- Final Thoughts
- Three Prize Questions!

An Overview of Business Process Management

PUBLIC

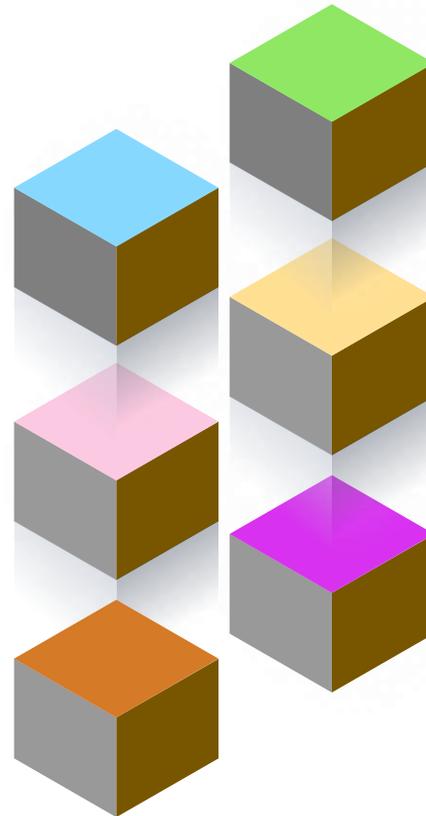

Given the volume of rich data, why is deriving business value so difficult?

Well, it may be due to the lack of...

...clear goals and objectives

...strategic alignment

...organizational buy-in

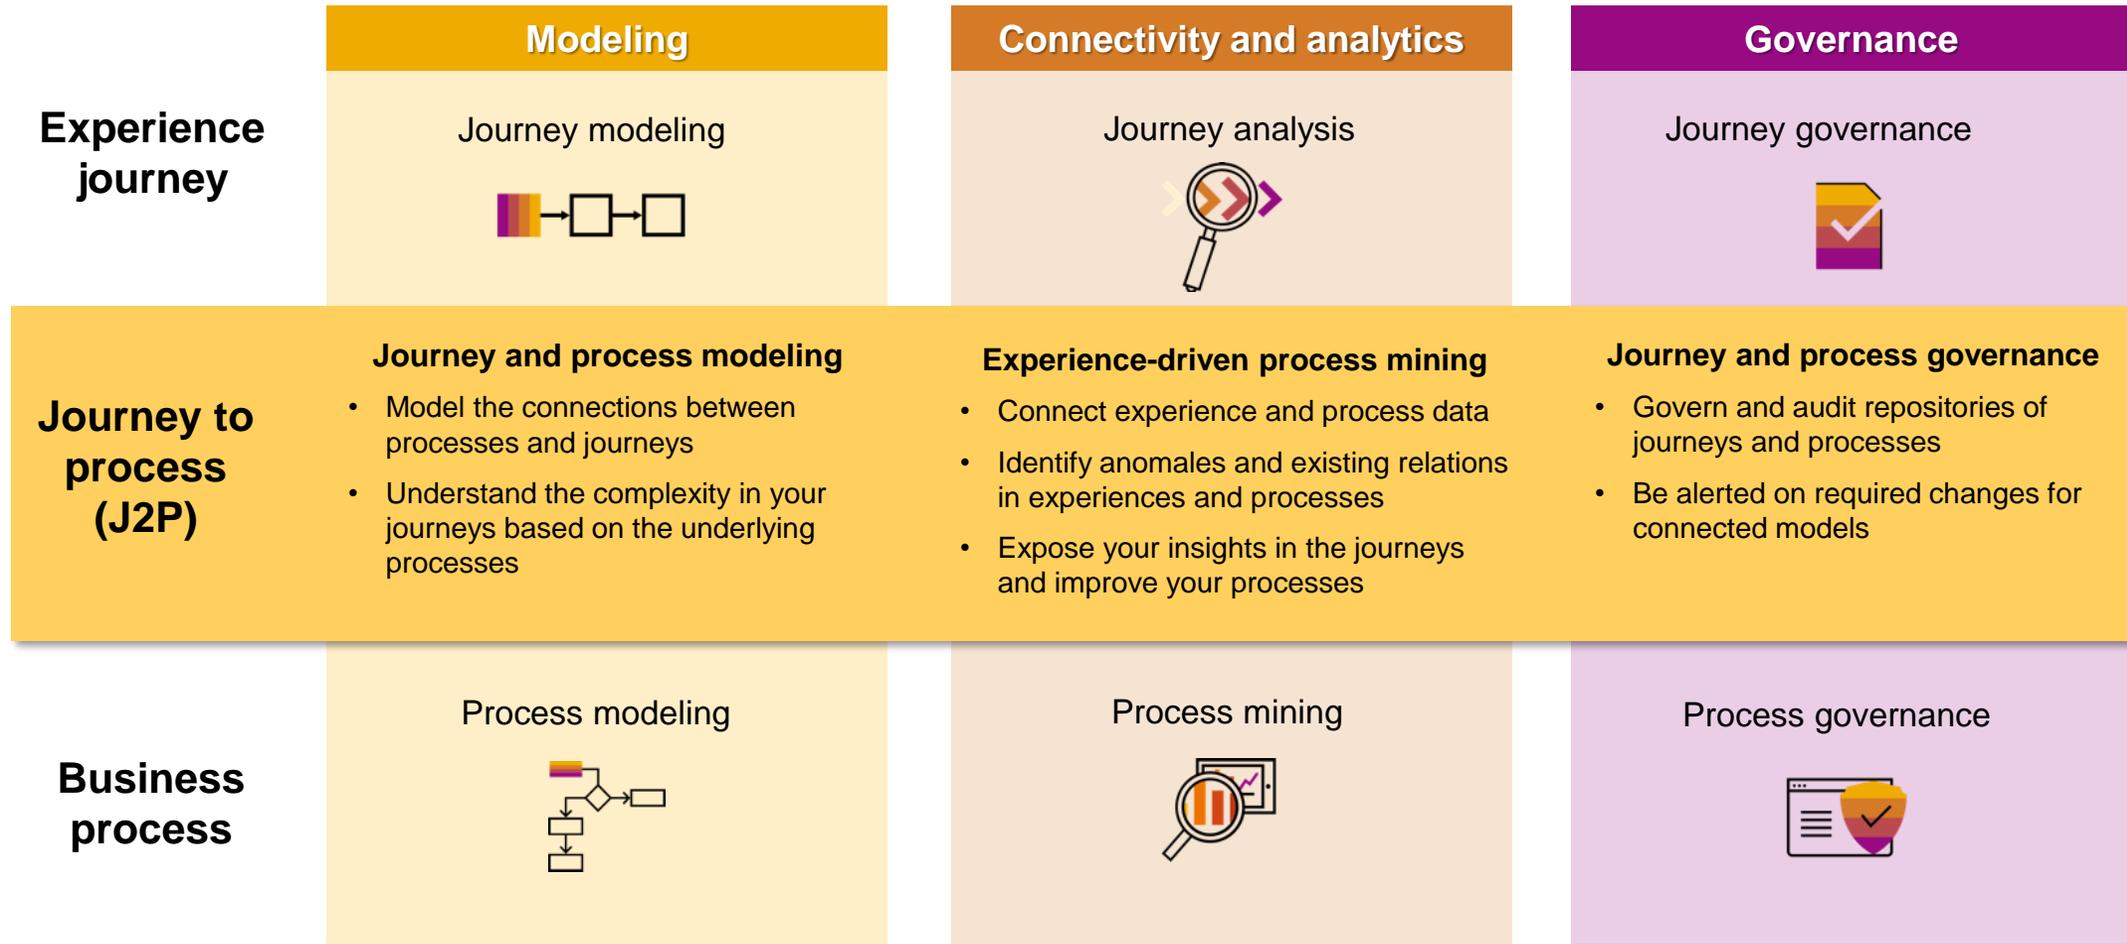

... communication

...data visibility

...people focus (abstractly
technology-driven)

