Innovation & Value Realization

SAP Solution Manager – Overview

- **Business continuity**
 - Reduce very high incidents
 - Decrease change related outages
 - Increase system performance
- **Time to market**
 - Deliver faster from requirement to deployment
 - Reduce test phase duration
 - Manage custom code
- **Efficiency**
 - Reduce cost of operations
 - Run more projects with the same staff
 - Reduce test effort
- **Compliance**
 - Improve audit ratings
 - Gain transparency via a “single source of the truth”

Mission-Critical Support

Reliable end-to-end support across all deployment scenarios

Mission-Critical Support

Regardless of your deployment scenario and the issues that may arise, a cornerstone of SAP Enterprise Support is mission-critical support that provides rapid collaboration with support experts.

A single, intuitive interface to access support resources. By using customizable role profiles, the SAP ONE Support Launchpad displays only relevant applications and insights to help ensure an efficient and user-friendly experience.

24x7 availability independent of your deployment model, with CALL-1-SAP as your global toll-free telephone number for contacting SAP support. Profit from the features of the Next-Generation Support approach.

Minimized business disruption and accelerated problem resolution thanks to best-in-class service level agreements for a timely initial reaction and a corrective action.

Appendix

Real-time interaction

Call-1-SAP and Customer Interaction Center (CIC)

CIC is one of the interfaces between customers and the SAP support organization. It is available 24 hours a day, seven days a week, 365 days a year, and provides a central point of contact for assistance with nontechnical queries.

Overview

- Contact channel for you for any nontechnical question such as:
 - Enquire about existing incidents
 - Ask questions about SAP ONE Support Launchpad and its applications
 - Get help for S-User queries
 - Request SAP remote services
- CIC can be reached by phone, chat, or e-mail

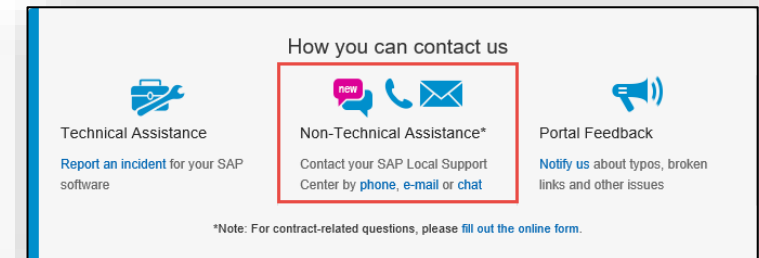

Benefits

- CIC is available 24 hours a day, 7 days a week, 365 days a year, and provides a central point of contact for assistance with non-technical queries
- Universal free-phone number for contacting SAP support
- Access to service menu to select a specific product area you require, now including SAP Ariba, Concur, and SAP Fieldglass solutions
- Toll-free number accessible in most countries through landline phones and some mobile providers

Access

- You can access CIC from the SAP Support Portal or through SAP One Support Launchpad
- Direct access:
 - [Chat with CIC](#)
 - [Call CIC](#)
 - [E-mail CIC](#)
- Learn more here:
 - [SAP Support Portal](#)
 - [Reference Guide](#)

Preview

SAP Support Portal

SAP ONE Support Launchpad

Real-time interaction

Expert Chat

Expert Chat provides a live chat function that connects you to SAP technical support experts instantly.

Overview

- Live support from SAP experts for any technical question related to a product
- Improves support experience with real-time interaction
- Available for all support levels and almost all solutions
- For more information:
 - Learn more about [Expert Chat](#) on SAP Support Portal
 - [Expert Chat video](#)

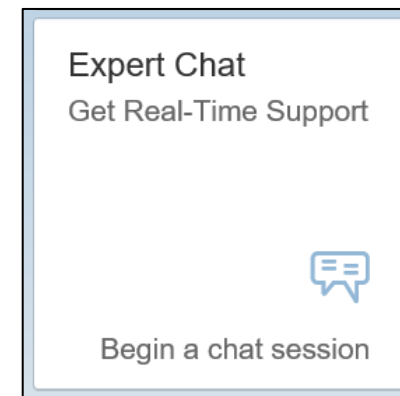

Benefits

- Connects you real-time with SAP support
- Offers screen-sharing option
- Provides access to the same technical experts as in the incident channel
- Resolves incidents significantly faster than those reported through traditional SAP support channels
- Offers quicker and more efficient issue resolution
- Reduces your project and operational costs

