Agenda

- Who is Tricentis
- SAP and Tricentis SOLEX Relationship
- Delivering Quality at Speed
- Available Resources

X Tricentis

The continuous testing market leader with Agile test management and advanced test automation optimized to support over 160+ technologies

Merger

Q-up

Flood

Why SAP Chose Tricentis as Its Official Testing Solution

Tricentis-SAP Partnership Value Partnership OEM | Product Reselling | Co-Development | Premium Support

The Global Leader in **Enterprise Testing Solutions**

Leader in Gartner Magic Quadrant

Versatile Platform for Customers at Any Stage of SAP Modernization

Enterprise-Grade Platform for SAP Testing and Beyond

Risk-Based Approach That Minimizes Business Downtime

Modern, Al-Driven **Technology for Easy Adoption**

Al-driven Impact Analysis for Fast, Safe Changes

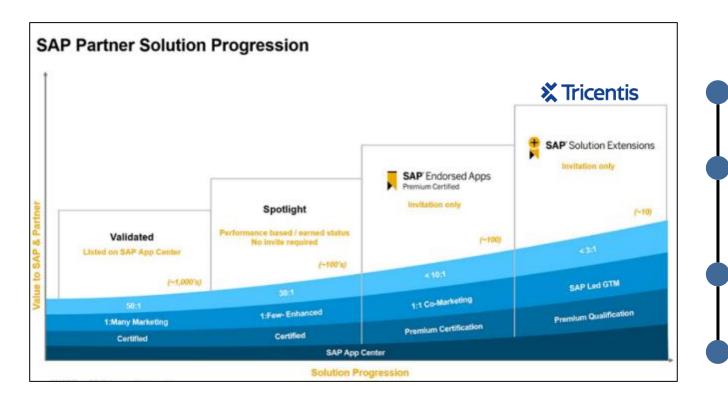

No-Code, Business Friendly Platform for Easy Adoption

Tricentis is an SAP Solution Extension (SOLEX) Partner

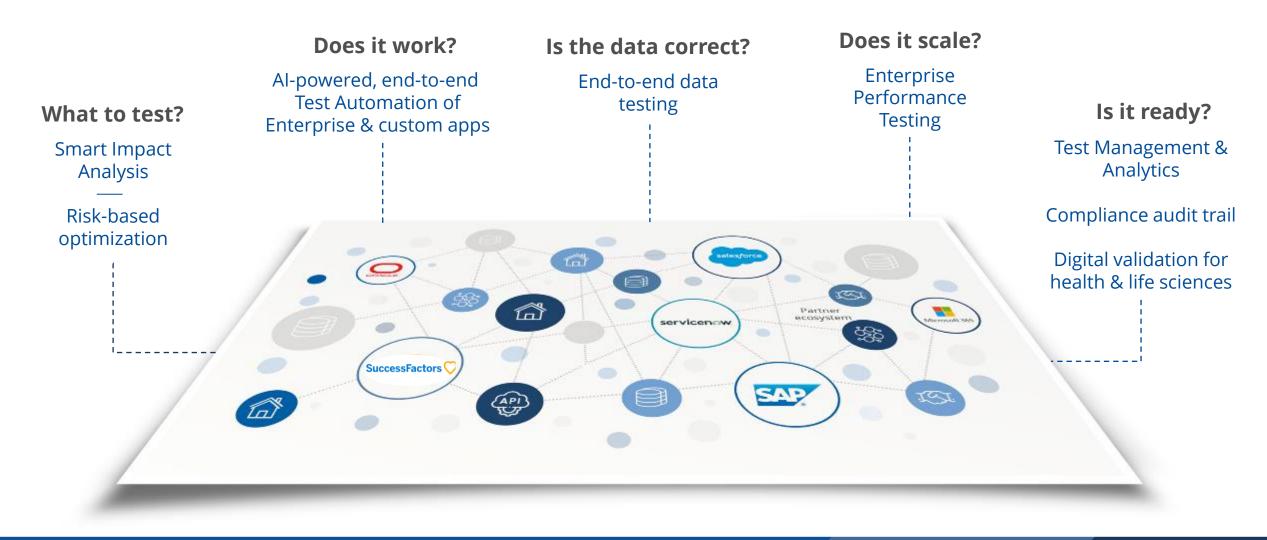

Critical Customer Value | Long-Term Outlook Joint Roadmap Planning

SAP Solution Extensions

- **Highest level** of SAP software partnership
 - **SAP Premium Qualification** (PQ) ensures that product quality is same as SAP products
 - **Long-term** roadmap planning and joint development
- Only ~10 partners "actively" managed in the SOLEX program – SAP will focus on Top 3 only