Experience-driven modeling and analysis is key to delivering results

Journey to Process

The SAP Signavio Business Process Transformation Suite

PUBLIC

SAP Signavio Business Process Transformation Suite

End-to-End Optimization

1. Process analysis and mining

Complete process analysis for enterprise transformation and operational excellence programs

2. Process and journey modeling

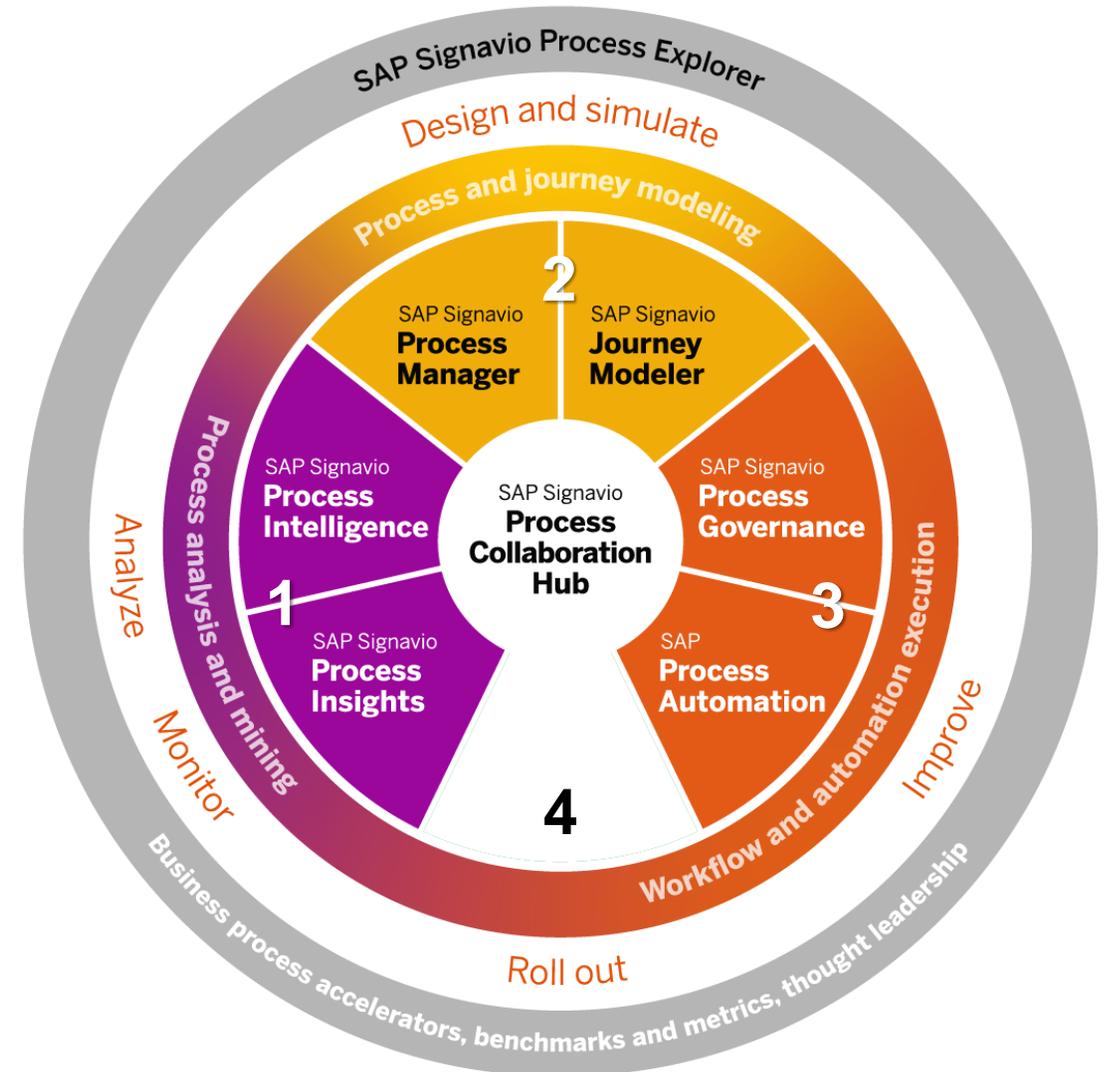

Standardized process and journey management, simulation, and modeling

3. Process governance and automated execution

Maintaining organizational and regulatory compliance for all documented processes

