DataLark Popular Use Cases

Foreground Processing

- **Application Migrations** (new implementations and migrations from ECC or non-SAP to S/4)
- **Selective Data Extraction & Migration** (company acquisitions)
- **Bulk Test Data Creation** (for QA and Training environments)
- **Cloud Migrations** – from on-prem/cloud to cloud data warehouses and data lakes.
- **Ongoing Data Manipulations / Data Wrangling** (e.g. as part of regular business processes)

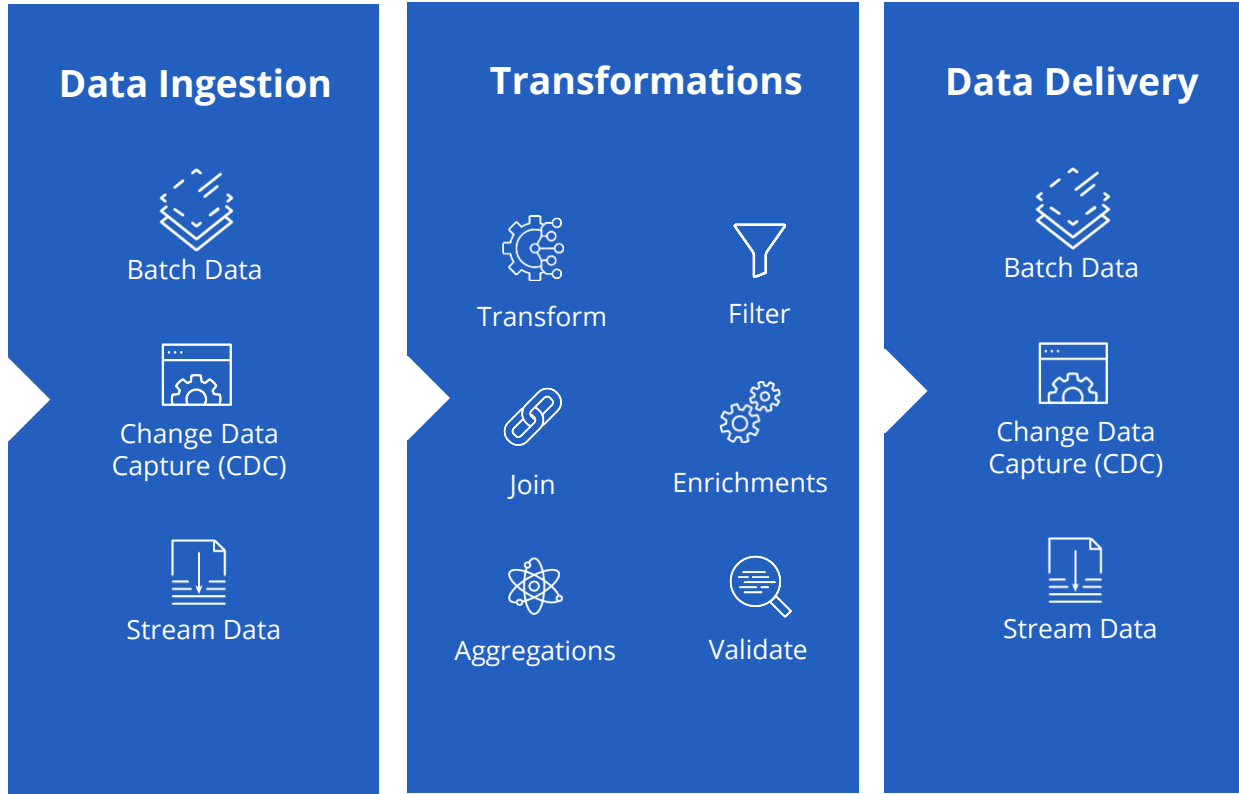

Background Processing

- **Integration with External Systems** (WMS, MES, eCommerce, HR, Authoring Tools, CAD)
- **Master Data Consolidation** (bringing master data from multiple sources)
- **Process Automation** (event or schedule based)
- **Cloud Integration & Data Pipelines** (batch or data streaming)