Deliver High-Quality Applications at Speed All the Capabilities You Need

Deliver High-Quality Applications at Speed

All the Capabilities You Need

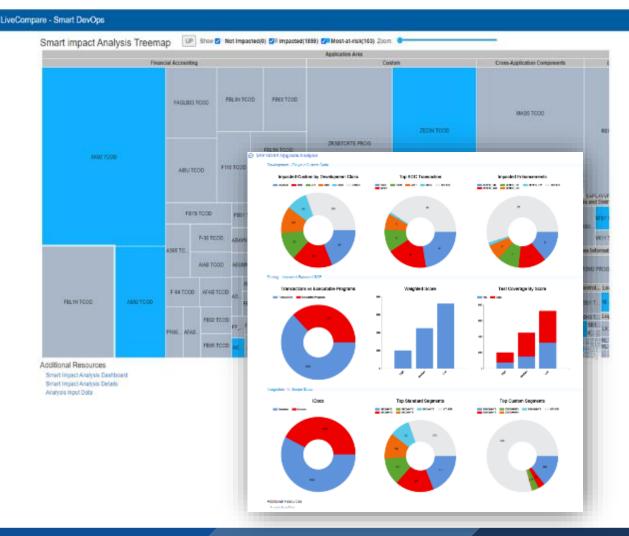

SAP

SAP Change Impact Analysis (CIA)

Tricentis LiveCompare

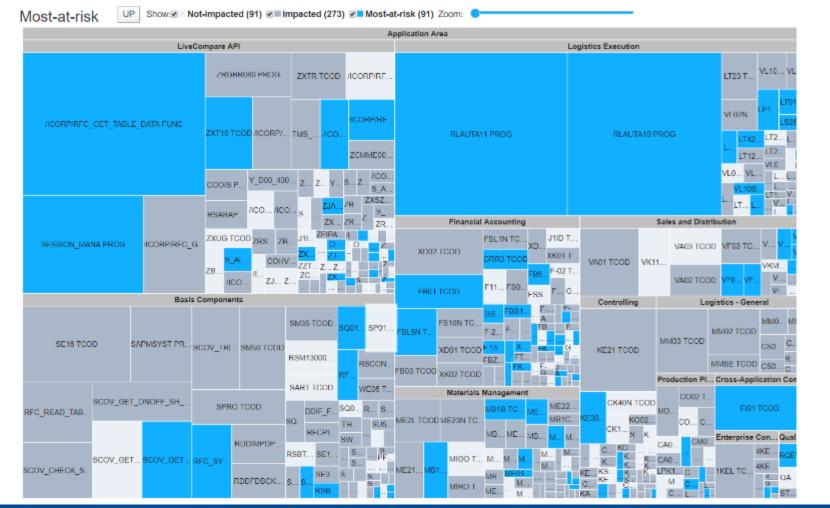

SAP Change Intelligence that lets your teams deploy with confidence:

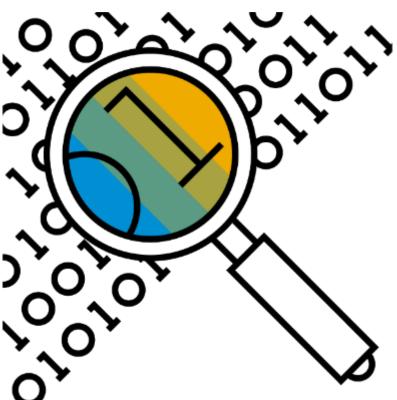

- Automated analysis of your SAP landscapes
- **AI-powered** risk identification and test optimization
- Actionable insights that prevent production defects

