

MDG Implementation with ADS

John Paul Palelil

Sr Director ERP & Corp Applications

Safety Moment

Driving Safety (Distracted Driving Awareness Month)

- When you're behind the wheel, your only job is to drive.
- At least eight people a day are killed in distracted driving crashes.
- Distracted driving isn't just risky for you, it can be deadly for every nearby driver, pedestrian, bicyclist and worker.
- Join us in observing Distracted Driving Awareness Month and help everyone get home safe.

Core Value

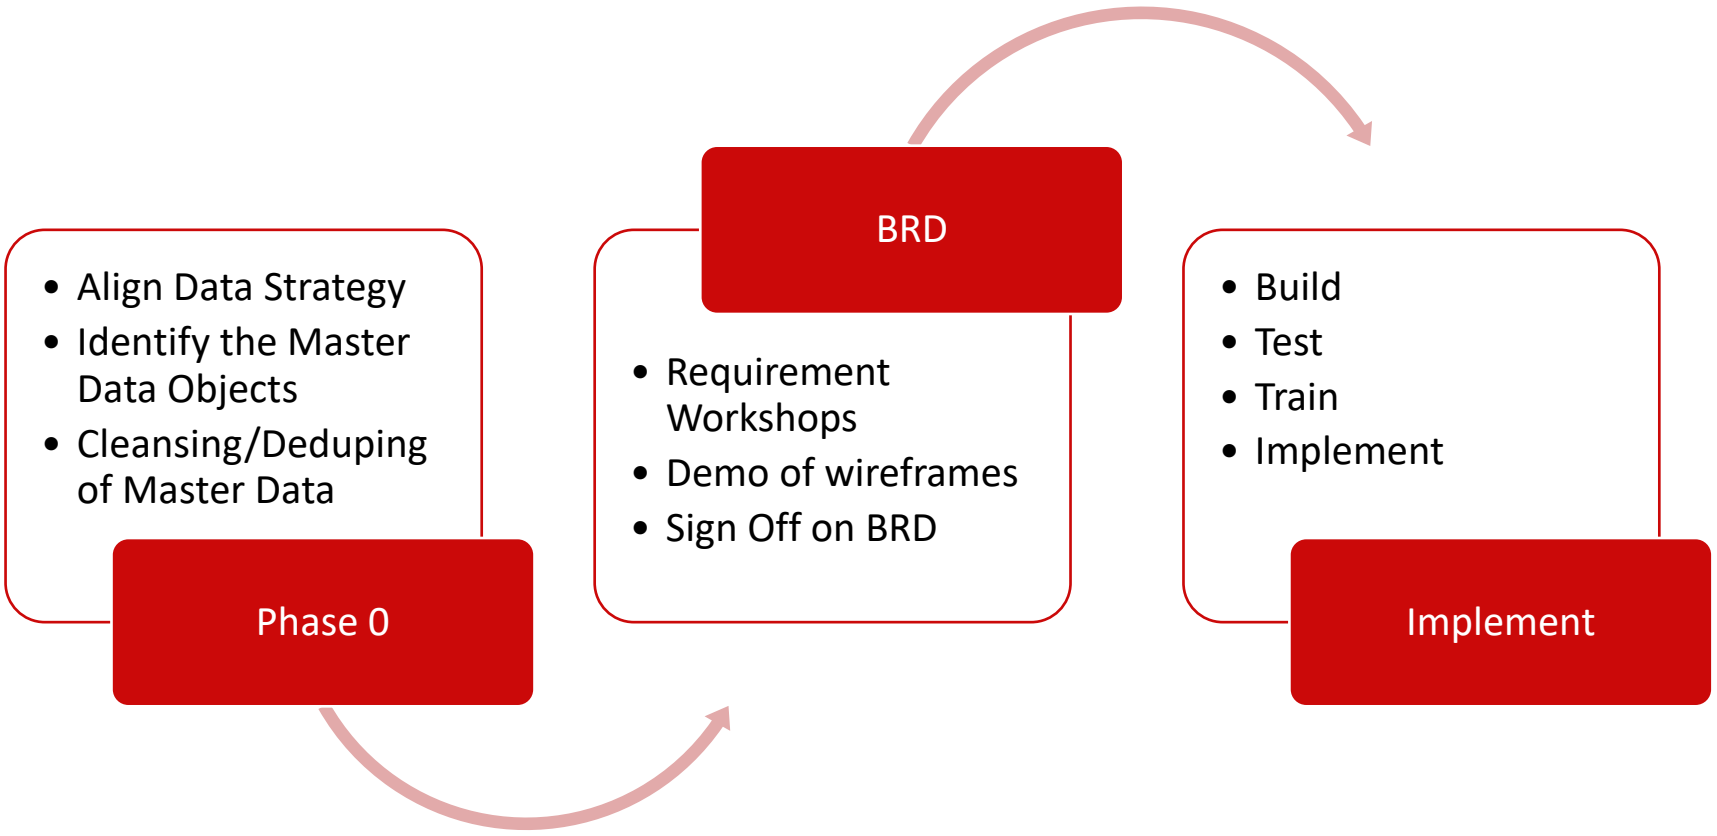

April

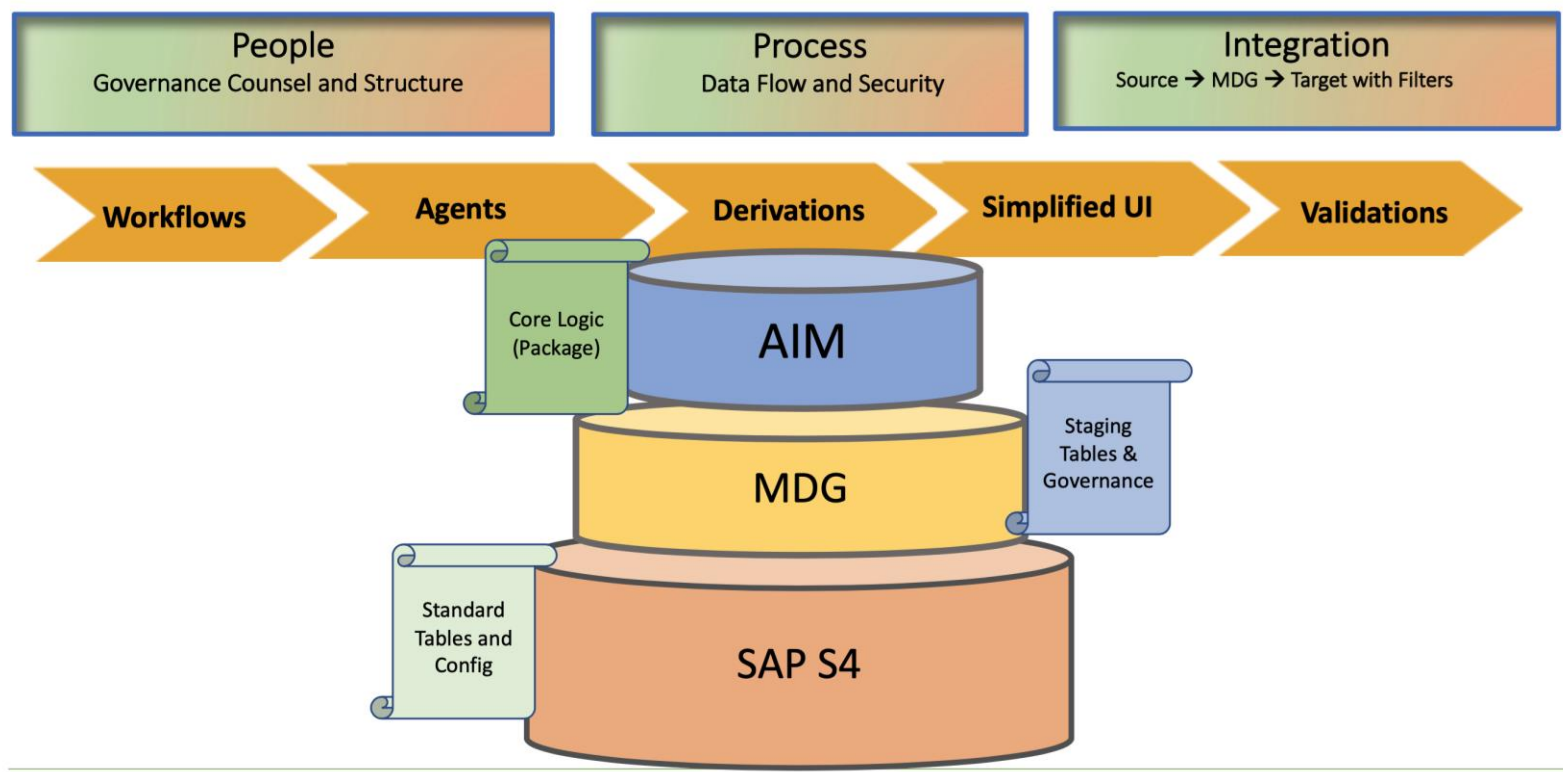

Take the Pledge

