Our vision of the digital support experience

Anticipate

You should never have to ask a question.

Our collective focus with product development is to achieve high-quality, intuitive products that **anticipate** your needs.

Accelerate

If you have questions, it's quick and easy to get answers.

Access to SAP's comprehensive knowledge base notably **accelerates** your path to accurate answers when you need them.

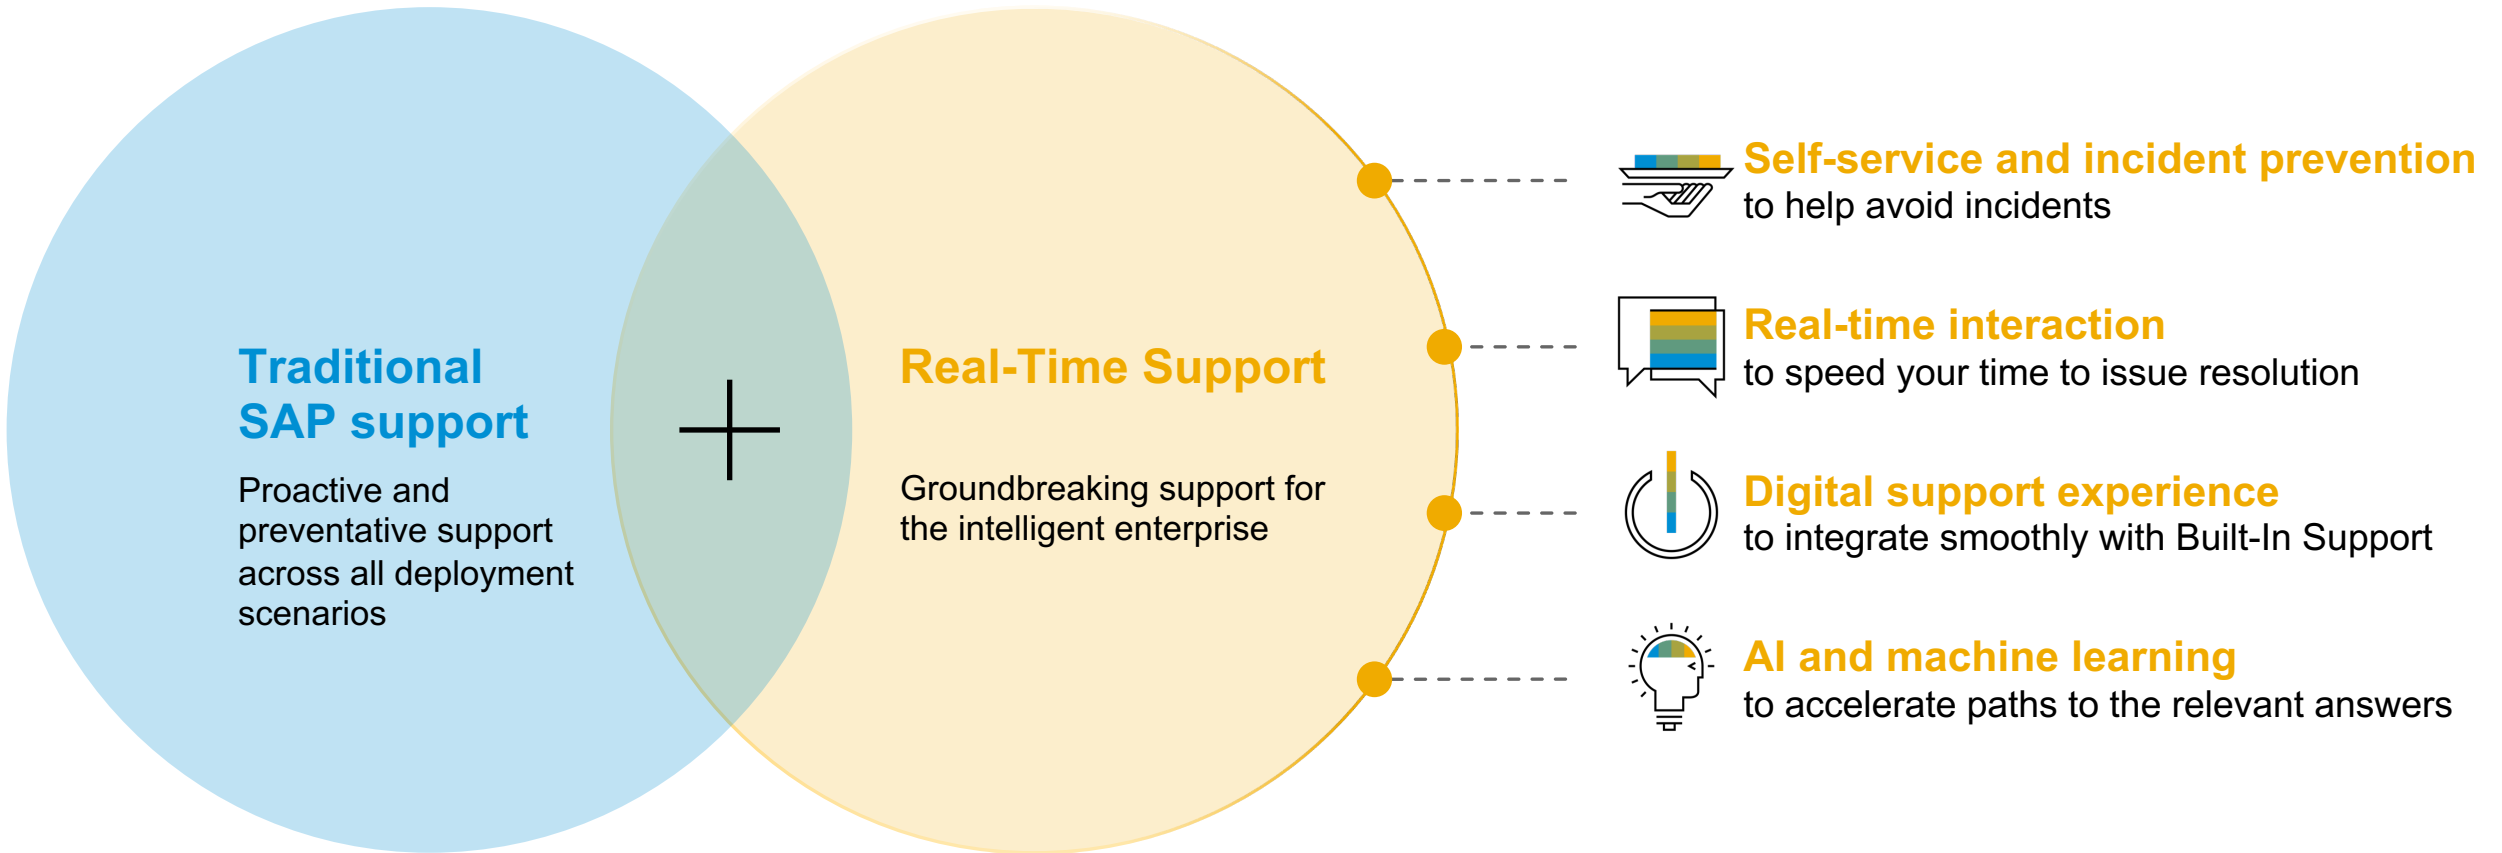

Collaborate

Our support experts will provide you with solutions quickly.