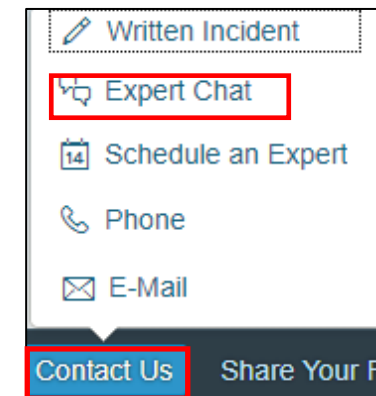

Access

- Access Expert Chat through the [SAP ONE Support Launchpad](#) (several options):
 - a. Access through the **Expert Chat tile** on your SAP ONE Support Launchpad on the My Home screen.
 - b. Carry out a search in the launchpad's database. Click on the Expert Chat-button in the upper area.
 - c. Access Expert Chat through the *Contact Us* menu
 - d. Access Expert Chat while going through the incident submission process. Chat functionality is built into the incident form.

Preview

Expert Chat tile on My Home in SAP ONE Support Launchpad

Contact Us menu in SAP ONE Support Launchpad's footer bar

Real-time interaction

Schedule an Expert

Schedule an Expert connects you live with SAP Support in a one-on-one 30-minute call to discuss a technical topic of your choosing – at a time that is convenient for you.

Overview

- One-to-one 30-minute call delivered remotely through Microsoft Teams
- Book an appointment at least one - three business days in advance to allow engineers to prepare
- Check out the [Schedule an Expert video](#)
- Visit [SAP Support Portal](#) to learn more
- Learn more on [how to join your Schedule an Expert call](#)

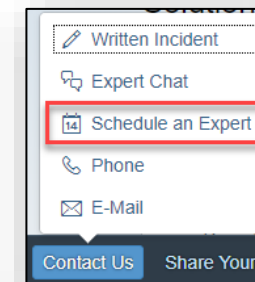

Benefits

- Live channel option for you
- Interact one-to-one with a support engineer
- Get answers when and where you need them
- Get help and direct support for any technical question
- Have access to the same engineers that you would create an incident with
- Reduce your waiting time for response and resolution

Access

- Access Schedule an Expert through the [SAP ONE Support Launchpad](#) (several entry options):
 - a. Access through the **Schedule an Expert tile** on your SAP ONE Support Launchpad home screen.
 - b. Carry out a search in the Launchpad's database. Click on the Schedule an Expert-button in the upper area.
 - c. Access Schedule an Expert through the "Contact Us"-menu in SAP ONE Support Launchpad's footer bar

Preview

„Contact Us“-menu in SAP ONE Support Launchpad's footer bar

Real-time interaction

Schedule a Manager for high/medium priority incidents

Schedule a Manager for high/medium priority incidents enables you to schedule a 15-minute call with an SAP Product Support manager to help manage or prevent potential service exceptions

Overview

- 15 minute call booked with a Product Support manager from the related product area
- Available for incidents within Product Support
- Incident is on high priority for at least 2 days OR
- Incident is on medium priority for at least 9 days
- Book an appointment minimum 2 hours in advance
- Sessions delivered via phone
- Click [here](#) to learn more, or check this [FAQ](#)

Benefits

- Have live one-on-one discussion on your high priority incident with a Product Support manager
- Schedule a call at a time that is convenient for you and matches with the availability of the manager
- Experience a more enhanced communication with SAP's Product Support management

Access

- Schedule a Manager* button appears in the incident editing page in SAP ONE Support Launchpad and is active when the following conditions are met:
 - The incident has been at priority High for at least 2 days OR
 - The incident has been at priority Medium for at least 9 days
 - The incident is within Product Support
 - A Product Support manager is available for the session
- Click *Schedule a Manager* button and then click *Book a Session*
- Add the appointment to your calendar and join the session at scheduled time

Preview

The screenshot shows the SAP ONE Support Launchpad interface. The main content area displays incident details for '324415 / 2019 Invoiced cannot be printed anymore'. Below the details, there is a 'Schedule a Manager' button. A calendar pop-up is visible, showing an upcoming session on 'Nov 11, 09:30 UK'. The pop-up includes a 'Book a Session' button and a 'Cancel' button. The background interface shows various navigation icons and a search bar.

