Key Integration Principles For The Intelligent Enterprise

1 OUT-OF-THE-BOX INTEGRATION

SAP provides integrated end-to-end business processes including plug-and-play integrations enabled by a standardized application and technology portfolio.

2 OPEN INTEGRATION

SAP provides exhaustive third party integration capabilities supported by its partner ecosystem. Public APIs allow any type of custom extensions.

3 HOLISTIC INTEGRATION

SAP covers all flavors of integration (process, data, UX, IoT, analytics). ISA-M helps customers to shape their integration strategy.

4 AI DRIVEN INTEGRATION

SAP is investing into simplification of the end-to-end integration experience. AI techniques will be embedded into next generation services.

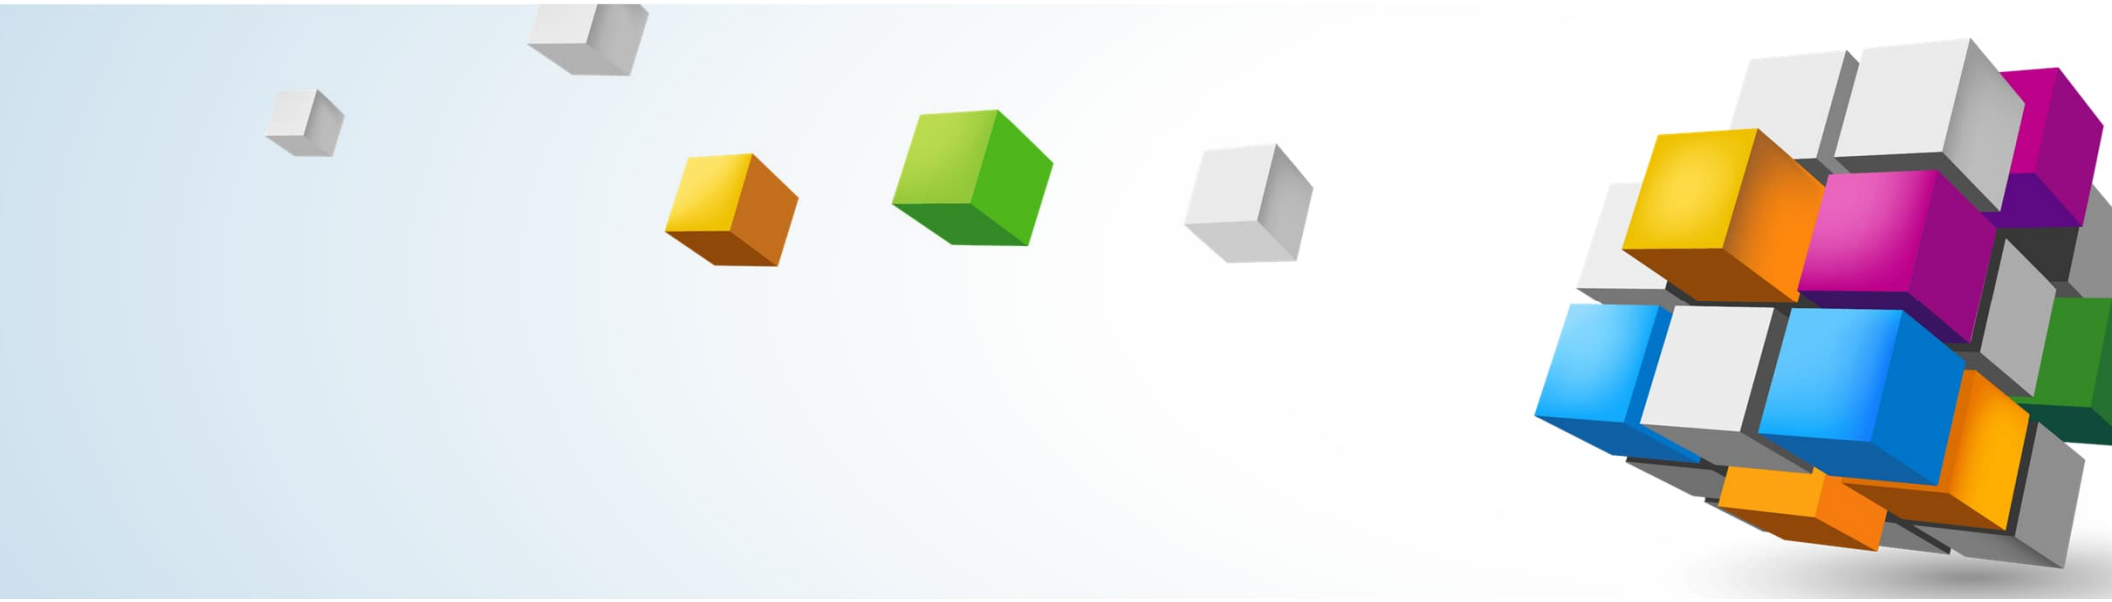
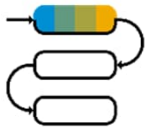
Core Integration Suite Capabilities

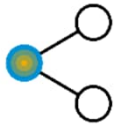


Overview Of Core Capabilities



Cloud Integration

Integrate applications and data across diverse landscapes everywhere.



API Management

Expose your data and processes as APIs. Manage E2E life cycle.

API Business Hub*

Jump start integration projects with APIs, packaged integration content and adapters.

Integration Assessment

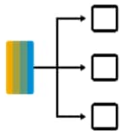
Shaping and execution of your integration technology strategy.

Integration Advisor | TPM

Accelerate implementation and maintenance of B2B scenarios using machine learning.

Open Connectors

Accelerate connectivity to third-party applications.



Event Mesh *

Enabling applications, integrations and extensions to communicate asynchronously through events.

Migration Assessment

Modernize your integration platform by smoothly transition to the cloud from SAP Process Orchestration.

SAP Integration Suite, advanced event mesh

*Event Mesh capability within SAP Integration Suite planned for Q3 2023, subject to change

Cloud Integration

Supporting a variety of integration approaches and out-of-the-box features

Hybrid and cloud application integration

- Intuitive web interface with built-in templates
- Supporting A2A and B2B/B2G scenarios with focus on third-party

Cloud technology

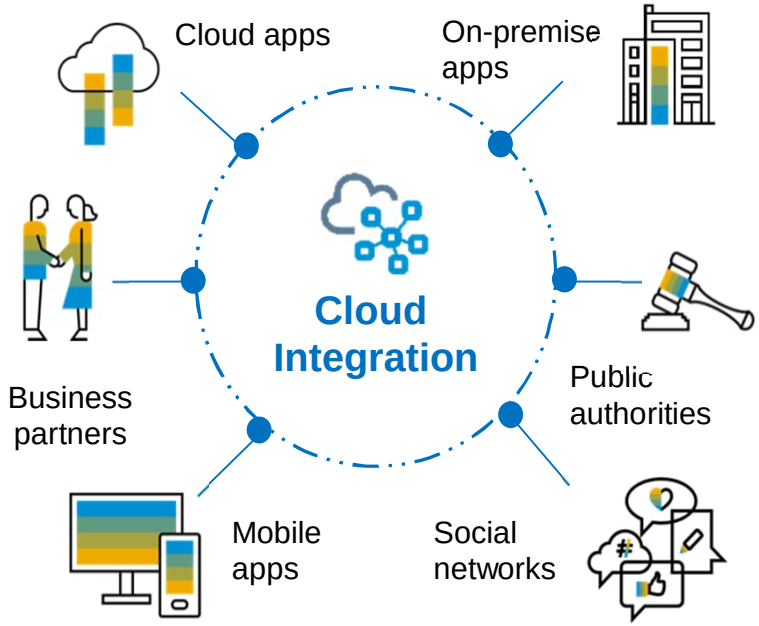
- Strong security focus and infrastructure availability
- Access via public OData APIs

