SAP ERP, ECC, and S/4HANA

Knowledge & Talent Gap

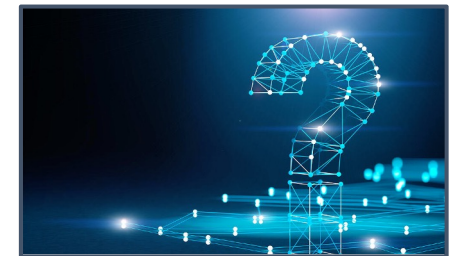

Misunderstanding of SAP Products

Major Differences in UX/UI

Business Continuity & Flow

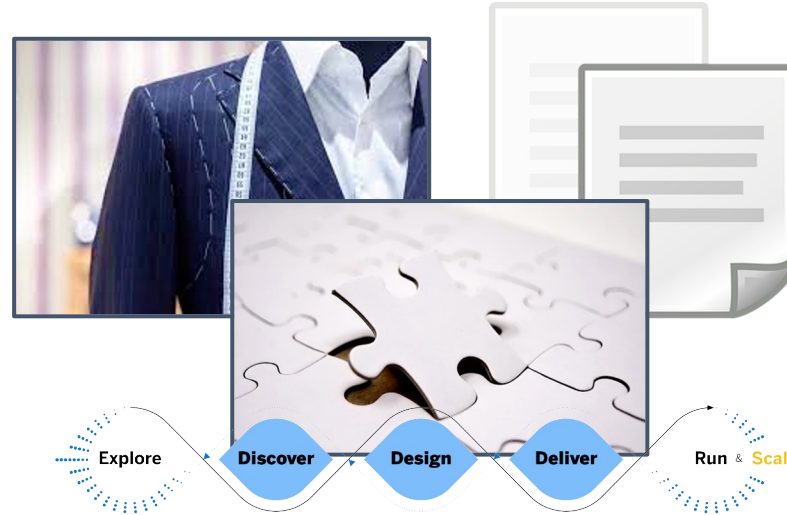

Contextualized Technology

ERP Related Topics - Triumphs

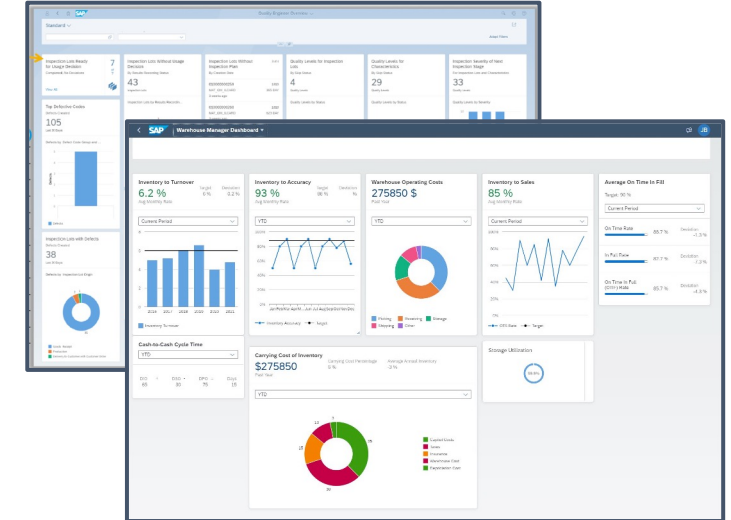

SAP ERP, ECC, and S/4HANA

Intelligent Enterprise
Machine Learning, Deep Learning,
Artificial Intelligence, Automation,
Robotics Process Automation

Implementation Approach
Fit to Standard & Design Thinking
vs
Bespoke/Tailored, Fit of Template

S/4HANA Analytics
Embedded/In-Line
SAP Analytics Cloud
(Drill through & back, getting more
contextualized)

ERP Related Topics - Wisdom

SAP ERP, ECC, and S/4HANA

1. Thou shalt have a purpose, and everyone and everything shall know it

2. Thou shalt empower thy leaders to make decisions, and support them

3. Thou shalt choose thy system integrator in wisdom, and hold them accountable to their statement of work

4. Thou shalt keep thy emotions in check

5. Thou shalt quash all thieftoms, empires, and dominions

6. Thou shalt appoint an empowered internal transformation champion and a trusted program manager

7. Thou shalt realize that scope, schedule, and costs have a direct correlation with one another

8. Thou shalt understand how and why thou are implementing ERP...Fit to Standard, Fit to Purpose, Fit to Template

9. Thou shalt understand that governance, risk, and compliance are crucial and that they can impact scope, schedule, and costs quickly and dramatically