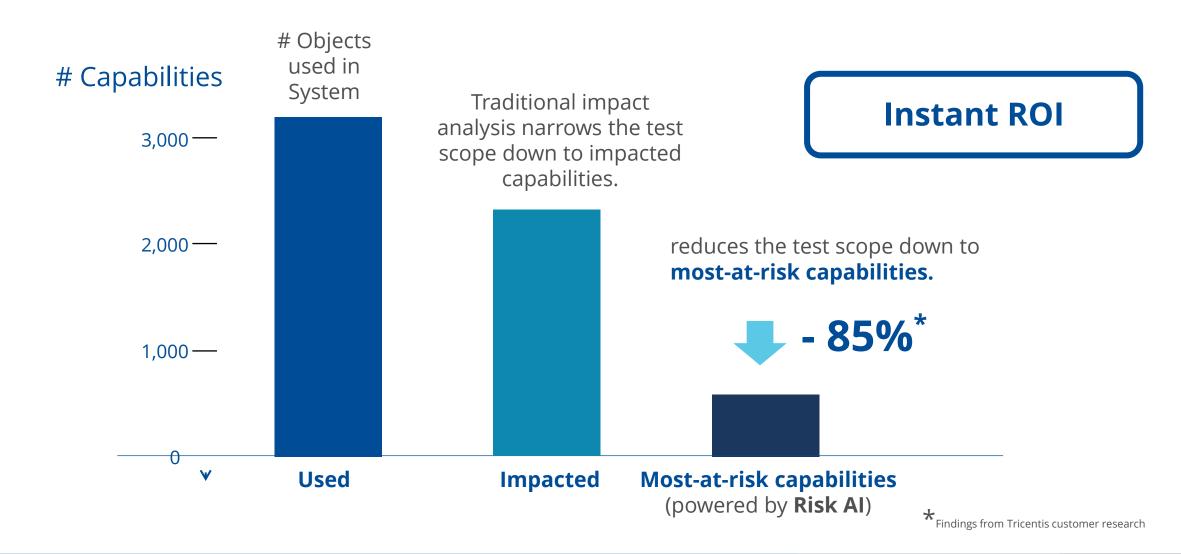

Most-at-Risk Capabilities Visualize Your Focus for Testing!

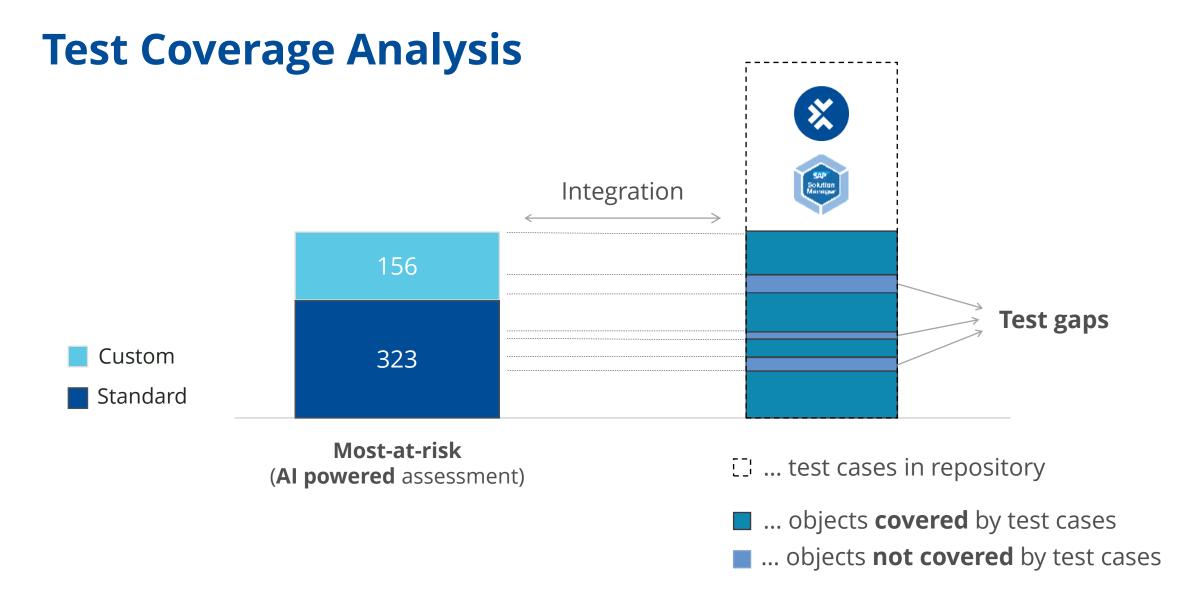

Change Impact Analysis is the **bird's eye view** identifying application areas that are **most-at-risk** from an update

