

SAP Signavio Process Transformation Suite For ASUG

Kevin Hansen

Signavio GTM Canada

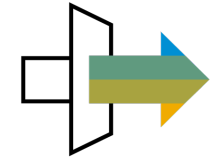

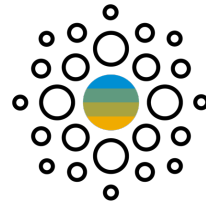

June 14th 2023

Agenda

June 14th 2023

- Background: SAP and Business Process Management
- Signavio for Technology Transformations
- Signavio as part of SAP Integrated Toolchain and ecosystem
- *Time allowing: light demo of product highlights*
- Next steps and useful resources

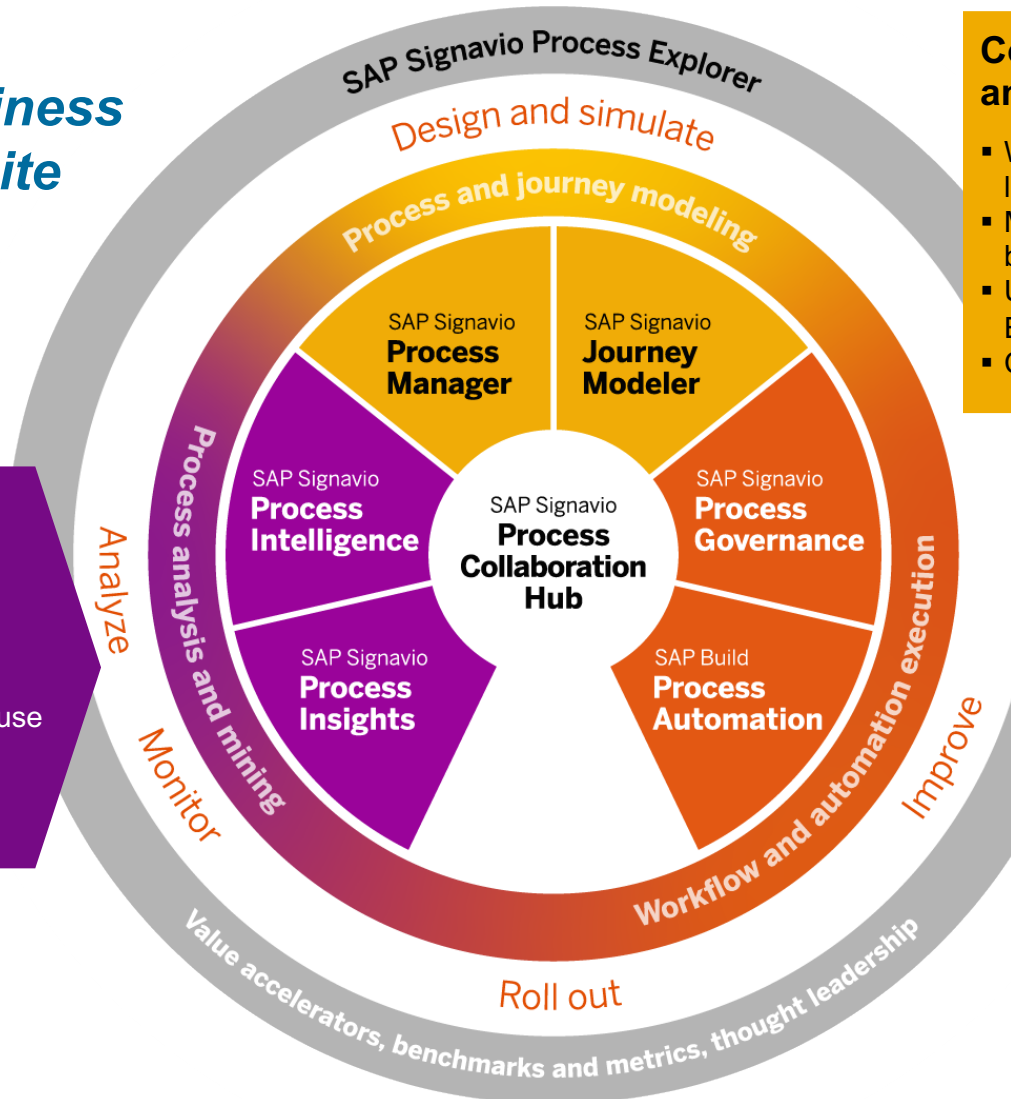

Why Business Process Management?