4. Process Collaboration

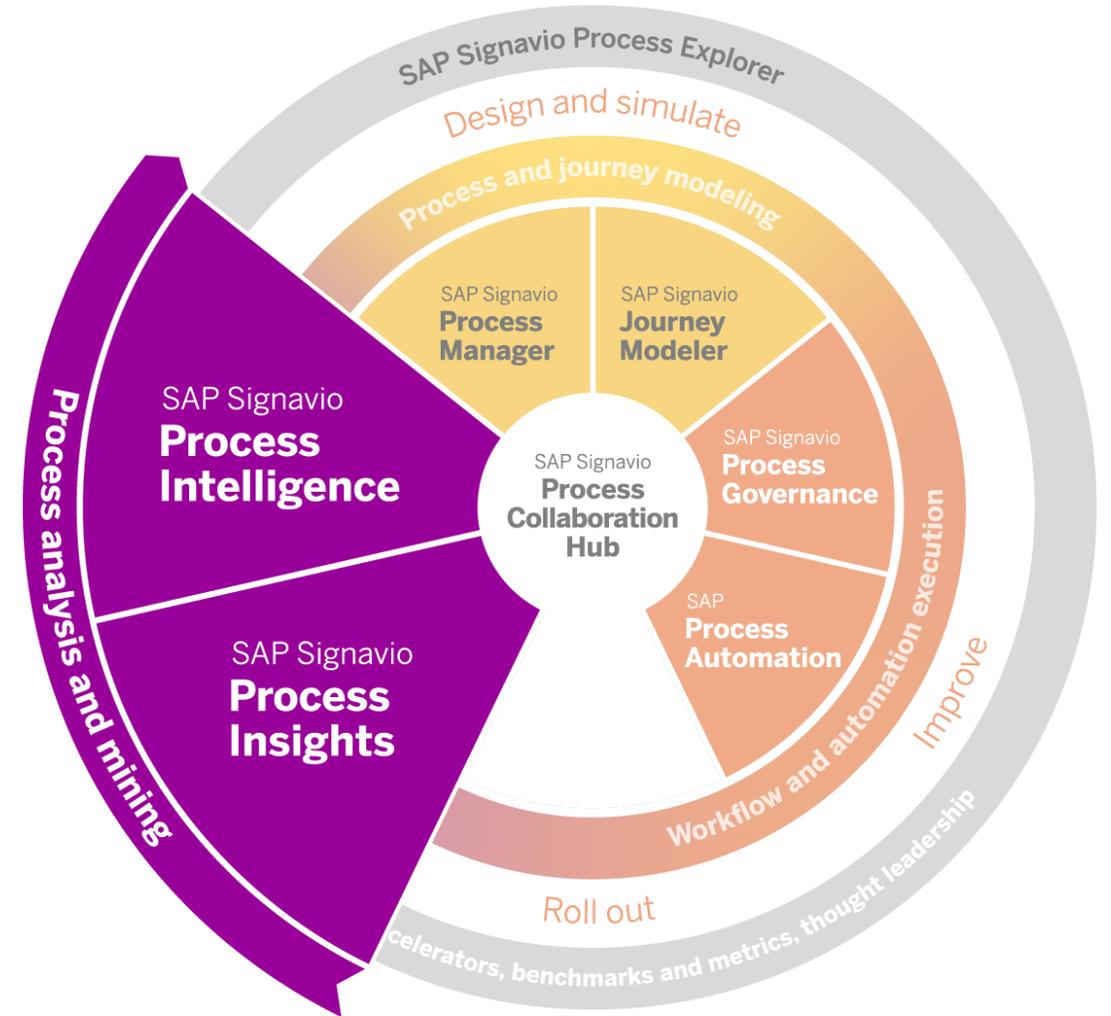

Stakeholder alignment and active collaboration across departments

Process analysis and mining

Benefits

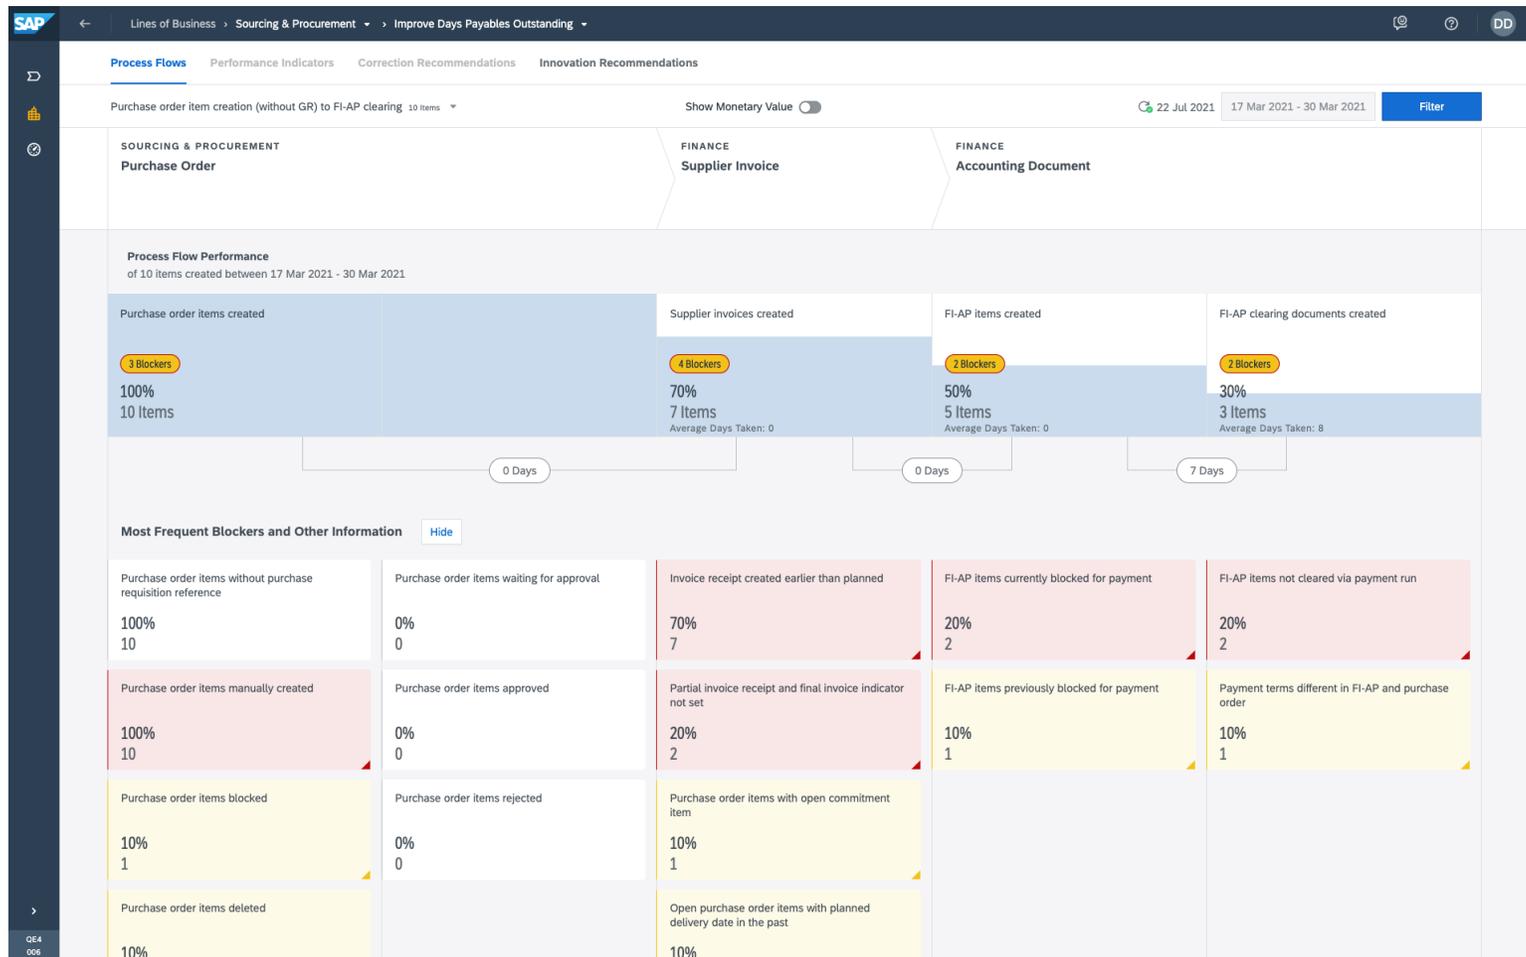

- Gain visibility into actual process execution bottlenecks and process inefficiencies
- Get recommendations for improvements
- Pinpoint improvement potential to drive transformative changes
- Gain visibility into process paths that lead to problematic experiences

SAP Process Insights*

Understand your process performance

Using 50+ delivered process flows and 1000+ typical issues and inefficiencies

Leverage data

Make data-driven decisions about which business areas to prioritize for improvement.

Get insights fast

Recommendations to SAP best practices and solutions.

Constantly evolve

The number of process flows increases with every release.

