Custom Code Remains Critical

As customers upgrade their SAP systems, they'll need to remediate and transform their custom code

The majority of survey participants plan to retain their custom code as they proceed with upgrading to S/4HANA and beyond

Q. As your organization moves forward with SAP S/4HANA or other SAP system upgrades, how will your organization's custom code be handled? (Please select all that apply.) (n=177)

Custom Code Presents Challenges for Modernization

Barrier to upgrading/
migrating to a new
SAP offering

Automation Offers Modernization Options

Speed

Accelerate the transformation process by **minimizing the need for manual remediation**

Confidence

Enhance the overall **quality, security, and stability** of the transformed code

Productivity

Eliminate the need for **business disruption**

Innovation

Modernize the system to be more **flexible, scalable, and agile**

- The only Intelligent Automation for SAP Custom Code Transformations
- 11 Patents - 10+ years of SAP ABAP Research & Development
- 3000+ Successful SAP Transformation Projects
- 2.5+ Billion lines of Code Remediated with <0.01% Code Transformation Error Rates

At smartShift, we develop and deliver automated solutions to accelerate business growth and de-risk the transformation of SAP custom code and applications.

powered by smartShift Intelligent Automation®

Custom Code Analysis

De-risk with data-driven planning. Know all changes for S/4 upfront & plan with confidence.

Custom Code Analysis

Code Analysis

Category	Description
Namespace analyzed	V*__*_*/BMW/*
Release	SAP BASIS 751; SAP_API_606
Unicode Enabled	Yes
System Size	Large (L)

Category	Metrics
Total number of ABAP Objects	18,623
Lines of Code (LOC) ABAP	2,092,672
Lines of Code (normalized*)	1,358,279
Commenting Rate	35% (Benchmark 30%)

	NWP	
	All Objects	Used Objects
# Total Issues	290,882	67,943
# Critical (UG/UC)	5,170	485
# HANA Code Compliance (readiness)	3,343	1,169
# HANA Performance Optimization	11,573	3,172
# General code performance	49,697	14,900
# Quality / Stability	156,269	47,306
# Security	4,830	911
# Issues / 1000 LOC	170	130

What it delivers:

- Complete ABAP repository analysis: HANA, S/4HANA, Stability, Security, Usage, and Optimization (250+ intelligent rules)
- Landscape comparison analysis for each landscape
- Outputs: Code decommissioning insight, reporting of categorized issues, simplification insight, data-driven plan for realizing end-state

Why it matters:

- De-risk w/data-driven planning. Know all changes for S/4HANA upfront & plan with confidence.
- Ensure version discrepancies between environments are identified and corrected.
- First step to realize guaranteed compatibility & comprehensive optimization of the code repository.

Custom Code Transformation

Comprehensive transformation. Guaranteed quality - 1,000X better than manual approach.

Ruleset Summary

Rule Set	All Objects	Used Objects
ABAP Cloud	28,082	17,906
ABAP Modernization	141,579	94,824
HANA Compatibility	2,463	1,757
HANA Performance	6,910	4,577
Internal	2,635	1,805
Performance	25,035	17,291
S/4HANA Compatibility	1,366	912
Security	4,780	2,974
Unicode	2,023	1,947