Our highly skilled engineers **collaborate** with you to help ensure you are successful – providing fast, easy access to the answers you need.

Product Support Accreditation

Self-enablement program for customers and partners for Product Support

Product Support Accreditation program enables you to make the best out of SAP's product support tools and Real-Time Support offerings

Overview

- Easy to consume interactive program
- Available to all SAP customers at no additional cost. It can be accessed via S-User login
- It consists of 3 modules and a final assessment.
- The modules cover incident prevention offerings, real-time interactions and digital support experience
- Watch the [video](#)

Benefits

- **Informative:** Gain empowerment and awareness to all the available resources from Product Support
- **Efficient:** The easy to consume enablement with SAP's Product Support Accreditation program helps users to increase their efficiency in working with Real-Time Support tools by selecting the best channel.
- **Rewarding:** A Product Support Accreditation badge is awarded once the final assessment is completed. This badge can be shared in social media.

Access

- **Easy to access:** simply use your S-User via SAP ONE Support Launchpad to enroll for program.
- **Easy to consume:** The accreditation modules can be taken at your own pace and time. Easy to consume content will be provided on demand.
- **Interactive:** Learnings can easily be validated in interactive quizzes supporting the user in their progress.
- Click [here](#) to access the accreditation and [here](#) to learn more.

SAP Knowledge Base Articles (KBAs) with search engine indexing

A **KBA** provides you with incident-specific information through the SAP ONE Support Launchpad or a search engine – right at your fingertips.

OVERVIEW

- Incident-specific documents
- Instant publishing
- Enriched content (embedded screenshots)
- Rating and free text commenting features to provide feedback on the quality of a KBA
- **Previews available for external search engines (responsive design across different mobile devices)**

BENEFITS

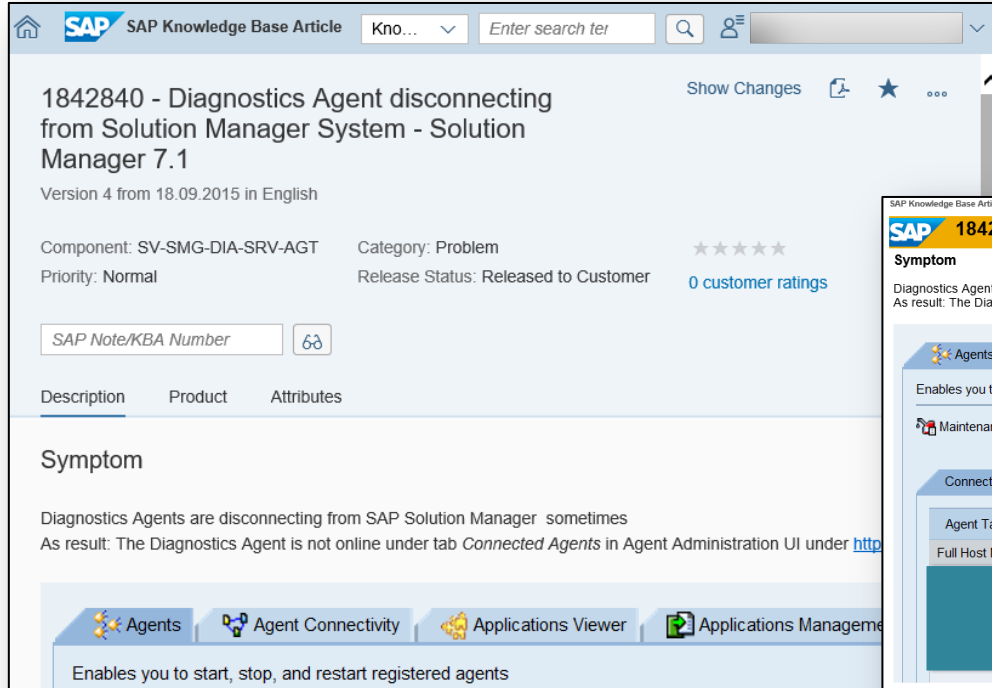

- Information you can easily access through the SAP ONE Support Launchpad or a search engine when you need it
- Provides you with quick information on your topic of interest
- Now available: Self-Service Machine Translation for SAP Notes and Knowledge Base Articles

ACCESS

- Both KBAs and SAP Notes can be accessed with a valid S-User through the SAP ONE Support Launchpad, or using a search engine (Google)
- Launchpad notification by e-mail or SMS: Configure your SAP ONE Support Launchpad to get notifications when SAP Notes or SAP Knowledge Base Articles in your area of interest are created or updated. Check out this blog to learn more.

Automatic translations

Automatic translations offer customers fast access to machine-translated support content in the SAP ONE Support Launchpad and the ability to interact with SAP support in their preferred language.

OVERVIEW

- Automatic translations are currently offered for Expert Chat conversations, the latest communication of the incidents in SAP ONE Support Launchpad, and SAP Notes and KBAs
- Based on SAP neural machine translation and artificial intelligence (AI) to process entire sentences and phrases
- Translations are designed to recognize SAP documentation and terminology
- Translation quality is continuously improving through feedback and learning

BENEFITS

- Breaks through language barriers
- Offers fast access to machine-translated support content and the ability to interact with SAP support – in your preferred language – at no additional cost
- Works in real-time and at the click of a button
- Let's you obtain the right SAP technical information, in the right context for your business

Guided Answers

Guided Answers offers you help by providing a step-by-step guide through an issue or a process.

OVERVIEW

- Helps you to find the answer through multiple channels
- Uses decision trees concept
- Content grows over time and helps to accommodate new or unforeseen scenarios
- Captures the workflows of support engineers
- Leads you to relevant content (KBAs, SAP Notes, wikis, and more) to address your issues

BENEFITS

- Receive step-by-step guidance through a particular problem
- Learn how to use the product as well as troubleshoot it
- Select a scenario and be guided towards a solution without any further intervention from a support engineer
- Obtain faster resolution of problems
- Navigate through an easy-to-use interface

SAP BusinessObjects BI support tool

SAP BusinessObjects BI support tool is a supportability solution providing reporting and analysis tools.

OVERVIEW

- A supportability client for SAP BusinessObjects BI platform
- Landscape Analysis Report gives total insight into the configuration and topology of the Business Intelligence environment
- Best practices, system configuration, service distribution, and other alerts are checked automatically
- Includes a toolbox providing many additional root cause analysis and administrative tools

BENEFITS

- Eliminates question ping-pong and helps speed up resolution time
- Allows historical capture of system configuration and provides a change analysis
- Inclusion of helpful tools such as Security Analyzer, Authentication, and E2E Trace Wizards
- Find problems and solutions pro-actively via customizable landscape alerts
- Obfuscate sensitive report data before sending to SAP

ACCESS

- The tool is free of charge for all SAP BusinessObjects customers
- Downloadable via the Software Download Center
- Information can be found on the [SAP Community Wiki](#)
- Version 2.1 [webinar and demo](#)

Automated search for SAP Notes

The **automated search for SAP Notes** is a tool that helps you to easily and quickly identify SAP correction notes for functional issues, your codes, and customizing tables (for standard processes).