Test Scope Reduction

AI-Powered Insights

ABAP Code Quality Analysis

- Shift left on guality $\langle \rangle$
 - Pinpoint coding issues early on SDLC
 - Instant feedback for developers
 - Data driven insights for commit approvals
 - Governance over partner led development work
 - Improved SAP application health
 - Less production defects

Smart Impact Analysis

- Intelligent targeted testing • 80% reduced testing efforts
- Faster test cycles
 - Speeds up release cadences 2-3X
 - Superior quality

SAP Test Coverage Insights

- Clear insights into test coverage in every release
- Prioritize time, resources and money in appropriate areas
- Track test coverage trends and monitor progress
- Eliminate duplicate test work
- Maximize ROI in test automation solutions

Test Audit

- Quality gate for deployment approvals
- Instant feedback for release managers
- improved business continuity
- Zero defect leakage

N+1 Transport Merge Comparison

- Perform Transport merges 80% faster
- Auto discover code and config conflicts for retrofitting
 - Eliminate manual analysis & investigative work
 - Deliver projects & releases faster
 - De-risk transport merges

SAP Custom Code Management Insights

D-

- Continuous visibility into custom code Manage, govern, optimize customizations
- Track trends and KPI's around custom code
- Eliminate Technical debt

SAP Root-Cause Analysis

- Debug Prod issues 80% faster
- - Less resource involvement Minimize production downtime
 - Improved business continuity

SAP System Synchronization

- Ensure code, config & data stays in sync
- Avoid defects cased by system discrepancies
 - Reduced need for system refreshes
- Test data validation

S/4 Readiness Assessment

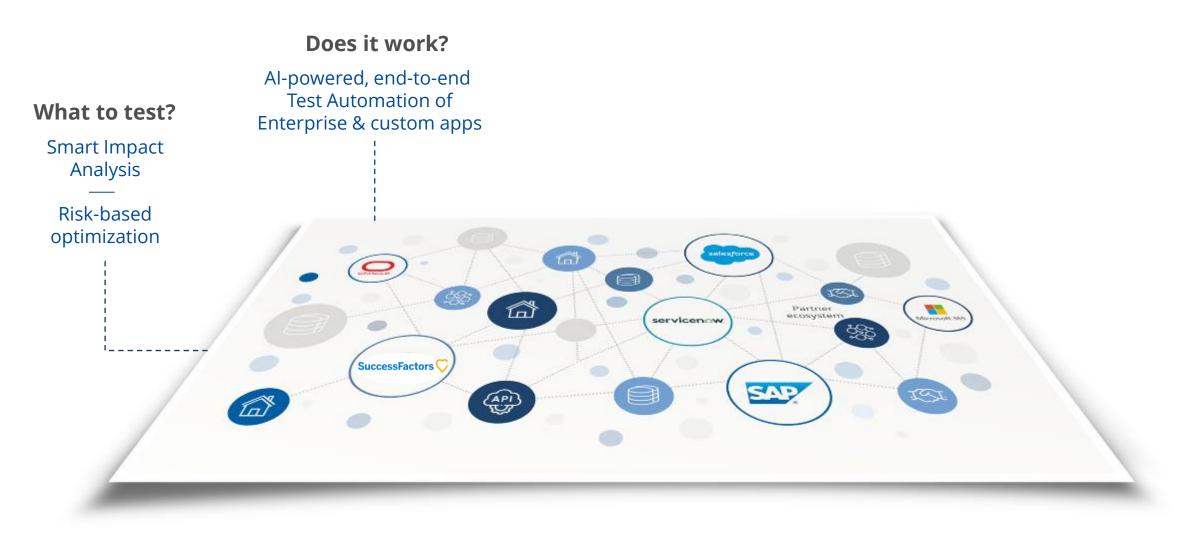

- Compare existing ECC to target S/4
- Key insights to plan, scope and strategize
- → Identify impact & test scope
 - Retire dormant custom code
 - Improve quality & performance of existing code
 - Remediate existing code to be S/4 ready

