

Accelerating Transformation

Process documentation
should be an asset, not an
artifact.

You're not alone.

Uncertainty

How does my businesses run today, and where do I start improvement?

Shortages

How do I prioritize my resources for the most impact and cost avoidance?

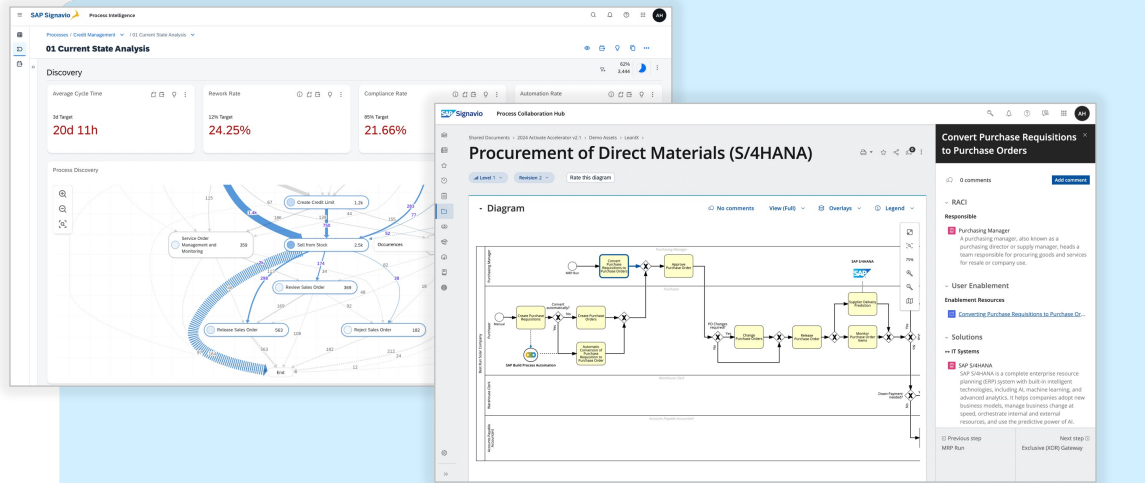

Inconsistency

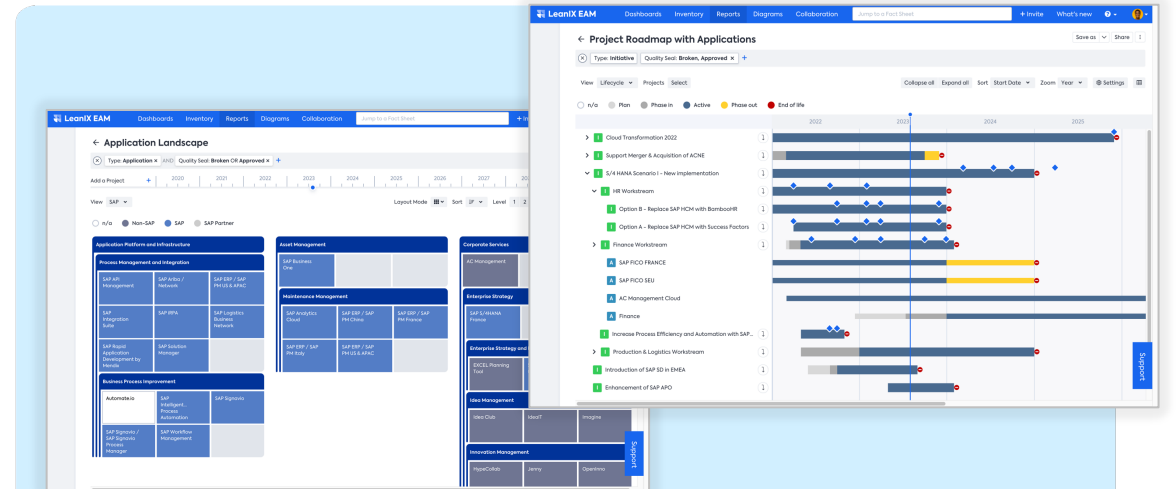

How do I get business and IT all on the same page?

SAP Signavio and LeanIX: Solutions for the agile enterprise

Powered by Business AI

Analyze, optimize, and manage your processes fast and at a scale to become agile and resilient.

Visualize and assess the technical landscape and confidently evolve your IT architecture.

SAP Signavio

LeanIX

Process AI is the next milestone, achievable through a foundation of digitalized processes and digitalized architecture.

