3 key considerations to drive value from your cloud migration

# Introductions

Tyler Constable, Executive Director, Sales Engineering

Avantra, AIOps platform that enables hyperautomation

# **Agenda**

- SAP in the cloud what does that mean?
- Technical automation
  - Planned cloud automation
  - Unplanned cloud automation
  - Automation platform and fringe automation
- How Avantra can help

#### SAP in the cloud

#### **Private Cloud**

Various Private

**Cloud Providers** 

&

Managed Service
Providers

#### laaS

Infrastructure as a Service Hyperscalers

## PaaS

Platform as a Service

#### SaaS

Software as a Service

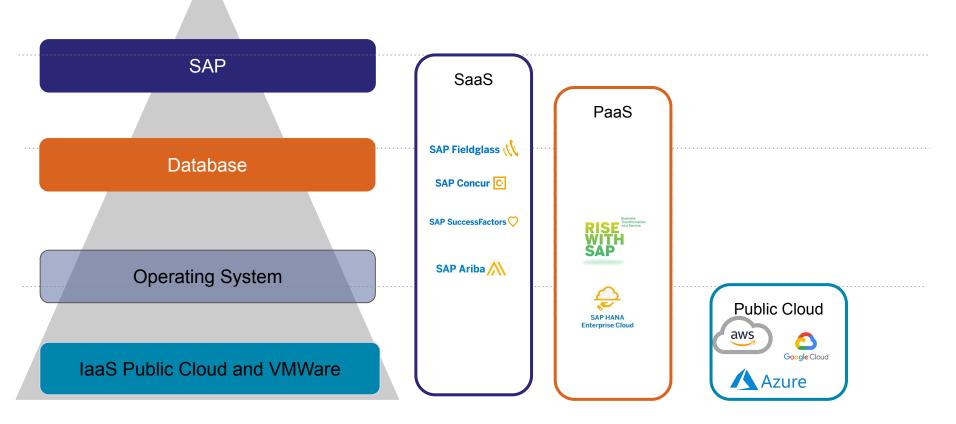