Deliver High-Quality Applications at Speed All the Capabilities You Need

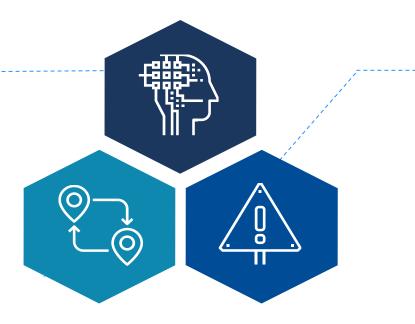

SAP

SAP Enterprise Continuous Testing (ECT) Tricentis Tosca

NO CODE / AI-POWERED

Build resilient, reusable and future-proof **test automation** without having to maintain tests as applications evolve

RISK OPTIMIZATION

Reduce the risk in your software releases while prioritizing testing for **business-critical functionality** – with much fewer tests

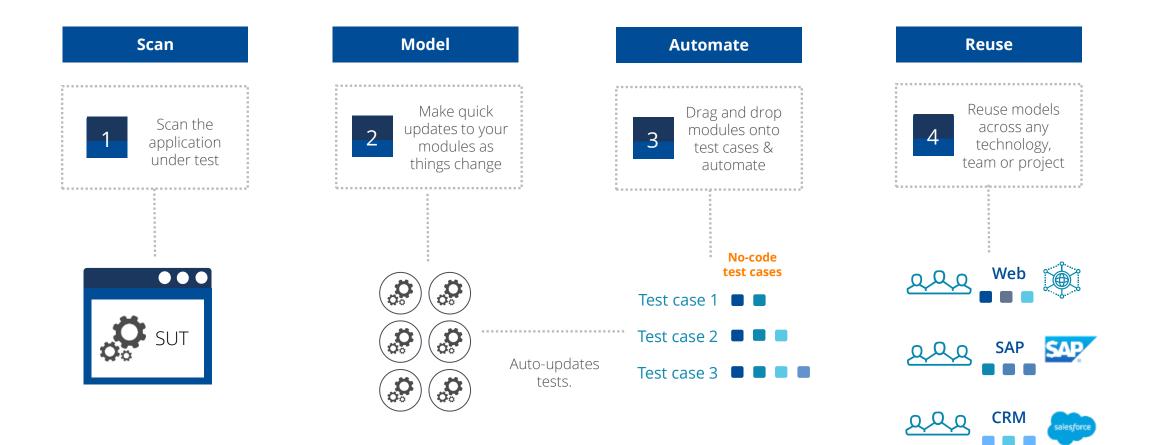

END-TO-END COVERAGE

Execute tests at the UI, API and data layer – Tosca **supports 170+ technologies** and enterprise applications

Model-Based Test Automation – How It Works

Create and maintain no-code, reusable test assets at scale

💥 Tricentis

Deliver High-Quality Applications at Speed All the Capabilities You Need

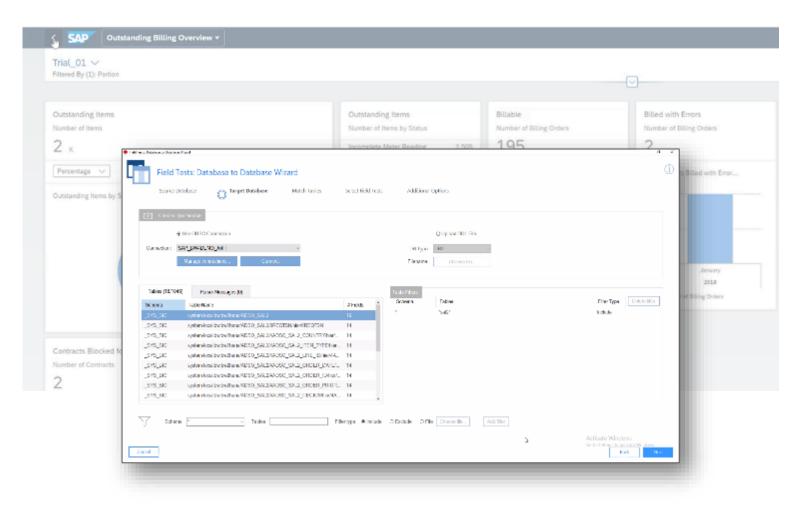

SAP Enterprise Data Integrity Testing (EDIT)

Tricentis Data Integrity

Is the data correct?