Process Transformation: A tale of two era's

**THE
FLINTSTONES**

**Pre-Signavian Era
(before 2021)**

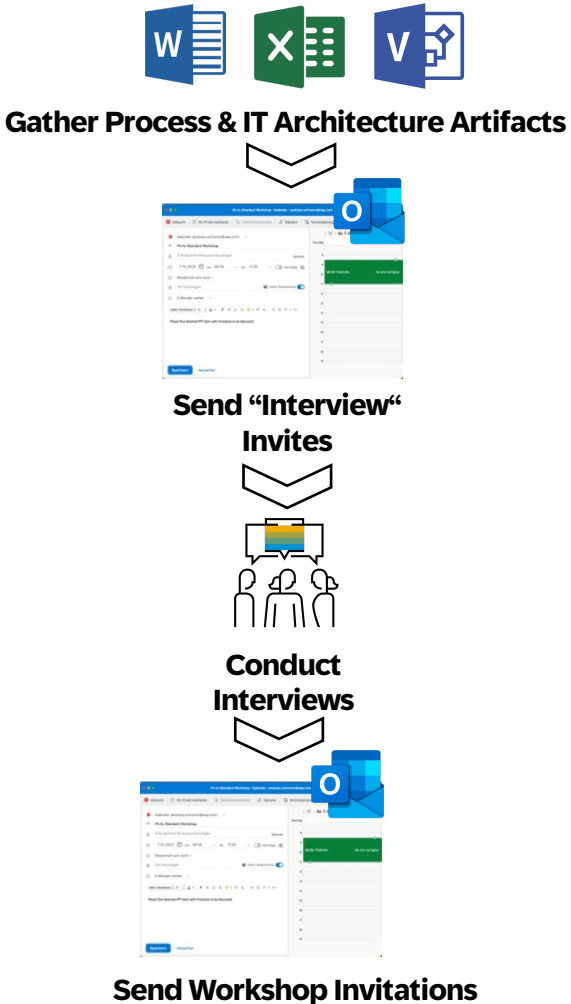

**Signavian Era
(2021 and beyond)**

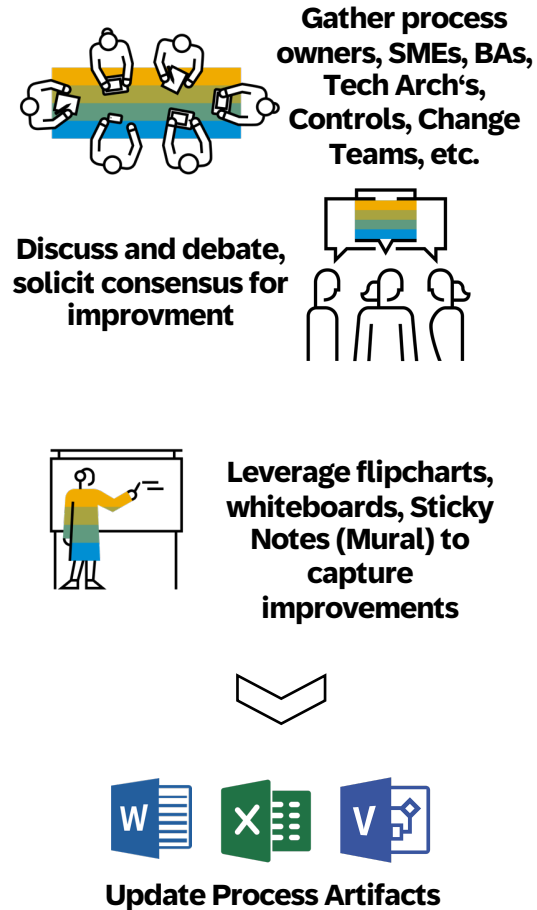

**THE
Jetsons**

Process AI The Next Milestone in Transformation Acceleration

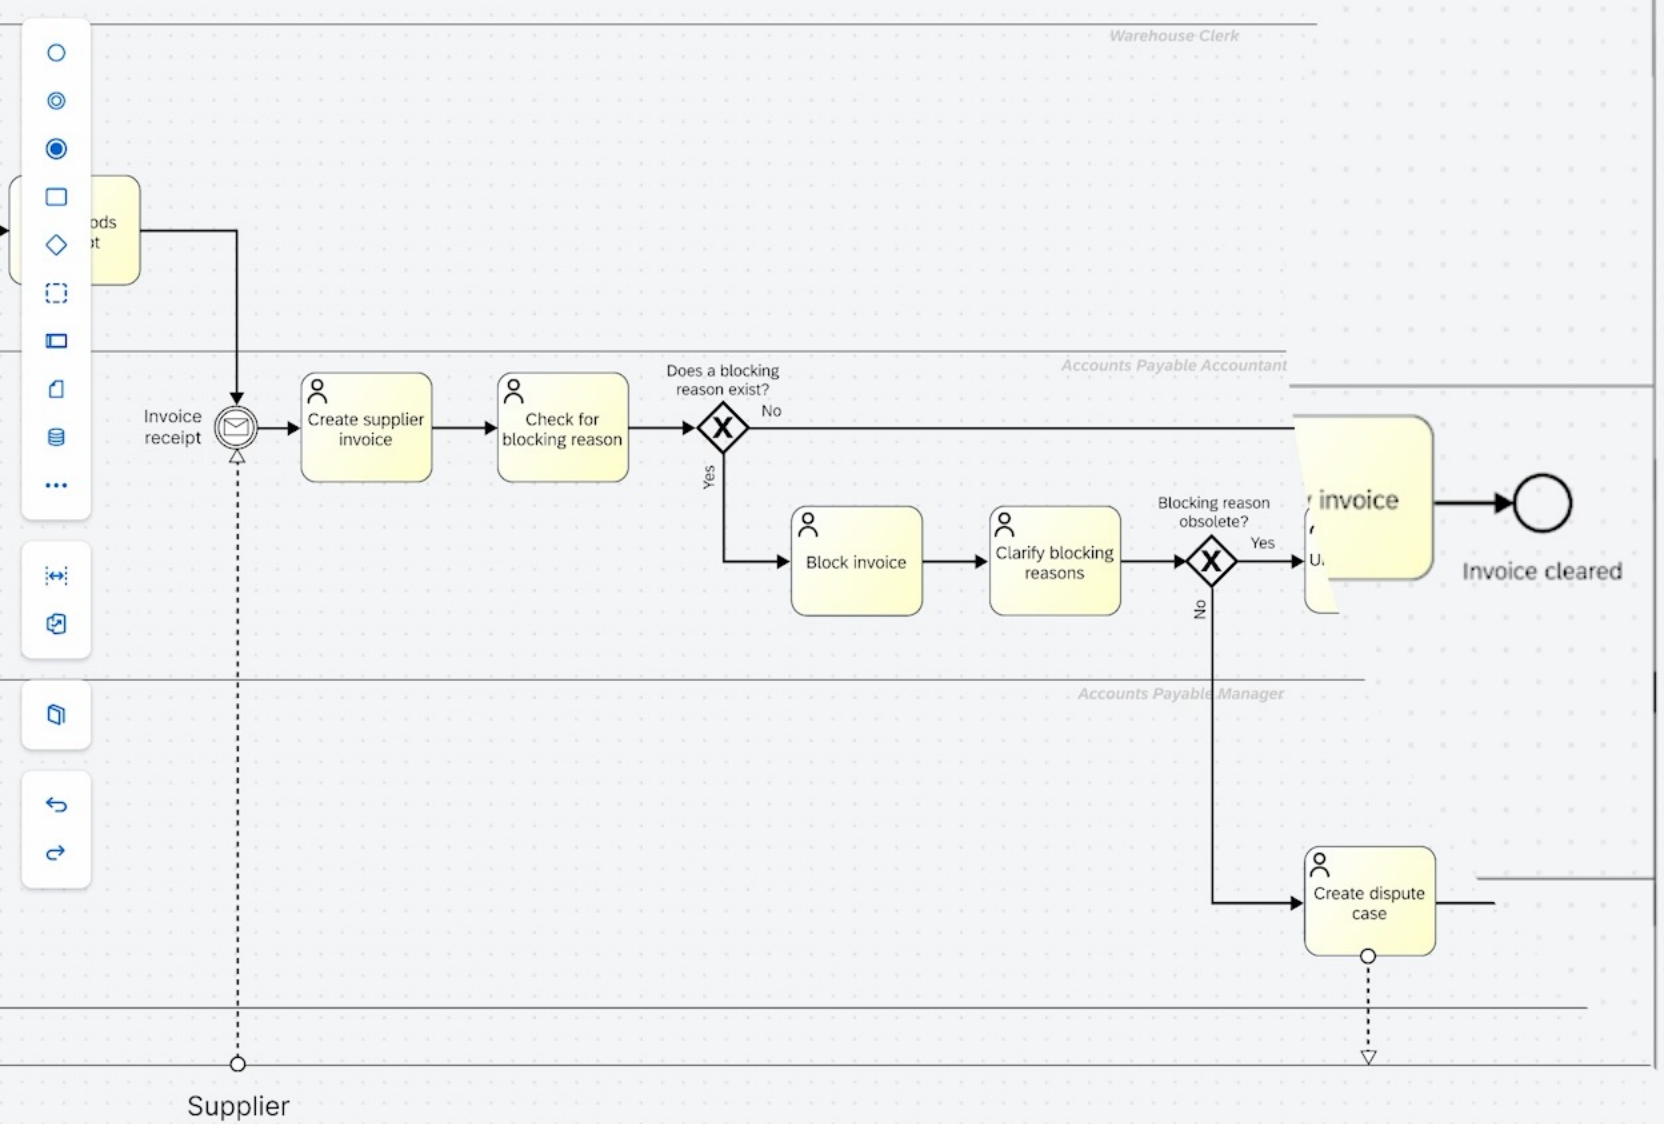

Process AI – Transformation in the hands of the business

1. Looking at a Accounts Payable process
2. Use Process AI to
 - a) Recommend Key Performance Indicators not identified in our existing process
 - b) Identify automations that are available but not being leveraged
 - c) Compare the as-is Accounts Payable process to the SAP Best Practice and identify differences and improvements.