DataLark Architecture

Sources

-  DBMS
-  Files
-  Applications
-  Cloud Services
-  Machine Data
-  Message Queues

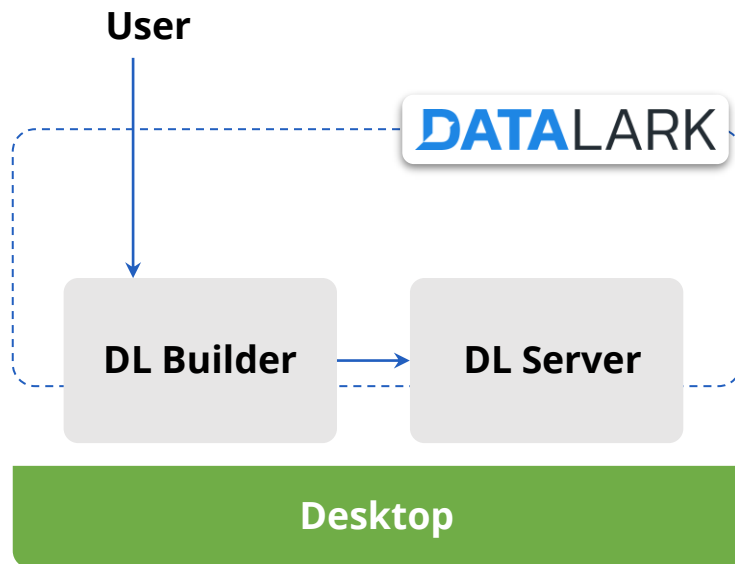

Targets

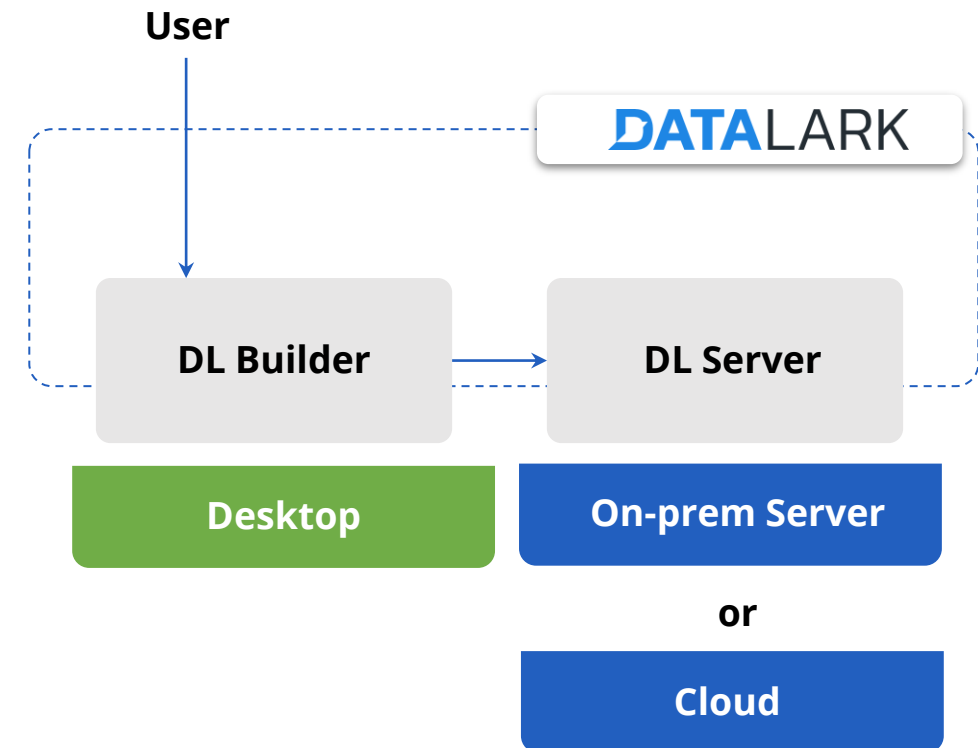