Establish a common business language	Promote process ownership and governance	Provide a central point of reference for processes	Measure and benchmark process performance	Identify opportunities to leverage best practices	Illustrate end-to-end value creation and dependencies
<ul style="list-style-type: none"> ▪ Reduce confusion and mis-communication ▪ Speed up decision making and consensus building 	<ul style="list-style-type: none"> ▪ Improve accountability ▪ Provide a forum for key stakeholders 	<ul style="list-style-type: none"> ▪ Trusted resources on how the organization operates ▪ Support guided and self-service training materials 	<ul style="list-style-type: none"> ▪ Consistently measure process outcomes across the organization ▪ Identify empirically opportunities for continuous improvement 	<ul style="list-style-type: none"> ▪ Focus on applying best practice on process areas that are not truly unique or differentiating ▪ Learn from the best 	<ul style="list-style-type: none"> ▪ Understand and measure the outcomes of cross functional value streams ▪ Assess the quality and value of process inputs and outputs

SAP Signavio Processes for Managing Processes

SAP Signavio Business Transformation Suite

Process Analysis and Opportunity Identification

- Monitor and analyze process performance and compliance
- Discover recommendations for improvement
- Understand process variations, perform root cause analysis, assess opportunity value

Collaborative Process Design and Documentation

- Work virtually between IT, business users, and leadership to find the best solutions
- Maintain a central enterprise-wide repository of all business processes with rev control
- Use pre-built connections to SAP Best Practices, EnableNow, and Solution Manager
- Communicate process changes to all stakeholders

Process Improvement and Governance

- Fix, automate, streamline, and enhance processes with SAP Process Automation and other technologies
- Configure and reconfigure S/4HANA using native functionality and other available process options
- Convert traditional system-of-record systems to proactive systems-of-interaction

Using Signavio during S/4HANA implementations

Ensuring a framework for continuous process re-engineering

① **Enterprise Transformation** - Ensure S/4HANA and SuccessFactors will be aligned with enterprise objectives and use available pre-built content

② **Process Excellence** - Establish a data-driven program for process monitoring and continuous improvement

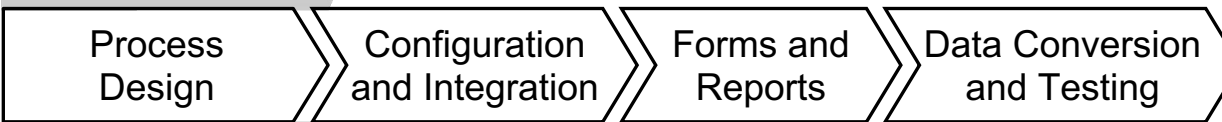

✓ **Scoping and Goal Definition**

Identify business objectives and key drivers for the transformation

✓ **“As is” Process Analysis and Modeling**

Analyze past processes to uncover improvement opportunities

ERP Transformation (Project)