OVERVIEW

- The automated search for SAP Notes works directly from the customer system where the issue occurs
- In order to obtain SAP relevant notes, customer code and customizing tables, start transaction 'ANST' and reproduce the issue
- Learn more:
 - Check the [FAQ](#) and go to the [Help Portal](#)
 - Read the blogs: '[ANST](#)' and '[What is ANST](#)'

BENEFITS

- Only notes that are relevant for the respective issue are identified
- No need to choose search terms for the notes search: As opposed to notes search based on search terms you may choose, the automated search for SAP Notes tool bases note searches on the ABAP objects that are involved in the process
- The tool is for ABAP based systems: either running directly in the back end system or through a front end (SAP Fiori, portals)

ACCESS

- Start a transaction 'ANST' from the back-end and reproduce the issue, learn more in [KBA 1818192](#)
- Before you proceed, make sure the following notes are implemented in your system:
 - [2361155](#)
 - [2469123](#)
 - [2286869](#)

Self-service and incident prevention

Performance Assistant

The **Performance Assistant** notes and KBAs search tool searches for SAP Notes and Knowledge Base Articles for ABAP messages – based on the relevant message code (message class and number).

OVERVIEW

- The Performance Assistant helps you to easily and quickly search for SAP Notes and Knowledge Base Articles for ABAP messages – based on the relevant message code (message class and number).
- Check the [FAQ](#)
- Read the [blog](#)

BENEFITS

- Receive real-time documentation updates
- If a new SAP Note is created and contains the ABAP message code, the Performance Assistant identifies it
- You benefit from updates and information on SAP Notes

ACCESS

- When you get an error message, double click on the error message then click on the binoculars/ search icon, learn more in [KBA 2096401](#)

Self-service and incident prevention

SAP Community

The professional social network **SAP Community** serves as an expansion of SAP's support channel offerings to provide professionals across the globe with easily accessible answers to 'How-to' questions.

OVERVIEW

- Comprises several collaborative communities
- Discussion forums, blogs, and videos
- Community exchange of knowledge through professional social network
- Connect and engage with other professionals and exchange information
- Browse for answers to already existing questions or ask own questions
- Offers a *Questions and Answers* as well as an *SAP Blogs* page

BENEFITS

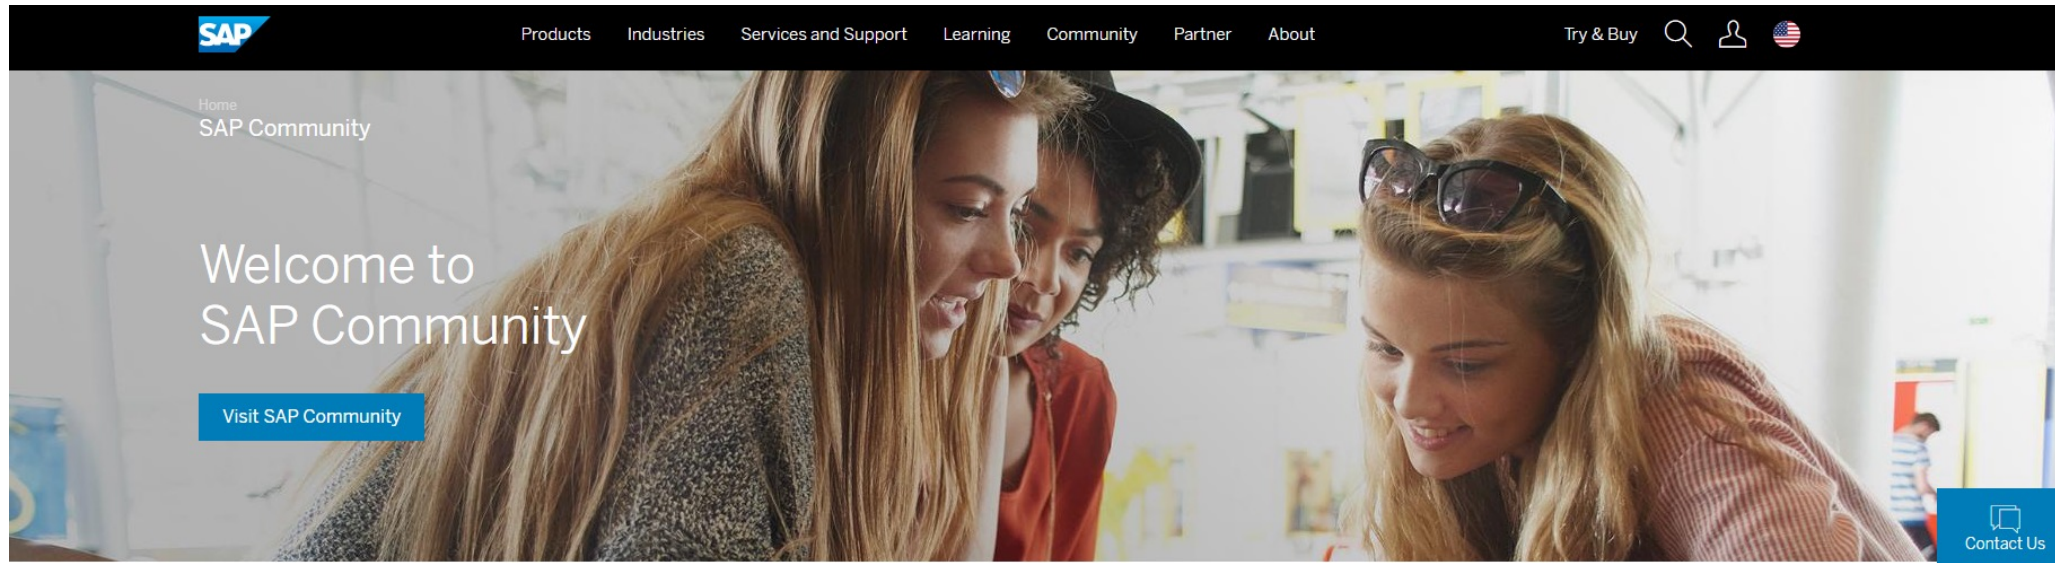

- Quick access to expert advice: Access knowledge and get answers to how-to questions from the SAP forums
- Provides a seamless support experience

ACCESS

Access the community:

Support by Product

With **support by product pages**, you get an at-a-glance view of support-related content for products and product versions in the SAP ONE Support Launchpad and the SAP Support Portal.

OVERVIEW

- Offer at-a-glance view of support-related content in the [SAP ONE Support Launchpad](#) and the [SAP Support Portal](#)
- Product pages in both major support properties contain all you need to know about your product (version) – or guide you to more helpful content if needed
- SAP ONE Support Launchpad offers a broader range of SAP products
- Read the [FAQ](#) or this [news](#)

BENEFITS

- On the support by product pages, you will have at-a-glance view and access to helpful content and resources for your product (version): KBAs, documentation, blogs, web pages, tutorials, release notes, and more
- Access of product-related content relevant to you – all compiled on one web page
- On the product pages, you will find content from different resources consolidated for you

ACCESS

SAP ONE Support Launchpad (S-User required):

1. [Add the “My Products” tile](#) to your personalized home screen or use the new search functionality called [“Products”](#) and enter the product name you are looking for
2. Easily navigate through the content on the product pages
3. Save product pages as “favorites” for future quick access

Real-Time Support for the Intelligent Enterprise

Real-time interaction

We offer Real-Time Support channels with live and direct access to SAP's support experts.

