @Analytics.dataCategory: #DIMENSION
4 @VDM.viewType: #BASIC
5 @ObjectModel.representativeKey: 'FieldName'
6 @accessControl.authorizationCheck: #NOT_REQUIRED
7 define view ZI_FieldName as select from d0021 inner join d0031 on d0021.tabname = d0031.tabname
8 and d0021.as4local = d0031.as4local
9 and d0021.as4vers = d0031.as4vers
10 association [0..*] to ZI_FieldNameText as _FieldNameText on $projection.TabletName = _FieldNameText.TabletName
11 and $projection.FieldName = _FieldNameText.FieldName
12 association [0..1] to ZI_TableName as _TableName on $projection.TabletName = _TableName.TabletName
13 {
14 @ObjectModel.foreignKey.association: '_TableName'
15 key d0031.tabname as TabletName,
16 @ObjectModel.text.association: '_FieldNameText'
17 key d0031.fieldname as FieldName,
18
19 _FieldNameText,
20 _TableName
21 }
22 where ( tabclass = #tabclass.'TRANSP' or tabclass = #tabclass.'INTTAB' )
23 and ( d0031.comptype = #comptype.'E' or d0031.comptype = #comptype.' ' )
24 and d0031.as4local = 'A'
25 and d0031.as4vers = '0000'
    
```

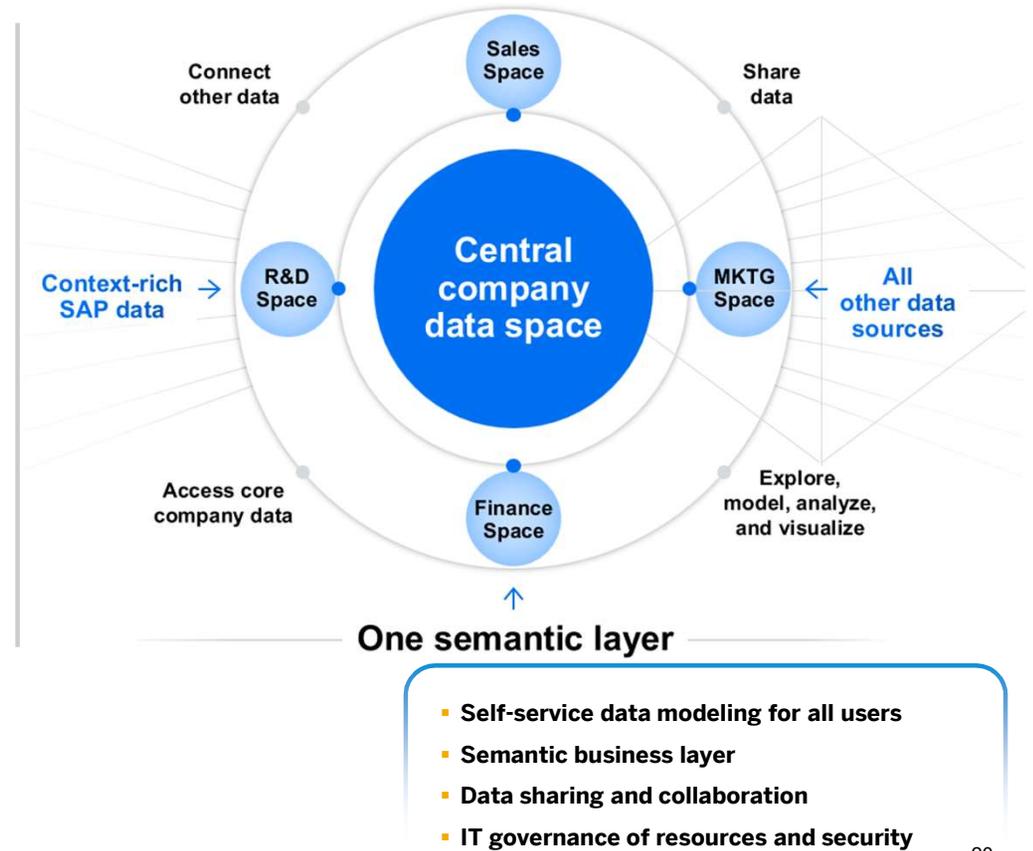

Datasphere: Mapping of Business Semantic to Data

