

precisely

Change The Way You
Work With SAP®
Through Automation

Winshuttle is now
part of Precisely,
the leader in data
integrity

The logo for Precisely, featuring the word "precisely" in a white, lowercase, sans-serif font. The letter "p" is stylized with a vertical bar extending downwards. The letter "o" is a large, 3D-rendered ring with a dark purple gradient and a shadow on the surface below it. The background is a solid purple color with a subtle gradient.

The global leader in data integrity software

Our data integrity software, data enrichment products, and strategic services deliver accuracy, consistency, and context to power confident business decisions.

Brands you trust, trust us

Data leaders partner with us

12,000

customers

Customers in more than
100 countries

99

of the Fortune 100

2,300

employees

The background features several abstract 3D-rendered geometric shapes in various shades of purple and blue. These include a large horizontal rectangle at the top left, a sphere to its right, a vertical rectangle on the right side, a sphere below the top-left rectangle, a sphere to the left of the vertical rectangle, and a square at the bottom center. The lighting creates soft shadows and highlights, giving the shapes a sense of depth.

Empowering business teams
to make an impact

Explosion of data

Data is the fuel for decision-making today

\$1.3 trillion spent
on digital transformation
last year

80% of CEOs
accelerating digital
transformation

67% spending
more on technology
than people

64 Zetabytes
of data today,
growing to 180+
zetabytes by 2025

Tackle process and data together

- Product launches
- Product data management
- Customer onboarding & management
- Vendor onboarding & management
- Asset management
- Financial master data

New Product Data

Streamline complex processes

Dynamic process linking

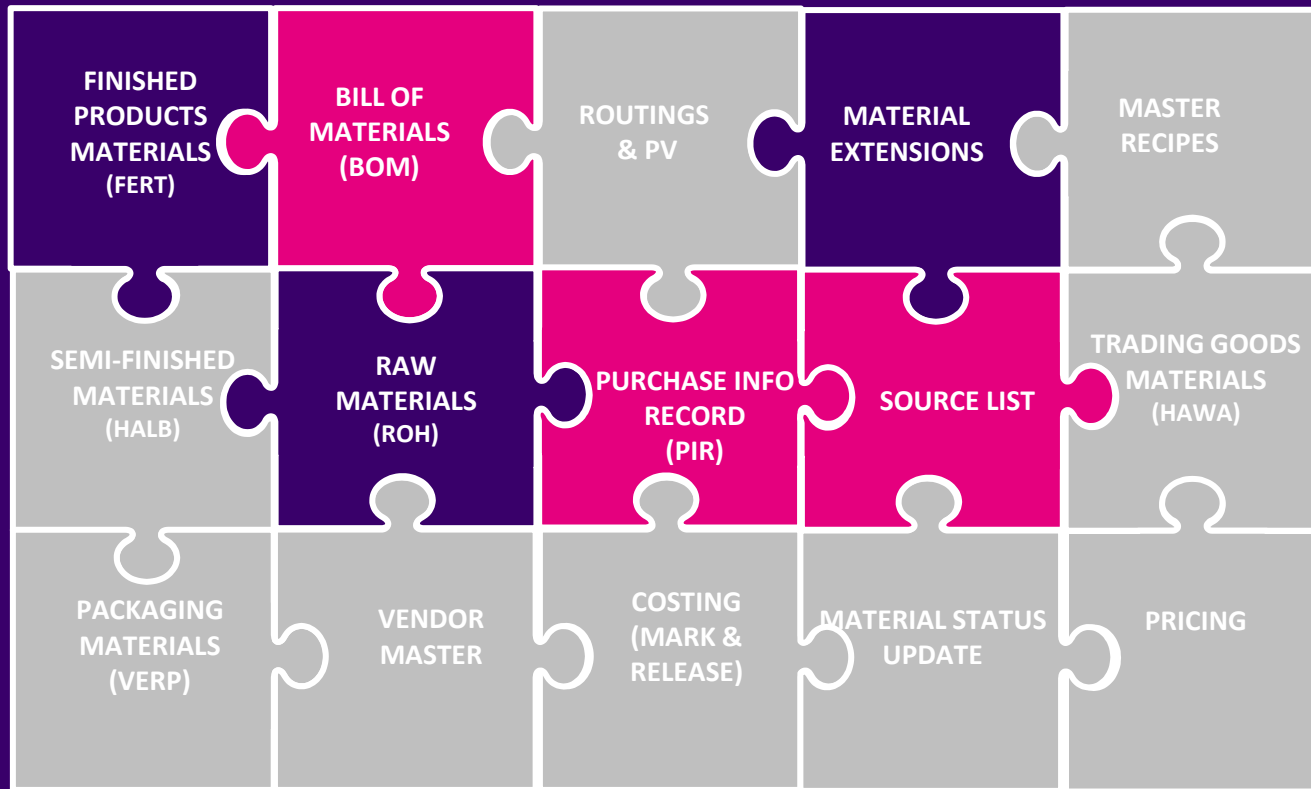

- Automate complex multi-layered processes
- Streamline data collection across data objects and business units
- Handle centralized and decentralized data in one solution

Use **one solution**
for all your product
launch types

Modular, strategic product launch platform

- Start with the data objects that make sense for your business
- Expand over time
- Meet the needs of any organizational structure type
- Supports high complexity and volume

Automate SAP processes when:

- Errors have costly consequences
- Take too long, impacting business/revenue
- Are complex with many participants
- Contain complex data & can span many objects
- With high volumes of data maintenance requests

What's next for SAP automation?

Integration into
larger, complex
processes

Incorporation of
AI and machine
learning

Automating Fiori
processes