Capabilities:

- Comprehensive data testing across SAP and 3rd-party technologies
- Low-code/no-code automation
- Actionable reporting
- Integration with DataOps and DevOps tools

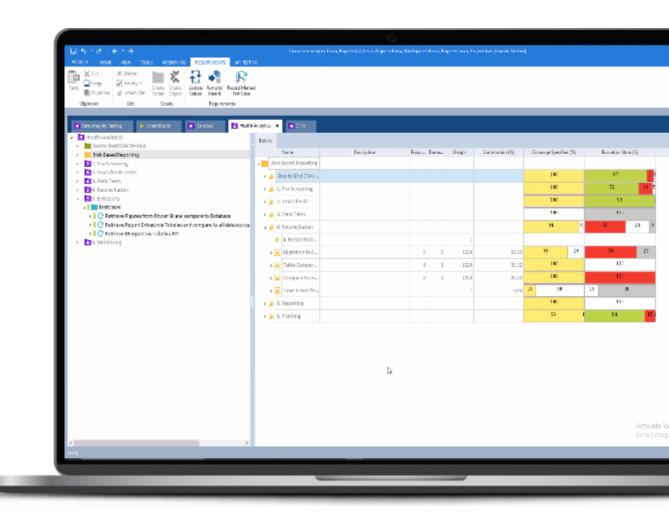

Comprehensive Data Testing

Across SAP and 3rd-party technologies

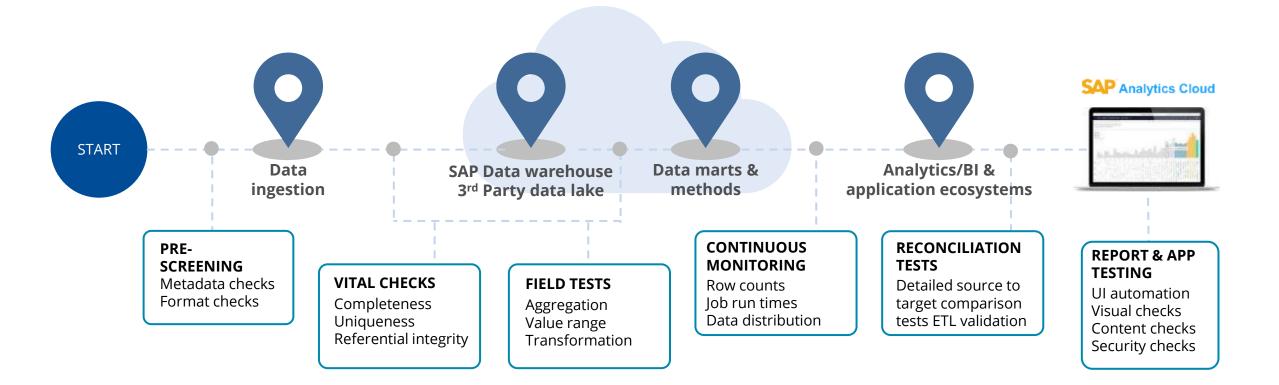

- Tests all data regardless of type, source, or format
- Includes specific data tests tailored to catch errors at different parts of the data journey, from source ingestion to business process step and final report
- Complements existing data tools by filling in the gaps that they don't cover
- Tests at volume and velocity