- Expert Chat
- Schedule an Expert
- Ask an Expert Peer
- Schedule a Manager
- Call-1-SAP & Customer Interaction Center (CIC)

Real-time interaction

Expert Chat

Expert Chat provides a live chat function that connects you to SAP technical support experts.

OVERVIEW

- Live support from SAP experts for any technical question related to a product
- Improves support experience with real-time interaction
- Available for all support levels and almost all solutions
- For more information:
 - Learn more about [Expert Chat](#) on SAP Support Portal
 - [Expert Chat video](#)

BENEFITS

- **Real-time SAP support** with quicker and more efficient issue resolution
- **Live support from SAP experts** for any technical question related to a product
- Same **technical experts** as in the incident channel
- **Resolves incidents faster** than those reported through traditional SAP support channels
- **Screen-sharing option**

ACCESS

- Access Expert Chat through the [SAP ONE Support Launchpad](#) (several options):
 - a. Access Expert Chat while going through the incident submission process. Chat functionality is built into the incident form
 - b. Access through the Expert Chat tile on your SAP ONE Support Launchpad on the My Home screen
 - c. Access Expert Chat through the “Contact Us”-menu
 - d. Carry out a search in the launchpad’s database. Click on the Expert Chat-button in the upper area
 - e. Access through Built-In Support

The image shows a screenshot of the SAP 'Create Incident' web interface. The main form is titled 'Create an Incident' and includes a 'Description' section with a text area containing 'Test Incident', a 'Subject' field with 'Test Incident', and a 'Language' dropdown set to 'English'. Below the form, there are buttons for 'Review & Submit Incident', 'Schedule an Expert', 'Expert Chat', 'Save as Draft', and 'Cancel'. The 'Expert Chat' button is highlighted with a red box and a red arrow pointing to it. An 'SAP Expert Chat' overlay window is open on the right side of the screen, displaying a chat conversation. The chat messages include: 'Welcome to SAP Expert Chat; this is Marton@SAP. Please wait a moment while I read the description you provided.', 'Yes, I don't see the reports in our BI system, can you help me please?', and 'Sure, we can have a screensharing session. I will request via the chat tool to share your screen. Is this all right?'. A 'Send' button is visible at the bottom of the chat window. A QR code is located in the bottom right corner of the page.

Real-time interaction

Schedule an Expert

Schedule an Expert connects you live with SAP support in a one-on-one 30-minute call to discuss a technical topic of your choosing – at a time that is convenient for you.

OVERVIEW

- One-to-one 30-minute call delivered remotely through Microsoft Teams
- Book an appointment at least 48 hours in advance to allow engineers to prepare
- Check out the [Schedule an Expert video](#)
- Visit [SAP Support Portal](#) to learn more
- Learn more on [how to join your Schedule an Expert call](#)

BENEFITS

- Live channel option for you
- Interact one-to-one with a support engineer
- Get answers at any time of your convenience
- Get help and direct support for any technical question
- Have access to the same engineers that you would create an incident with
- Reduce your waiting time for response and resolution

ACCESS

- Access Schedule an Expert through the [SAP ONE Support Launchpad](#) (several entry options):
 - a. Access Schedule an Expert while going through the incident submission process
 - b. Access through the Schedule an Expert tile on your SAP ONE Support Launchpad home screen
 - c. Access Schedule an Expert through the “Contact Us”-menu in SAP ONE Support Launchpad’s footer bar
 - d. Carry out a search in the Launchpad’s database. Click on the Schedule an Expert-button in the upper area

Real-time interaction

Schedule an Expert for open incidents

Schedule an Expert for open incidents enables you to book a 30-minute call to discuss technical details of the incident with the assigned support engineer.

OVERVIEW

- One-on-one 30-minute call booked directly from an open incident with the assigned support engineer
- Available for low, medium, and high priority incidents with select support engineers
- Book an appointment minimum 24 hours in advance
- Sessions delivered remotely through Microsoft Teams (Learn more on [how to join your Schedule an Expert call](#))
- Check [User Guide](#) and [FAQ](#) to learn more

BENEFITS

- Have live interaction to discuss technical details of the open incident with the assigned support engineer
- Schedule a call at a time that is convenient for you
- Experience less ping-pong and more efficient incident processing reducing the time to resolve your open issue
- Easy to have other colleagues with you on the call

ACCESS

- *Schedule an Expert* button will appear in the incident editing page in SAP ONE Support Launchpad when the following conditions are met
 - The incident is an Open Incident within Product Support
 - A processor has been assigned to the incident and is available for scheduling
- Click *Schedule an Expert* button and then click *Book a Session*
- Add the appointment to your calendar and join the session at scheduled time

Ask an Expert Peer

Overview

Ask an Expert Peer

As a part of our ongoing efforts to meet your changing needs, SAP Support is exploring additional options for how we deliver support. Ask an Expert Peer is a new support channel for SAP products*.

Start collaborating on your technical, product-related questions. To get the help you need as quickly as possible, your question will be answered by a qualified, passionate, knowledgeable SAP users and administrators who are experienced in providing technical support. By collaborating with an expert peer outside of SAP, you benefit from their experienced perspective about your question. Ask an Expert Peer is designed for basic inquiries and how-to questions.

Because the free feature trial will be available for a limited time, we encourage you to help us decide if we will expand or discontinue the support channels to use, try the brand-new channel Ask an Expert Peer through the survey we send after using Ask an Expert Peer.

Real-time interaction

Schedule a Manager

Schedule a Manager enables you to schedule a 15-minute call with a Product Support manager to help manage or prevent potential service exceptions

OVERVIEW

- 15-minute call booked with a Product Support manager from the related product area
- Available for cases within Product Support
- Available for medium priority cases and high priority cases
 - or on high priority for at least 2 days
- Book an appointment minimum 2 hours in advance
- Sessions delivered via phone
- Click [here](#) to learn more, or check this [FAQ](#)

BENEFITS

- Have live one-on-one discussion on your medium and high priority case with a Product Support manager
- Schedule a call at a time that is convenient for you and matches with the availability of the manager
- Experience a more enhanced communication with SAP's Product Support management

ACCESS

- *Schedule a Manager* button appears in the incident editing page when the following conditions are met:
 - High priority case:
 - Your case has been opened at least 2 days ago; available for all SAP products
 - Medium priority case:
 - Your case has been opened at least 9 days ago; available for all SAP products excluding SuccessFactors and HCM products
- Click the *Schedule a Manager* button and then click *Book a Session*
- Add the appointment to your calendar and receive your callback at the scheduled time

Real-time interaction

Call-1-SAP and Customer Interaction Center (CIC)

CIC is one of the interfaces between customers and the SAP support organization. It is available 24 hours a day, seven days a week, 365 days a year, and provides a central point of contact for assistance with nontechnical queries.