✓ **Target State Definition**

Collaborate across all business and IT to agree on the “to-be” state

✓ **Define Governance Model**

Determine project milestones and assign ownership and responsibilities

✓ **Process Governance**

Deploy new processes consistently across user teams

✓ **Process Reengineering**

Repair, automate, streamline processes as needed

✓ **Monitor Performance and Compliance**

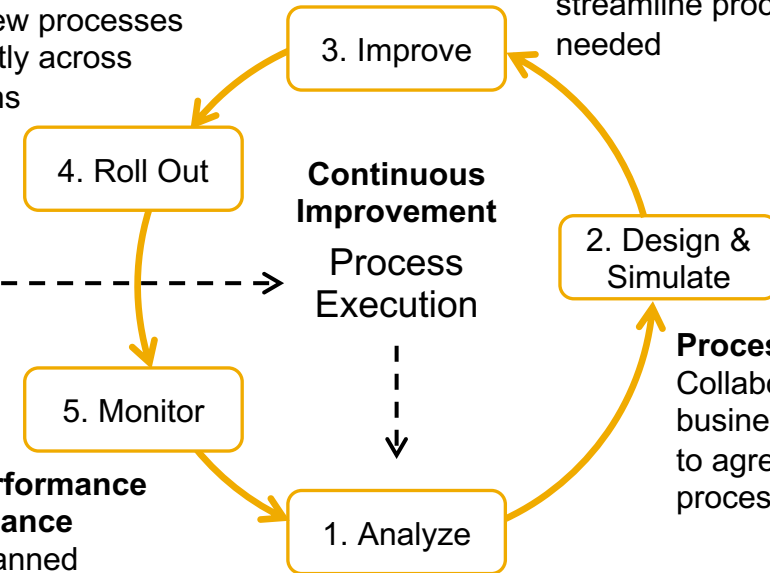

Compare planned performance with actual performance and ensure compliance

✓ **Process Analysis**

Analyze actual process performance to detect improvement opportunities

✓ **Process Redefinition**

Collaborate with business users and IT to agree on “to be” processes

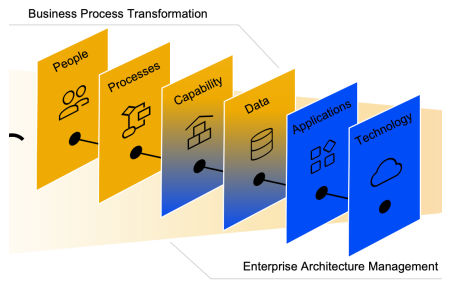

The flow of a well-managed project

SAP Enable Now

Enrich Process with Learning Content