Ruleset Summary

```

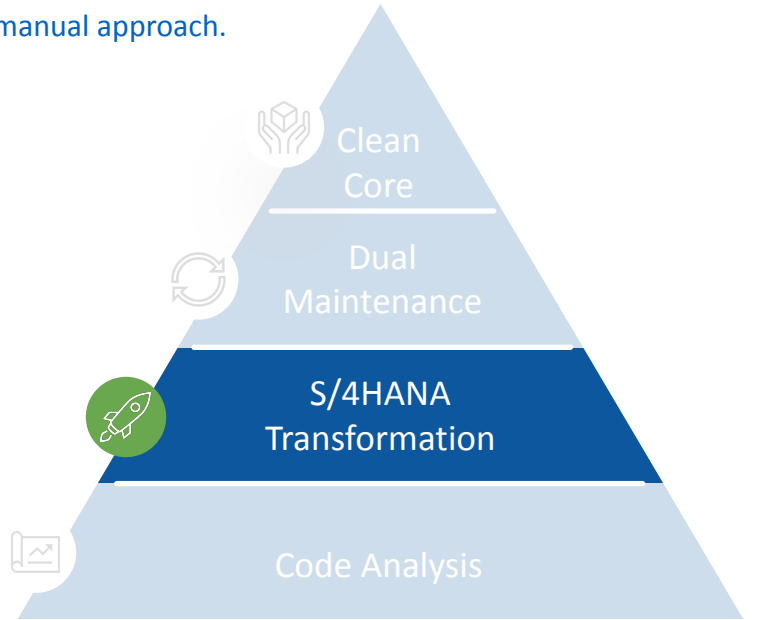

TABLES : bseg.
DATA gt_fagL_bseg_tmp TYPE fagL_bseg.
*$smart (E) - #633 Detected access to DB table BSEG. (A)
cL_fagL_emu_cvrt_services=>get_leading_ledger(

Custom Code Transformation

S/4HANA Transformation

What it delivers:

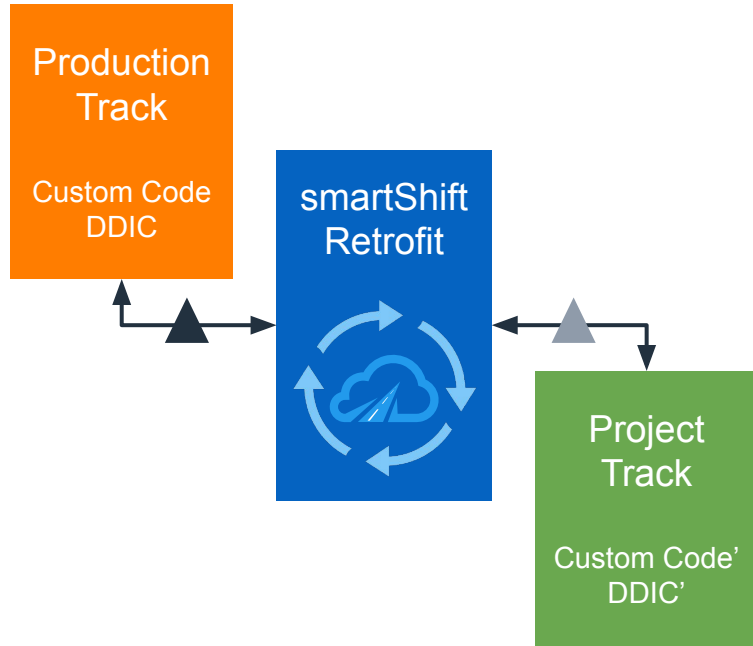

- Comprehensive, automated transformation of ABAP: HANA, S/4HANA, Stability, Security, and Optimization (250+ intelligent rules)
- Unused code decommissioned
- Version alignment within each landscape - right version, right place
- Modification adjustment (SPDD/SPAU/SPAU_ENH)
- Outputs: All code transformed and posted to designated transport in the target environment, full audit and before/after reports

Why it matters:

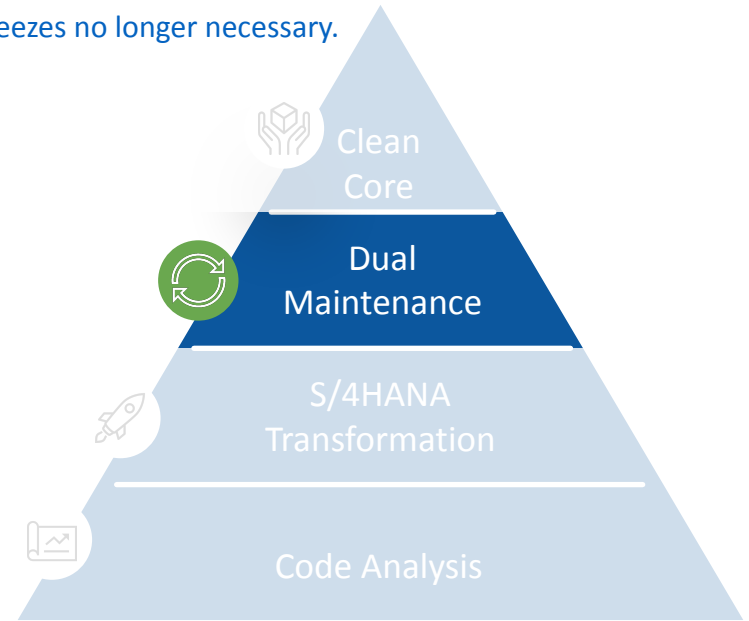

- Comprehensive transformation and optimization, not limited
- Guaranteed quality - 1,000X better than manual approach