OVERVIEW

- Contact channel for you for any nontechnical question such as:
 - Enquire about existing incidents
 - Ask questions about SAP ONE Support Launchpad and its applications
 - Get help for S-User queries
 - Request SAP remote services
- CIC can be reached by phone, chat, or e-mail

BENEFITS

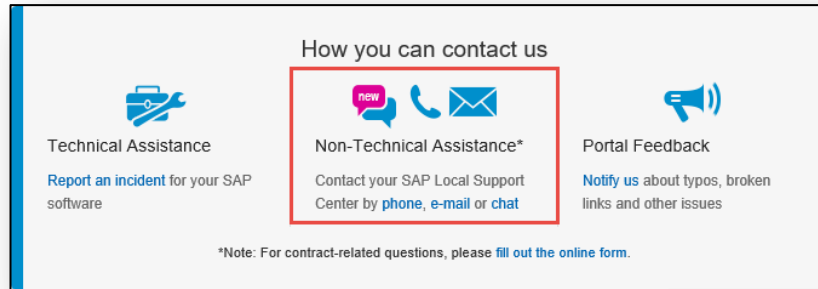

- CIC is available 24 hours a day, 7 days a week, 365 days a year, and provides a central point of contact for assistance with non-technical queries
- Universal free-phone number for contacting SAP support
- Access to service menu to select a specific product area you require, now including SAP Ariba, SAP Concur, SAP Fieldglass, SAP Qualtrics and SAP SuccessFactors solutions
- Toll-free number accessible in most countries through landline phones and some mobile providers

ACCESS

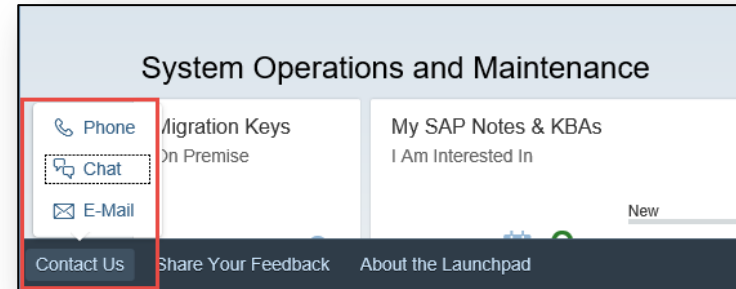

- You can access CIC from the SAP Support Portal or through SAP ONE Support Launchpad
- Direct access:
 - [Chat with CIC](#)
 - [Call CIC](#)
 - [E-mail CIC](#)

Digital support experience

Optimized incident creation with support assistant

Support assistant guides you in creating a better incident. It helps categorize your issue to get it assigned to an expert that can help you resolve your issue faster, all while recommending content and solutions.

OVERVIEW

- Support assistant helps categorize your issue so that topic-specific content can be offered along the way
- Once the issue is categorized, you are asked specific questions that can help get your incident resolved faster
- At the end of your support assistant interaction, the details are captured and available to review/edit in the incident form
- The best component for your issue type will be automatically selected as well

BENEFITS

- More detail is included on incident creation, helping to achieve faster resolution times
- Component / Expert Area is automatically selected so the incident is routed correctly the first time, reducing ping-pong
- Recommended content can help you resolve and/or investigate the issue on your own
- All details of your support assistant interaction is transferred to the incident to help the support expert investigate your issue

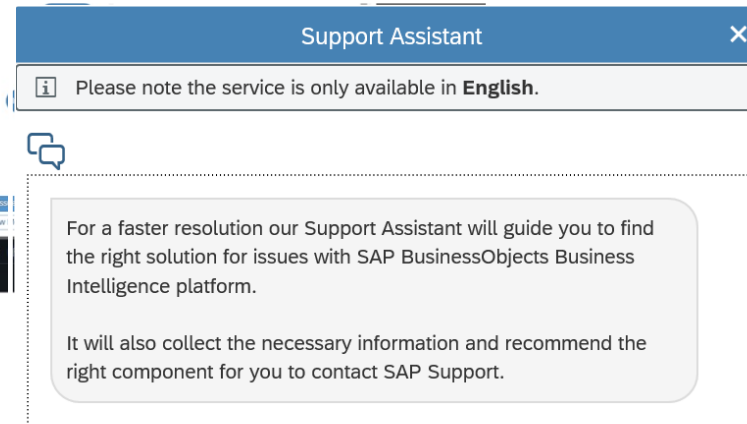

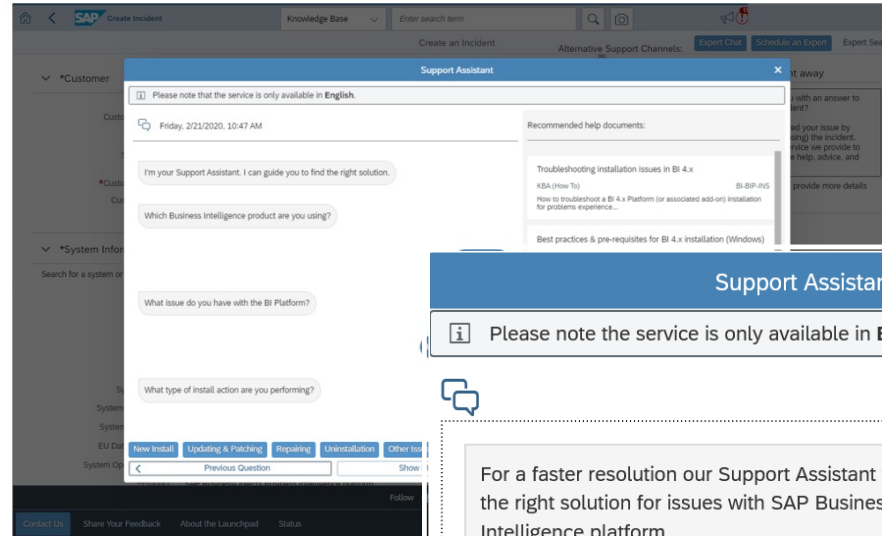

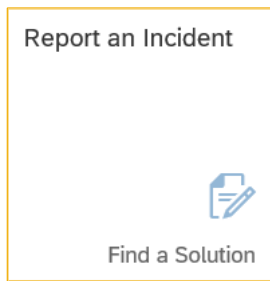

ACCESS

- Accessible through the [SAP ONE Support Launchpad](#)
- Add the tile '**Report an incident**' to your My Home-Screen in SAP ONE Support Launchpad

Digital support experience

Optimized incident creation with support assistant preview

Digital support experience

Optimized incident management

The **optimized incident management**, accessed via the new **'Manage Incidents'** tile, enables you to easily view, edit or confirm your reported incidents to SAP, with personalizable filters and views, sorting and grouping

OVERVIEW

- New tile **'Manage Incidents'** provides a redesigned incident list view for you to easily search, view, edit or confirm your incidents
- You can customize the filtering option to search incidents and save the personalized view with preferred grouping and sorting rules
- Multiple saved searches can be added within the tile.
- For detailed information also visit [here](#)

BENEFITS

- Simplified and intuitive design
- Filter customization and personalized view
- Quick access to confirm, open or view incident last changes
- Foundation of incident management tile simplification from SAP ONE Support Launchpad
- Redesigned incident edit layout provides an intuitive workflow to interact with SAP support

ACCESS

- Accessible through the [SAP ONE Support Launchpad](#)
- Add the tile **'Manage Incidents'** to your My Home-Screen in SAP ONE Support Launchpad

Digital support experience

Optimized incident management preview

The diagram illustrates the user journey from a menu to a detailed incident management view. On the left, a box labeled 'Manage Incidents' contains the text 'Customize your Lists' and 'Incident Lists' with a list icon. An arrow points to the right, where a larger screenshot of the incident management interface is shown.