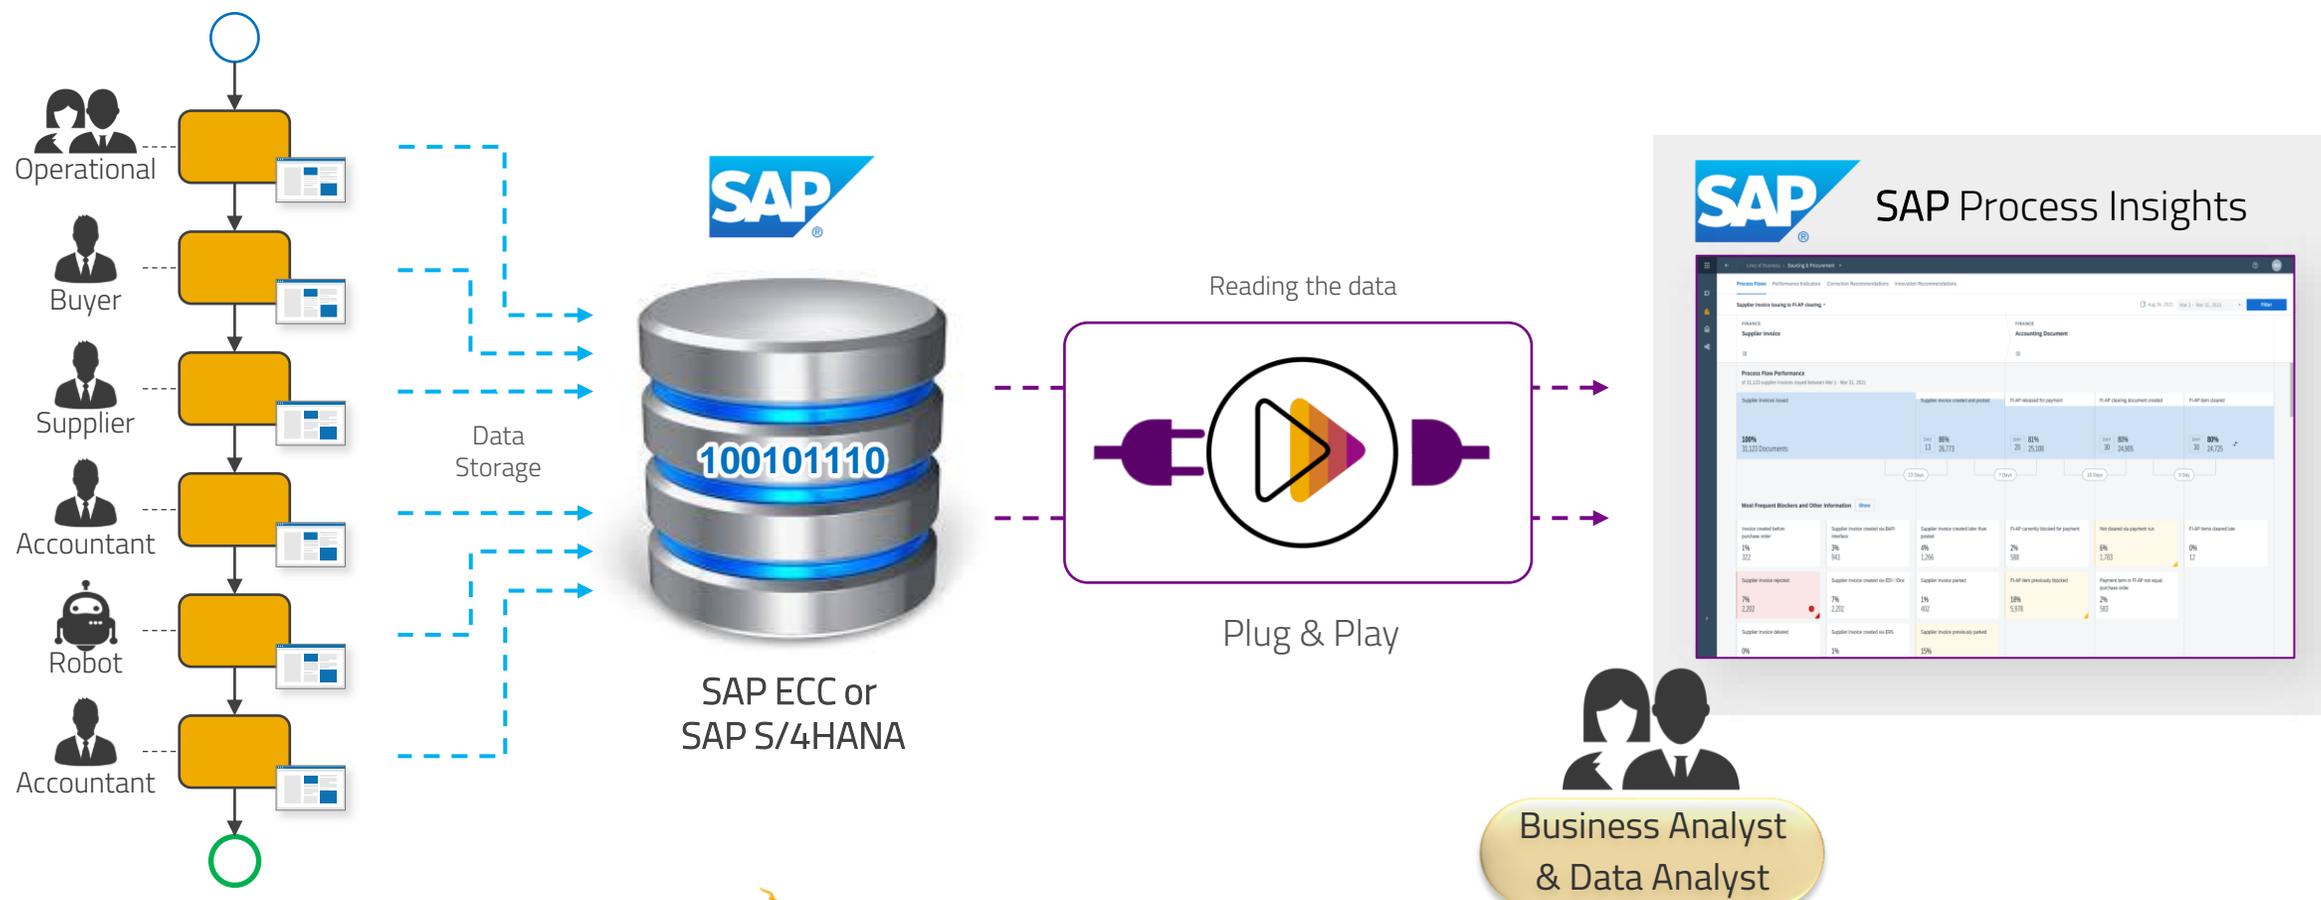

* Available for SAP customers only

SAP Signavio Process Insights

How does it work?

Get an end-to-end view of your company's performance with **1000+ Process Performance Indicators, recommendations** for improvement and **live data** for continuous monitoring.

SAP Signavio Process Intelligence

Unleash the potential of your process data

Reduce time to insights and identify levers to improve outcomes

Get full visibility into your process reality

Support internal efficiency programs. Improve the way you operate.

Uncover opportunities with process mining

Leverage ready-to-use insights, metrics, and powerful data querying capabilities to **uncover process inefficiencies, reducing your time to insights.**