Prepackaged content

- Prepackaged integration content to jump-start integration projects and get productive quickly
- Extension of pre-delivered content to include custom requirements

Ecosystem

- Ability to integrate with business networks
- Open to partners for developing integration content and adapters



© 2023 SAP SE or an SAP affiliate company. All rights reserved. I PUBLIC

Cloud Integration

Data Mapping And Transformation

Mapping

- XSLT
- Message mapping
- Value mapping
- Operations mapping

Encoder and Decoder

- GZIP
- MIME multi-part
- Base64 decoder
- Zip

Message

- Content modifier
- Content enrichment
- Filter
- Message digest

Scripts

- JavaScript
- Groovy

Converter

- CSV ⇔ XML
- JSON ⇔ XML
- EDI (EDIFACT, ASC-X12) ⇔ XML

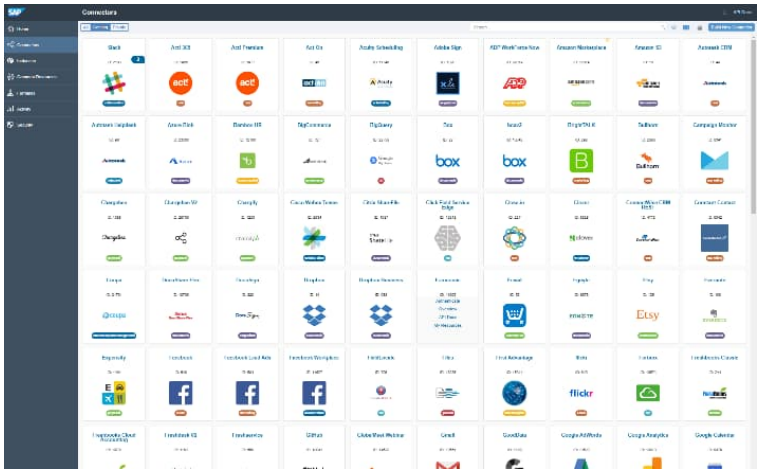
API Transformer

- SOAP ⇨ OData
- SOAP ⇨ OpenAPI (REST)
- Postman collection ⇨ OpenAPI
- OData ⇨ OpenAPI

© 2023 SAP SE or an SAP affiliate company. All rights reserved. I PUBLIC

Open Connectors

Take advantage of the REST based API approach in scenarios with multiple third-party systems



Extend connectors

- Pre-built common resources that can be extended
- Create consistent data model based on your integration needs

Out of the box connectivity to third-party applications

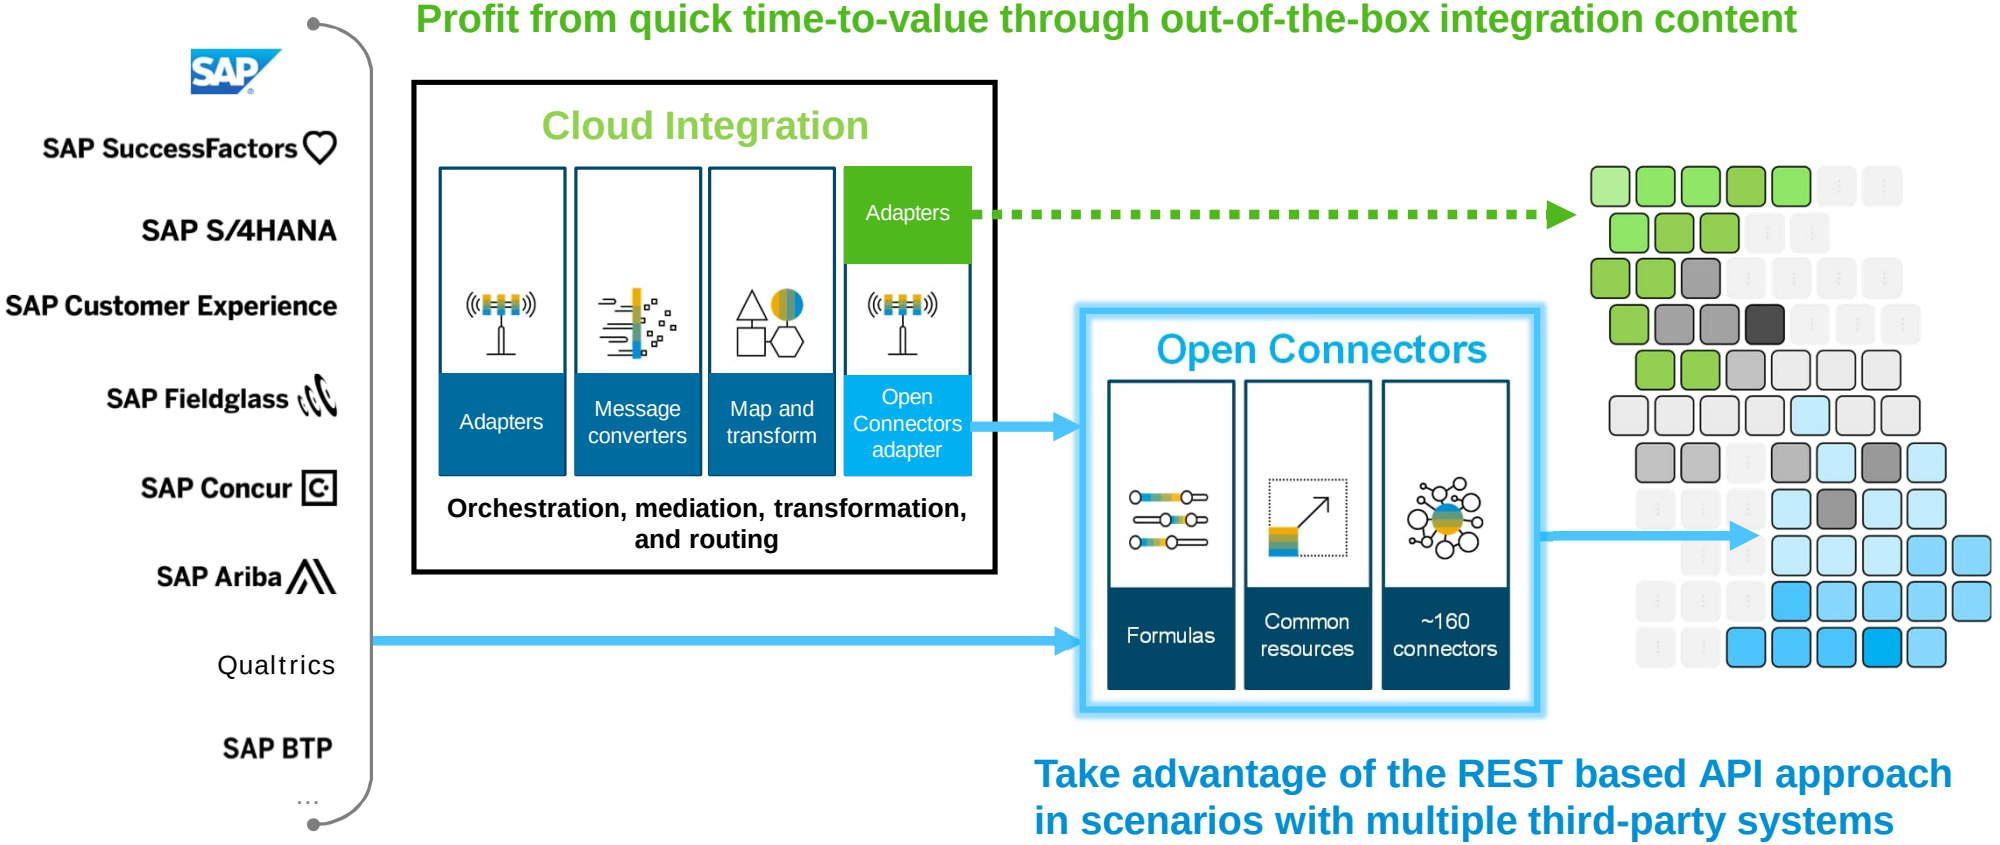
- Connectors to 170+ popular third-party applications
- REST API with:
  - Same authentication
  - Same data model
  - Same error handling
  - Same pagination
- Built-in interactive API documentation in Open API specification