SAP SIGNAVIO SERVICES SUCCESS MODEL

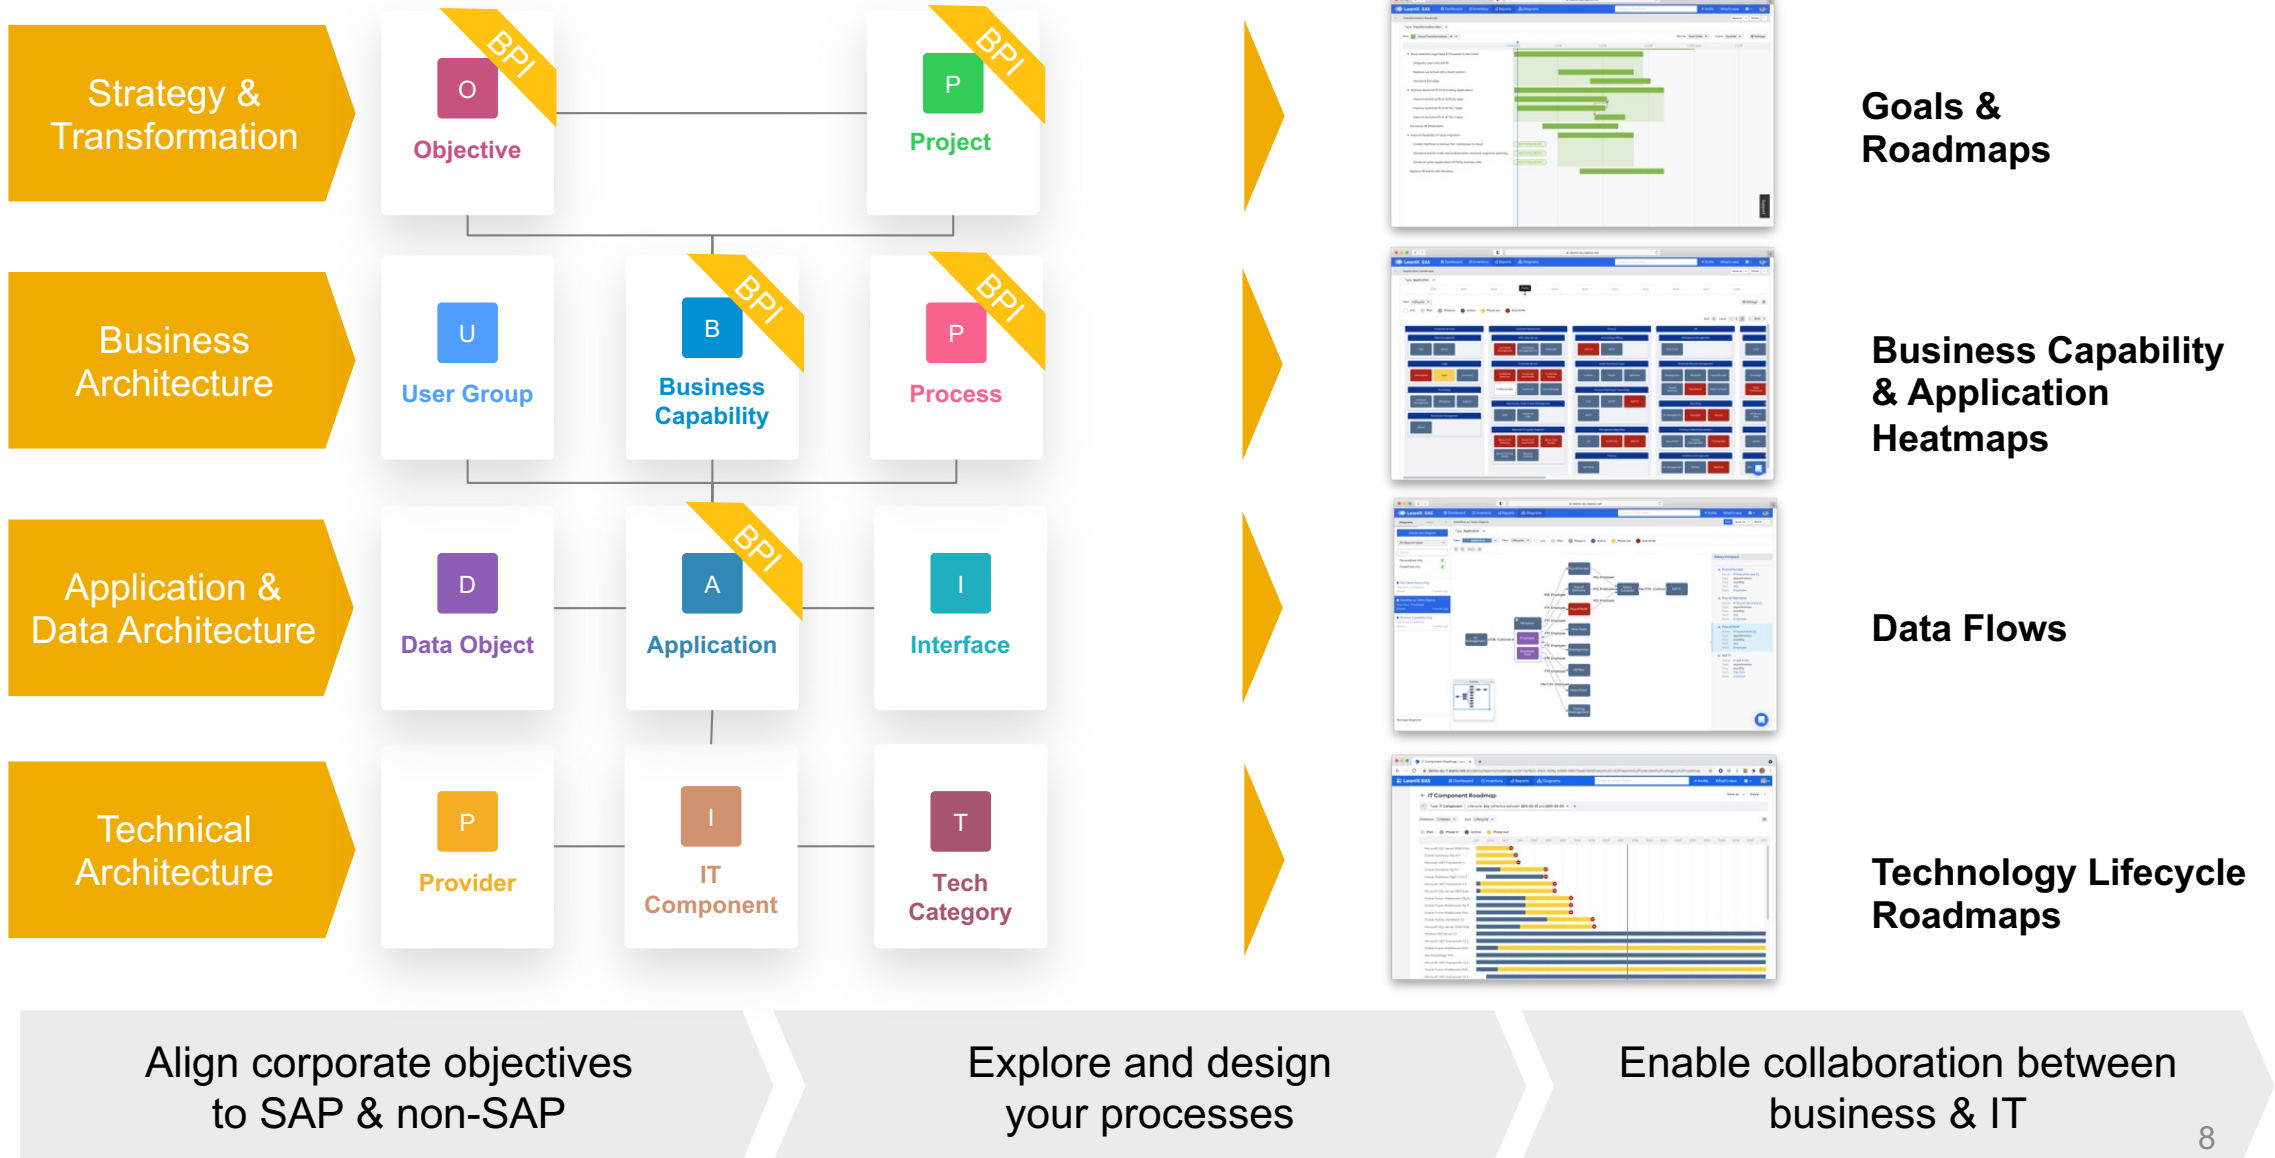

Ongoing Collaboration Between Your Business, SAP and System Integrator

Guiding Principles

- ✓ **3 Legs of Support**
- ✓ **Time to Value**
- ✓ **Risk Mitigation and Cost Avoidance**
- ✓ **Path to Scale & Self-Sufficiency**
- ✓ **SAP Integrated Toolchain**
- ✓ **Signavio in support of the system integrator's broader strategy**