Unlock data insights with integrity

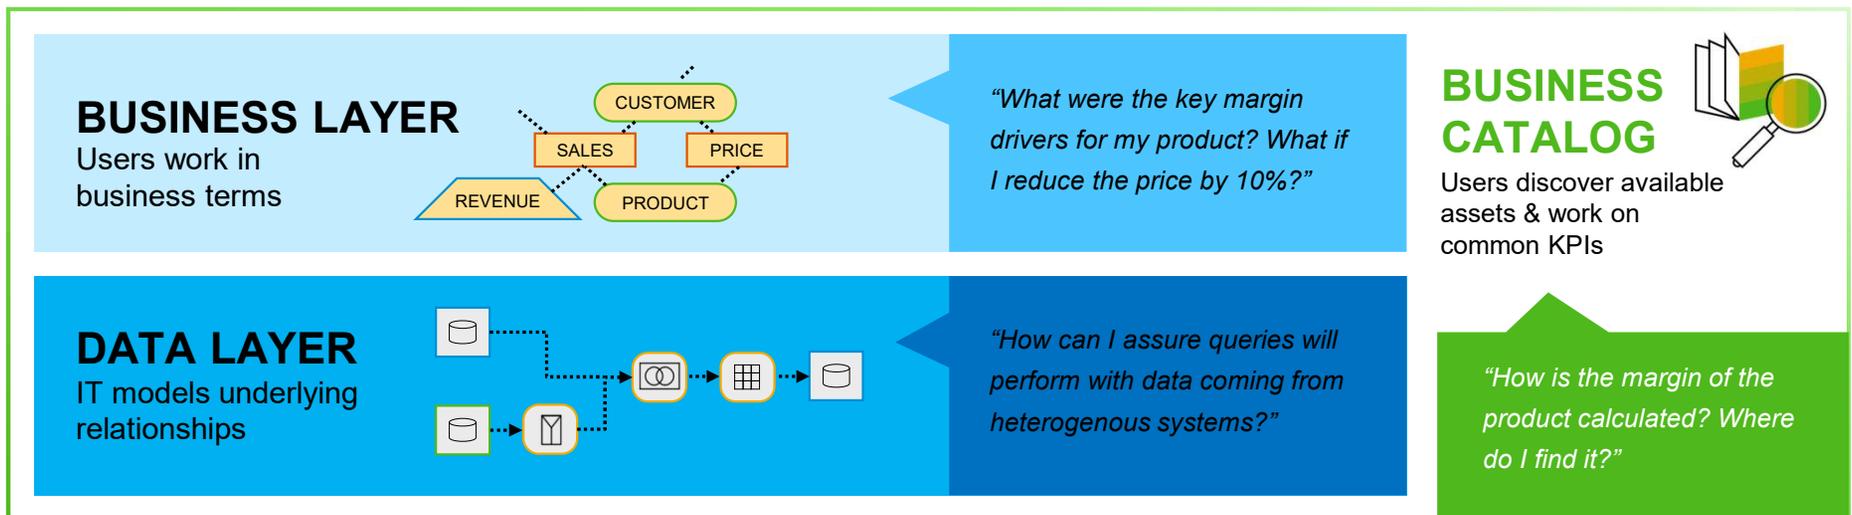

Typical Environment

SAP Datasphere

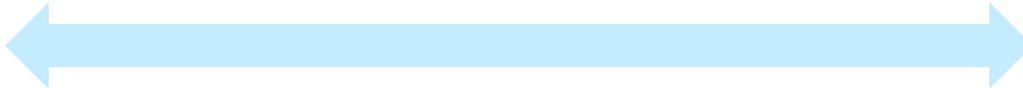

Manage. Collaborate in business terms

- Business entities and relationships with business language
- Model standardization and re-use for efficiency
- Independence for business users from IT

Manage. Modeling for Everybody

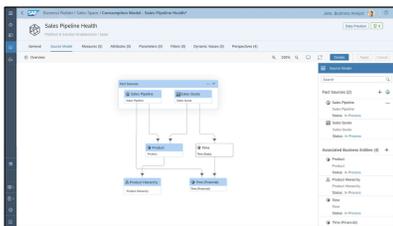

Business Analyst
No Code / Low Code

Developer / Power User
Pro Code

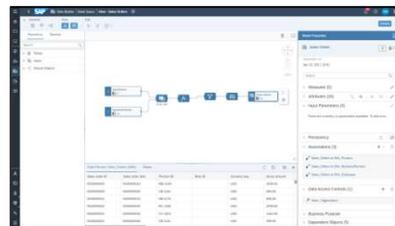

BUILT-IN EDITORS
modeling for all users

Business Modeling

- Allow for a greater degree of self-service
- Non-disruptive environment for business scenarios – independent from the data integration layer

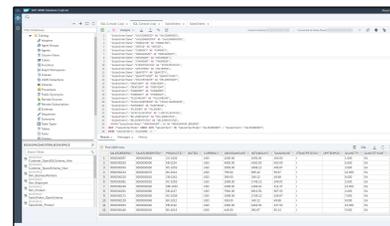

Graphical & Scripted

- Collection of no code/low code editors to support Graphical Modeling
- Model E/R-models, Tables, Views, SQL & SQL-Script Views
- Focuses on most-used modeling operators

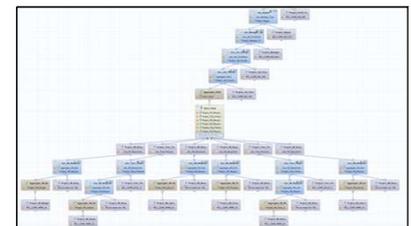

EXTERNAL EDITORS
integrated SQL Data Warehousing

Open SQL Schema

- Option to use SQL DDL & DML leveraging e.g. SQL Views, Tables, Procedures, etc.