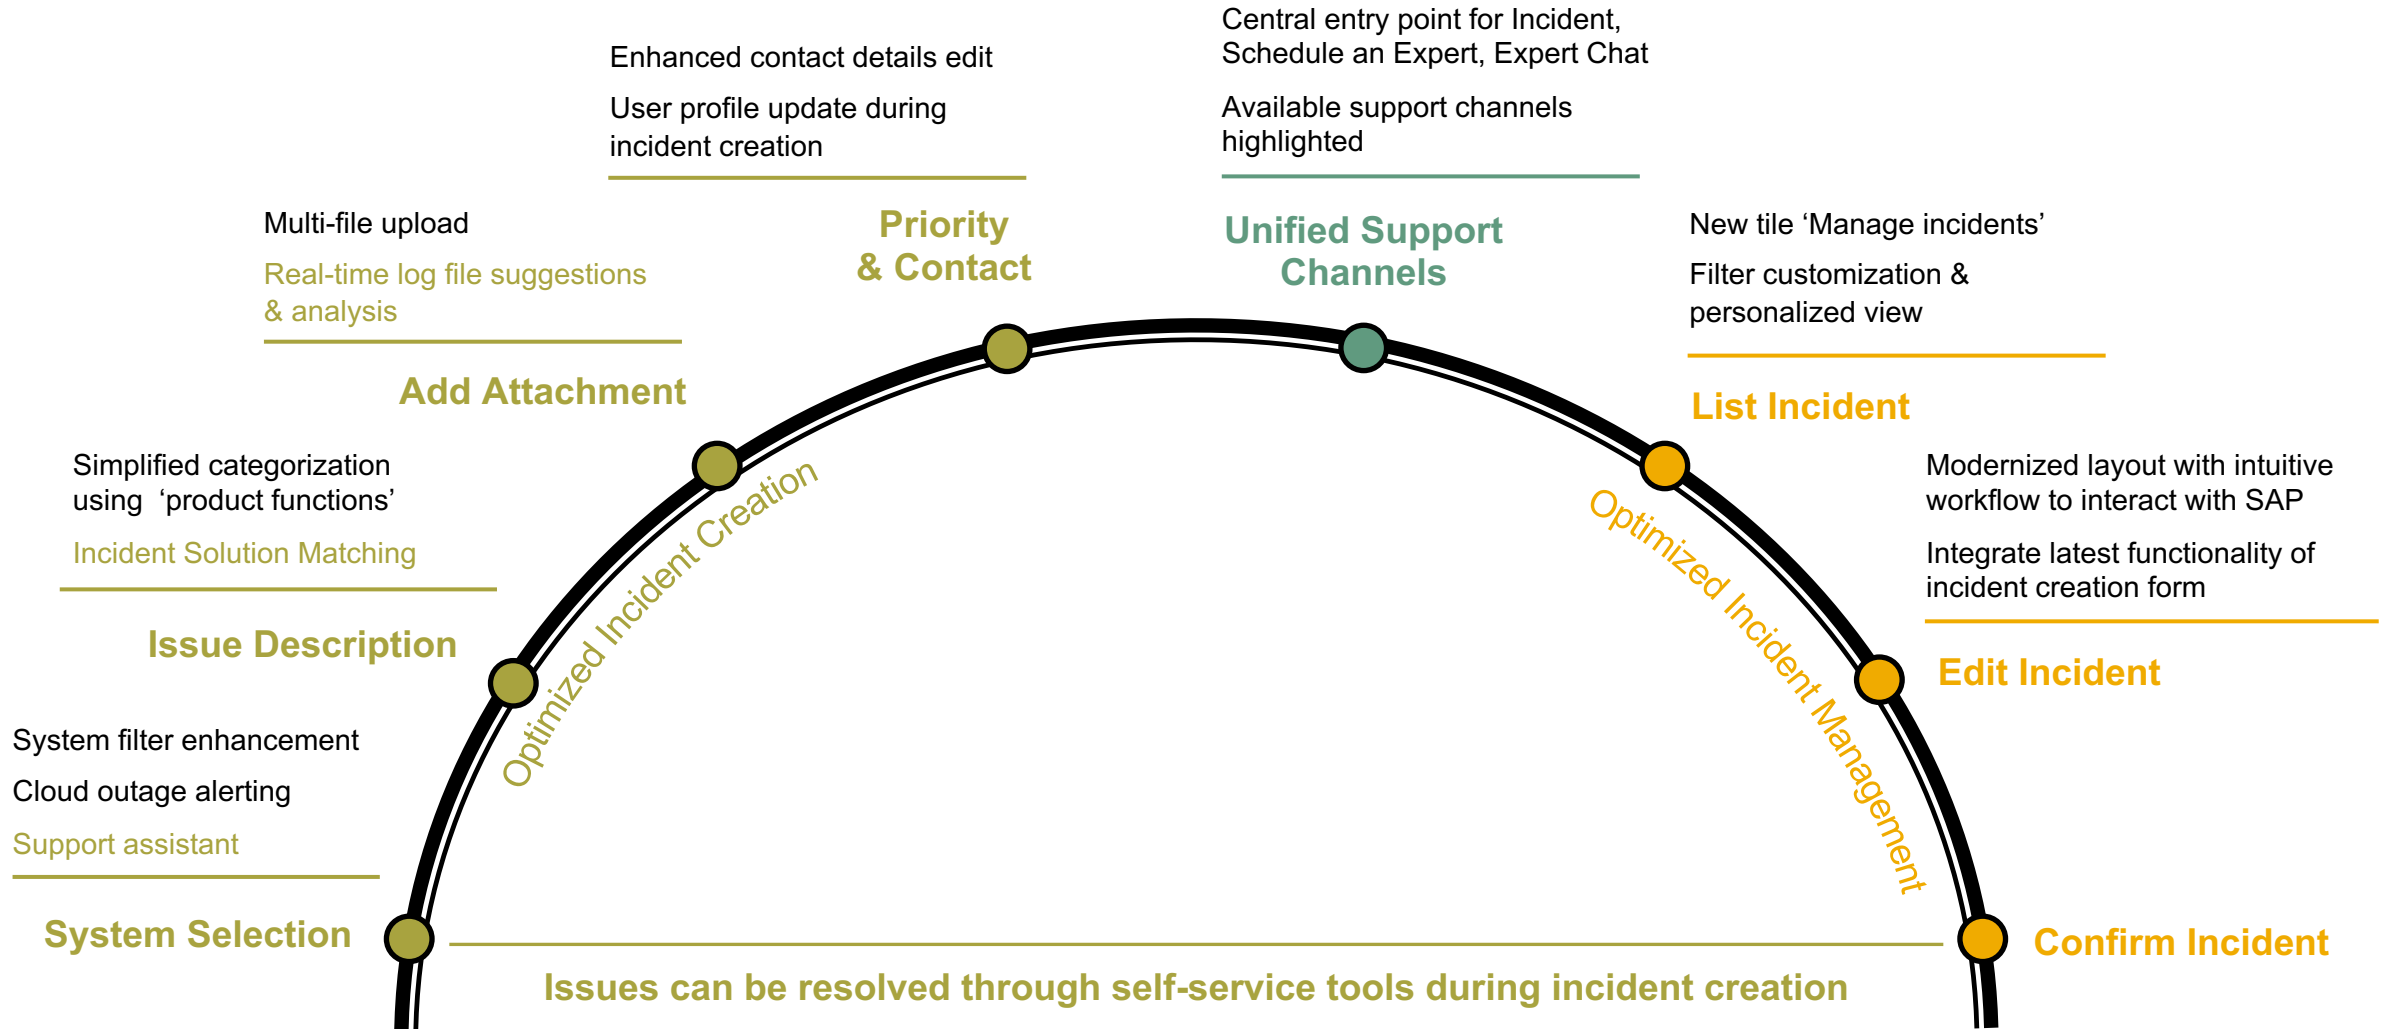

The interface screenshot includes a top navigation bar with 'My Very High incidents' and a search bar. Below the search bar, there are filters for 'Status' (set to '11 Items') and 'Priority' (set to 'Low'). A table of incidents is displayed with columns for System/Product, Component, Reporter, Customer, Created On, Updated On, and Auto Confirm Date. A pop-up window titled 'Incident Details' is overlaid on the table, showing information for incident number 137714 / 2020, including its status ('Customer Action'), last changes, and a confirmation button.

System/Product	Component	Reporter	Customer	Created On	Updated On	Auto Confirm Date
ASE	Sybase IQ (BC-SYB-IQ)	Hans Ammer	- Test value contract OSS corp. function	03/05/2020 at 10:04 am	04/01/2020 at 03:21 pm	03/20/2020
JGE	Upgrade tools for ABAP (BC-UPG-TLS-TLA)	Hans Ammer	- OSS Test function #1 OSS corp. funktion*	03/31/2020 at 05:18 pm	03/31/2020 at 05:27 pm	05/15/2020
CSS	Value Added Tax (VAT) (FI-GL-GL-F)	Alexandra Paul	- SAP Test Account - aPaul Pharma Test - Account AGS Data Quality	04/01/2020 at 03:52 pm	04/01/2020 at 03:52 pm	

Incident Details Pop-up:

- Title:** Mike Test
- Incident Number:** 137714 / 2020
- Updated on:** 04/01/2020 at 16:21:49
- Status:** Customer Action
- Last Changes:** Info to Customer
- Change:** 04/01/2020 at 03:21 pm by SAP
- Description:** This is a test
- Buttons:** Confirm, Open Incident, Cancel

Enhancing the whole incident creation & management journey

Digital support experience

Predictive and preventative support

The **predictive and preventative support** features and capabilities will help customers in a tailored and personalized way to avoid or even prevent issues.

OVERVIEW

- The predictive support approach provides customers with tailored information on how to address issues which may be unknown or manifest themselves, attempting to eliminate the cause or mitigate contributory factors.
- Preventative support features and functionalities, such as Ariba cloud health, help SAP support to reach out to the customer with tailored and focused information to prevent issues, their impact and any associated effort.

BENEFITS

- Real-time tailored trending data exposed at the customers point of need (Product Pages, SAP ONE Support Launchpad).
- By analyzing performance and error data for every user action, Ariba cloud health redefines traditional monitoring and enables preventative action derived directly from the unspoken voice of customers.
- On-demand subscriptions provide you with the latest updates on relevant critical cloud outages in the SAP ONE Support Launchpad.