Available connectors

© 2023 SAP SE or an SAP affiliate company. All rights reserved. I PUBLIC

Open Connectors

Leverage Open Connectors in integration scenario with multiple non-SAP systems



© 2023 SAP SE or an SAP affiliate company. All rights reserved. I PUBLIC

Comprehensive Connectivity Options

SAP Integration Suite

250+ connectors to accelerate integration development

Standard Adapters

Open spec connector

- HTTP, HTTPS (incl. REST), SOAP
- FTP(S), SFTP
- Mail (SMTP, IMAP, POP3)
- OData V2 & V4
- IDoc, RFC, XI
- AMQP, JMS**, AS2**, AS4**
- Kafka
- JDBC, LDAP

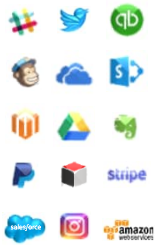
Connectors to SAP & third-party apps

- SuccessFactors, Ariba
- AWS (S3, SQS, SNS, SWF)
- Microsoft Dynamics, Microsoft Storage***
- Salesforce
- Workday**, ServiceNow**
- Dropbox***, Slack***, Splunk***, Microsoft Azure Storage***, RabbitMQ***, MDI***
- Twitter, Facebook
- SugarCRM
- Elster*
- …

Full list of connectors by SAP in SAP product documentation

Open connectors to third-party apps

- Cloud storage
- Collaboration
- CRM
- ECommerce
- ERP
- eSignature
- HCM
- Field services
- Finance
- Help desk
- Messaging
- Payments
- Social
- …



Full list of open connectors in SAP product documentation

Adapters built by partners

Example list

- iShare
- Kafka
- MQTT
- Office 365
- SharePoint

List of connectors by partners in SAP API Business Hub -> partner content

Adapter development kit

- Framework to create new adapters
- Certification available

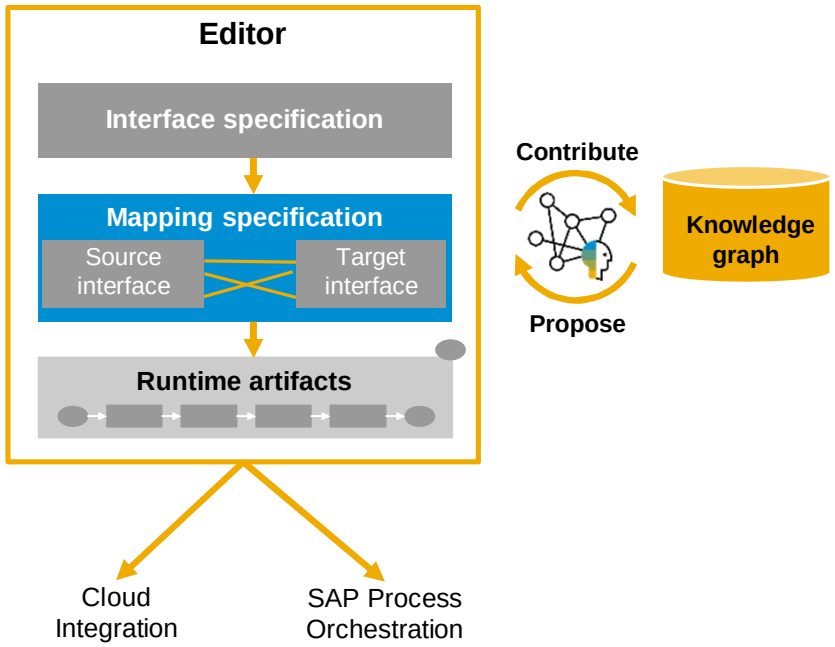
Integration Advisor

Reduce complexity and accelerate implementation and maintenance of B2B scenarios using machine learning



Crowdsourcing and machine learning for integration

- Central documentation of B2B and SAP libraries, including code lists
- Crowd-sourced proposal service with machine learning approach for interfaces and mappings
- Automatic generation of documentation and runtime artifacts
- Potential savings of 60%

Video | openSAP | Blog | Docu

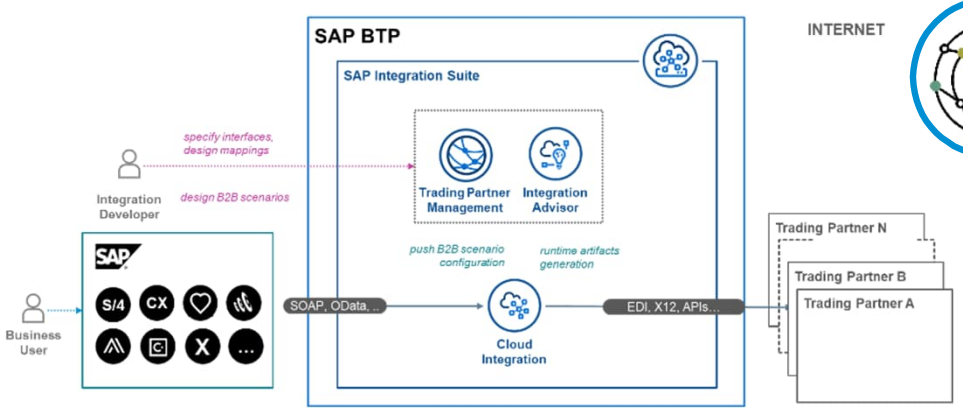
Trading Partner Management (TPM)*

Maintain trading partner profiles and agreements



One-stop shopping

- Simplified B2B integration scenario management with multiple trading partners
- Crowd-sourced content
- Lift and shift scenarios in transformation projects to the cloud