- Leveraging existing SQL-tooling & skillset
- SAP Database Explorer

SAP HANA Deployment Infrastructure

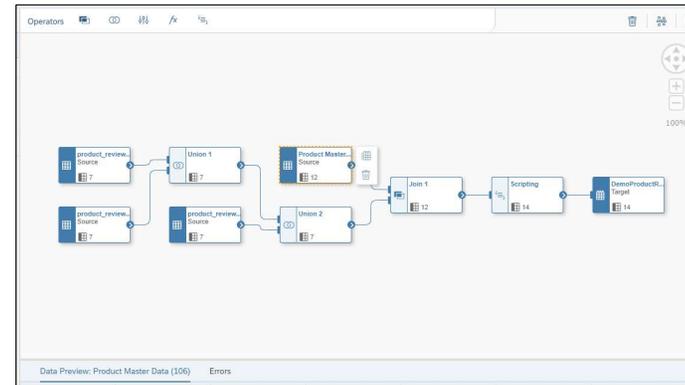

- SAP HANA Cloud Modeling capabilities leveraging Calculation View, Flowgraph, Synonym, etc.
- Simply re-use HANA based Modeling within SAP Datasphere

Integrate. Data Flow

Standard Transformations

- Combine data sets with no code operators for Projection, Aggregation, Join, Filter, Union, Add Table
- Data source can be tables, ABAP CDS views, OData, remote files (JSON/JSONL, CSV, ORC, EXCEL, or PARQUET)
- Target mode: Append/Upsert, Truncate, Delete

Scripting

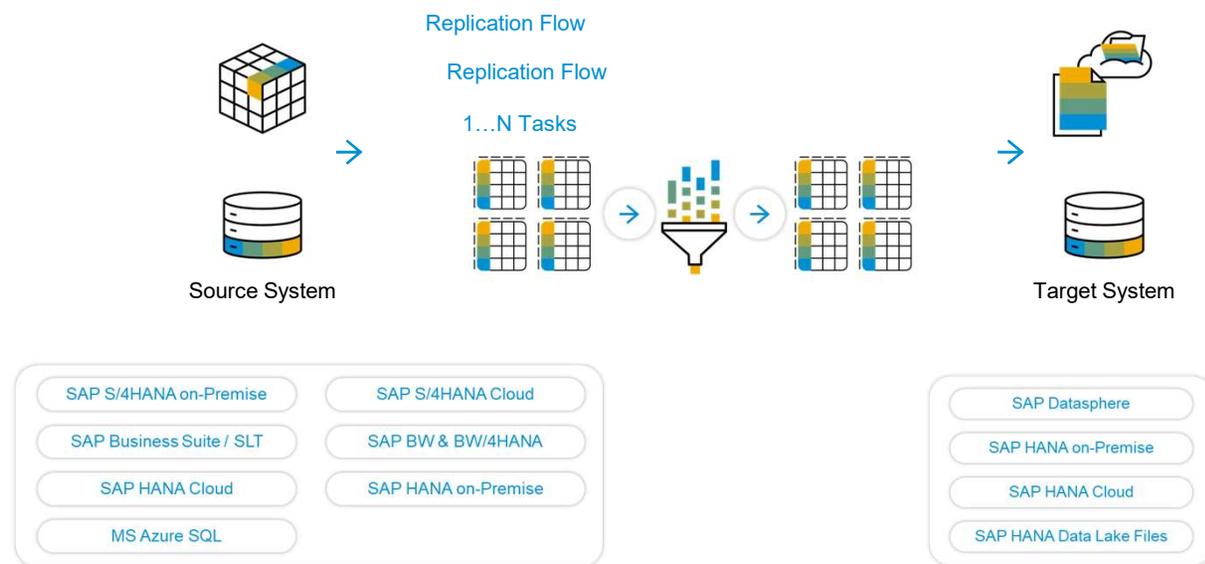

- Advanced transformation requirements like extraction of text
- Embedded scripting editor in Data Flow Modeler
- Support of standard Python 3 scripting language

```
Script
Properties
General  Script  Output Columns
General
Label: Scripting
Code Language: Python
Script
1 from textblob import TextBlob
2 def on_input(data):
3     try:
4         REVIEW_TEXT_INDEX = 17
5         if len(data.body) > 0:
6             for row in data.body:
7                 if row[REVIEW_TEXT_INDEX] is None:
8                     tb = TextBlob(row[REVIEW_TEXT_INDEX])
9                     row.append(tb.sentiment.polarity)
10                    row.append(tb.sentiment.subjectivity)
11            sql.send("output", data)
12        except Exception as e:
13            # just forward
14            raise e
15
16
17 sql.set_port_callback("input1", on_input)
```

Integrate. Replication Flow

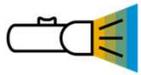

Enhancement of data replication use cases through a cloud based data replication tool

- Model data replication from a selected source to a selected target
- Focus on 1:1 replication with simple projections and filters
- Integrated user interface in Data Builder
- Integrated monitoring features in Data Integration Monitor
- Support initial load as well as delta load capabilities

Manage. Catalog enabling Governance

Discover

Discover data (*crawl, profile, organize, link, and enrich*) and make data **accessible** (*browse, search*)

Organize

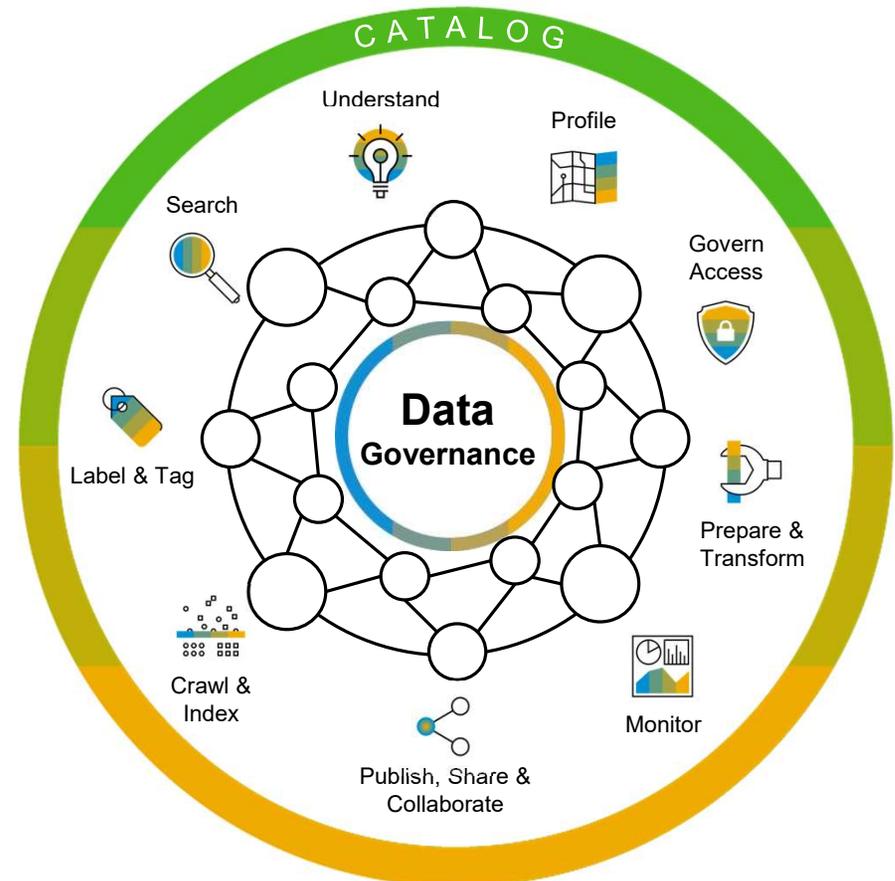

Classify, organize, and understand data (*location, attributes, quality, lineage, sensitivity*)