-  Data Warehouse
-  Data Lake
-  Cloud Services
-  AI / ML
-  Message Queues

DataLark Runtime Options

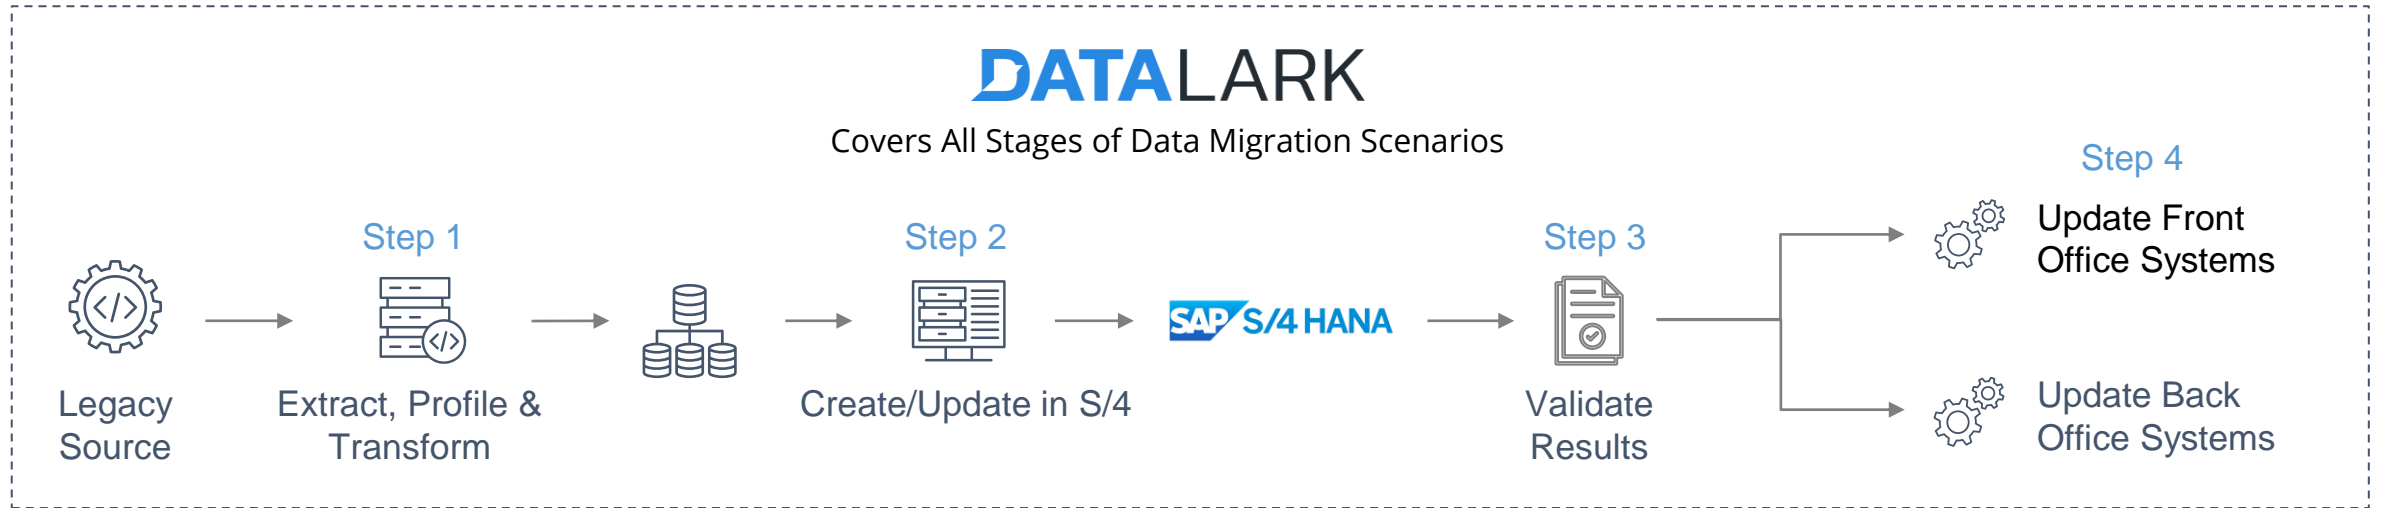

USER CONTROLLED OPERATION (Desktop Mode)