ACCESS

- Accessible through the [SAP ONE Support Launchpad](#)
- Product Pages. [Access through “Products”](#) in the header navigation of the SAP Support Portal.
- Cloud health is a key element in how SAP will transform major incident management across the cloud landscape. For SAP Ariba customers, cloud health is fully integrated into the existing support model providing benefit 24x7.

Incident Solution Matching

Incident Solution Matching automatically proposes solutions based on incident data (e.g. *incident description*) in the incident creation form and the view or edit form of open incidents in SAP ONE Support Launchpad.

OVERVIEW

- A new machine learning service based on artificial intelligence (AI) technology
- Automatically recommends solutions from SAP Notes and SAP Knowledge Base Articles when you create a new incident or view/edit an open incident
- Potential matches are ranked according to their semantic relevance based on incident data
- Accelerates the process of finding relevant solutions by learning from past incidents
- Watch the [video](#)

BENEFITS

- Supports receiving proposed solutions for your issue much faster
- Find relevant SAP Notes and SAP Knowledge Base Articles in one quick step without manual searching effort
- The more you use *Incident Solution Matching*, the more relevant the recommendations become

ACCESS

- Simply access the SAP ONE Support Launchpad
- Go to the incident creation form
- Describe your issue as concisely as possible
- Automatically receive suggested solutions ranked in order of relevance in the right pane
- Select a component to further refine the results
- Access your incidents inbox and open an existing incident to view or edit
- Automatically receive suggested solutions ranked in order of relevance in the right pane of the open incident

Incident Solution Matching preview

The screenshot displays the SAP 'Create Incident' interface. On the left, the 'Provide Incident Details' section includes fields for Language (English), Priority (Medium), Subject (Stock in transit stock issue), and Component (MM-IM-ST-PO). The Description field contains a detailed problem report about stock in transit quantity not being reduced and completion indicators not being set in a PO.

The main area shows a list of alternative support channels and search results. A yellow arrow points from the description in the 'Create Incident' window to a highlighted search result in the 'Alternative Support Channels' list. This result is titled 'How to fix quantity on stock in transit? (KBA 1618453)' and includes a brief description of the issue.