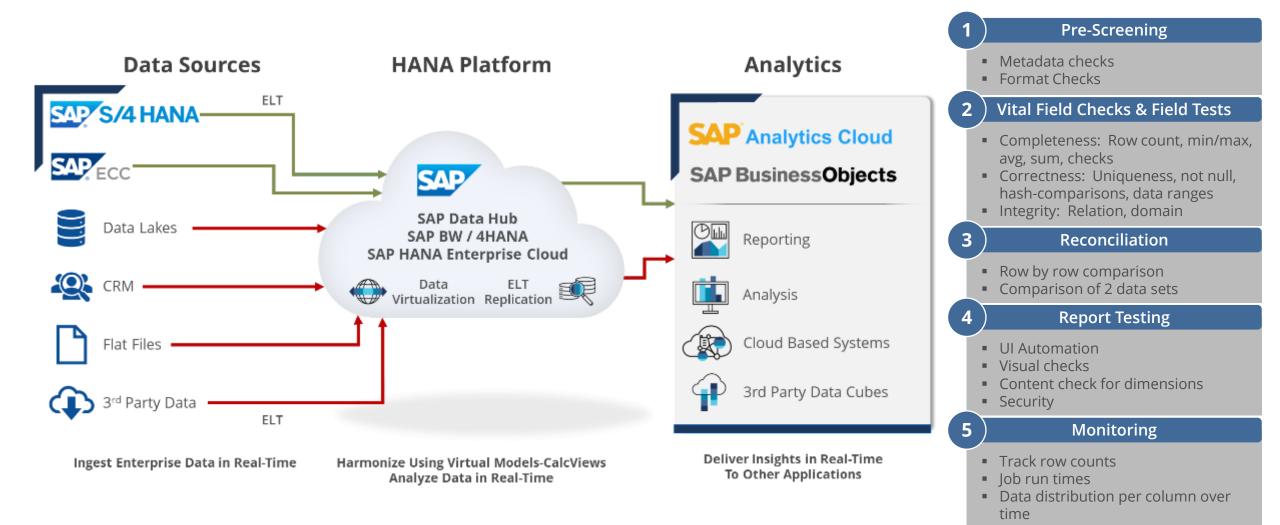

Deliver Trustworthy Data

Example scenario: Verify sales analytics data and dashboards

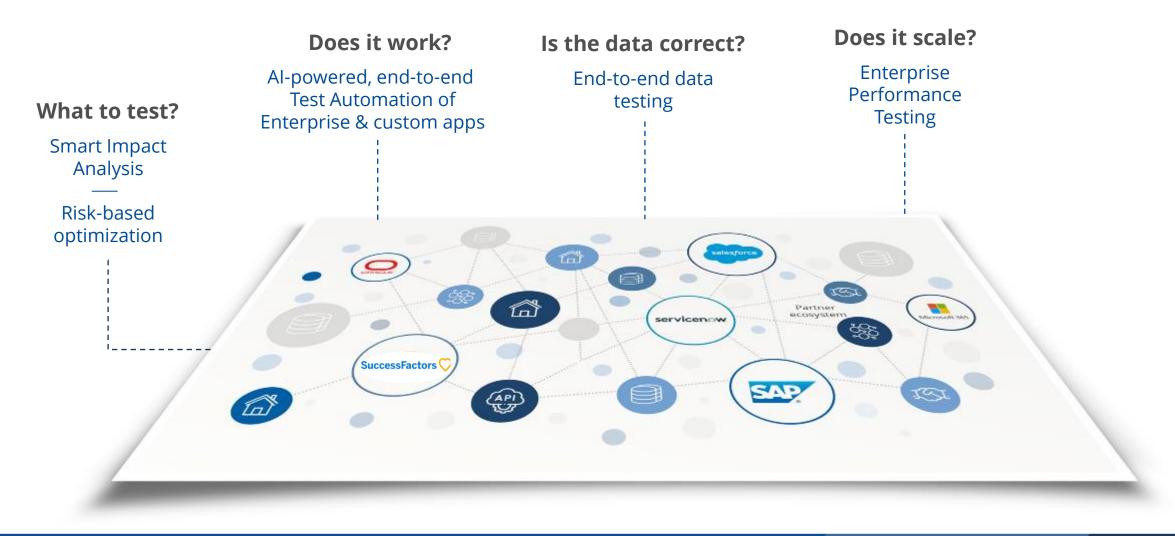

The Race is on to Find Data Errors To TRUST data in production...you MUST test end-to-end in the test environment

Deliver High-Quality Applications at Speed All the Capabilities You Need

SAP Enterprise Performance Testing (EPT)