AUTONOMOUS OPERATION (Server Mode)

End-to-End Migration Process with DataLark

LeverX Data Management Team

Holistic E2E data migration approach

Strong team with diverse and relevant skillset

Knowledge of leading industry practices

Best in class Tools and accelerators

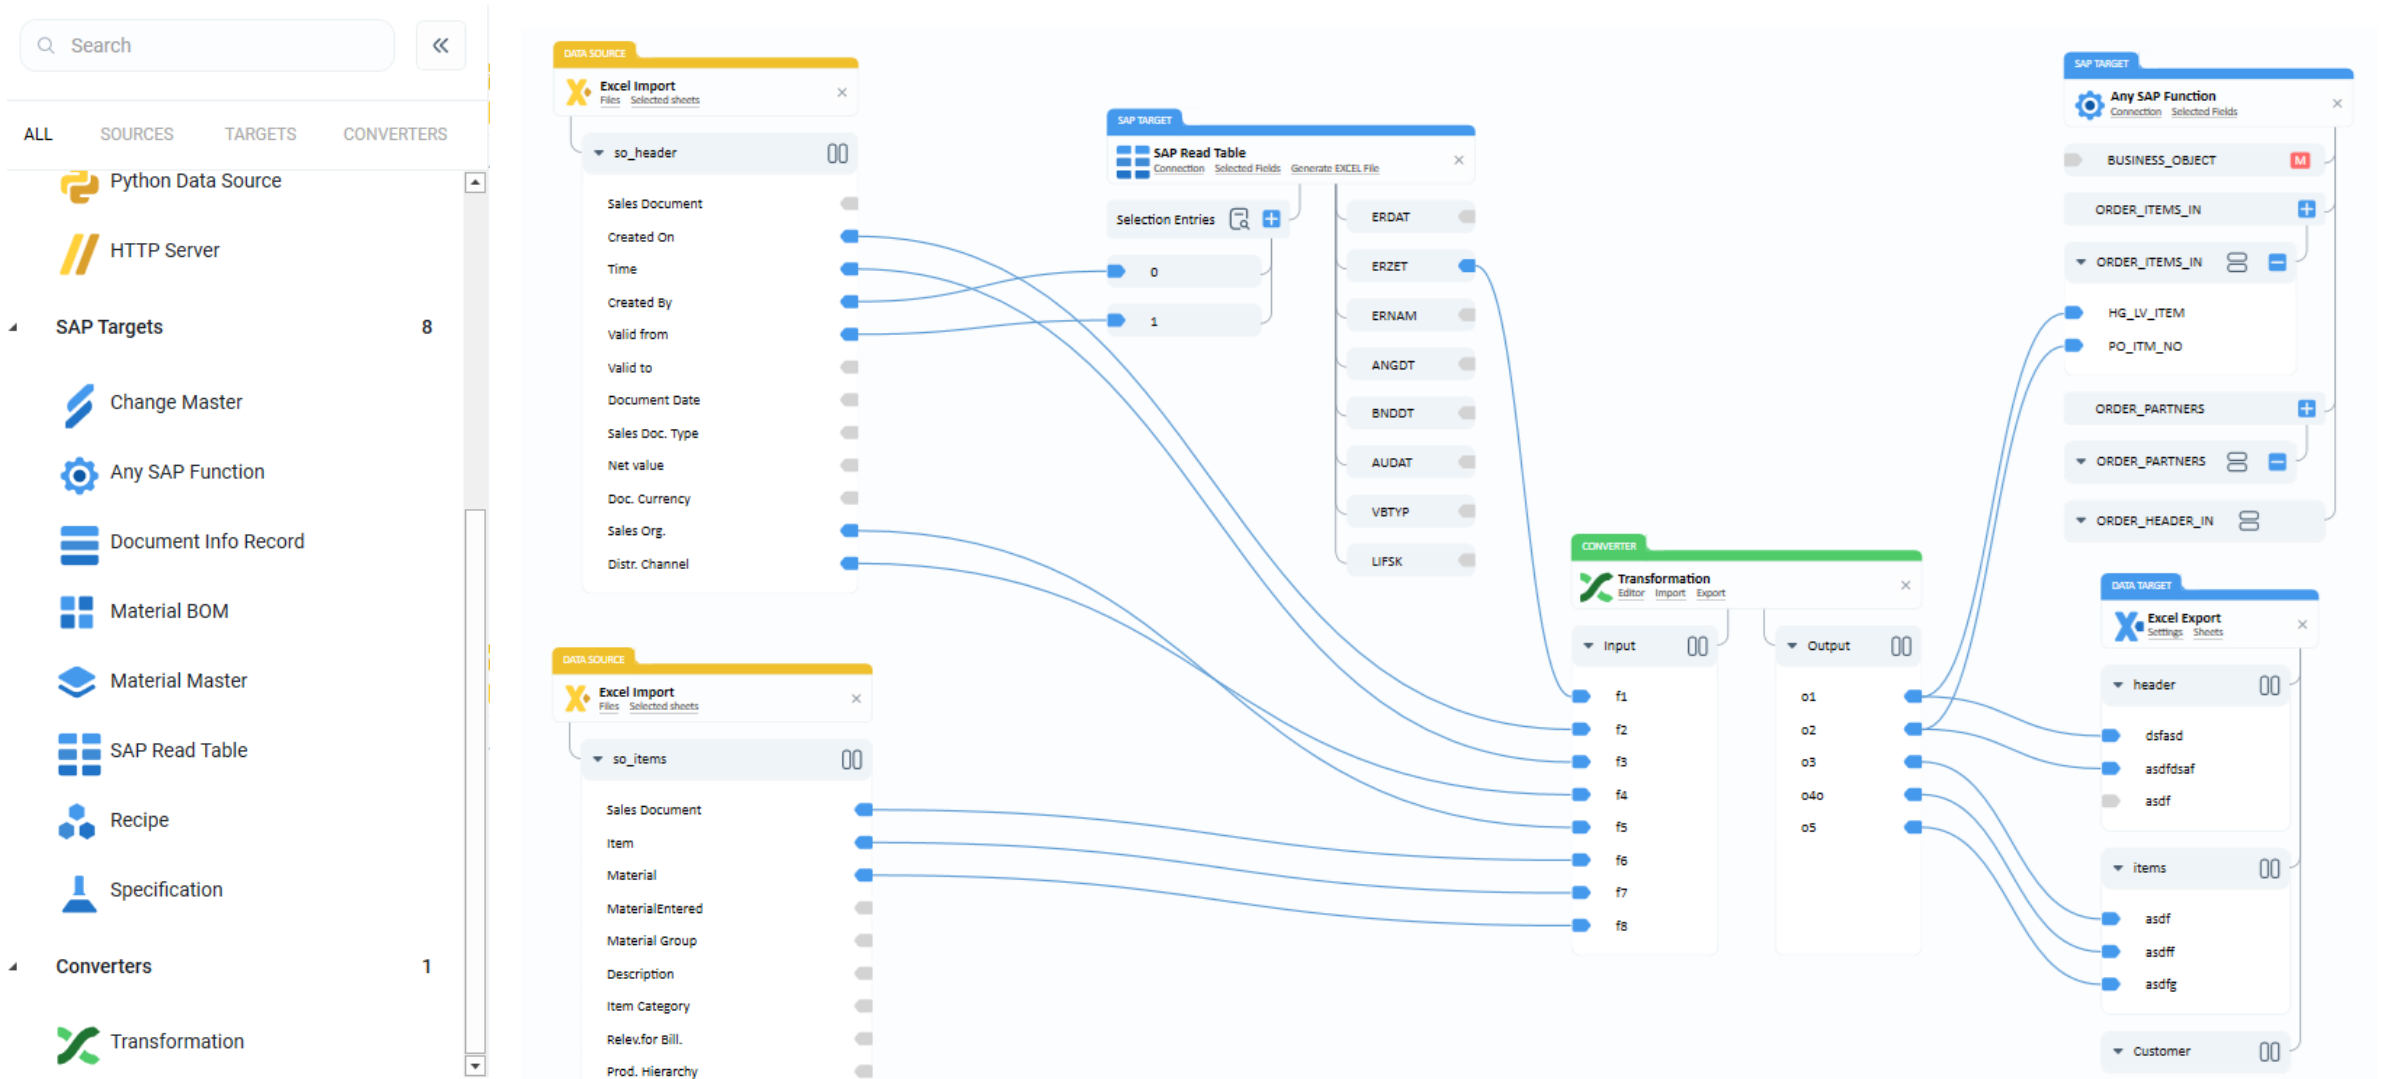