Accelerated onboarding of trading partners

- Onboarding of trading partners - leveraging SAP Integration Suite capabilities
- Trading partner specific interface and mappings design from Integration Advisor
- Optimized operation effort though dynamic integration
- Monitoring of integrations with business partners
- Archiving

Blog | Docu

Dependency to Cloud Integration and Integration Advisor capabilities
*Available with SAP Integration Suite, standard and premium editions

Simplify Cloud-based B2B Integration by combining Integration Advisor, Trading Partner Management* and Cloud Integration

Integration Advisor

- Definition and documentation of interfaces and mappings
- Central documentation of B2B and SAP libraries
- Intelligent and crowd-sourced proposal service

Trading Partner Management*

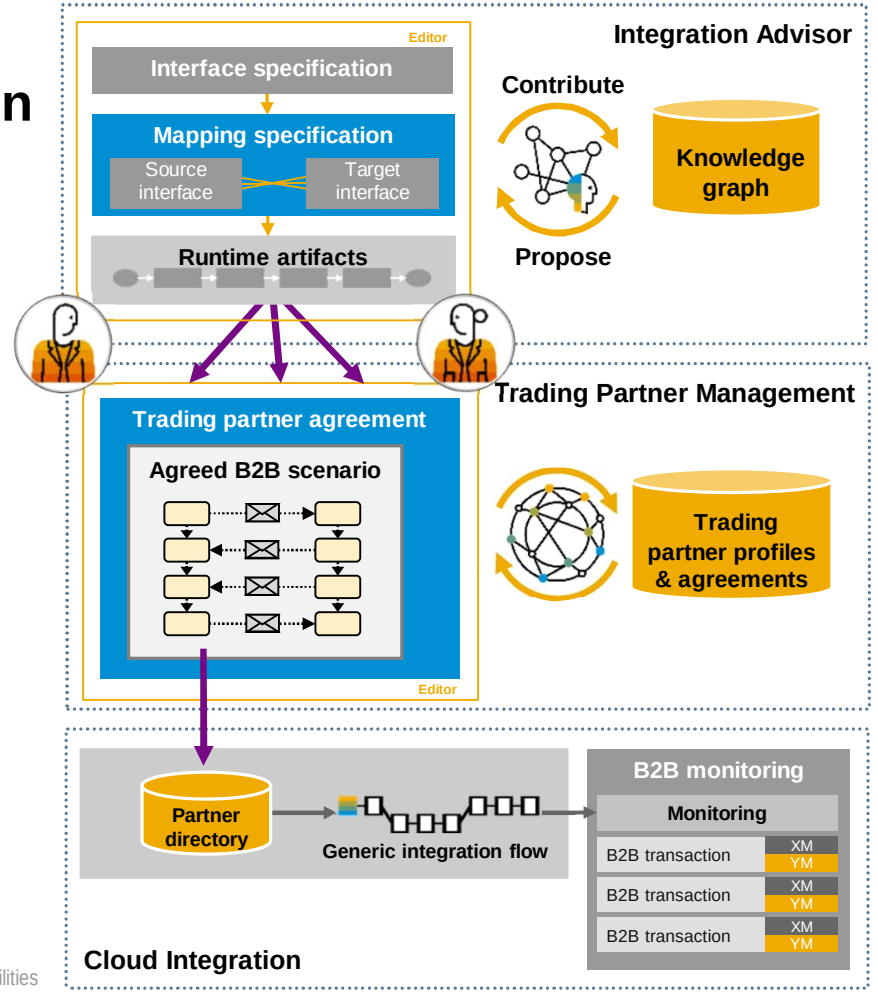
- Creation and maintenance of B2B scenarios
- Consideration of individual aspects and requirements per trading partner
- Push B2B scenario configuration to partner directory

Cloud Integration

- Stores configuration in partner directory
- Processes B2B transactions with one integration flow

B2B monitoring

- Monitors the B2B transactions at runtime in corporation with trading partner agreement data



Dependency to Cloud Integration and Integration Advisor capabilities

*Available with SAP Integration Suite, standard and premium editions

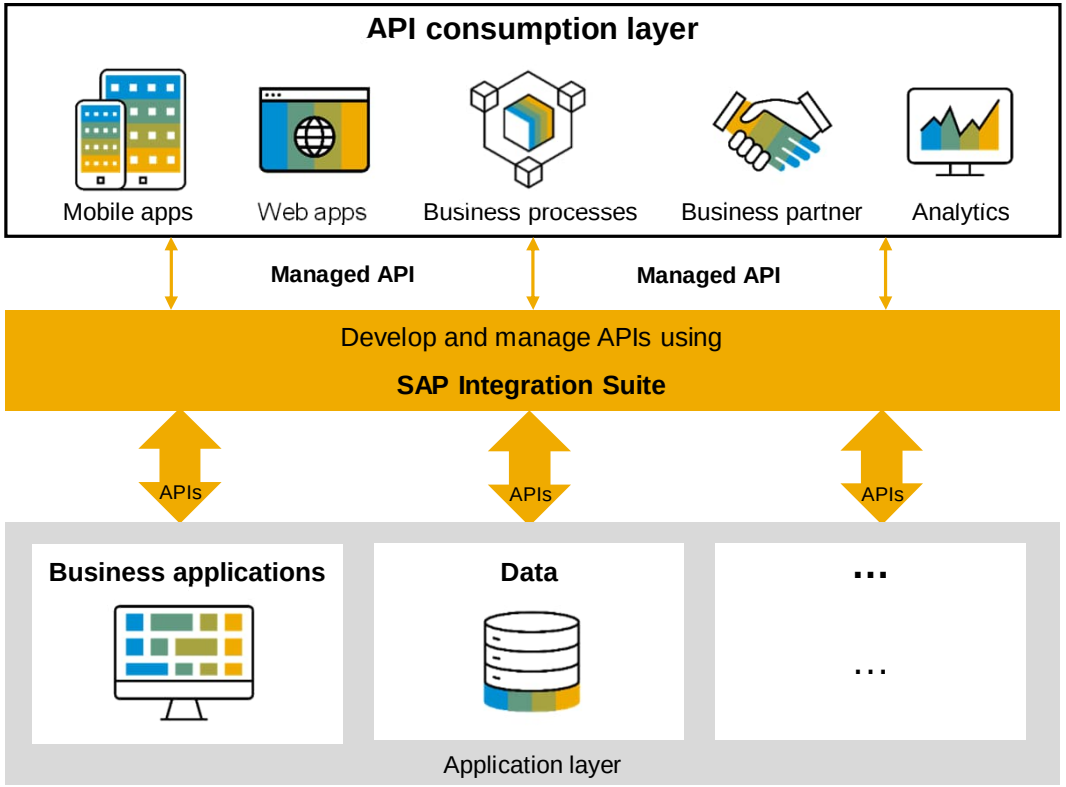
API First Integration With SAP Integration Suite API Management

Provision omnichannel and secure access to business applications

- APIs are digital building blocks for modern apps and open integrations.
- API-led integration connects applications with reusable APIs.
- API-led integration forms a foundation for interoperability across an enterprise ecosystem
- It helps you to integrate and expose your data, apps, and devices to your entire ecosystem.
- This approach accelerates the connectivity of information assets across the enterprise.