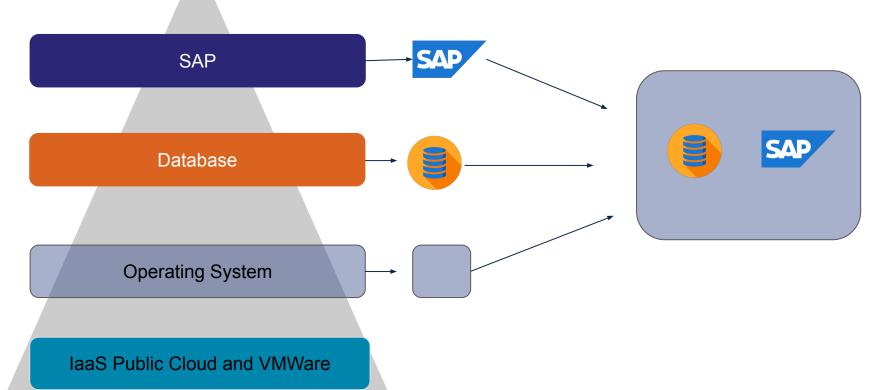

#### **Cloud technical stack**

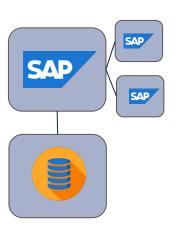

#### **Technical SAP architecture**

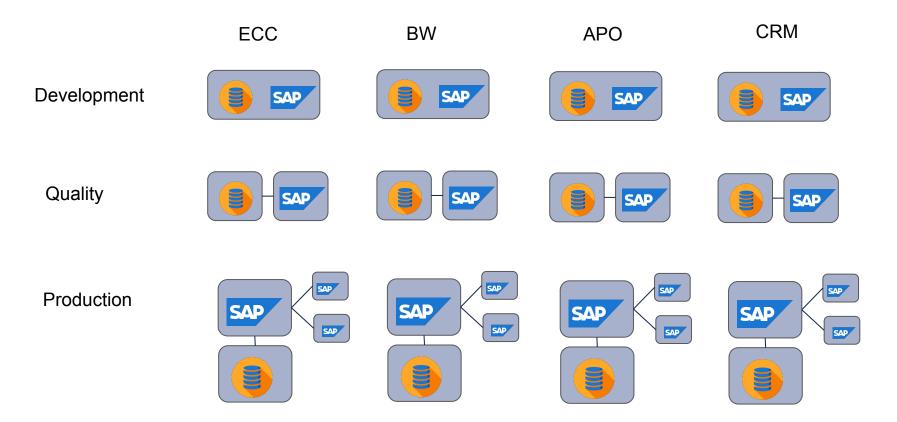

- SAP application and database on different servers
- Addition of application servers (work engines)
- SAP systems get much more complex

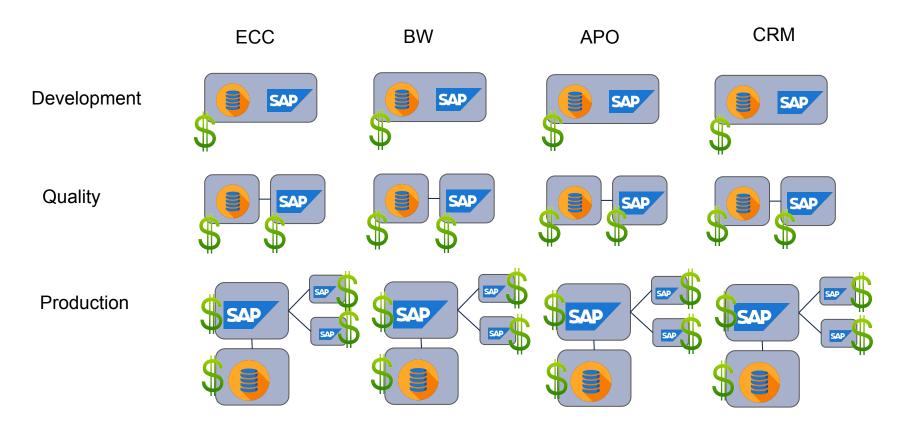

### **Complexity of SAP landscape**

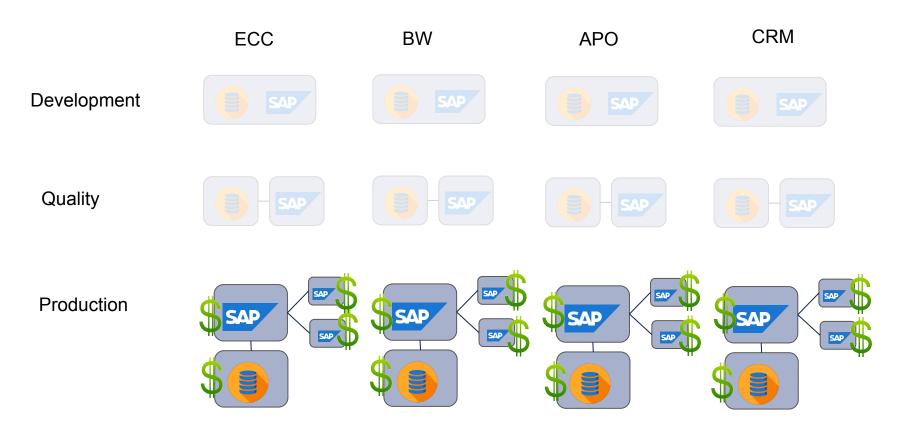

### **Cloud cost**

### **Cloud cost savings**

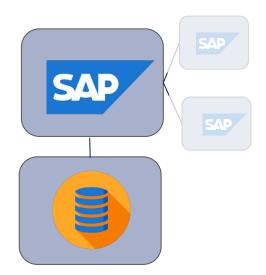

# Planned cloud automation

- Significant cloud savings
- Consistent shutdown / startup processes
- Happy employees No recurring off hours work
- Sustainability

