# O Den ext

**S/4HANA Migration:** The legacy SAP® system dilemma

#### Introductions

## Your Presenters:

**Kevin Marinov**, Principal Solutions Consultant at OpenText **Jonathan P. Simpson**, Director at Sigma Business Solutions

# **Objectives**

We will teach you how to overcome the dilemma associated with legacy SAP systems through previously successful use-cases.

#### What's the Dilemma and Why Does it Matter?

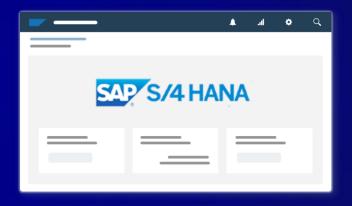

- Budget to be realized from legacy SAP applications
  - Reallocate to transformation initiatives (S/4, Cloud)
- Simplify access and compliance
- Mitigate legal risk

# The legacy SAP application dilemma

# Do you have a strategy for efficiently managing your legacy SAP systems?

# Case Study: Global CPG Organization

#### **Situation**

Multiple SAP systems in each of four geographic regions (APAC, EU, LATM and NA)

Complex and long retention management requirements

Additional older SAP instances left from earlier upgrades and failed decom attempts

#### **Objective**

Consolidation and upgrade of all corporate SAP applications to S/4HANA

Decommission older instances of SAP for datacenter simplification and cost reduction

Improve retention management and compliance capabilities

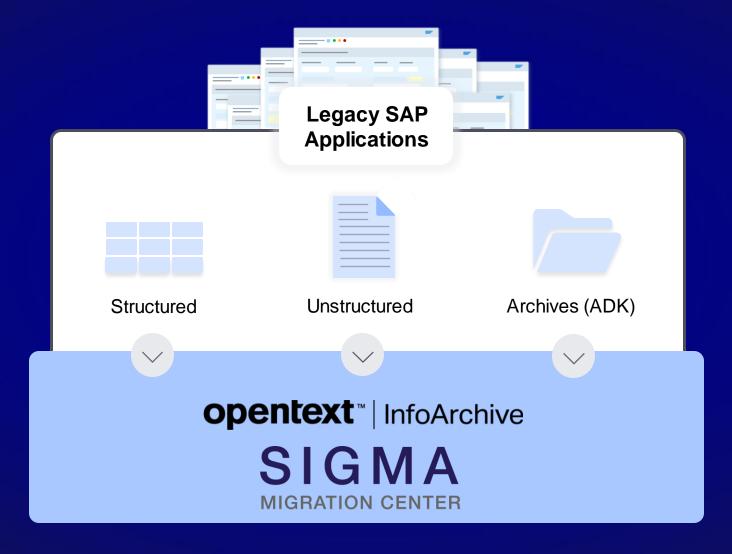

# Case Study: Global CPG Organization

#### Requirements

- Single solution to decommission all SAP application data
- 13 systems total (Phase 1 consisted of ECC, BW, HR, DART)
- Ability to apply corporate-based retention polices
- Scalable solution; over 20TB to be archived

# Legacy SAP application decommissioning

# Sigma Migration Center for InfoArchive

An ecosystem of tools and IP built specifically to extract SAP data and migrate it into InfoArchive, a modern archive solution and cloud-based service for compliant archiving

- Highly-accessible
- Scalable
  - Any SAP application
  - All data types
  - Structured, Unstructured
- ETL tools developed in SAP ABAP
- Pre-built Views
- Ad Hoc Query Generator

#### **Global CPG Organization**

# Case Study: Utilities Organization

#### **Situation**

**M&A:** acquired two legacy SAP applications (3.1 & 4.6/2TB) and three *non-SAP* applications

#### **Objective**

- Reduce overall supporting infrastructure
- Maintain access to financial, sales and material management data
- Ability to apply corporate retention polices

#### **Utilities Organization**

**M&A:** acquired two legacy SAP applications (3.1 & 4.6/2TB) and three *non-SAP* applications

**Legacy SAP Apps Extract Transform** Load **InfoArchive** FI **SAP R/3 3.1 XML** SD Non-SAP MM **SAP R/3 4.6** Carve-Out

#### **Utilities Organization**

**M&A:** acquired two legacy SAP applications (3.1 & 4.6/2TB) and three *non-SAP* applications

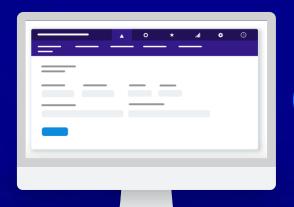

#### Successfully archived and fully decommissioned 2 SAP & 3 non-SAP applications

# Case Study: Cleveland-Based Industrial Motion Provider

#### **Situation**

Large SAP user, but also use Epicor Prophet 21 in some business segments

Many years of data built up in SAP, effecting performance

Other redundant ERP systems resulting from mergers and acquisitions

### **Objectives**

Archive older data from SAP

Decommission redundant ERP systems

Improve retention management and compliance capabilities

One comprehensive archive for all enterprise data

# Case Study: Cleveland-Based Industrial Motion Provider

#### Requirements

- Single solution for all archiving requirements
- Eliminate unused ERP systems
- Ability to apply corporate-based retention polices
- Flexible to handle any archiving scenario

# **Essential Elements of Successful Decommissioning**

A Successful Decommissioning Effort Must Be Flexible to Accommodate All Data Types and Complex Compliance Requirements:

**DATA INTEGRITY** 

INFORMATION LIFECYCLE MANAGEMENT

**SECURITY & PRIVACY** 

Audit

Log all system and user activity

**Retention policies** 

Implement and administer complex records plans

Masking

Hide all or part of a data record

**Chain of custody** 

Who, origination, volume

**Purge** 

Controlled deletion of data

**Encryption** 

Strong encryption and key management

**Immutability** 

Read-only data

**Legal Holds** 

Override retention policy

**Access control** 

Simple and Intuitive access by authorized users only

## Recap

#### SAP DECOMMISSIONING CUSTOMER BENEFITS

Accelerated S/4HANA Migration

Reduced TCO Increased ROI

Simplified Access

Simplified Compliance Minimized Risk

Scalable Enterprise Solution
