MODERNIZING & AUTOMATING

content management with SAP

Sean Fitzpatrick, VersaFile Co-Founder

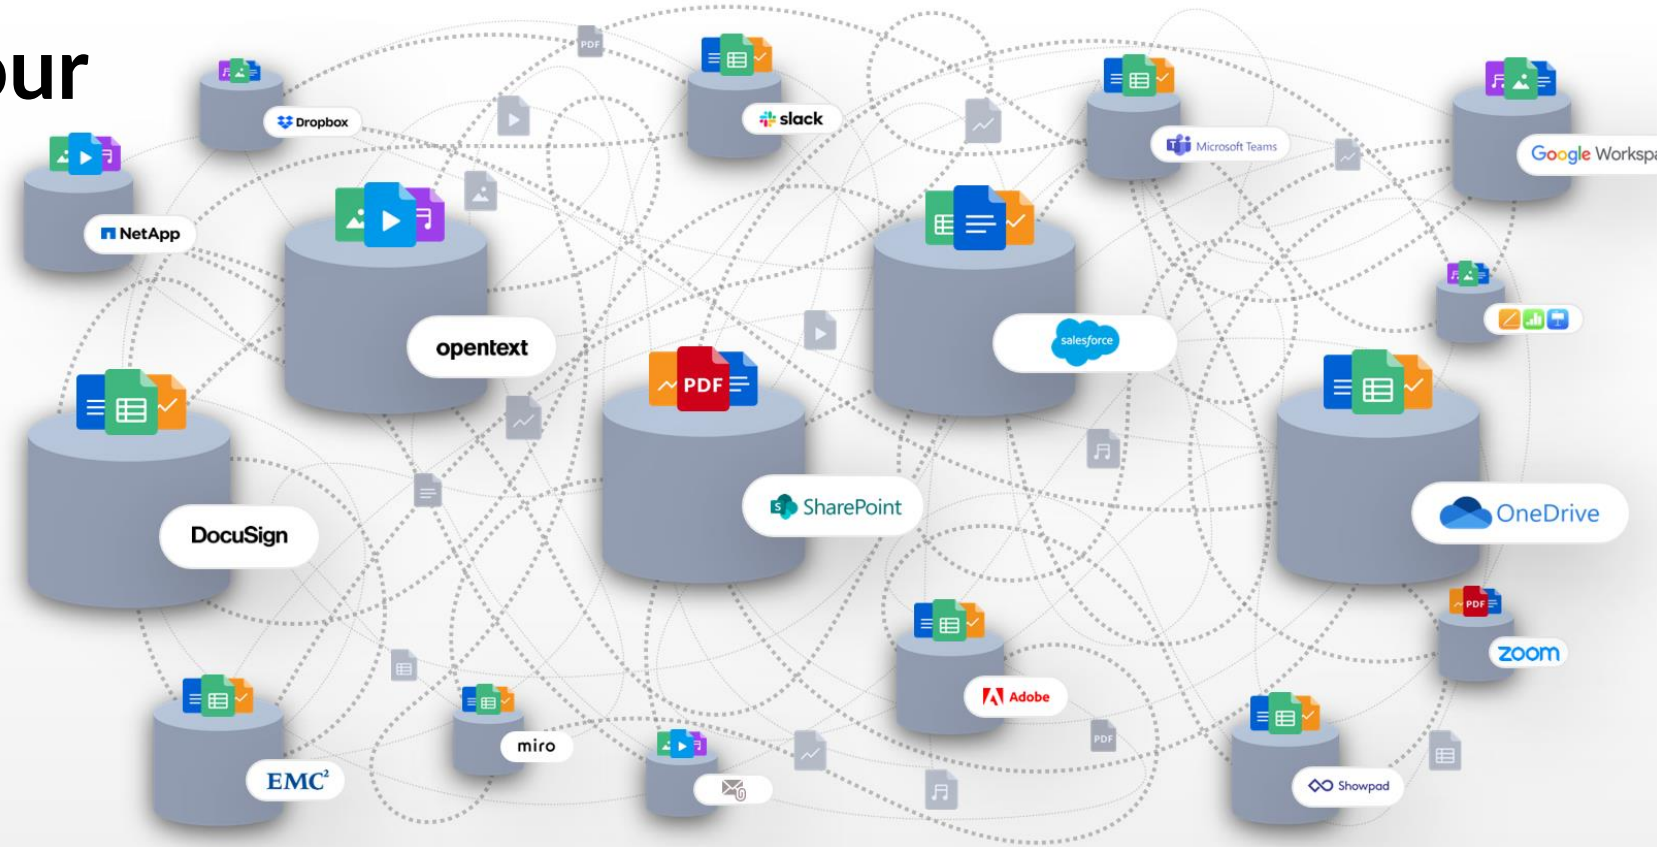
SAP Partner

docuflow | SAP Certified Integration with SAP S/4HANA

Key trends

As reported from our SAP customers

1. ECC to S/4
2. Improve security posture
3. Continue journey to cloud
4. Automate tasks & processes
5. Modernize via digital transformation