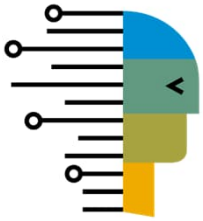


Example: Expose APIs to business partners. Managed APIs leverage API traffic management policies, API security policies, and API analytics

© 2023 SAP SE or an SAP affiliate company. All rights reserved. I PUBLIC

API Management

Manage the lifecycle of your APIs using SAP Integration Suite



APIs are digital building blocks for **modern apps** and **open integrations**. API Management supports **full-lifecycle management** of your APIs

Design

Design your APIs based on open standards like Open API specification and OData

Develop

Develop your APIs by exposing and composing backend interfaces from apps or middleware

Manage

Protect your APIs from security threats, manage traffic, cache your data on the edge with 40+ in-built policies

Monitor

Monitor and analyze your API usage, performance and errors

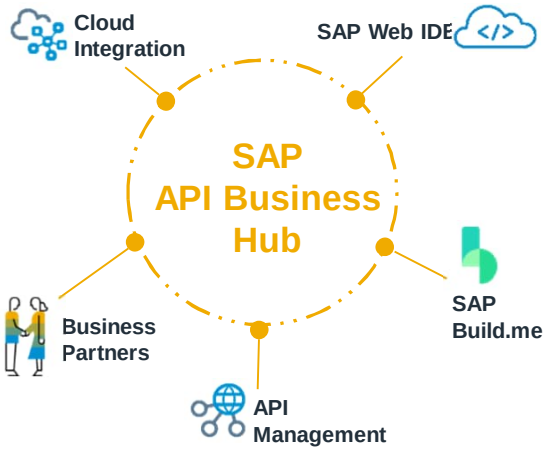
Engage

Engage with application developers and monetize your digital assets through APIs

© 2023 SAP SE or an SAP affiliate company. All rights reserved. I PUBLIC

SAP API Business Hub*

Streamline any-to-any, SAP and third-party integrations with thousands of prebuilt integrations and connectors



Experience the value proposition

Developers “try-out” before consuming

- 5.5M try-outs for APIs by 22K developers
- 40.4K integrations live
- 500K package views served last year

Discover a diverse catalog

- Themes, search, filters and featuring
- Nimbus UI that draws user to the most popular packages
- Product themes, search and filters help users navigate integrations and APIs
- Favorites and Subscriptions to keep user up to date with the latest content

Digital consumption

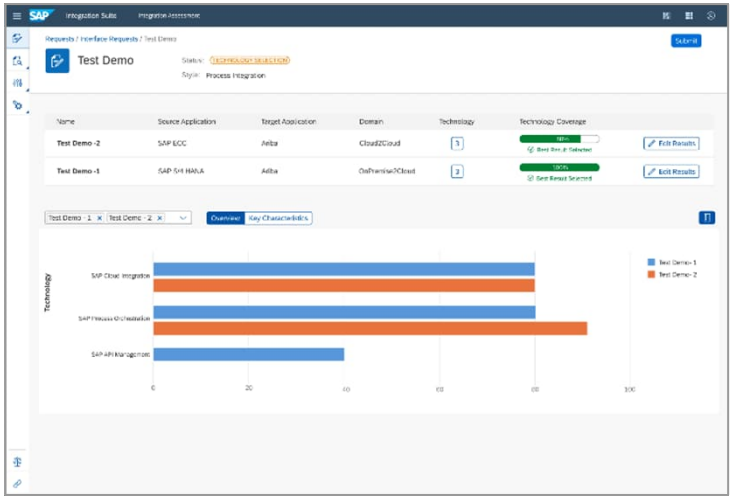
- Integrated with development environments
- Cloud Integration, API Management, SAP Web IDE, SAP Build, Mendix

© 2023 SAP SE or an SAP affiliate company. All rights reserved. I PUBLIC

*Publicly available for everyone

Integration Assessment*

Take a systematic approach to solving common integration challenges with best-practices methodology



Shape your integration technology strategy

- Tool based approach for key parts of the **SAP Integration Solution Advisory Methodology**
- Includes SAP's integration technology recommendations for a turnkey start
- Open to cover custom recommendations, incl. third party applications and technologies

Introduce integration governance

- Define policies to establish guidelines for the use of integration technologies within an organization
- Determine the most suitable integration technology for a specific integration scenario
- Improve the collaboration between integration architects, integration developers and business domain experts

Gain insights into your integration landscape

- Build an inventory of existing integration technologies
- Get an overview of the use of integration technologies across an application landscape
- Document integration requirements, technology proposal and selection

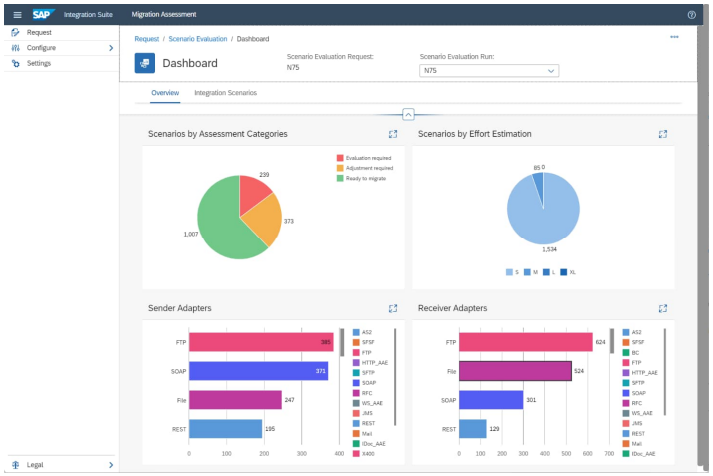
* Available with SAP Integration Suite, standard and premium editions

Migration Assessment and Migration Tool*

Smoothly transition to the cloud from SAP Process Orchestration



Accelerates the migration process

- Semi-automatic migration tool to migrate integration scenarios from SAP Process Orchestration to SAP Integration Suite
- Automate the migration based on integration flow templates

Provides transparency of your migration efforts and costs

- Self-service tool that automatically analyses and assesses an SAP Process Orchestration system to be migrated to SAP Integration Suite
- Extract integration scenarios from SAP Process Orchestration
- Evaluate integration scenarios based on flexible rules framework
- Estimate migration effort
- Check for technical showstoppers & provide possible workarounds