Curate

Enforce **centralized authorization** and **security** for data orchestration, and control **data quality standards**

Business Warehouse Bridge

- Automatic restart of the data transfer process
- Data extraction: use of operational data provisioning through HTTP
- Lifecycle management – remote table usage check
- Overview of migrated queries and the option to delete from SAP BW...

Data Cataloging

- Backup-and-recovery functionality for catalog metadata and the...
- Extending extraction of column and attribute details
- Linking of terms and KPIs to asset attributes
- Monitoring user interface for metadata extraction

Business Warehouse Bridge

- Use SAP Datasphere data as source for SAP BW bridge

Data Center Availability

- Data center availability in the Asia Pacific Southwest region through...
- Data center availability in the European region through Google...

Data Integration

- Improving browsing and selection of CDS views from SAP S/4HANA in...
- Scheduling of replication flows
- Support for Google BigQuery as a target in replication flows
- Support for using cloud object stores as a source in replication flows

Business Warehouse Bridge

- Handling and reuse of hierarchies in SAP BW bridge
- SAP BW bridge for SAP Datasphere: delta extraction to SAP Datasphere

Data Cataloging

- Metadata extraction for SAP Business Warehouse
- Unified discovery of data products and metadata in catalog

Data Modeling

- Improved change management for analytic models
- Sharing of dependent entities

Data Cataloging

- Metadata extraction for SAP HANA
 - Ability for catalog users to search and discover data from SAP HANA data repositories, including column tables, row tables, global temporary tables, virtual tables, SQL views, and calculation views
- Metadata extraction for SAP S/4HANA
 - Ability for catalog users to search and discover data from data repositories in SAP S/4HANA, including tables, views, CDS views, and operational data provisioning (ODP) extractors
 - Ability to harvest metadata for all CDS views using a batch job
 - Ability to harvest metadata for a subset of CDS views by category

Data Center Availability

- SAP BW bridge: data center availability in the Google Cloud...