Blend process and experience analytics

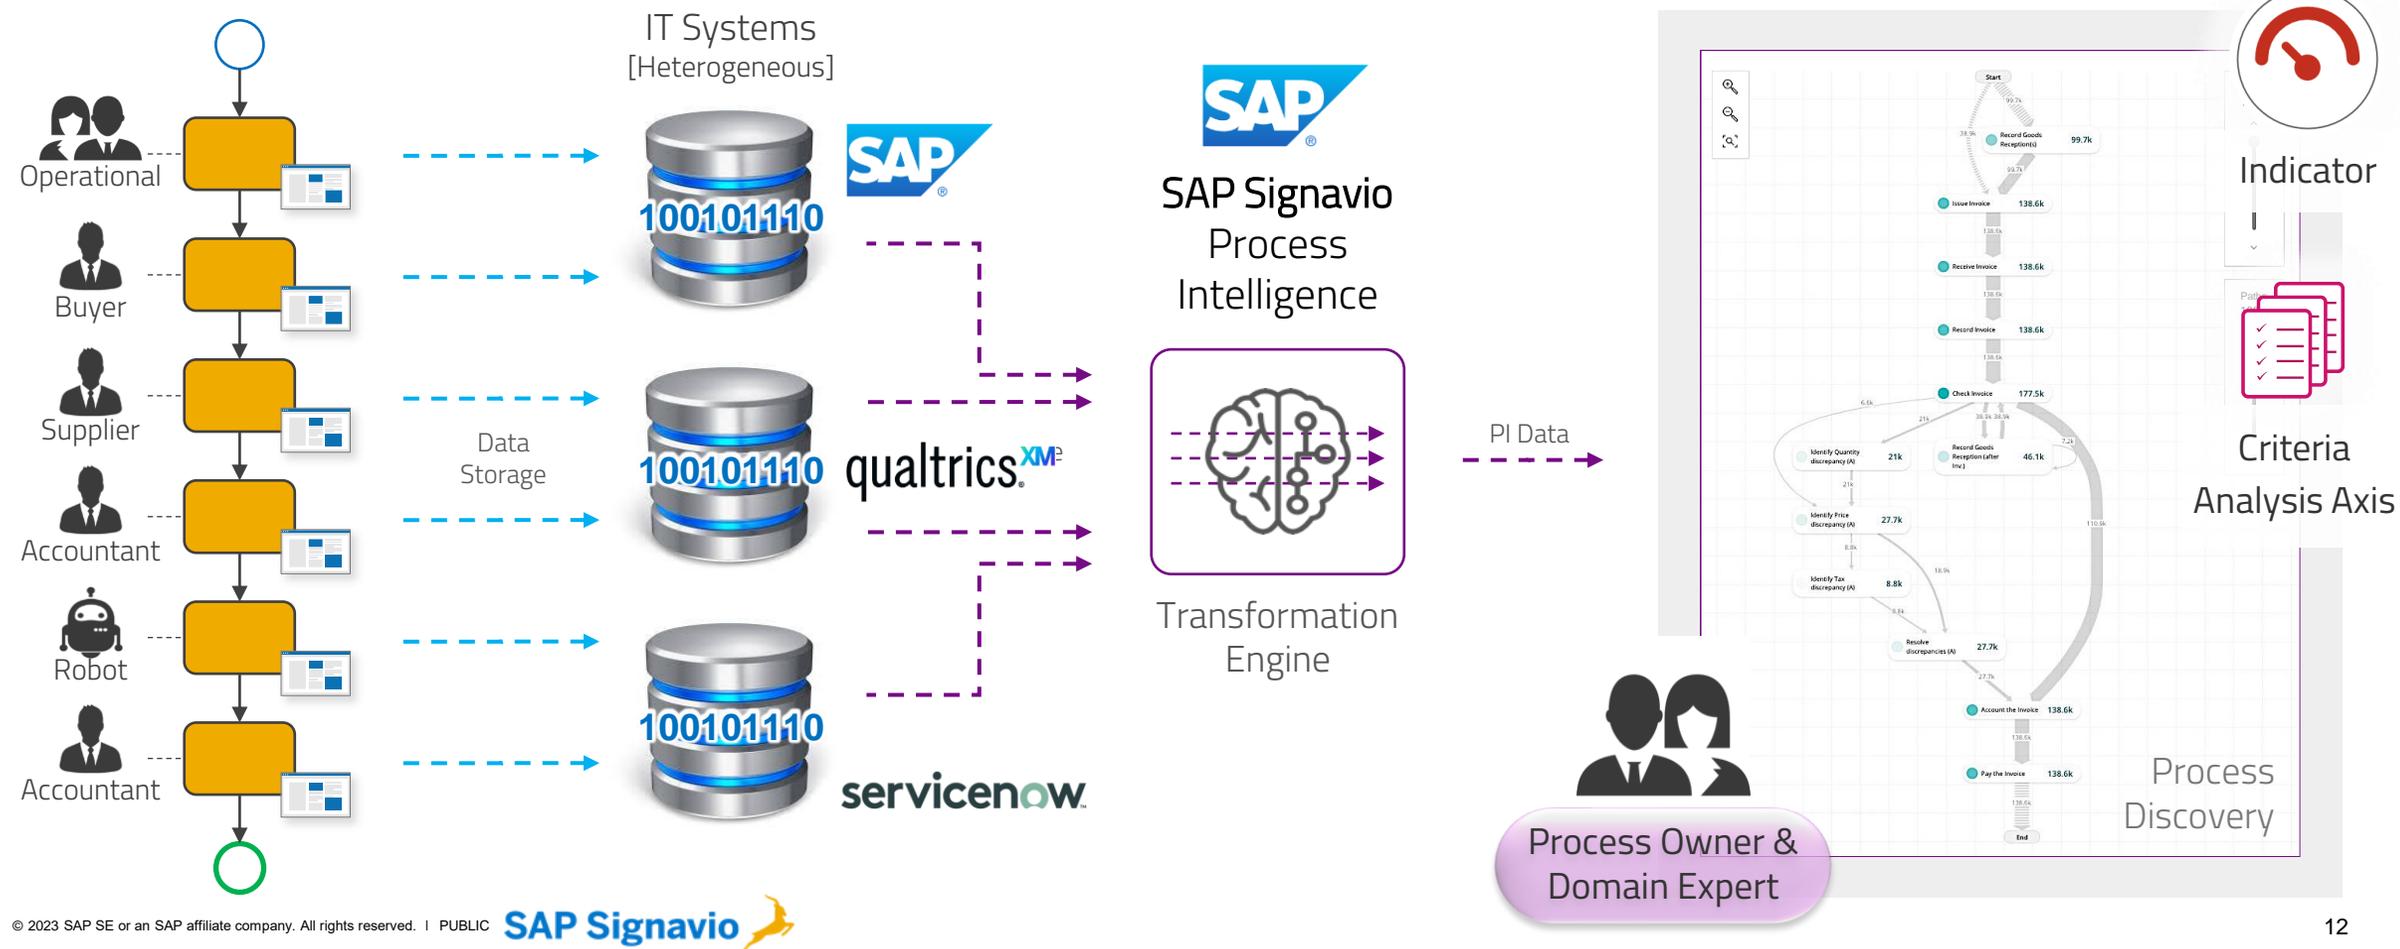

Spot inefficiencies and problems hitting top and bottom lines by **blending process and experience analytics** in one single framework.

SAP Signavio Process Intelligence

How does it work?