Drive continuous transformation with EA & BPI

SAP Signavio process analysis and mining

Unique two-speed offering for data-driven process improvement

SAP Signavio Process Insights

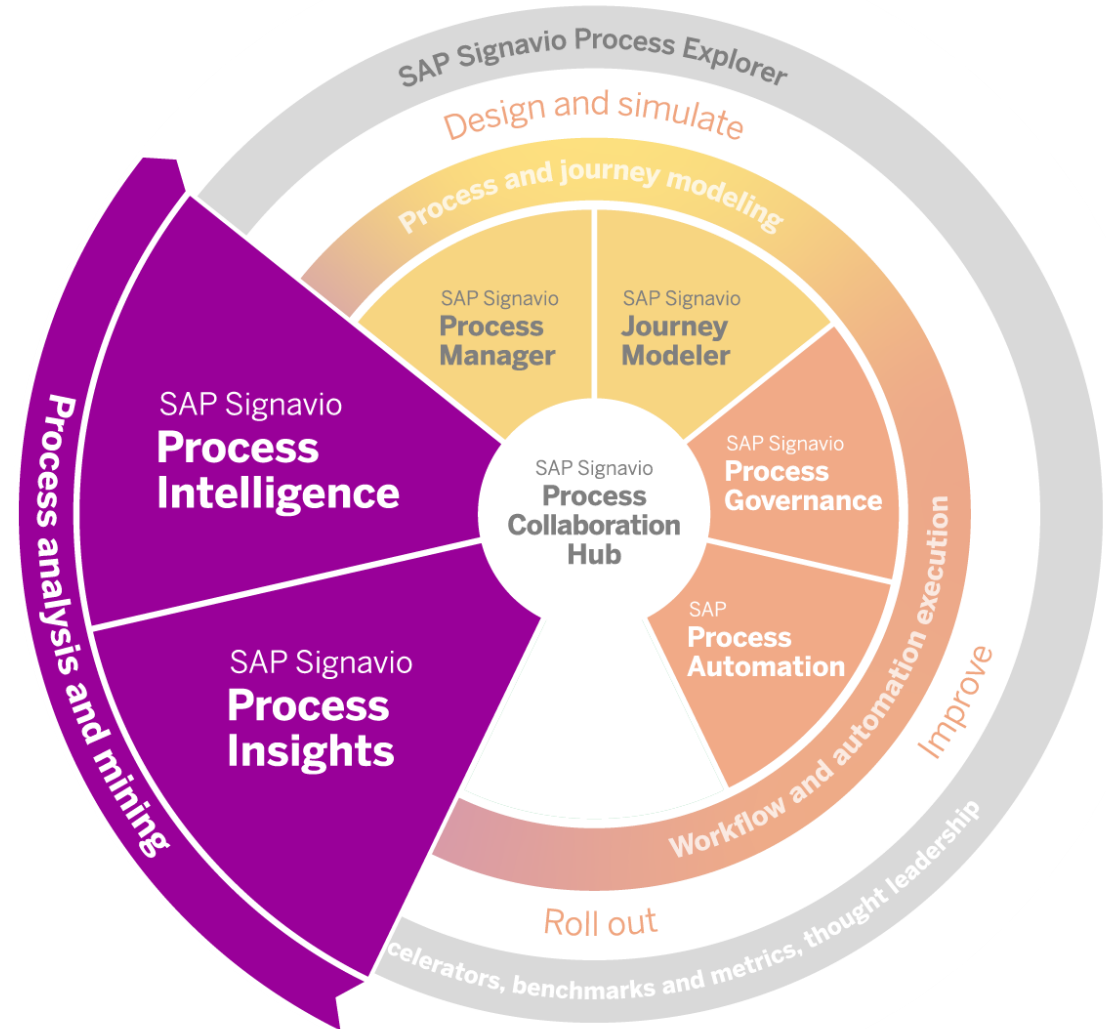

Fast-track your process improvement initiatives with plug-and-play analytics and benchmarks for your SAP processes.

- SAP Specific
- Insights populate within 24 hours across all business areas
- uses prebuilt process flows and KPIs

SAP Signavio Process Intelligence

Discover your end-to-end process reality, including its unexpected paths, and perform in-depth analysis.