Data Cataloging

- Data profiling for SAP HANA
- Enriching data products with catalog metadata
- Import of glossaries, terms, and KPIs
- Lineage and impact analysis for data products
- Metadata extraction for replication flows
- Metadata extraction for SAP ERP Central Component
 - Ability for catalog users to search and discover data from SAP ERP Central Component (SAP ECC)
- Transport capabilities for catalog lifecycle management

Administration and Service Management

- Elasticity and workload – financial governance of elastic read nodes

Data Center Availability

- Data center availability in Israel through Google Cloud Platform
- Data center availability in the Google Cloud Platform Asia Pacific East...

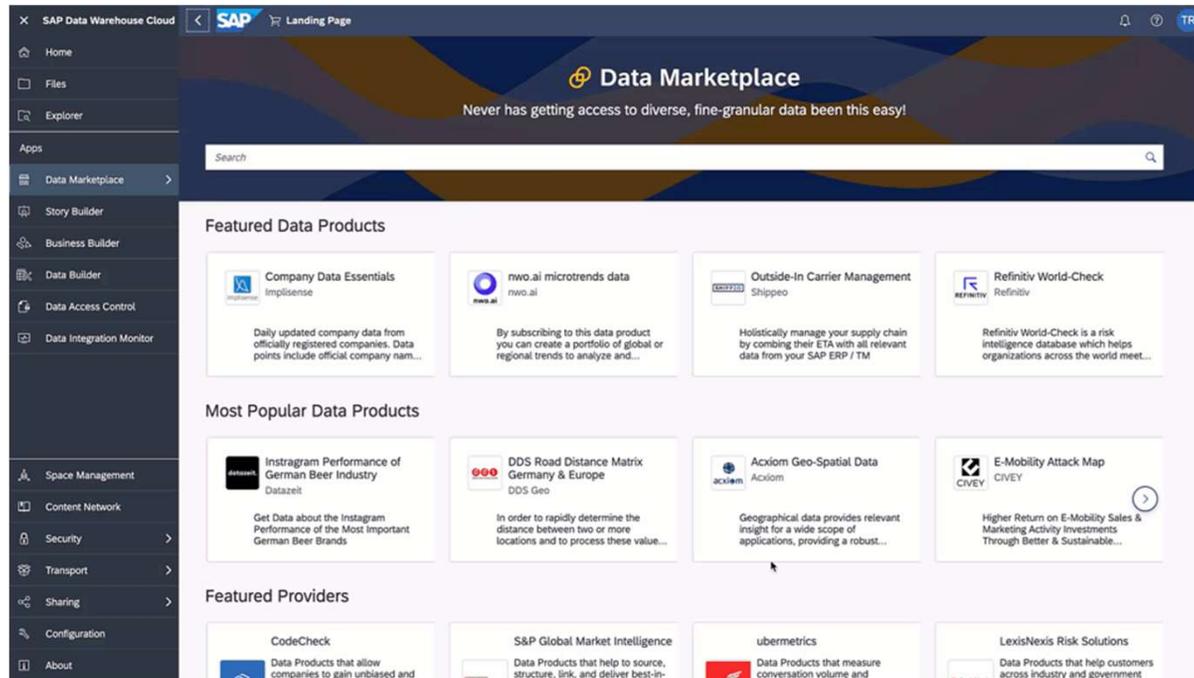

Data Integration

- Handling of schedules upon user deletion

Data Privacy and Protection

- User and authorization management audit

Data Marketplace – Access to External Data in Clicks, Not Projects

In-App Data Discovery Experience for transparent evaluation of more than 100 Data Providers & 3000+ data products through the cooperation with [Datarade.ai](https://www.datarade.ai)

Complimentary Deployment Channel as you can bring your existing data provider license with no brokerage for SAP

Managed Data Integration & Update Management for sustainable adoption of external data sources

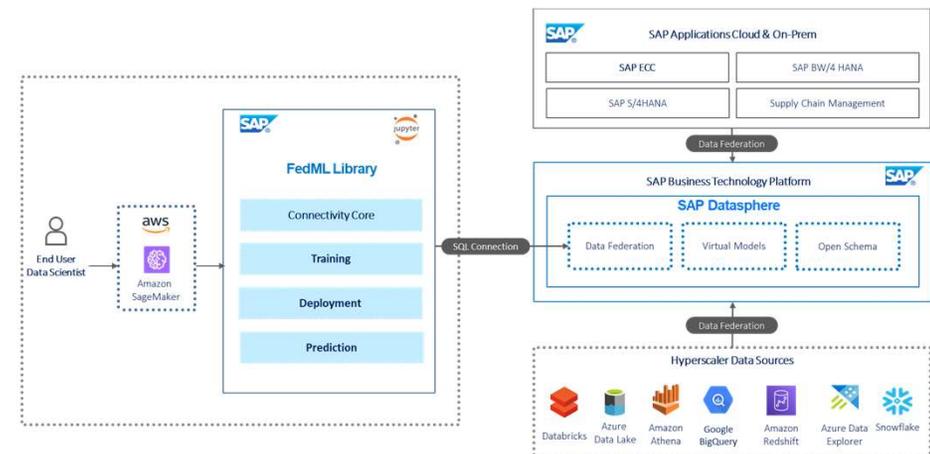

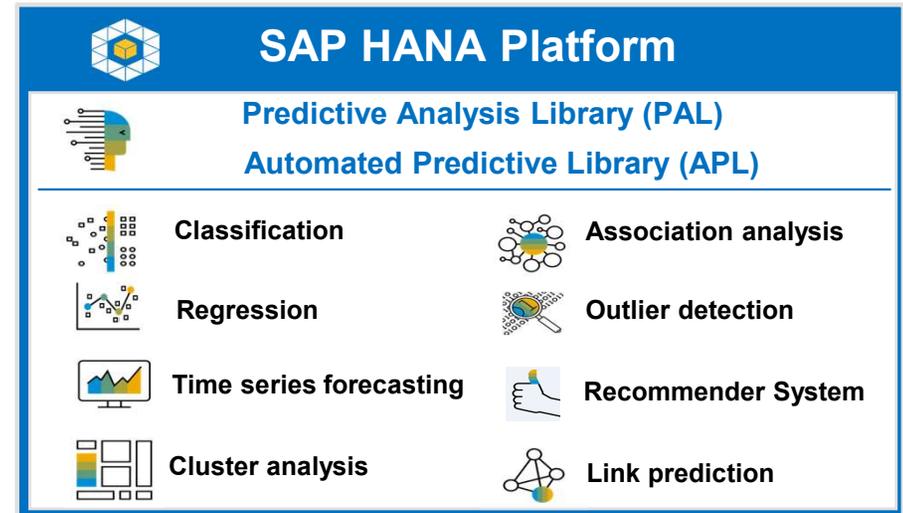

Seamless Consumption with SAP Analytics Cloud, SAP Data Intelligence & SAP HANA Cloud or the 3rd Party Frontend Tool of Customer Choice

Unparalleled Data Management Functionality for Data Enrichment & Harmonization with SAP Data for Business & IT Users

Built-in Machine Learning

- **Predictive Analysis Library (PAL)**
 - Addresses key scenarios like Classification, Regression or Time Series Forecasting (and more)