Process accounts payable (global) All changes saved

Add further KPIs to be monitored, to proactive track your process health performance

Review Add to model

Action Recommender

Enhance your process by implementing an automation with SAP Build Process Automation

Review Add to model

Process Recommender

Profoundly improve by changing to the most suitable finance best practice BPMN model

Review Add to model

Review all

Start by adding recommended KPIs to be monitored in future:

Company code without payment runs

Add to model Decline

Open items blocker for payment

Add to model Decline

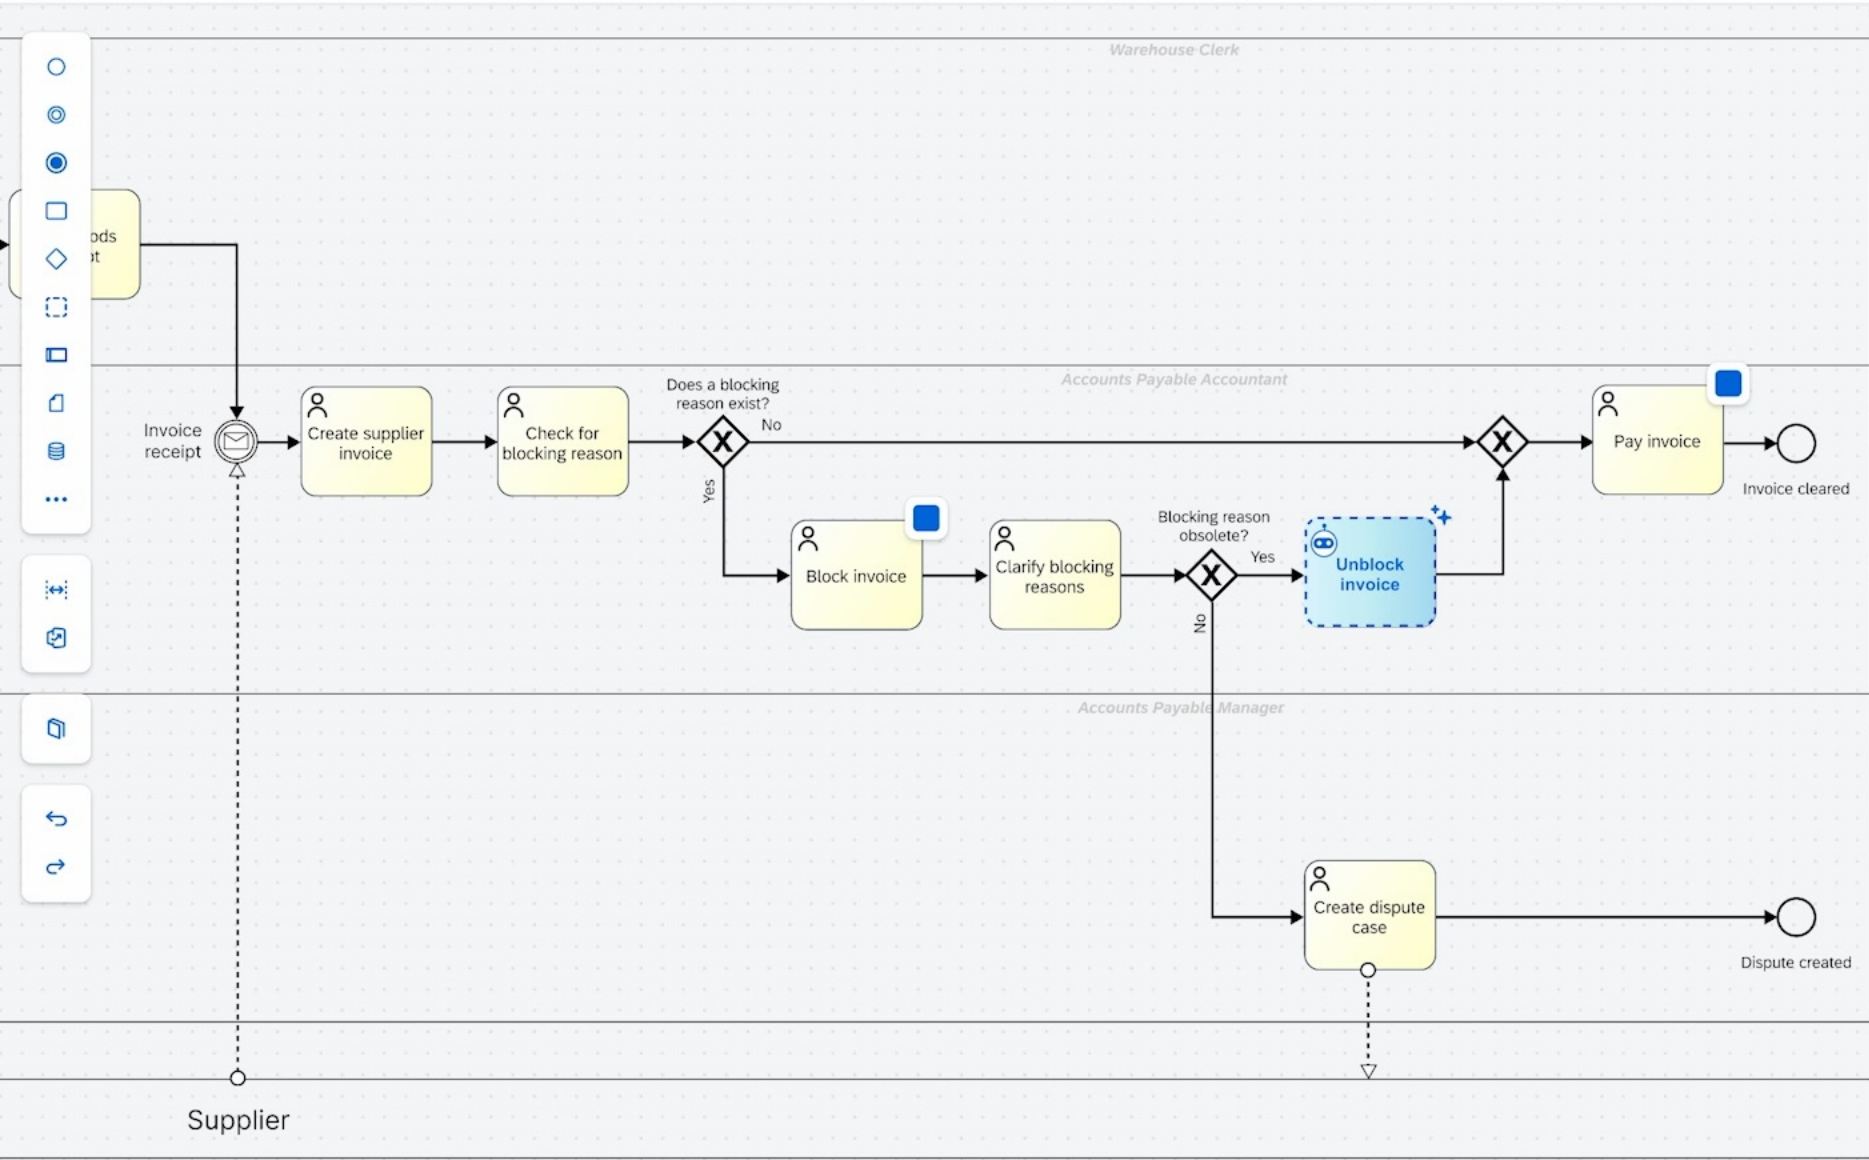

Add all to model Decline

Process accounts payable (global)

Review Add to model

Review all

Start by adding recommended KPIs to be monitored in future:

Company code without payment runs

Add to model Decline

Open items blocker for payment

Add to model Decline

Add all to model

As second step, add this automation to your process as a recommended action:

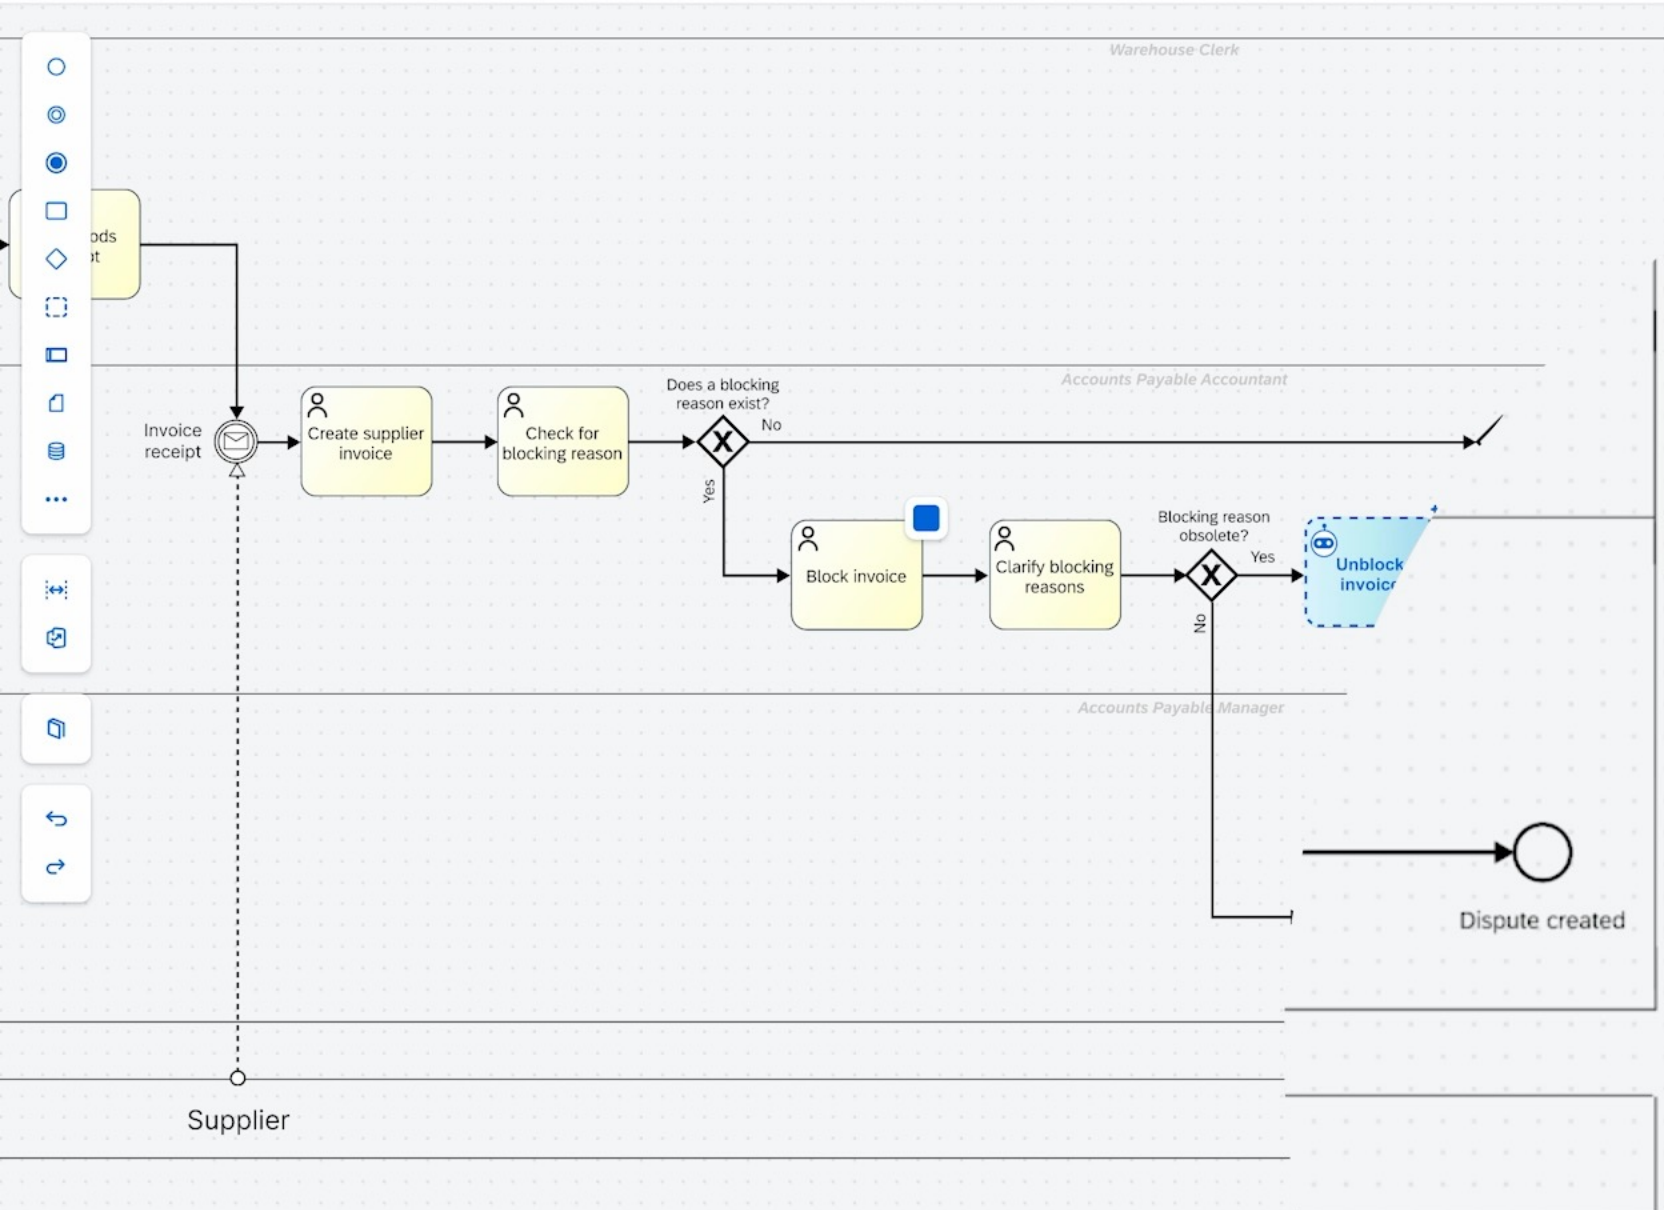

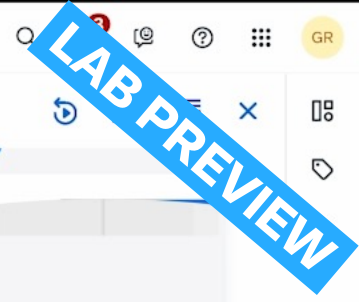

Automated removal of payment block

★★★★☆ (153)

Add to model Decline

why this bot and what's the expected outcome

Automated removal of payment block
★★★★☆ (153)

Add to model Decline ...

why this bot and what's the expected outcome

To accelerate the unblocking processes which is currently done manually, this bot can be used to release invoices. The invoices will be released automatically based on certain rules and in mass. This is expected to **reduce the number of overdue invoices** which are blocked for payment, but should have been unblocked already.

Do you want to add this automation to your process?