* Available with SAP Integration Suite, standard and premium editions

Integration Advisor

Crowdsourcing capabilities for business oriented interfaces and mappings

Proposal service with machine learning approach

- Ready to start your integration projects without deep domain knowledge
- Designed to accelerate every interface implementation
- **Effort reduction 60%** or more

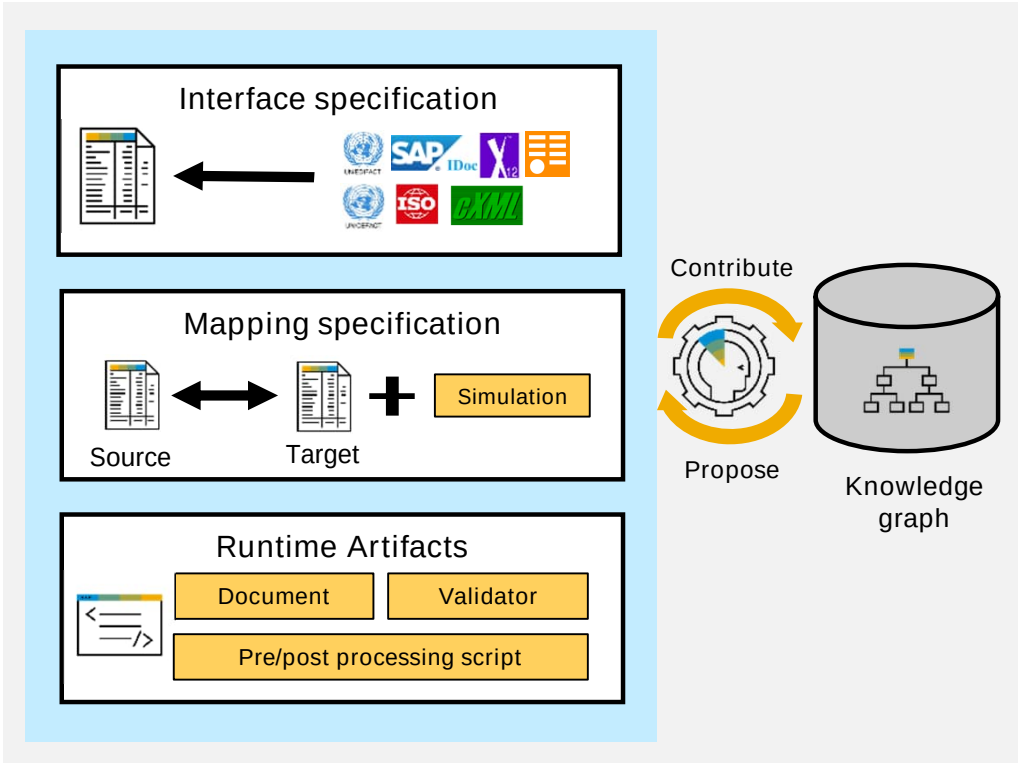
Crowdsource based learnings

- From interface customizations and mappings
- Continuous learning

Automatic generation of documentation and runtime artifacts

Community collaboration

- Creating and maintaining tailored integration interfaces and mappings

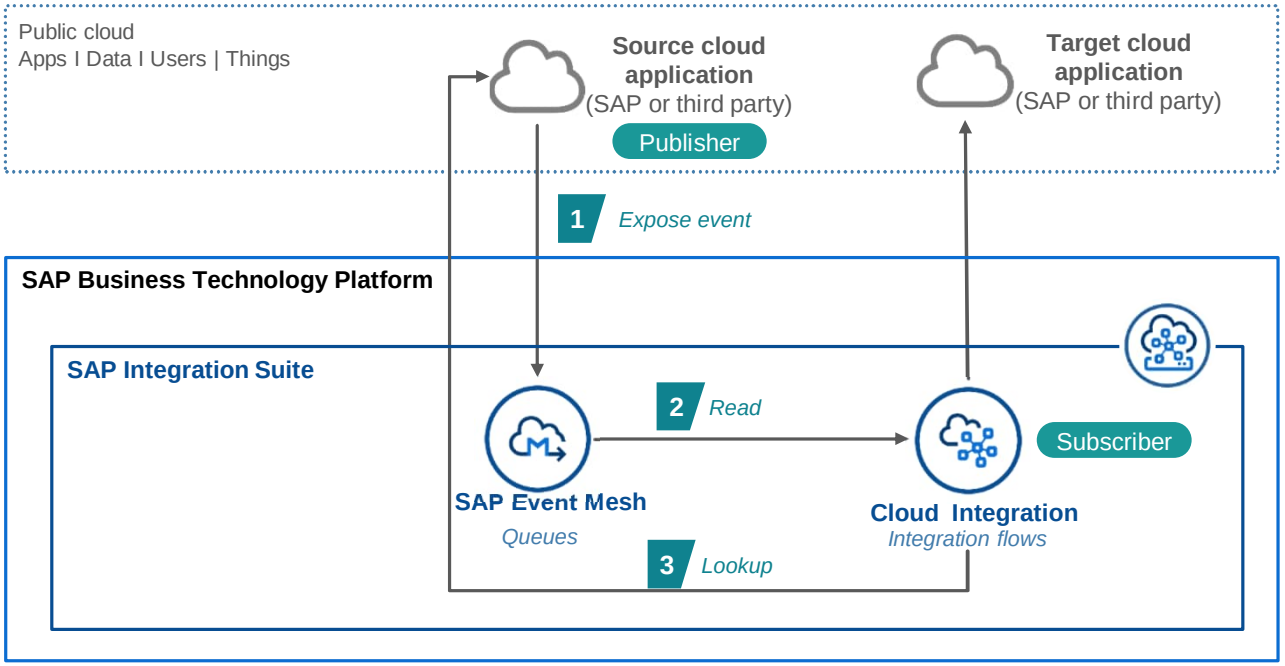


© 2023 SAP SE or an SAP affiliate company. All rights reserved. I PUBLIC

Event – Based Integration With SAP Integration Suite

Decouple applications, extensions, or IoT data by messaging principles

- Business applications expose events, such as when a sales order gets created or changed in SAP S/4HANA Cloud
- The event is associated with a topic to achieve publish-subscribe (pub-sub) model
- Sender and receiver(s) are decoupled
- Standard protocols are used (AMQP 1.0, webhook, REST, Kafka, MQTT)



Example: With event-driven extensions for SAP S/4HANA, application extensions can react to events from SAP S/4HANA