 - High performance parallel mass prediction, real-time transactional speed prediction
- **Automated Predictive Library (APL)***
 - Addresses key scenarios like automated Classification, Regression or Time Series Forecasting (and more)**
 - **Automation** is based on concepts of “Structural Risk Minimization” and **covers analysis steps** of *automated variable selection, data preparation, variable encoding, missing value handling, outlier handling, binning and banding, model testing and best model selection*
- **Federated Machine Library (FedML) Library**
 - library provides the ability to build, train and deploy machine learning models from any data source in a hyperscaler service without the need of replication or migration from its original source

SAP BW Bridge. Value Proposition

What is the SAP BW bridge?

A SAP Datasphere **feature** that provides a path to the public cloud for SAP BW NetWeaver and SAP BW/4HANA customers.

Offers key capabilities of SAP BW directly in SAP Datasphere:

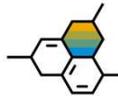

- **Connectivity & Business Content** providing proven SAP BW-based data integration (Extractors) from SAP ECC and SAP S/4HANA
- **Enterprise-ready staging layers** of SAP BW for managing data loading with partitioning, monitoring, error handling
- **Tool-supported move** of SAP BW-based integration and staging

What are the key value propositions?

Re-use for business continuity

Leverage SAP BW data structures, transformations, customizations, and skills – quickly extending your SAP BW investments to the public cloud

Connect with confidence

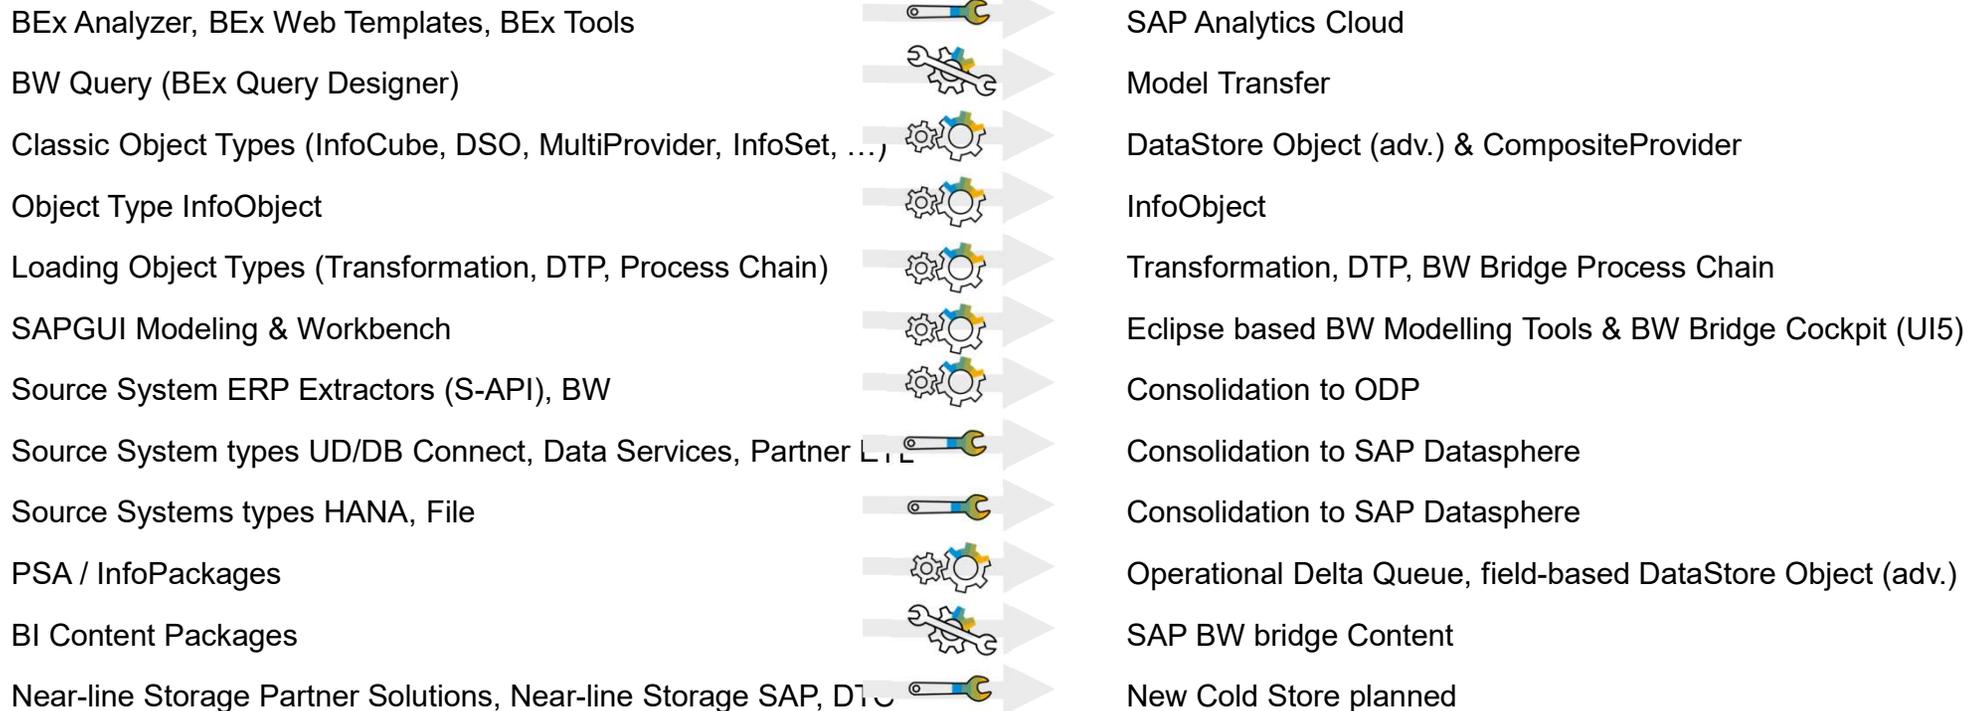

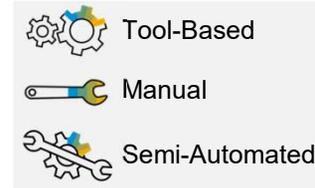

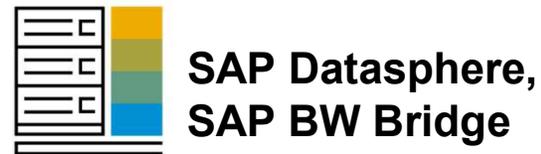

Integrate on-premises SAP Business Suite data with familiar connectivity and semantic richness – retaining instant access while expanding your analytics depth