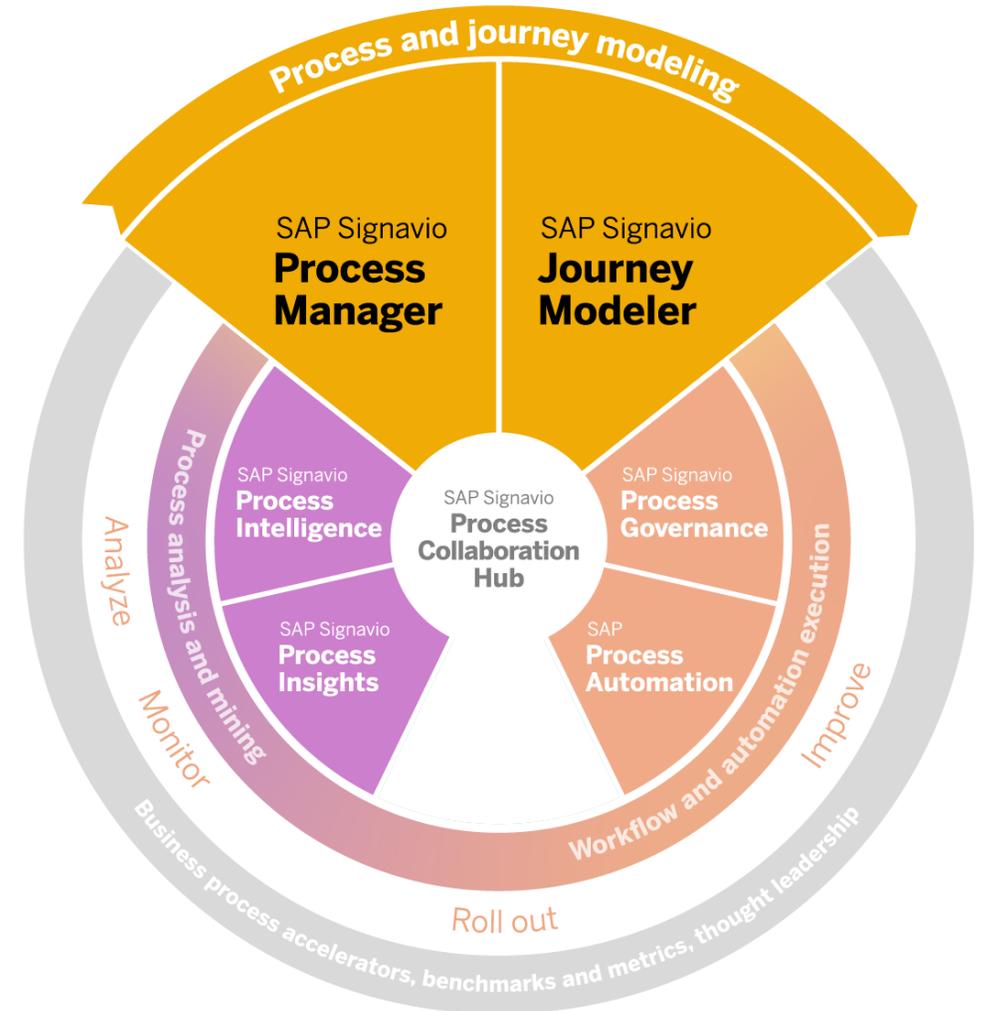

Discover your real business processes, employee, customer and partner behaviors to deploy best practices throughout your organization.

Process and journey modeling

Benefits

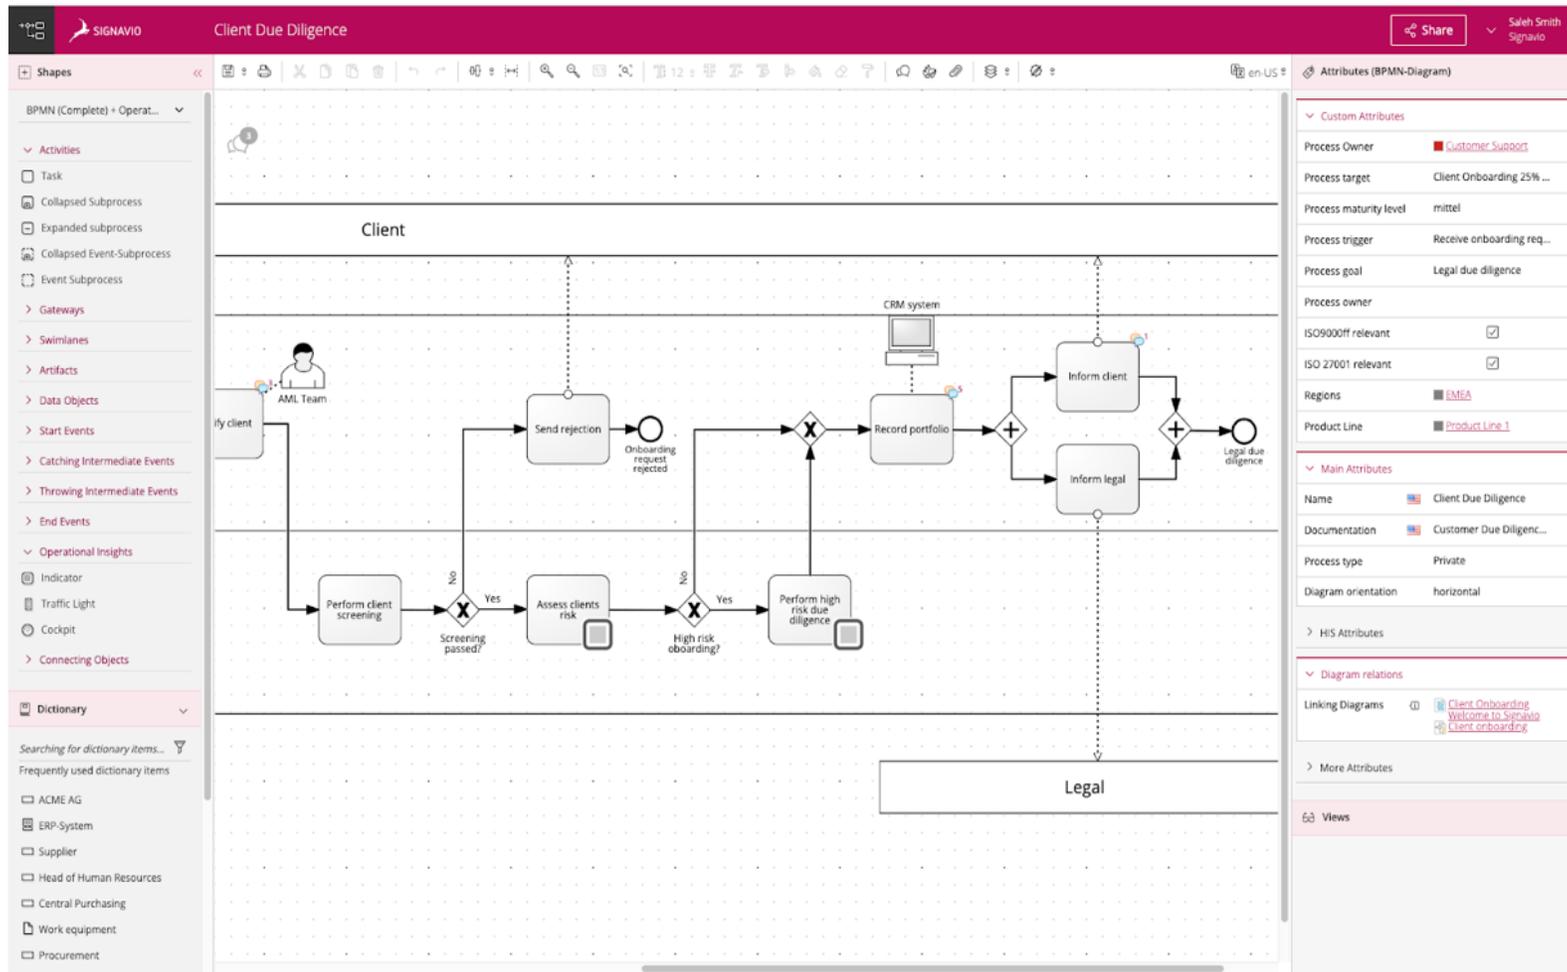

- Understand who does what, when and how within a process
- Identify the inputs and outputs of individual processes
- Standardize process practice, help ensure high quality modeling standards, and educate your organization
- Leverage the knowledge of key stakeholders in the transformation process
- Conform to your standards with process approval workflows
- Visualize the journeys your customers, suppliers, and employees take and the impact your business processes have on their experience
- Understand how changes will impact process outcomes using process simulation

SAP Signavio Process Manager

Visualize, standardize, and optimize your processes

Using a cloud-based modeling repository and analytics tool

Process modeling

Design and model your business processes collaboratively.

Analysis and simulation

Analyze your processes and mitigate business risks using reports. Simulate the impact of changes prior to implementation.

Transparency

Provide a transparent overview of the process landscape

SAP Signavio Journey Modeler

Operationalize customer experiences

Connect journeys with processes, metrics, systems, and roles

Connect processes with journeys

Integrate operational and experience data with journeys.

Design journey models

Benefit from an intuitive journey modeling environment.