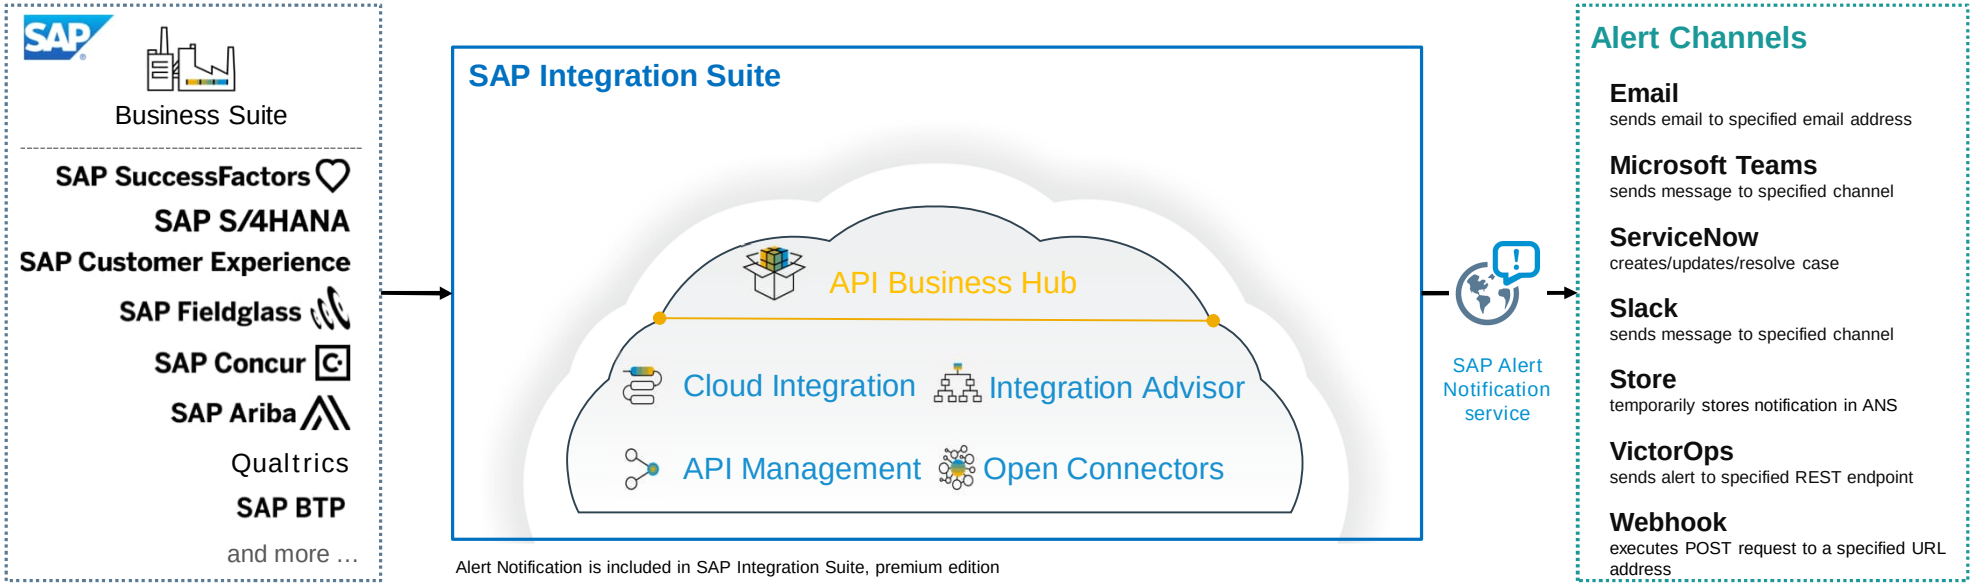
© 2023 SAP SE or an SAP affiliate company. All rights reserved. I PUBLIC

SAP Alert Notification Service

Business and technical alerts and notifications

Benefits

- **Standardization** of an environment-agnostic model and benefit from common configuration lifecycle and information model
- Subscription to receiving events and choice of **preferred delivery channel**
- **Retry mechanism** for failed alert delivery

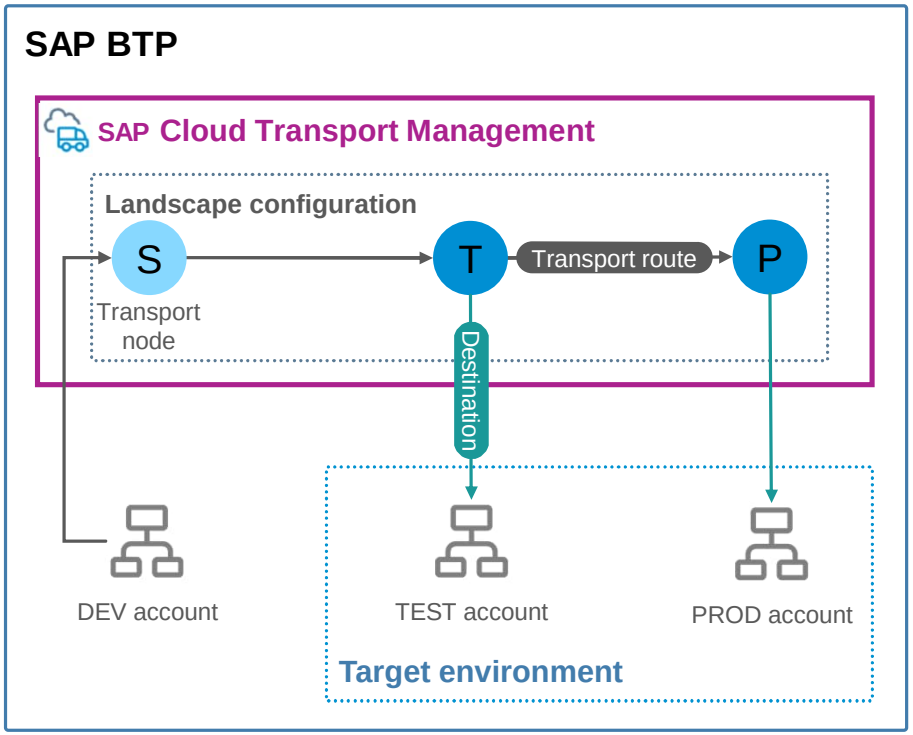


Alert Notification is included in SAP Integration Suite, premium edition

© 2023 SAP SE or an SAP affiliate company. All rights reserved. I PUBLIC

SAP Cloud Transport Management Service

Standardized, enterprise-ready change management process



Cloud-based transport management solution for your changes in the cloud – no ABAP system required

- Add transparency on **audit trail of changes**
- Establish **separation of concerns** and regain control
- Option for **synchronizing transports** with on-premise artifacts

Transport in Neo and Cloud Foundry environments of SAP Integration Suite content

- Trigger transport of your changes directly from the Web UI
- In addition, you can transport development content and content from other SAP BTP services (separate subscription required)

Cloud Integration | API Management | Business Rules | SAP Cloud solutions | ...

- Stick to one transport approach – even if you should move from Neo to Cloud Foundry or have both environments in use

Transport Management is included in SAP Integration Suite, premium edition.
For SAP Integration Suite, standard edition, it is licensed separately via CPEA or via a-la-carte subscription.