Agility in Execution and Delivery

No disruption to business operation

DataLark User Interface

Migration to S/4HANA

Data Extraction, Preparation and Load Using DataLark

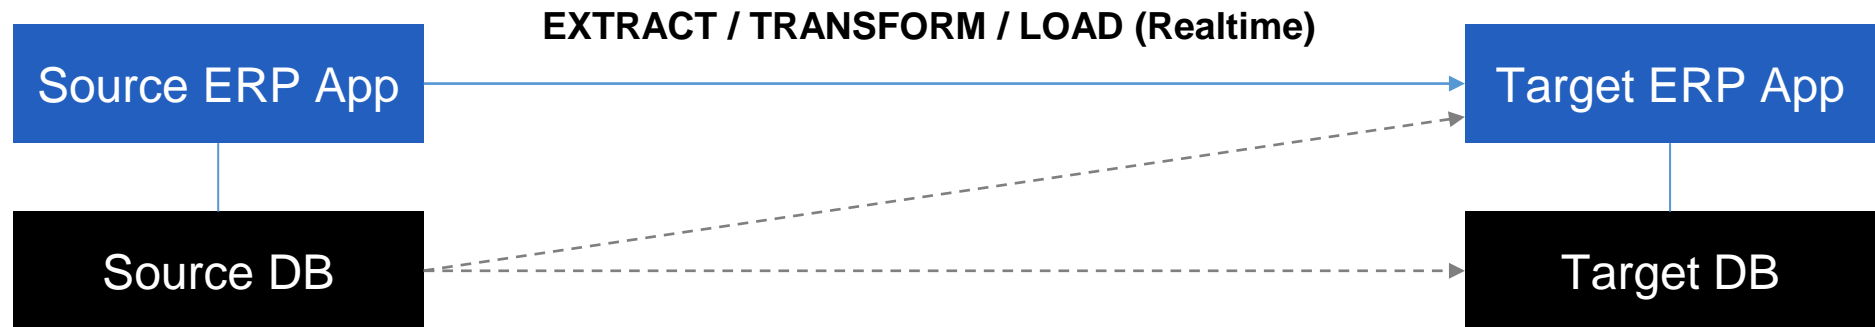

DataLark: Available Transfer Methods (i)

Method with Data Staging

DataLark: Available Transfer Methods (ii)

Direct Data Transfer Method

DataLark Key Differentiators

Designed for business users

Modern and intuitive user interface

Unlimited flexibility and extensibility

Desktop, Server, and Cloud Deployments

Small Footprint (Desktop version)

No need for IT involvement (Desktop and Cloud versions)

Rapid Deployment and User Training

Flexible pricing model