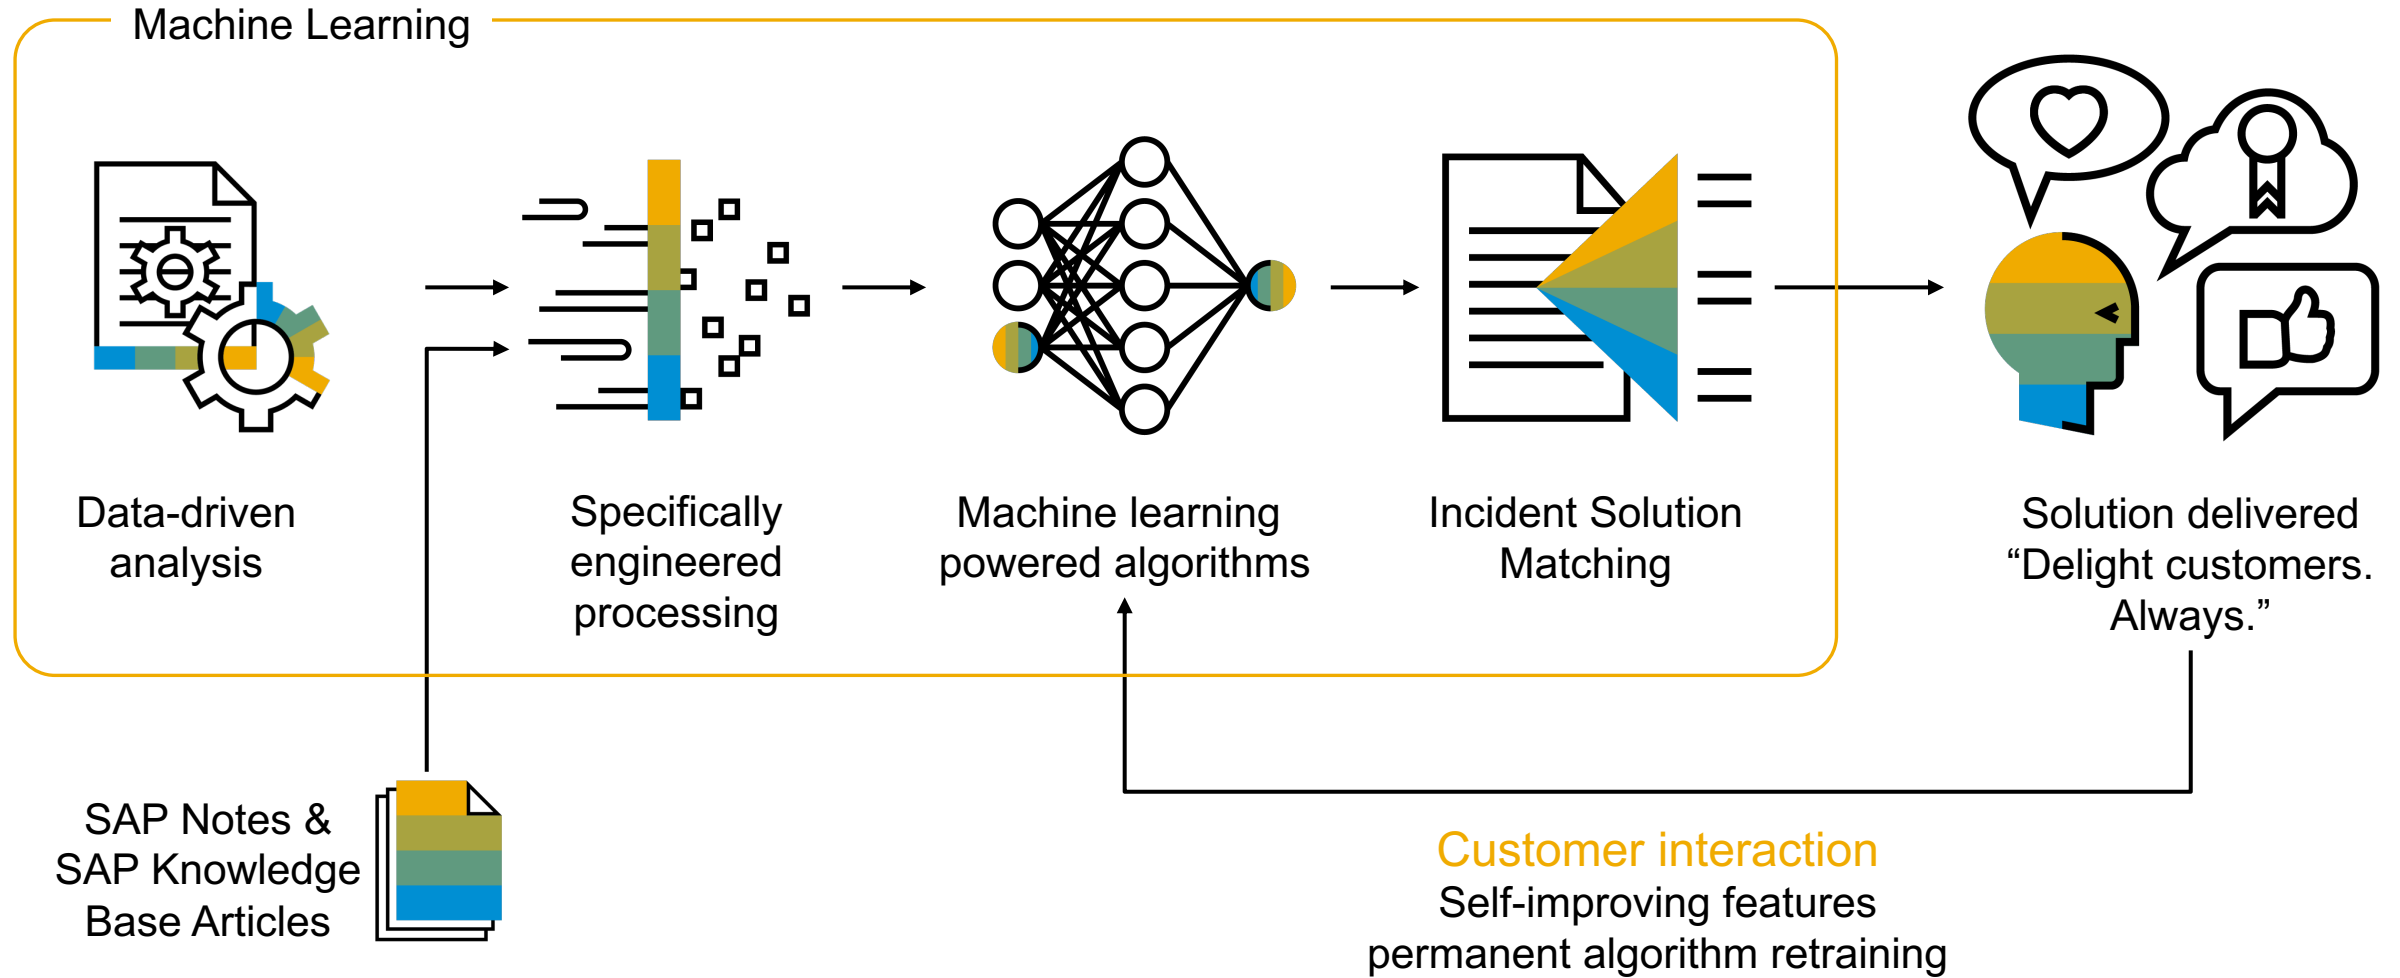

Below this, a detailed view of the search result is shown. It includes the title '259985 / 2019 Stock in transit stock issue', system information (ABZ - SAP R/3), and a description of the problem. The description matches the user's input: 'We have the following issues when doing a movement of type 557: a) The stock in transit quantity is not getting reduced. b) We are unable to put completion indicator in the PO. The scenario of PO from our system is as below: A stock transport order (XXX) 7490002222 was created for material 538010(Finished product) from plant IT11 storage location FG01 to IT11 plant and FG10 storage. Both the storage locations are warehouse managed.' The date of the result is 2019.05.23.00:06:01 UTC.

At the bottom, a 'Reply to SAP' field is visible, containing the text: 'After the posting of a goods movement with movement types 557 or 558, the stock in transit quantity is still displayed in the transaction MBST.'

On the right side, a green-bordered box titled 'This information might help you right away' lists several related KBA articles and notes, including 'Stock in Transit not cleared with movement 557/558 in MBST (KBA 1727922)', 'How to fix quantity on stock in transit? (KBA 1618453)', and 'Movement types 557/558 for the stock in transit correction (Note 389484)'. A yellow arrow points from the detailed search result to this box.