BUT…this is inhibiting progress and preventing the full achievement of what customers want to accomplish

Why is this a Problem:

SAP content integration today is monolithic & costly

For SAP customers, legacy content management is not driving the value it used to.

High sustainment cost of legacy systems continue to increase, be it labour, hardware or licensing

Expansion is time-consuming
with projects being long-tail and expensive, drives down ROI, can't justify expansion

Friction is high, user adoption is low
due to lack of modern, secure, and easy ways to collaborate inside and outside of the organization resulting in more shadow IT and resultant risk

What are the immediate opportunities?

Prep for S/4

- Remove content from ECC database
- Archive data objects
- Migrate content to cloud

Save cost

- Reduce sustainment efforts
- Eliminate legacy software licenses
- Eliminate legacy hardware/cloud VM's

Replace custom code

- Reduce sustainment efforts
- Assessed as S/4 in-compatible
- Use no-code/low-code options

Process Automation

- Save end-users time and clicks
- Automate micro tasks & processes
- Eliminate errors and re-work

Reduce risk

- Better information governance
- Aligned unstructured with structured
- Inform and optimize your decisions

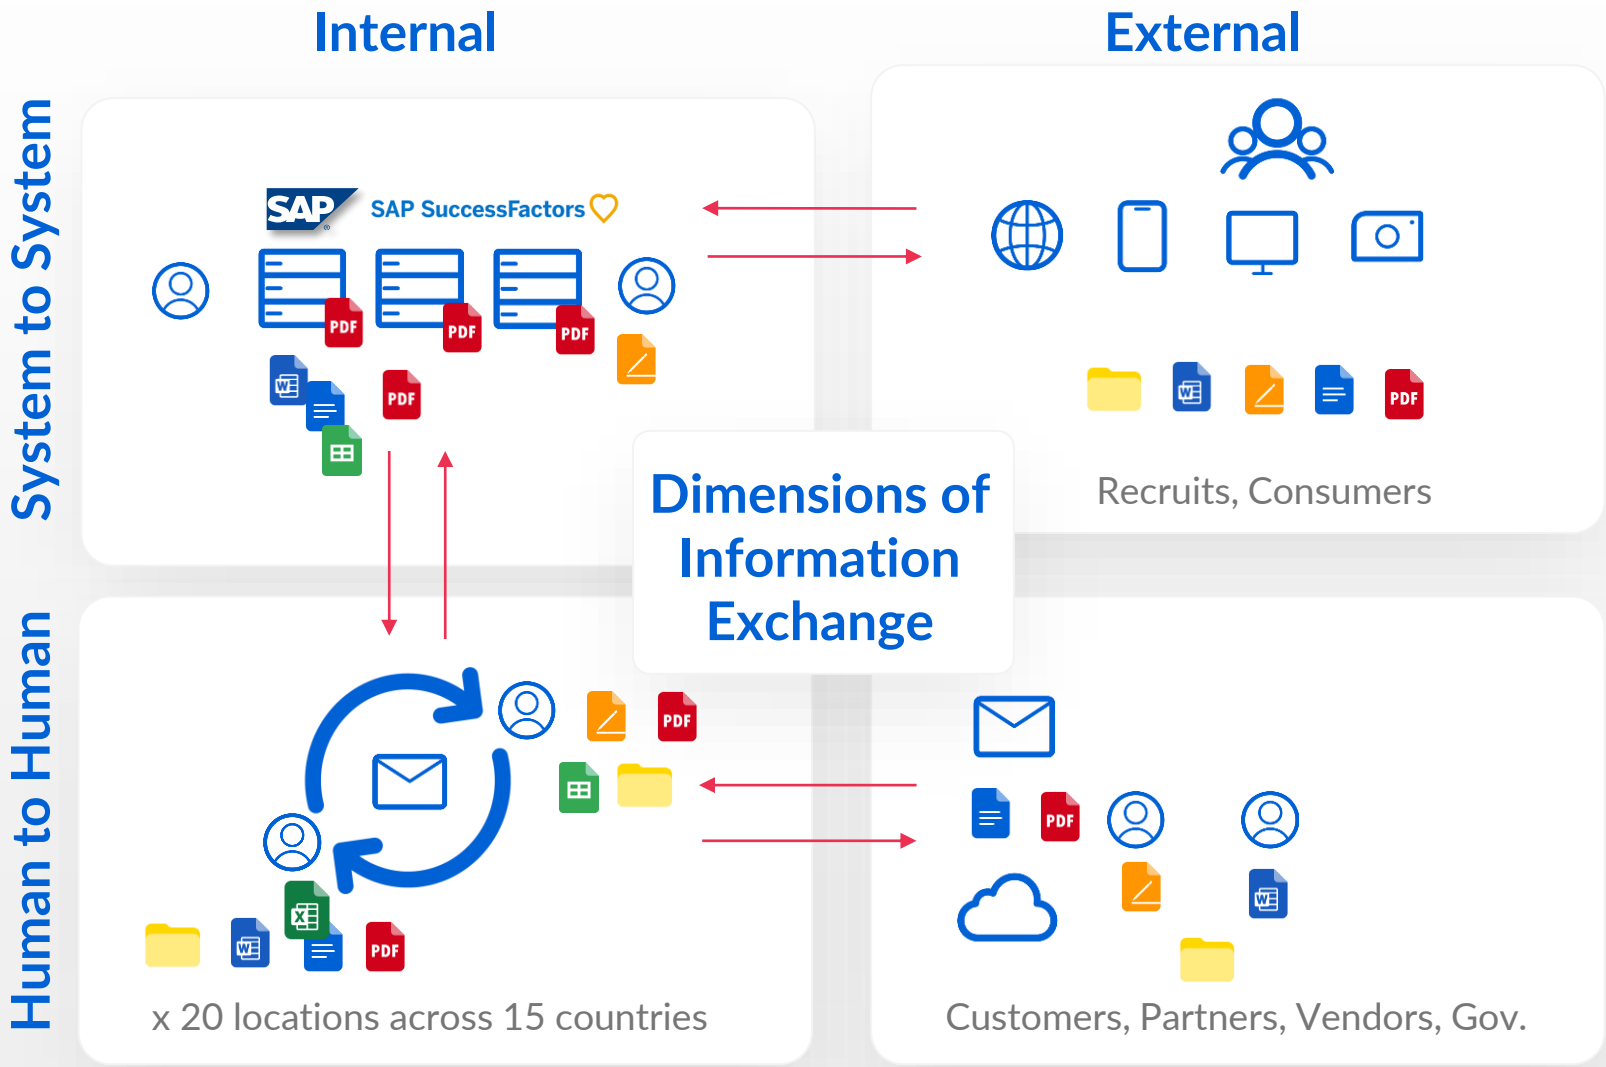
More secure

- Eliminate content in the wild
- Easier Collaboration
- Secure information from anywhere

What's the bigger picture?

Ability to do this is a Requirement for successful:

- Digital Transformation
- Task Automation &
- Security Posture



SAP content integration options

	ECC	S/4 on-prem	S/4 Cloud Private Edition	S/4 Cloud Public Edition
Database	●	●	●	NA
ArchiveLink	✓	✓	✓	NA
DMS	✓	✓	✓	✓
CMIS	NA	✓	✓	✓
BPT	✓	✓	✓	✓

Available migration paths

Greenfield

Good news:

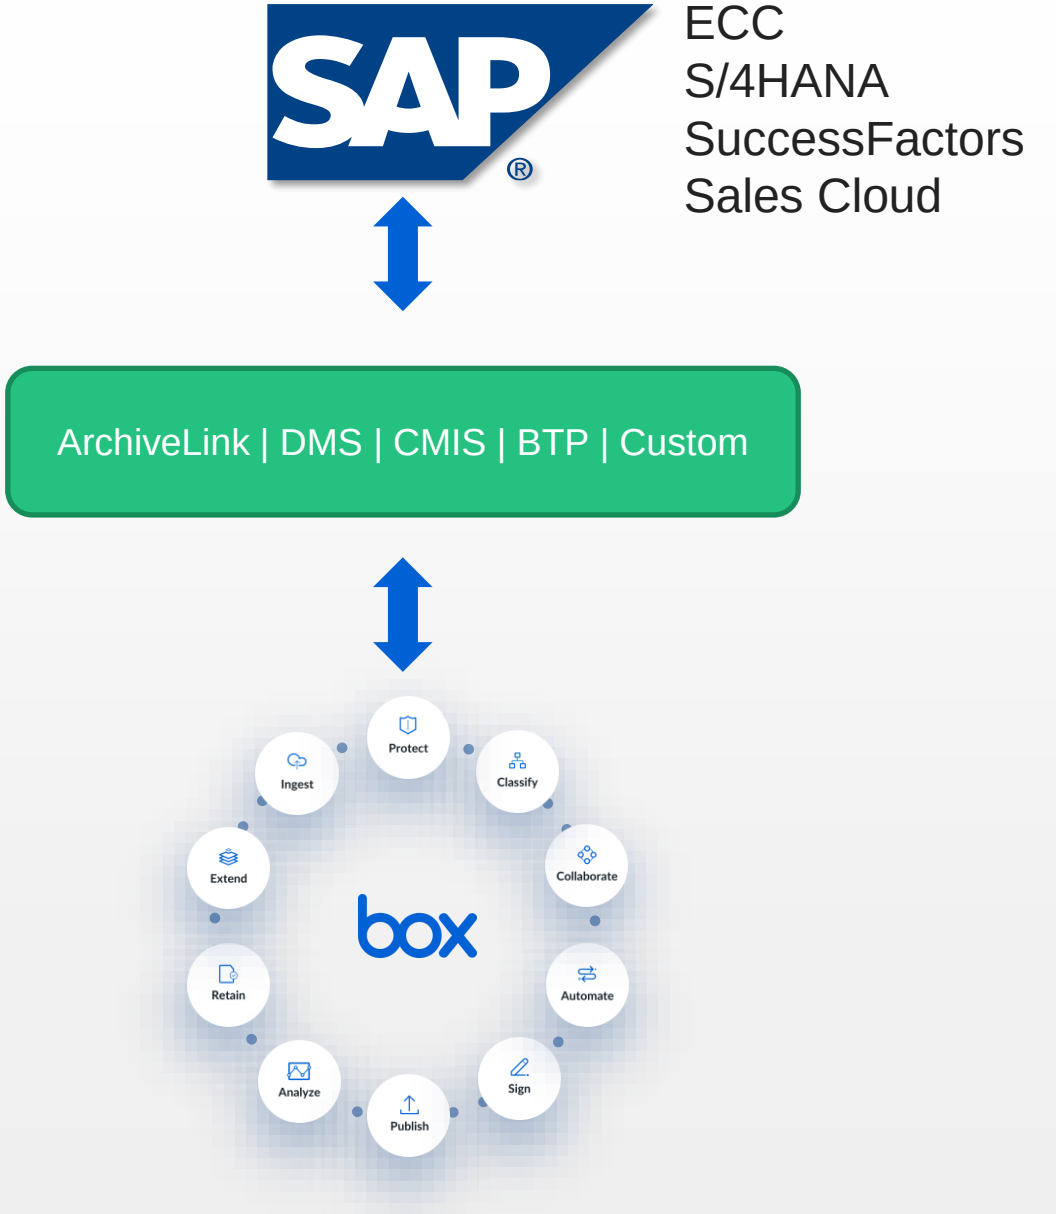
You can modernize your SAP content systems with the Box content cloud