10. Thou shalt understand greater than 90% of thy organization's processes are exactly the same as thy industry peers

Integration, Innovation & Extensibility

SAP BTP Overview

SAP BTP - Extensibility Tools

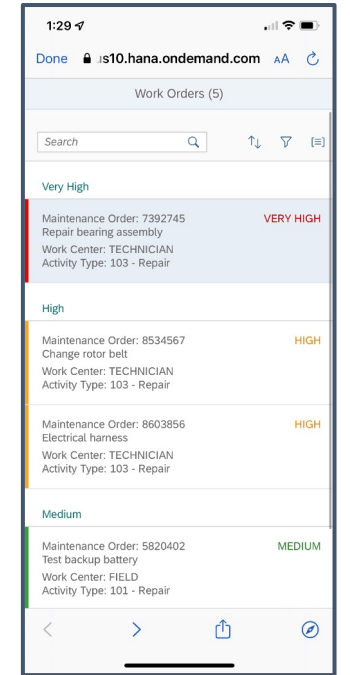

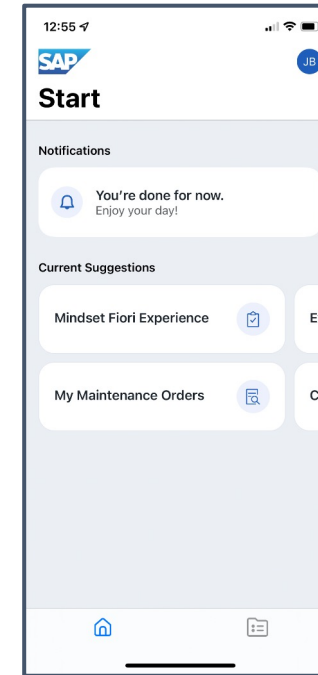

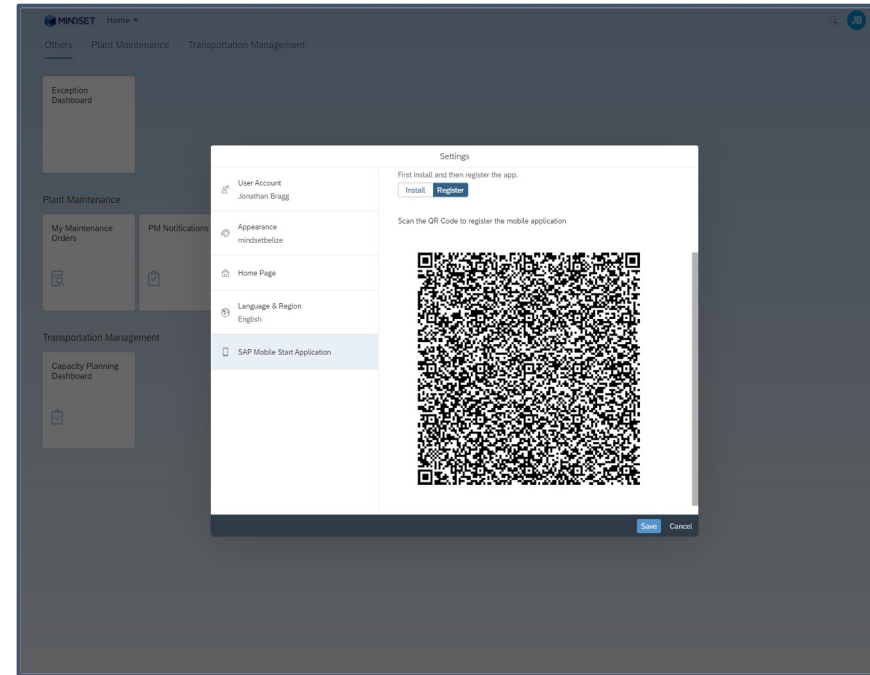

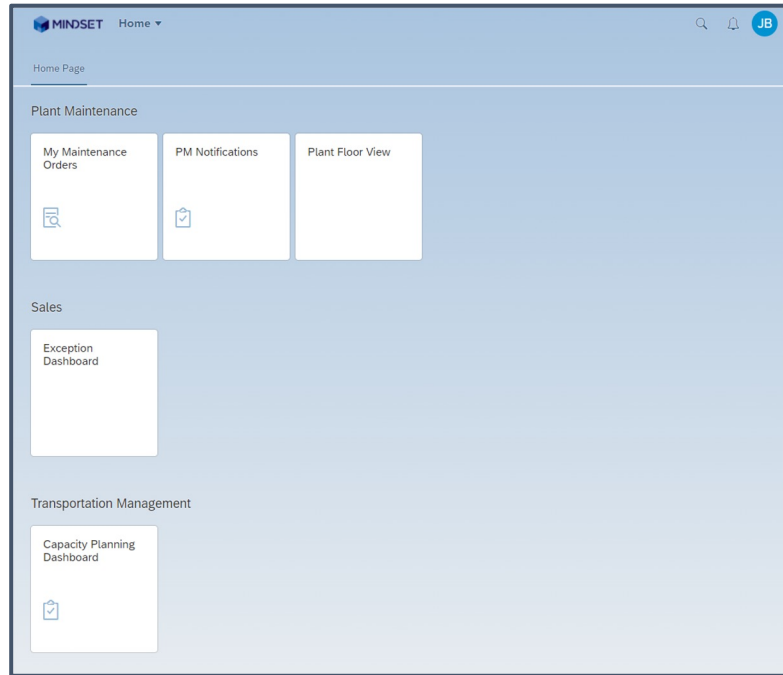

SAP BTP - Fiori Launchpad Service & Mobile Start

Step 1: Launch Portal Service FLP

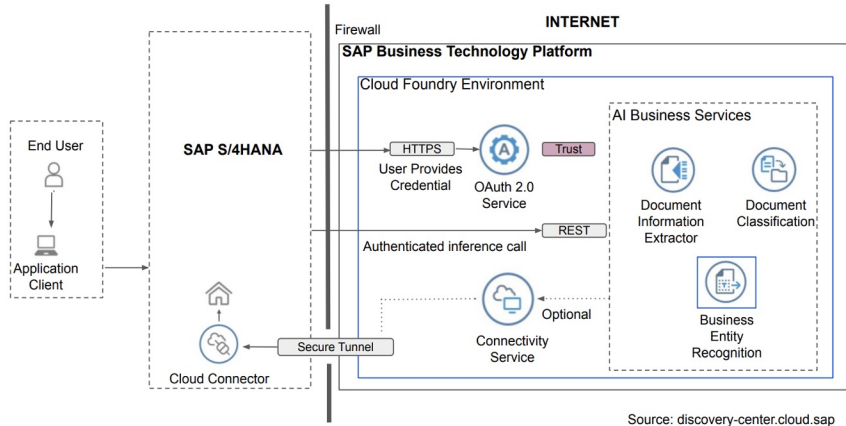

Step 2: Settings → SAP Mobile Start

Step 3: Launch app on phone, logon, and use the same apps immediately

SAP BTP - Popular Innovation Services

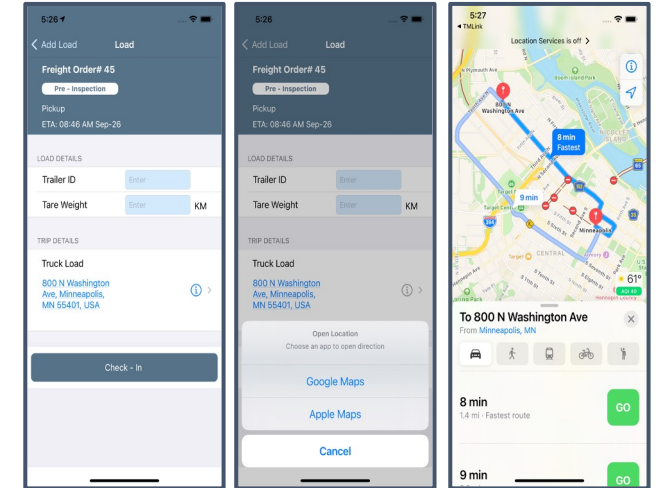

SAP iRPA

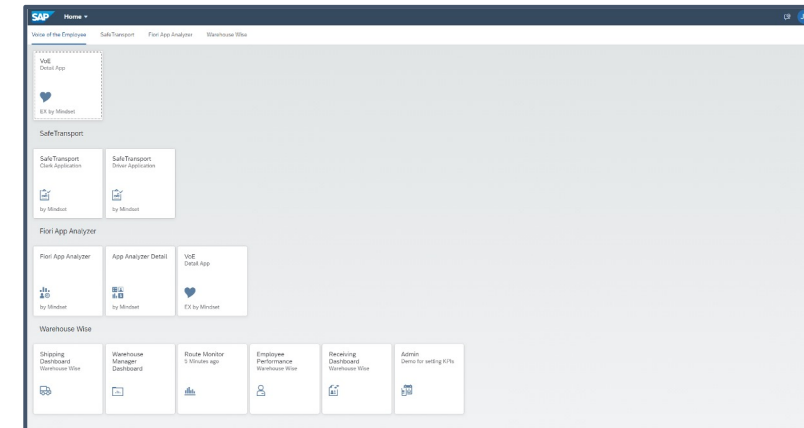

SAP Analytics Cloud

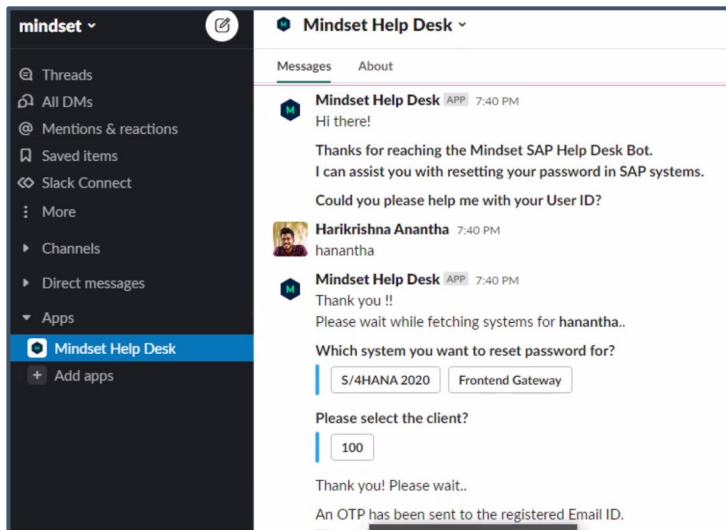

Mobile Services

BTP Central Entry Point

SAP CAI

Resources

[SAP Discovery Center](#)

The screenshot shows the SAP Discovery Center homepage. At the top, it says "Welcome to the SAP Discovery Center" and "Learn how to adopt SAP Business Technology Platform and turn data into business value." Below this is a search bar for "missions and services". The main content area is titled "OFFERINGS Our Cosmos" and features two primary cards: "Missions" (with a rocket icon) and "Services" (with a satellite icon). Each card includes a brief description and buttons for "Mission Catalog" and "Learn More". Below this is a "FLEET Featured Content" section with four cards: "Getting Started on SAP Business Technology Platform", "Learn how to model an Approval Process for Capital Expenditures", "SAP Analytics Cloud, embedded edition", and "SAP HANA Cloud".

[SAP API Business Hub](#)

The screenshot shows the SAP API Business Hub homepage. The header includes navigation links for "Explore", "Resources", "Discover Integrations", and "Partner with Us". The main heading is "SAP API Business Hub" with the tagline "Accelerate your integrations, extensions, and innovations". A search bar is present. On the right, there are three vertical sections: "Discover" (Products, Processes, and Partners), "Explore" (Integrations, APIs, and Accelerators), and "Consume" (Visualize and consume integrations and workflows). Below this is a "Choose a Product to Explore" section with a grid of product cards: "S/4HANA Cloud", "S/4HANA", "Customer Experience", "BTP", "SuccessFactors", and "Ariba". Each card provides a short description and a "View All Products" link.

[SAP iRPA Store](#)

The screenshot shows the SAP Intelligent RPA Store. The header says "SAP Intelligent Robotic Process Automation Store". The main heading is "SAP Intelligent RPA Store" with the tagline "Discover the SAP Intelligent RPA Store where you can access predefined content for your automation". There is a search bar and a "Filters" section on the left. The main content area displays a list of "Packages (227)" with details for each, including the publisher, category, and application. The first package shown is "Authorization Roll Out" by NTT DATA Business Solutions AG, with a description: "Creating a stable and reliable authorization matrix is key for SAP implementation projects, requiring a lot of manual effort. With this robot, creation and assignment of roles will be automated and lifted to a much higher quality level." Other packages include "Production Order Operations (4FF)" and "Mass Asset Acquisition (Non-Integrated) (4MB)".