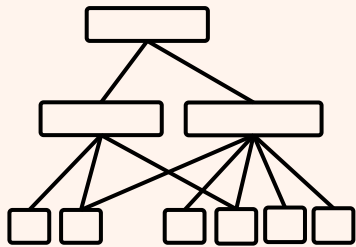

- System Agnostic
- Targeted Process Improvement (mining)

Why SAP Signavio Value Accelerators?

PAIN POINTS

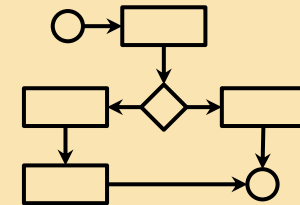

Hierarchical solution-driven Best Practices Model

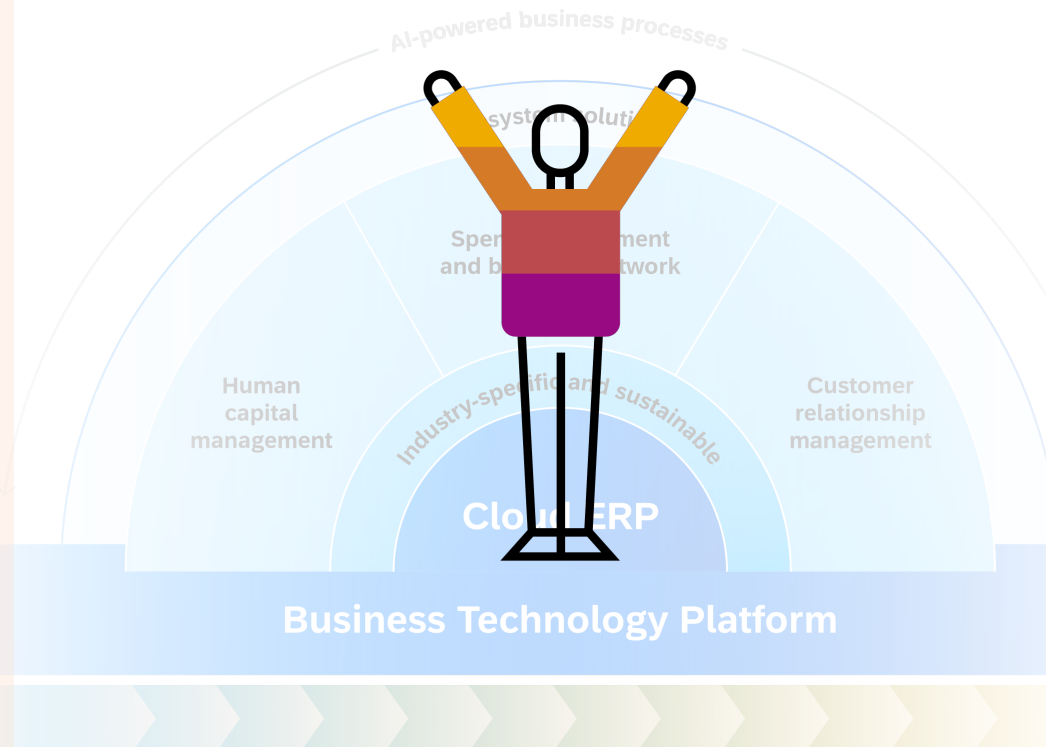

- Focused on solution-centric SAP Best Practices
- No integration with graphical process modelling tools
- No end-to-end scenarios

SOLUTION

Composable, integrated and reusable value accelerators

- Guided **end-to-end experience** along transformation and improvement initiatives
- **Integrated and connected** process and architecture content
- Value Accelerators **beyond best practices** including reference models, business metrics, and configuration items

Useful Resources

1. [Signavio Process Explorer](#) – prebuilt process accelerator content
2. Our global Signavio team is offering a free 6-week training (2-4 hours per week) on how to use Signavio during your S/4HANA program, on [OpenSAP](#).
3. [SAP Learning Hub](#) offers thorough training and certification on various areas within Signavio and BPM Fundamentals. A learning hub license is required to access.

Thank You!