Please note: this service is not offered for incidents processed within development support !

SAP Product Support Incident Creation Best Practices

Details	SAP Note
How to create a (one-issue per) support incident (log into https://launchpad.support.sap.com/ - Report an Incident tile) OR Chat Live via SAP Expert Chat to discuss immediately with PS engineer (P1 is n/a). Schedule an Expert for new issues (min. 3 day allowance).	SAP Note 1296527
What important information must be included in order to create a perfect SAP Support incident?	SAP Note 1922545
Choose the right system (and product) for your Incident in the SAP One Support Launchpad: <ul style="list-style-type: none"> Selecting an incorrect system/product or installation for the incident may have negative impact on the processing of the incident you submit The support contract depends on the installation; if an incorrect system/product is selected, different SLAs and different processing times will apply to the incident. 	SAP Note 2848890
Enter S-user/person getting the error message – ensure your contact info is added to incident	
Provide a meaningful short text description and a step-by-step description including navigation and description of when issue started, prior changes, expected results and date for resolution. Add screenshot of error message and inform about any SAP Notes search that was done.	
Provide complete business impact details (mandatory for P1)	See embedded Word Doc
Open service connection and provide login data (if required)	SAP Note 1773689
Select the appropriate incident priority	SAP Note 67739
Record one issue per incident	SAP Note 50048

SAP Product Support Best Practices for Escalations

When criticality increases Details

Step 1

Accelerate the incident by calling the SAP Customer Interaction Center (CIC)

1-800-677-7271 (U.S.) (24x7, 365)

- Local CIC numbers (available 24 x 7) are found via [SAP Note 560499](#)
- Ask to speed up OR 'escalate' the incident by explaining the business impact
- Consider whether the current priority matches the urgency of the matter

In case of product system

In case of test/development system

Points of contact

Step 2

Escalate the incident in case the situation is getting more critical by calling the SAP Customer Interaction Center and request ESCALATION.

- What core process is affected?
- What is the financial loss?
- Is a manual workaround available or too extensive?
- How many users are affected?
- How long has the problem been going on?

- Which project?
- Go-live date, product, and release?
- Showstopper: yes/no?
- Is the go-live date affected?

- Contact names and hours of availability.
- Work phone numbers (no 800xx)
- Phone number and email address.
- System Opener resource identified.

Step 3

Escalate using Talk to a Manager for Ariba Incidents via portal.
OR
Escalate a HIGH/Medium incidents using Schedule a Manager session for those applicable incidents via SAP incident portal (see requirements).

Requirements

- 15 minute call booked with a Product Support manager
- Available for incidents within Product Support
- Incident is on high priority for at least 2 days
- Incident is on medium priority for at least 9 days
- Book an appointment minimum 2 hours in advance

See [SAP Note 90835](#): Business Impact details for escalating an incident

Business Impact. Important questions to ask your users and useful examples.