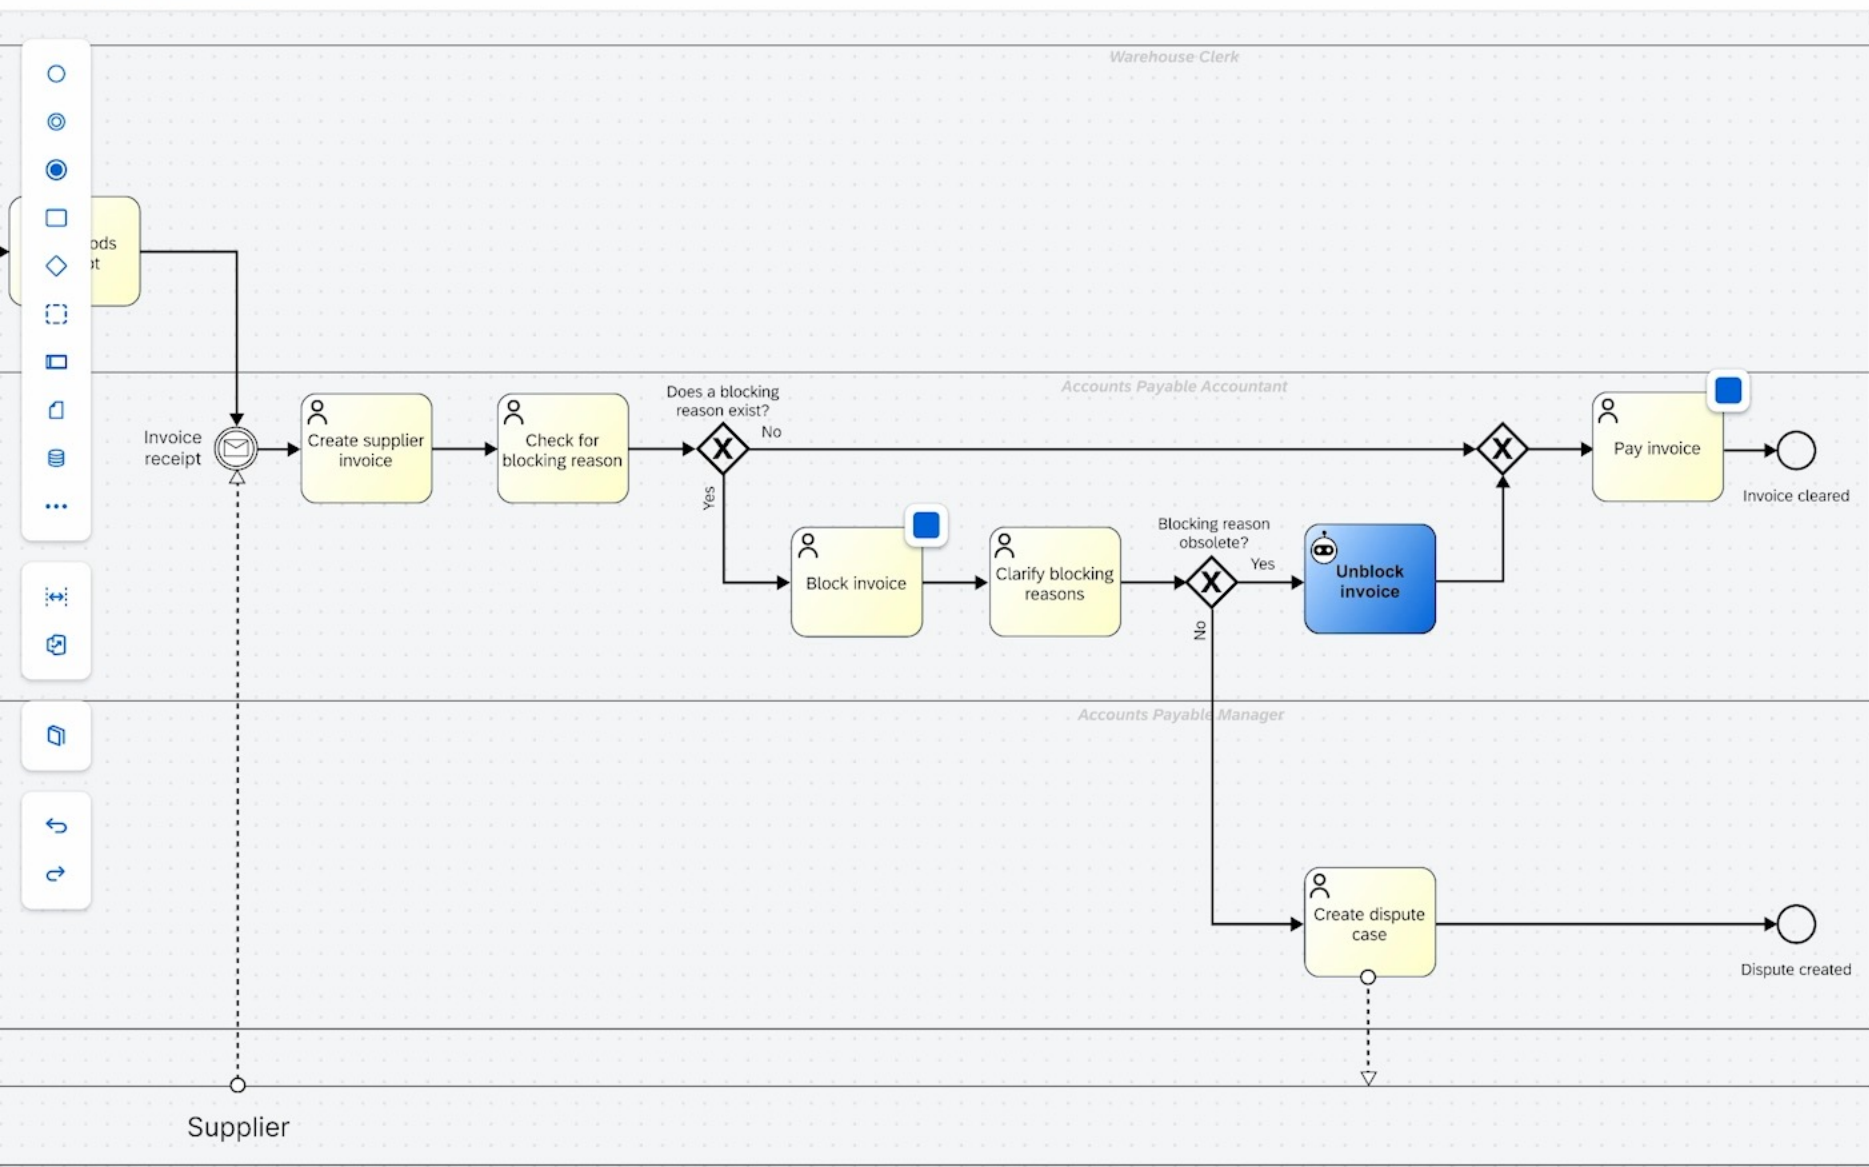

Add to model Decline

Profoundly improve the process with most suitable **best practice BPMN models**:

The SAP Best Practices will help to avoid the root causes for late payments with

- **J60**: A payment run improves on time payment performance.
- **J45**: Offers an automatic blocking and release functionality in SAP ERP.

J60 (Accounts Payable)
★★★★☆ (128)

Review Decline ...

J45 (Procurement of Direct Materials)
★★★★☆ (153)

Review Decline ...