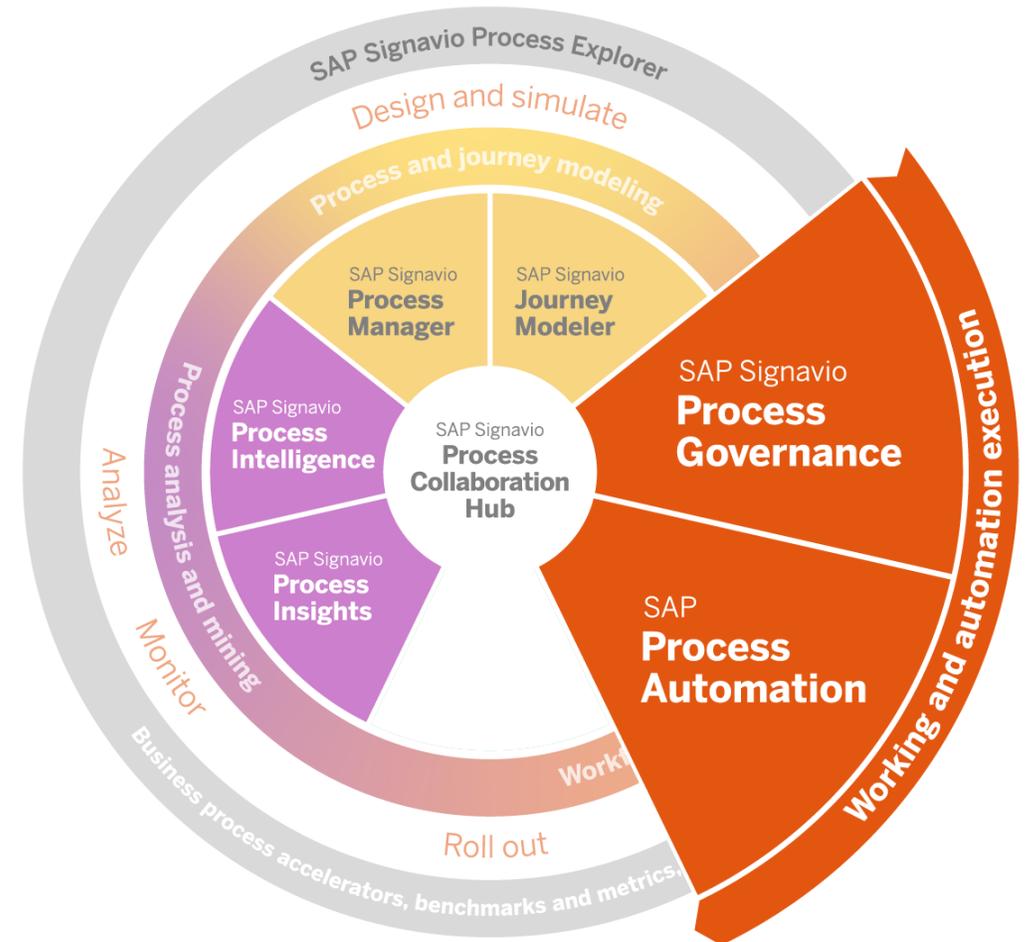

Comment and collaborate

Collaborate on modeling journeys with direct feedback on a single step, a stage, or the whole journey.

Process governance and automated execution

Benefits

- Maintain organizational and regulatory compliance of all documented processes
- Get approvals from key stakeholders on all documented processes
- Maintain process relevance and maturity with regular and ad hoc reviews
- Reduce error-prone and repetitive manual processes
- Evaluate the overall impact of manual vs. robotic process changes

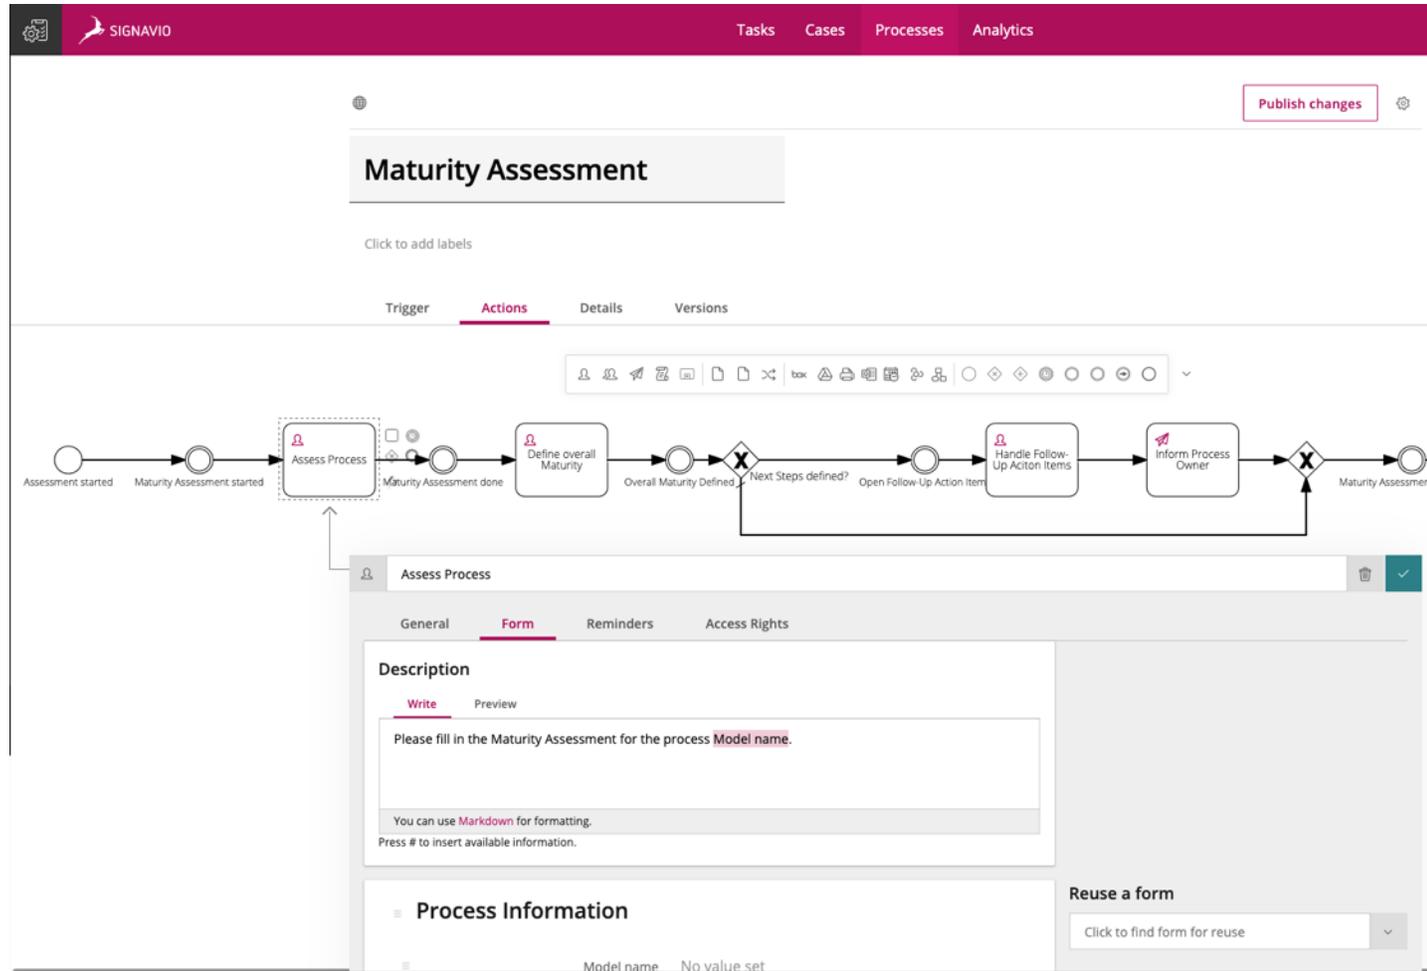

SAP Signavio Process Governance

Lower the cost of change for regulatory requirements

Manage and govern the processes and associated content

Process review

Review the critical processes for auditing and compliance.