Question to ask users:	Why is this important to ask?	Example:
What is the issue?	This allows the user to explain the issue in their own words. While the problem description is not the business impact, a detailed problem description gives insight into the issue.	When attempting to import supplier files to supplier creation, a system error is received preventing the creation of suppliers. The error received is, System Error ID 123456789. The audit log was checked with the ID but the stack trace pointed to a Null Pointer Exception.
When did the issue start?	This allows you to get a clear timeline of when the issue started happening. It helps narrow down what could have been the cause of the issue or what could have caused the issue.	The issue started Monday morning when the manual supplier import was attempted around 9am EST. There was a release on Friday, which might be the cause of the issue.
Has this feature ever worked?	This allows you to understand if the feature was every properly working. If at one time it was working, this serves as a timeline that allows you to determine what change before/after the feature did or didn't work.	This worked on Friday of last week. When the files are being manually imported, a system error happens after 'Import' is selected. The last manually ran supplier import was Friday morning at 10am EST.
When did you notice it stopped working?	This allows you to get a clear timeline of when the feature stopped working It helps narrow down what could have been the cause of the issue, such as a quarterly release.	I noticed the manual supplier import stopped working around 9am EST on Monday. I was able to manually import suppliers on Friday.
Can you provide specific examples?	Asking for users to provide specific examples helps to not only see the issue in the system but also helps to narrow down the issue. The specific examples can help you see exactly where the issue is taking place.	Go-live is scheduled within the next 2 days. The error is preventing suppliers from being created which prevents supplier creation in the production realm. Without supplier creation, we're unable to transact in any form at time of go-live.
Are there any workarounds being used?	It is important to ask what workarounds are being used so it can be understood if there already is a workaround being used and if it can continue being used. If a workaround is already being used, you are able to determine the impact the issue is having.	We are able to create suppliers within Supplier Manager one-by-one. This workaround can be used for the next 2 weeks. After the next 2 weeks we have a wave of 300 suppliers being enabled in our realm and it would take 3 dedicated employees to create these suppliers in time.
What is the financial impact?	Gathering the financial impact the issue is causing allows you to add a quantifiable measurement within the business impact. It adds an understanding of scope to the business impact that is needed when prioritization takes place.	If we are unable to create the needed 300 suppliers, it will prevent around \$500,000 USD of items being ordered which prevents payments from being delivered to the suppliers.
Does this impact any processes?	Understanding how the issue is impacting internal processes helps determine how the issue is affecting the you. This allows you to understand what is being affected beyond the issue or error.	This is impacting the internal process around supplier creation. We are unable to create suppliers in batches through the import due to the error. Instead, we'd have to create the suppliers manually one-by one causing internal resources to be solely dedicated to supplier creation.
Is there an audit impact this is causing? *Not applicable to all customers*	While this is not applicable to all situations, it is important to understand if the issue is impacting audit in some way. If the issue is causing an impact to audit, the business impact should reflect this to ensure proper prioritization takes place.	The issue is causing our business from being in SOX compliance. We are being audited in three days and will not pass SOX compliance if the issue is still occurring. We will be fined \$500,000 should SOX failure occur.
How many end users are impacted?	It is important to ask how many end users are impacted because it helps to understand the scope of the problem. Understanding the scope allows for a quantifiable measurement the impact is having on the business.	The issue will be impacting 500 users within the next 2 weeks if the issue isn't resolved. The 300 new suppliers needed to be ordered from will not be available in the system to purchase items from.
How does this impact a go-live?	It is important to understand that a go-live blocker is not the business impact. The information we're looking to gather with this question is how the issue is impacting the go live and the date the go-live is scheduled to take place.	Our go-live is scheduled within the next 2 days. The error is preventing suppliers from being created. This prevents supplier creation in the production realm. Without supplier creation, the buyer is unable to transact in any form at time of go live.

Product Support Accreditation

Make the best out of SAP's product support tools and Next-Generation Support offerings!

- Available to all SAP Customers and Partners with an S-User at no additional cost
- Gain empowerment and awareness to all the available resources from Product Support
- Consists of 3 modules and a final assessment, which can be taken at your own pace and time. Approximate 1 hr completion time.
 - incident prevention offerings
 - real-time interactions
 - digital support experience
- Product Support Accreditation badge is awarded once the final assessment is completed, which can be shared on social media
- Updated session training information bi-annually – no need for assessment on earlier learned material.

- [Product Support Accreditation welcome video](#)
- [SAP News Center: Make the Best Out of Interactions with Product Support](#)
- [Access the Product Support Accreditation program](#)

ABOUT THIS PROGRAM

Product Support Accreditation allows customers to become familiar with the accurate ways to interact with Product Support from SAP.

By completing the accreditation all customers and partners are enabled and empowered to interact with Product Support in the most efficient way.

Accreditation can be completed within a short time. The course consists of 3 modules, each containing a short, interactive video and a PDF document. At the end of each module a short quiz is taken to ensure full understanding of the presented material.

On successful completion of the final assessment, the Accreditation is then awarded.

BENEFITS

- Empowerment** - Awareness to all the available resources from Product Support, resulting in improved response time, better support interactions & increased efficiency and productivity.
- Badge** - Acclaim badge shareable on social media.
- Entry pass for SAPPHIRE NOW 2020*** - A chance to receive a SAPPHIRE NOW 2020 complimentary pass for the event held in Orlando, FL, with the opportunity to meet with Product Support Leadership.

***Disclaimer:**

- These benefits will be awarded for a limited time to limited users ONLY
- Once the benefits with limited quantities are distributed, they will be discontinued
- Some exclusions apply, please contact ps_accr@sap.com for more details