Innovate with cloud agility

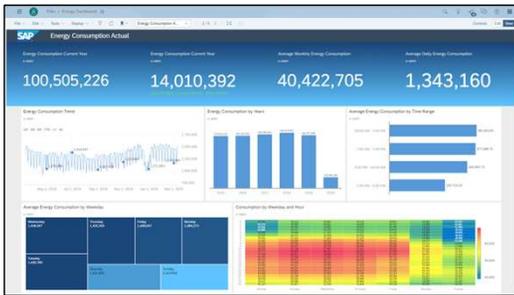

Empower your business to rapidly innovate on BW data with an open, unified data & analytics cloud service – scaling innovation and efficiency in the cloud

Conversion Paths to SAP Datasphere, SAP BW Bridge

Use. Choice and openness

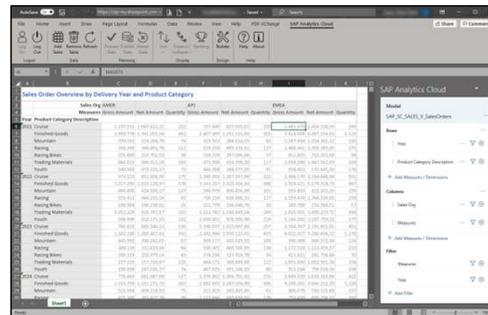

SAP Analytics Cloud

One seamless user experience

- Direct consumption of models in SAP Analytics Cloud (live connection)
- Any number of SAP Datasphere systems can be connected to any number of SAP Analytics Cloud systems

MS Office Integration

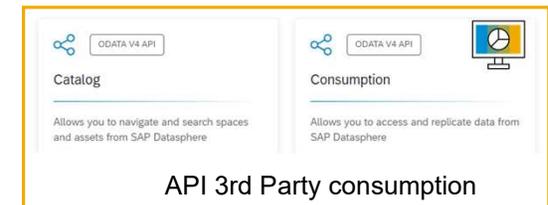

Live Connection to MS Excel

- SAP Analytics Cloud, add-in for Microsoft Office 365 (live connection) online or desktop version
- SAP Datasphere with SAP Analysis for Microsoft Office 2.8 SP14+

External API

jupyter Excel R Studio
PowerBI Tableau zepl

External API for consumption

- Freedom of choice
- Use consumption interface to connect any 3rd party front end tool to your exposed views
- Make your data models accessible for consumption tools & applications

BI, Augmented Analytics, and Planning on one common platform

Monitor & Process

- Monitor & Alert
- Process execution

Ask

- Understand status quo
- Model business questions

Act & Visualize

- Review Data
- Smart Analytics
- Trigger Actions

Collaborate

- Share Stories
- Run Discussions
- Enter Comments

Analyze

- Adhoc insights
- Data Exploration

Plan

- Input / Adjustment
- Distribution & Allocations
- Advanced Formulas

Predict

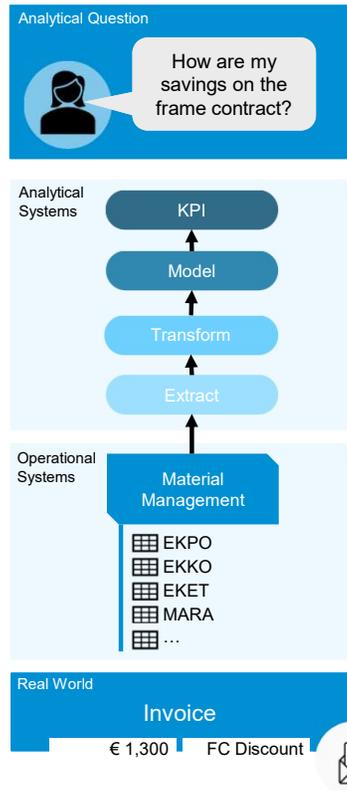

- Time Series Forecast
- Planning Proposition
- Driver determination

1 Powerful Analytics, Planning & Applications create a closed loop from insight to action