Maturity assessment

Assess the maturity of processes to find potential for improvement and prepare for auditing.

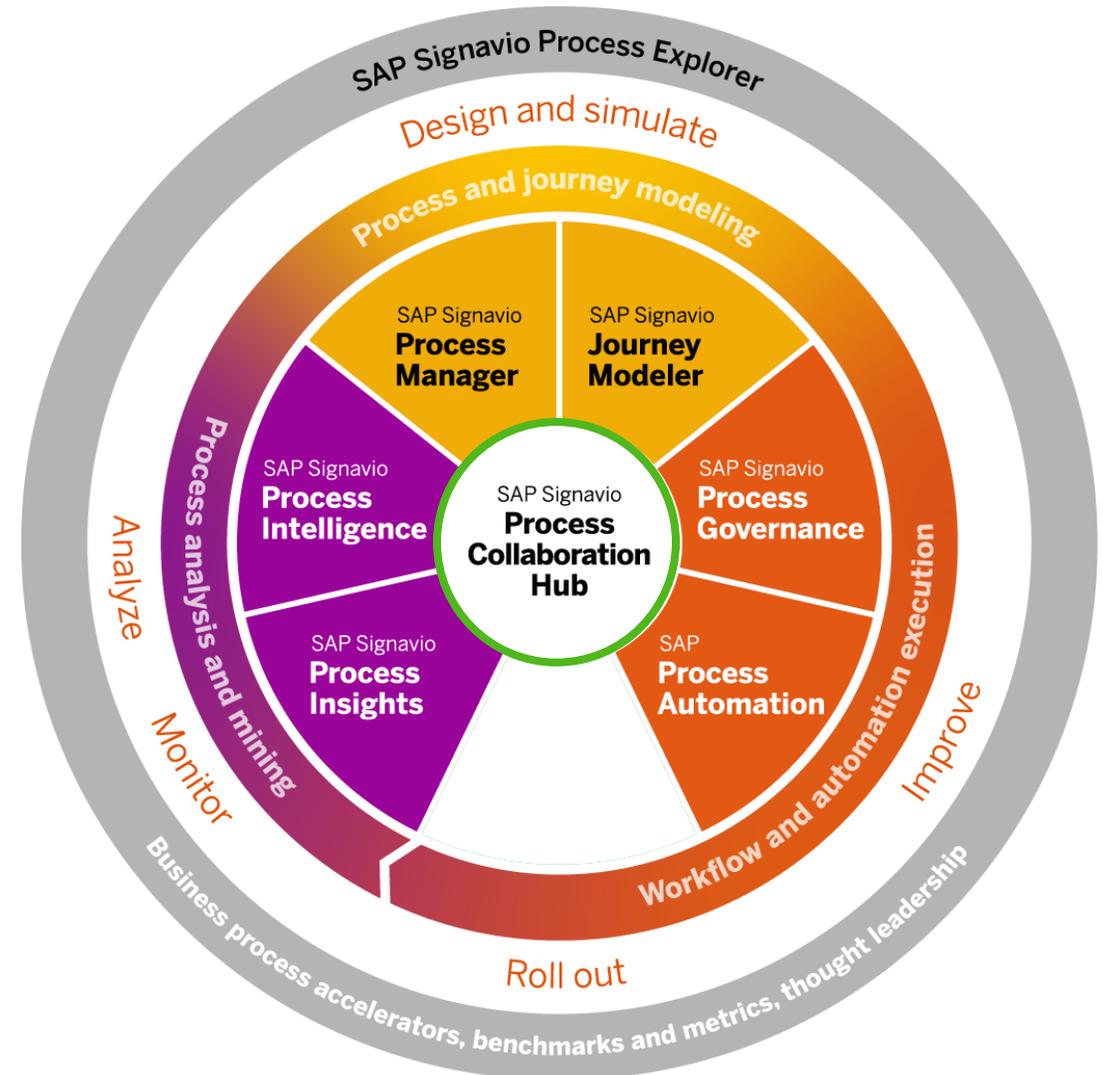

Process release management

Maintain a compliant and approved process content repository.

Process collaboration

Benefits

- Utilize published processes to inform and train employees on process execution
- Align with key stakeholders by sharing process changes and improvements
- Curate process-related content for specific audiences by functions and departments
- Gain full visibility on your entire process landscape
- Single source of truth for organizational process knowledge

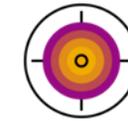

SAP Signavio Process Collaboration Hub

Involve your entire organization in transformation and process excellence initiatives

Harness a cloud-native collaboration environment

The screenshot shows the SAP Signavio Process Collaboration Hub interface. The top navigation bar includes a 'Create' button and user information for Saleh Smith. The left sidebar lists navigation options: Home, Newsfeed, Starred, Recent, Tasks, Processes, Investigations, and Dictionary. The main content area displays 'Welcome to Signavio' and 'Monitoring' with two charts: 'High Risk Onboardings' (line chart showing cases ended over time with a tolerance line) and 'CDD Requests by Regions' (bar chart showing cases for Africa, Asia/Pacific, and Middle East). A right-hand sidebar contains user profile information and navigation options like My profile, Preview, Published, Collaboration Hub, Process Manager, Workflow Accelerator, Process Intelligence, Workspaces, Hub-Beta (confidential), Product - Suite Demo, Velocity - New, Content languages, and Help.

Collaboartion

Get a 360 degree view of your process landscape, related analysis and key metrics

Sharing & communication

Review, publish, and share your process documentation with key stakeholders

Monitoring

Provide feedback and propose improvements to relevant processes

PUBLIC

DHL

- Driving process knowledge dissemination throughout the organization
- Developing a process-first culture and ensuring operational excellence

Seagate

- Establishing operational excellence and achieving straightforward onboarding and job rotation
- Keeping business excellence as strategic focus for the CEO

Customer Success Story

Enabling Transformation and Creating a Foundation for Continuous Improvement with SAP® Signavio®

Before: Challenges and Opportunities

- Decades of evolving processes in eight business units, resulting in a heterogeneous process landscape
- Lack of visibility and transparency in the execution of most process areas, including procure-to-pay and opportunity-to-cash processes

Why SAP

- SAP® Signavio® solutions, part of the business process intelligence portfolio, providing real-time information for strategic decision-making to enhance behavior, efficiency, and performance
- **SAP Signavio Process Manager and SAP Signavio Process Collaboration Hub** solutions to document, model, and simulate business processes and improve collaboration across those processes
- Visualization capabilities of the **SAP Signavio Process Intelligence** solution when connected to **SAP S/4HANA®**

After: Value-Driven Results

- Enabled process visualization that allows a fact-based conversion on the gradually evolving maturity of procure-to-pay processes and encourages faster business-user buy-in
- Helped business units adhere to defined procurement processes, decreasing late payments and missed procurement discounts
- Increased cash forecasting accuracy after reducing invoices received without purchase orders
- Harmonized processes to allow “apples-to-apples” comparisons and drive efficiency and performance of internal and external service partners
- Increased visibility into warehouse stock levels, material aging, and sales and delivery performance
- Gained a more accurate view of reorder points, improving cash-flow position

“In the past, improvements to business processes often relied on gut feel and perceptions of individual stakeholders. We had to make a lot of assumptions before deciding on changes. **SAP Signavio solutions enable more meaningful discussion on business processes with less ambiguity, because we have the process visualized and backed by system data.**”

Stefan Szupper, GFGWay Program Director, GFG Alliance Australia
