Open and extensible

SAP Change Impact Analysis by Tricentis

Analyzes your SAP systems and usage to learn everything about your SAP landscape, including business processes, integrations, custom code, and security.

Uses AI to determine the risks in any change to your SAP system, factoring in landscape and usage data to pinpoint exactly **which objects need testing**.

Finds matching test cases (and gaps) when integrated with testing solutions such as SAP Enterprise Continuous Testing by Tricentis.

Drive **acceleration and cost avoidance** through test scope reduction

AI-Powered Impact Analysis for SAP

Core Functionality & Use Cases