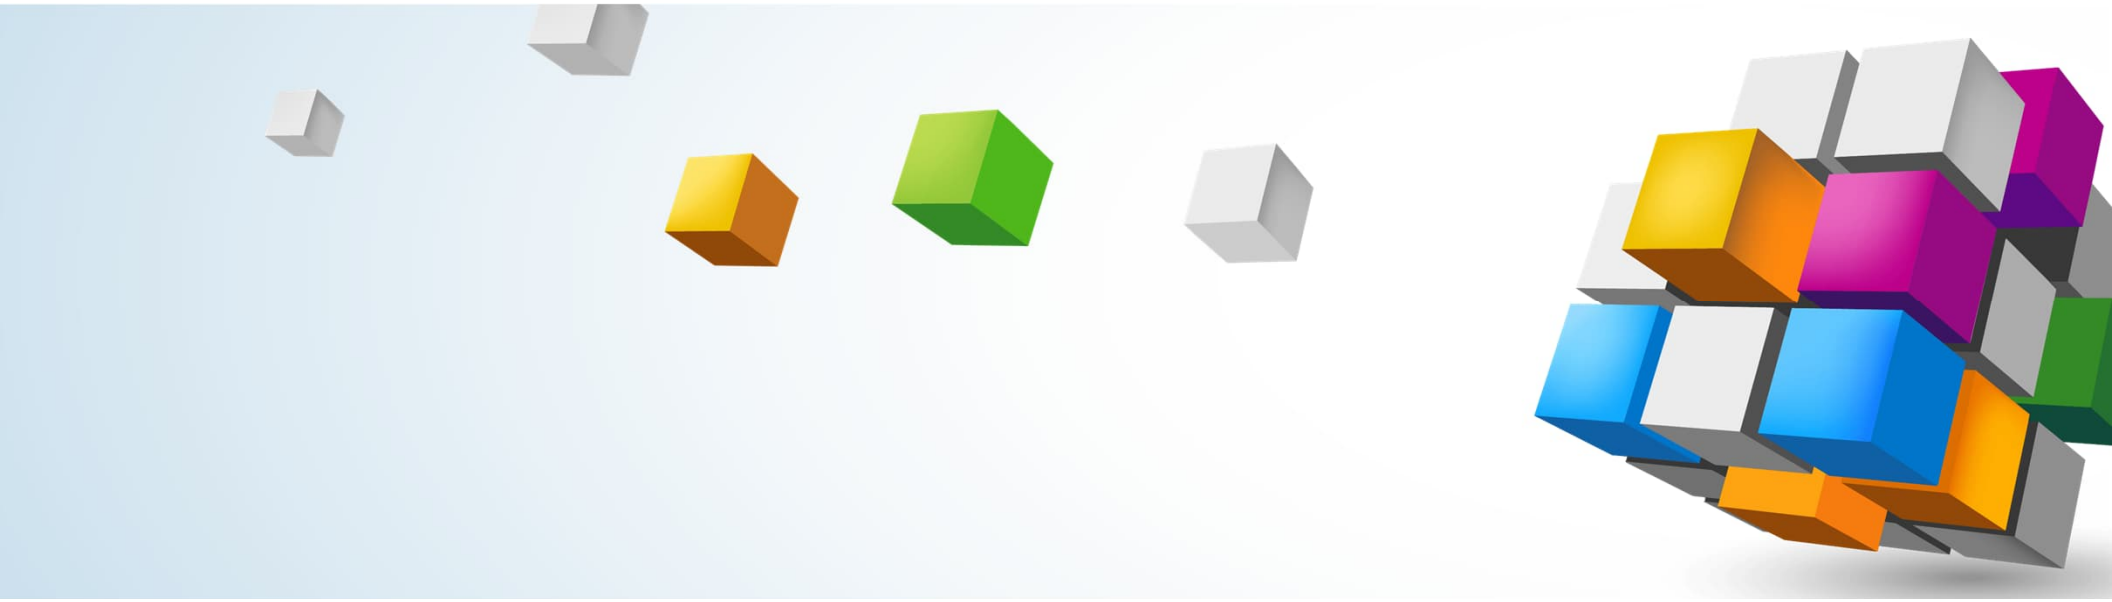
SAP Integration Suite – Recent Innovations



SAP Integration Suite – Top recent innovations

1

Edge Integration Cell as next-generation hybrid integration runtime *(in beta)*

- On-premise runtime version as optional extension to SAP Integration Suite to run classic process orchestrations
- On-premise API gateway for API-led integrations with executions of API policies and mediations
- On-premise event bridge for event-driven integrations from SAP “legacy” to SAP Event Mesh and/or non-SAP event brokers

2

Migration from SAP Process Orchestration to SAP Integration Suite

- Ease the transition through assessment, migration, and regression test tooling for customers planning move from SAP Process Orchestration to SAP Integration Suite

3

Cloud based B2B integration

- Trading partner management to centrally manage B2B scenarios incl. individual aspects & requirements of trading partners based on AI / ML and crowd-sourced proposal service
- B2B monitoring to monitor B2B transactions at runtime in corporation with trading partner agreement data

4

Event-driven and API-leg integration

- Advanced event mesh for high-volume event use cases, distributed deployment of event brokers, and more
- New experience of API business hub enterprise for SAP and non-SAP API gateways with customization capabilities
- Graph as part of API Management capability to create out-of-the-box one connected data graph (beta)
- Additional APIs and integration content from SAP LoB’s and our community on SAP API Business Hub

5

Integration governance

- Integration Assessment capability to define, document and govern an integration technology strategy based on ISA-M
- Unified developer experience, bringing different capabilities of SAP Integration Suite closer together

6

Additional integration content and adapters

- New user experience for SAP API Business Hub including community content and subscription to API packages
- Additional connectivity options, such as Data Store, Dropbox, Slack, and Splunk, and MS Azure adapters

Built-in connectivity to third-party applications simplified with new adapters

Slack Adapter

- The Slack sender and receiver adapter help you to create or manage conversations, upload files or chats, create groups, etc. within Slack channel, to meet specific needs effectively and reduce the email count significantly.
- The Slack adapter connects to a user's Slack account from Cloud Integration and performs different operations as supported by the Slack APIs.
- **Key features:**
  - App, Bot or user token based authorization
  - Dynamic header and property support in the receiver adapter.
  - Desired response type from Slack (JSON or XML)

Splunk Adapter

- The Splunk sender and receiver adapter will be used for monitoring, searching, analyzing and visualizing the machine-generated data in real time.
- It performs capturing, indexing and correlates the real-time data in a searchable container and produces graphs, alerts, dashboards and visualizations between Splunk and SAP Integration Suite.
- **Key features**:
  - Basic Authentication and Token Based Authorization.
  - Dynamic header and property support in the receiver adapter.
  - Desired response type from Splunk (JSON/XML).
  - Raw Data can be pushed to Splunk.

Azure Storage Adapter

- The Azure Storage sender and receiver adapter help you to integrate Azure Storage from Microsoft with SAP Integration Suite to perform CRUD operations on four types of storage protocols. These are:
  - Blob service
  - Queue service
  - File service
  - Table service
- **Key features:**
  - Shared access signature token-based authorization
  - Shared access key based authorization
  - Dynamic header and property support in the receiver adapter.
  - Desired response type from Azure (JSON/XML)
  - Post processing file handling