Tricentis NeoLoad

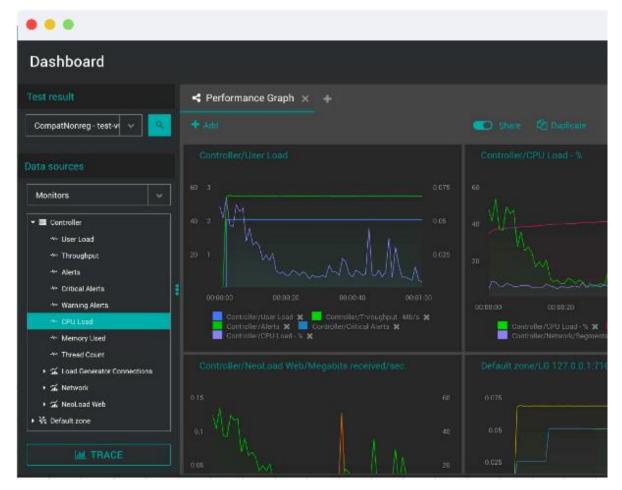

Continuous performance testing for microservice to monolith

Robust Platform uniquely positioned to address performance testing challenges in modern applicaxtions (*cloud, web, mobile, streaming, IoT*) and in core enterprise applications such as SAP

Rapid test design with low-code, no-code approaches

For experts and non-experts a like

Continuous performance testing **for all SAP use cases** from S/4HANA migrations to endto-end SAP business processes and other non-SAP protocol testing

SAP EPT has Native Support for SAP Testing

EPT supports traditional on-premise SAP, hybrid and modern SAP cloud deployments.

User Experience	Web, NetWeaver, FIORI, SAP GUI	
Application	ERP (ECC, S/4), CRM, Hybris, Business Technology Platform (BTP)	
Platform	SAP NetWeaver, SAP Cloud Platform	
Database	Oracle, HANA, SQL, DB2	
Non-SAP Protocols	HTTP(S/2), Salesforce, Citrix, GWT, MQTT, SOAP, WebSocket, JMS, Oracle, RTMP, AMQP, Java	

SAP Enterprise Performance Testing (EPT)

Native Integration

Native integration with other testing and DevOps tools contribute performance engineering metrics across all phases of release & delivery.

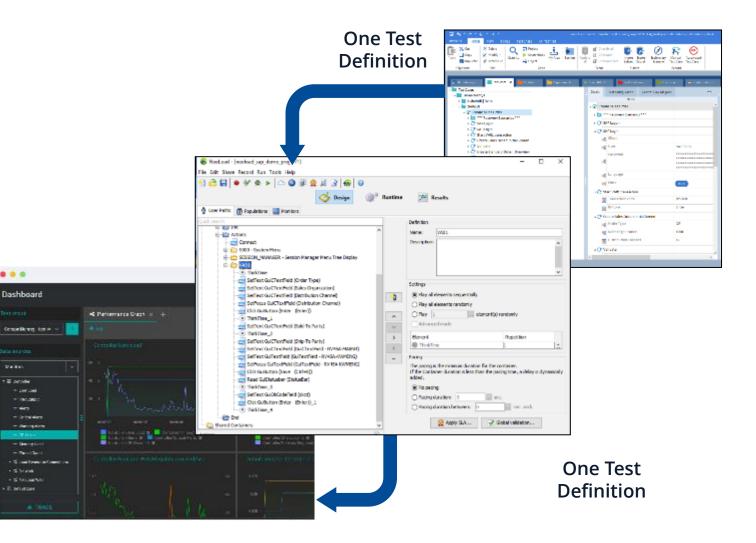

One click conversion of functional into performance tests. Convert SAP GUI, API, Web tests from ECT with one-click.

SAP EPT performance tests are **automatically updated** – enables Continuous Performance Testing

Up to **80% faster** test design & maintenance

X Tricentis SAP

Forrester Total Economic Impact SAP Application Testing Solutions

Through customer interviews and data aggregation, Forrester concluded that SAP application testing solutions by Tricentis have the following three-year financial impact.

Tricentis Business Assurance Quantified Benefits

When you put it all together, the benefits are clear: less test condition, less effort, less errors.

ERP principal test manager, telecommunications

BENEFITS

Accelerate innovation and software release cycles.

Reduce risks to critical business processes.

Lower costs by reducing manual test efforts and complexity.

Increase transparency and support real-time insights.

Empower business users and better decision-making.

334%

ROI and six months payback

300%

Improvement in application release rate

84%