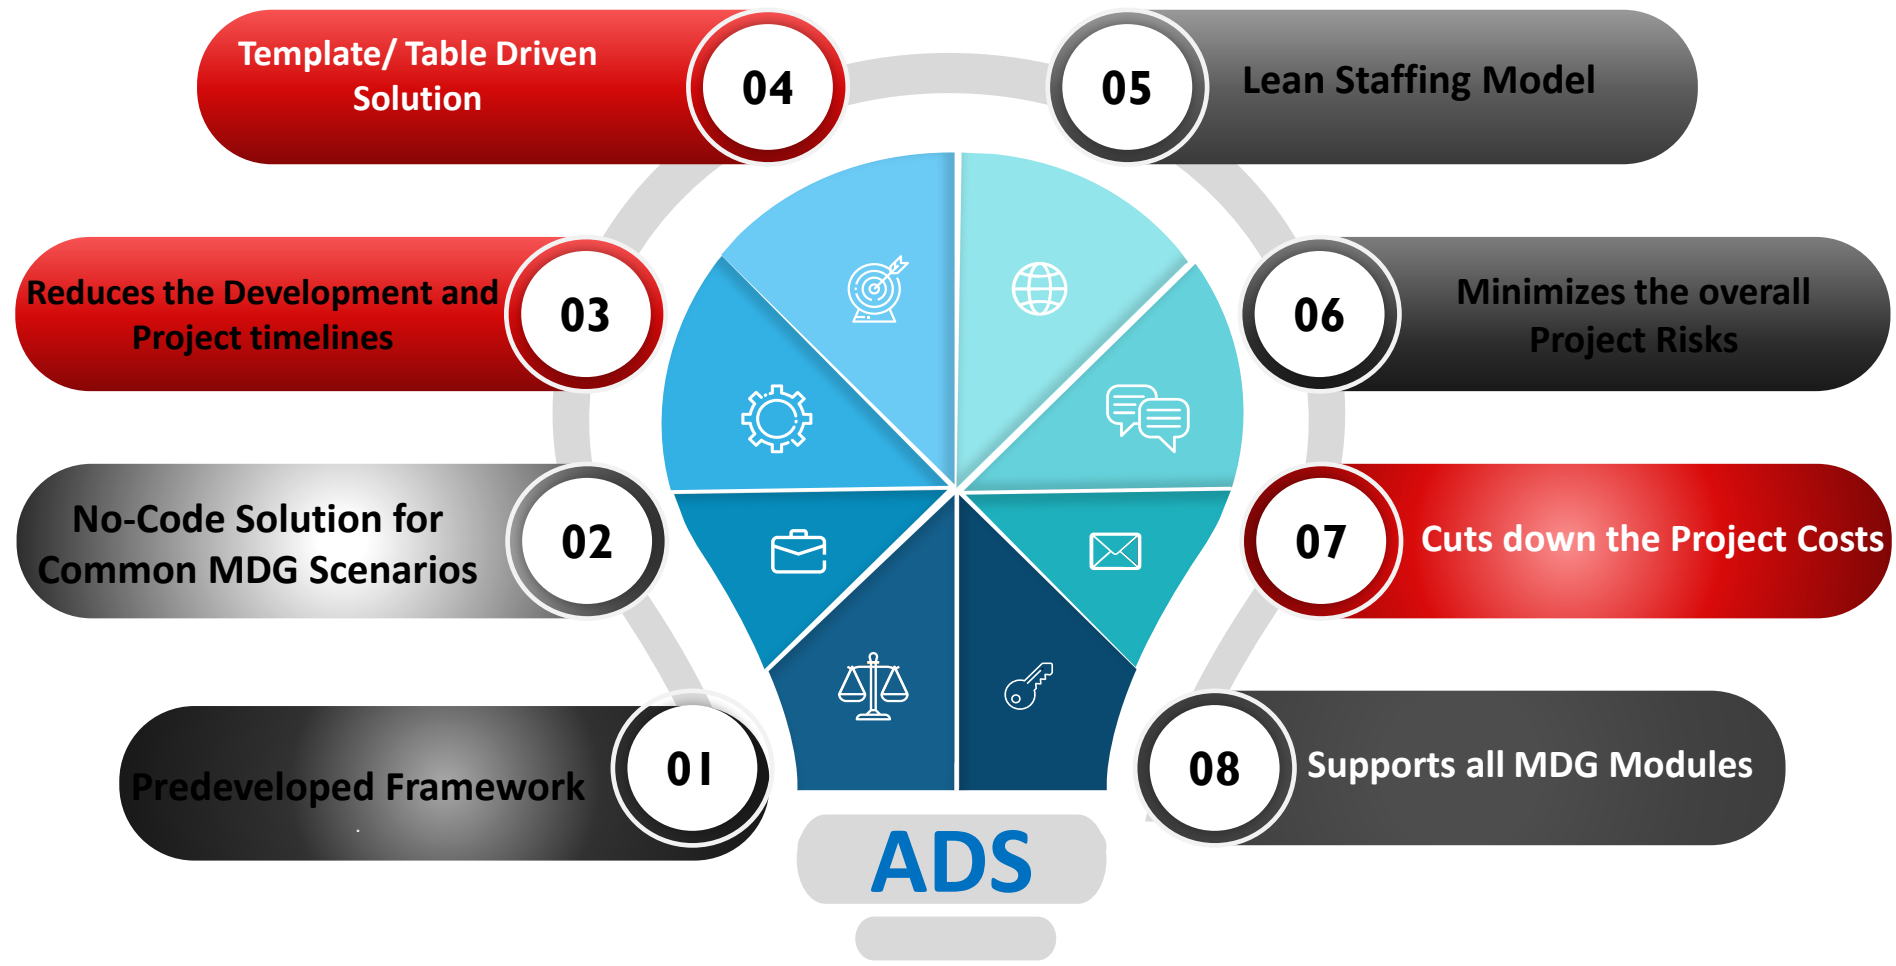

- I will make our roads safer for everyone by avoiding all forms of distracted driving.
- I will speak up when others are distracted to protect myself and all other road users.

- Previous implementation took over 6 months only for Material Master
- Configuration sync (Harmonization of Configuration and Ref data across the SAP Landscape)
- Data Migration (Consolidation of shared records across the SAP Systems)
- Not knowledgeable of the Governance Counsel and Data Segregation
- Lack of knowledge in grouping of the workflows and agent determination
- Not involving the data owners at the right workflow steps
- Missing the vision on end-to-end Integration for Non-SAP and SAP systems
- Poor Co-ordination/ Communication between the clients and implementation team
- Over complicating the development and breaking the core MDG Functionalities

- Add-on Framework on top of SAP MDG Application Layer
- Accelerates the SAP MDG implementations without compromising the quality
- Developed based on our client experiences and industry best practices
- Predeveloped and Pretested Framework to accelerate MDG Implementations
- Uses SAP MDG Framework to remain compliant with SAP MDG upgrades
- Contains ready-to-use Templates for all Standard Objects and Business Processes
- Significantly reduces the implementation Timelines, Cost, Resources, and Overall Project Risk vs traditional implementation approach.

Dynamic Workflows

Build the workflows dynamically

No Development is needed for majority of the scenarios.

Simplified UI

Create a simplified UI based on the Workflow Step (Role).

Requestors and Approvers will see a customized UI that is specific to their role.

Field Properties

Offers finest level of Field controls based on the Workflow Step (Role).

Derivations

Allow the clients to populate the default values based on a control table.
