KEMIRA

cbs conducted a comprehensive assessment of Kemira's interface landscape in 2021, with the goal of defining a future target landscape and planning the transition steps.

The assessment included an analysis of interfaces based on SAP Process Orchestration (PO) and S/4HANA readiness.

The outcomes of the assessment were a detailed integration and API strategy following the ISA-M approach, a migration project plan, and an API roadmap.

Interface Assessment & Strategy

S/4HANA Transition

Project Example: Assessment – Migration Project Plan

Tasks	Jan	Feb	Mar	Apr	Мау	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar
Wave 1: S/4HANA Interfaces	Desi		gration					Test							GoLive
Wave 2: Non-ERP Interfaces								Design Mig	ration	GoLive					
Wave 3: SuccessFactors Interfaces										Design Mi	gration	GoLive			
Wave 4: Data Warehouse Interfaces												Design Mig	gration	GoLive	

INTERFACE MIGRATION Transition to SAP Integration Suite

кетга

KEMIRA

- Migration of >350 interfaces from SAP PO 7.5 to SAP Integration Suite
- Scope included complex interfaces in the areas of logistics, SWIFT and HR data
- Usage of SAP API Management for all inbound scenarios
- Multiple integration test phases ensured reliability

C	ustomer Fac	sts
Chemical	3,659 bn	5.062
Industry	Revenue	Employees

In January 2022, Kemira and cbs embarked on a substantial S/4 transformation program, simultaneously migrating over 350 interfaces from SAP PO 7.5 to SAP Integration Suite.

The project encompassed complex interfaces for logistics, SWIFT, and HR data, while employing SAP API Management for all inbound scenarios. The use of interface and policy templates significantly minimized development and maintenance efforts.

"Go-live: successful big bang go-live as part of S/4HANA go-live. Amazing smooth and invisible switch to Integration Suite."

Project Example: Migration – Project-Specific Guidelines

Separate Routing and Mapping Flows

Reuse XSLT mappings where possible, adjust where neccessary

Transfer Java mappings to groovy scripts

Replace NFS shares with SFTP servers or Azure FileREST API-based access

Replace RFC lookups with CDS View calls or OData services

Use API-Management for all inbound communication

Simplification & merge of Interfaces

Implementation of custom SWIFT solution

Summary

Key Takeaways

By making the upgrade now, Kemira chooses to be a pioneer compared to competitors and by doing so creates a springboard for further improvements.

Migration and Implementation Experience

- Any size migrations from small to large scale
- Large scale implementations
- A2A, B2B, EDI, Salesforce, C/4HANA, ServiceNow, Microsoft Dynamics, etc.
- Coverage of all Integration Suite capabilities: Cloud Integration, Integration Advisor, API Management, Open Connectors, Event Mesh

Partnerships

- Close partnership with SAP (product management SAP Integration Suite, SAP user groups)
- Existing and long-term collaboration: INT4, Figaf, Arianim

cbs Best Practices

- Proven methodology & tools
- Extensive set of templates and accelerators
- Constant extension and feedback from implementation projects

Delivery

- Global delivery capability
- Focus on quality, enabler approach and long-term partnership with customers