2 Link Operational and Financial data from all LoB's data to see one version of the truth in context

3 Integrate with enterprise applications in real time to bring intelligence to the end user

SAP Datasphere Business Content

Business Content Collection

Leverage SAP's business expertise and knowledge from our ecosystem of partners with pre-built data models, semantic views of SAP application data, and transformation logic.

Continuously growing number of content packages

- 250+ Content packages built by SAP & Partners for SAP Analytics Cloud and SAP Datasphere
- 31 Content Packages with SAP BW Bridge (11,000+ reusable objects)
- SAP S/4HANA Content Generation (1,000+ Fiori apps ready for import)

SAP Datasphere

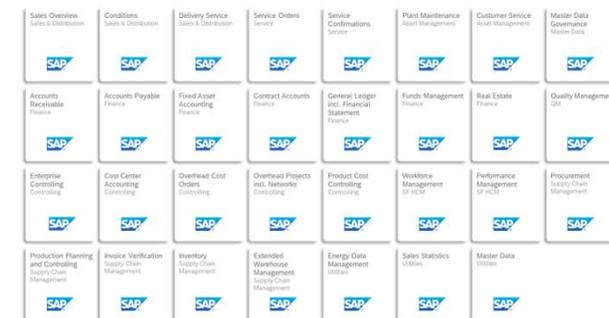

SAP

Partner

SAP BW Bridge

SAP Analytic Cloud

Accelerate Outcomes with Prebuilt Business Content

Accelerate customer outcomes with prebuilt line-of-business and industry content packages from SAP and partners.

Line of business

- Advanced compliance reporting
- Carbon footprint analytics
- Environment, health and safety
- Finance
- FI operational expense planning
- Human resources
- Liquidity planning
- Marketing
- Procurement
- Product cost planning
- Project and portfolio management
- Project budgeting and planning
- Project staff planning
- Sales and distribution
- Sports one
- Trade management
- Travel and expense
- Treasury management for SAP
- Vendor management system
- Workforce planning
- + many more

Industry

- Trading and risk management analysis
- Banking
- Chemicals
- Consumer products
- Customer profitability analysis
- Engineering, construction and operations
- Health care
- High tech
- Insurance
- Mill products
- Mining
- Oil and gas
- Professional services
- Public sector
- Higher education and research
- Real estate
- Retail
- Rural sourcing management
- Utilities
- + many more
