

# SAP Integration Suite Technical Academy

## Session Overview:

- The purpose of the workshop is to get to know and work with the primary components/capabilities of the [SAP Integration Suite](#)
- NOTE: SAP Integration Suite is a set of services which run on the [SAP Business Technology Platform](#)
- The hands-on will start with a short overview presentation about SAP Integration Suite as well as information about migrating from SAP Process Integration/Orchestration.
- You will get hands-on experience of the simplicity and power of SAP Integration Suite. You will model, adapt and manage APIs, perform application and process integration, and gain experience with event driven architectures. You will get hands-on with the Cloud Integration and API Management capabilities and as extra credit the Event Mesh service if time.
- **Audience:** Business Analysts, Developers, Enterprise / Integration Architects
- **Duration:** Approximately 3-4 hours
- NOTE: Access to the hands-on environment will be available until October 20th to review and completed exercises if needed after the event.
- **Prerequisites:** Knowledge of web protocols, integration topics, REST / API Tools (Postman)

# REMINDERS

**Download Postman** to test your APIs and services **OR** have an API testing tool available  
Postman Download Link: [Postman Download](#)

---

**Use Dual Screens (e.g. laptop+ipad; if possible)** to better work through TA activities.