## **Unplanned Cloud Automation: Scaling Out**

#### **Work Processes**

- Little work engines
- Many other SAP based metrics
- Not visible to non-SAP monitoring

#### **Use Cases**

- Unknown performance issues
- Busy season
- Month end closing
- Unsure architecture, M&A

# Unplanned cloud automation AN

- Maintain ongoing low cloud costs
- Keep business moving
- Better support life, give the team time to research issues

### **Automation platform**

#### & fringe automation

Every SAP environment is unique

- Architecture
- Development
- Supporting software (3<sup>rd</sup> party, backups, etc...)
- Interfaces (legacy systems, banks, vendors, etc...)

A platform is needed where automation can be customized

- Planned
- Unplanned

#### **Automation across the technical stack**

AVANTRA

\*\*With correct authorizations

SAP

Trigger an ABAP Event
Calling remote function calls & BAPI
Kernel Upgrades
Identify HotNews/High security notes
Start/Stop (SAP system or individual instances)

Database

Database Refreshes Run SQL Scripts Start/Stop SAP database

**Operating System** 

Run Command Line Commands Run Scripts from central Avantra Master SSH Start/Stop with IaaS Public Cloud and VMWare Modifying SAP Profile Parameters

laaS Public Cloud and VMWare

Start/Stop - Scheduled and Triggered

# **Automation platform**

- Drive an innovative culture
- Reduce downtime
- Get ahead of business related issues
- Keep costs low
- Keep support teams focused with less interruptions
- Keep happy teams by minimizing off hours work

# Designed to manage your SAP world

Operational Transparency

Actionable Insights

Full Stack Automation

Customizable dashboards

Business process technical monitoring

Customizable reports

Notification escalation

Best practice provided out of the box

Intelligent alerts

Root-cause visibility

Predictive resource analysis

Consistent auditing & system governance

Agent-based deployment for deep insights

Consistent and rapid deployments

Best-practice monitoring automation

System hardening

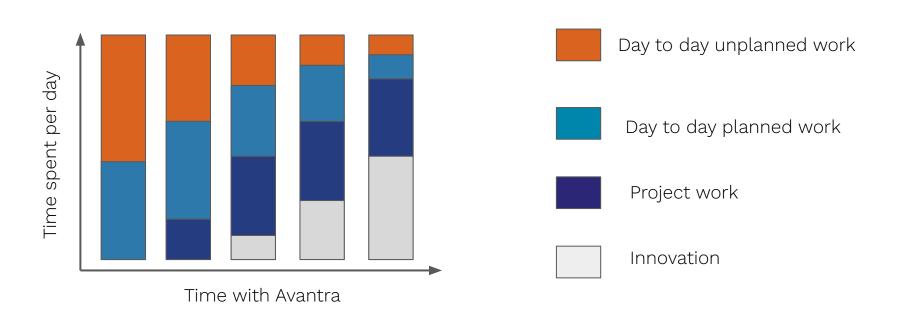

Cloud automation

Build your own custom checks & actions

## Driving an Innovative Culture

# Invista / Chemical Company

"We selected Avantra to manage our AWS and on-premise SAP systems. Avantra empowered us with a monitoring solution that keeps us informed through real-time alerts, resource utilization, and integrations with business processes inside our ERP systems."

Company SAP Basis Lead

In the process of a migration to the cloud, the customer identified the need to manually scale that cloud as well as hybrid landscape monitoring and notifications. This was not available through other means.

Without scaling to match demand the customer would not have realized the true cost saving benefits from operating a managed hybrid cloud landscape.

Using Avantra, the customer could easily see how much cloud resource was expected to be used and adjust accordingly. They also deployed cloud scaling automation and have landscape wide (on-prem and cloud) monitoring with real time notifications.