Replace monolithic legacy systems

Streamline migrations to S/4HANA

No code automation of SAP tasks inside & outside of SAP

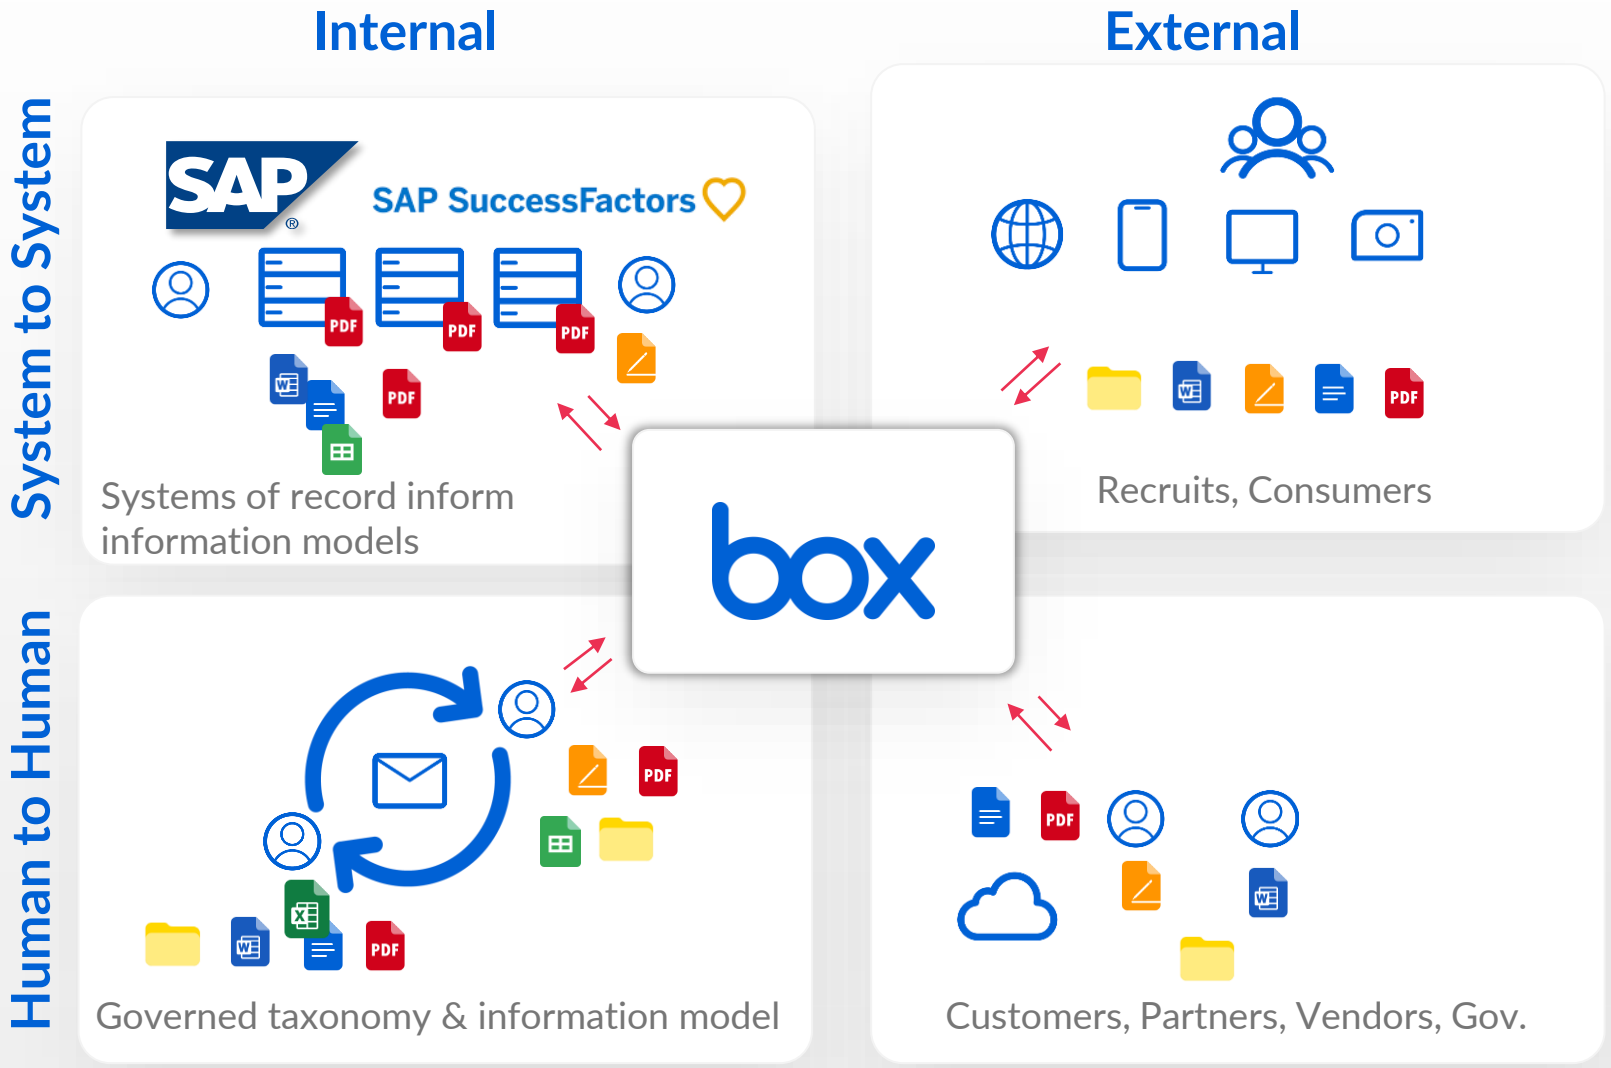
And more



What's the MODERN picture?

Ability to do this is a Requirement for successful:

- Digital Transformation
- Task Automation &
- Security Posture



Customers