- Guaranteed compatibility - full coverage, all severities, best practice
- Timeline acceleration, protection, and risk reduction
- Elimination of technical debt/obsolete code, plus future-readiness
- Secure, stable, & optimized, not just compatible
- Cost certainty

Automated Dual Maintenance

Enables business agility & innovation. Dev restrictions, prolonged code freezes no longer necessary.

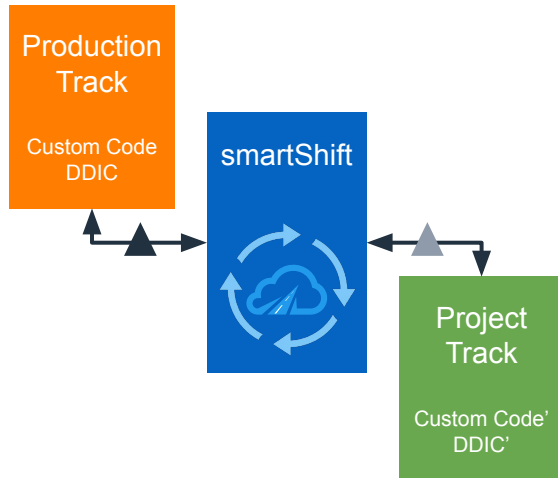

powered by
smartShift Intelligent Automation®

Automated Dual Maintenance

Automated Dual Maintenance

What it delivers:

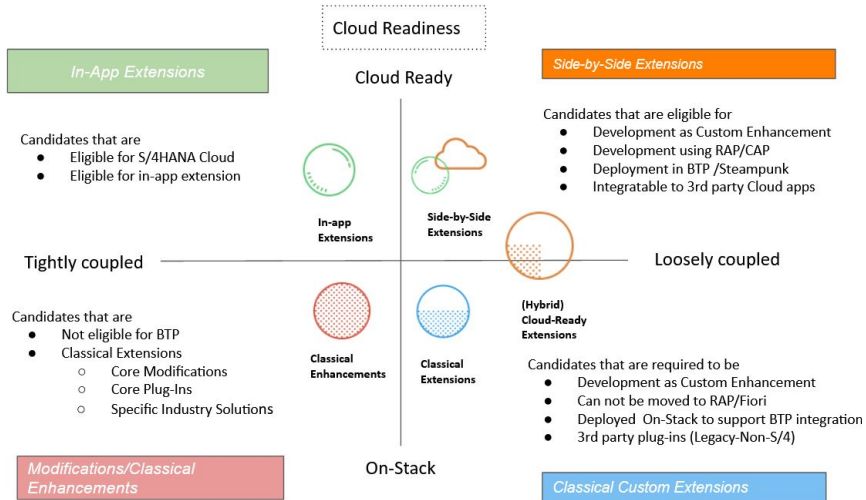

- Automated comparison, merge, and S/4HANA compatibility (ECC → S/4HANA) for ABAP & related DDIC (workbench)
- Integration with change management process and governance (SolMan, ChARM, ActiveControl, Rev-Trac, etc.)
- Delivered to SLA committed cycle frequency & capacity attuned to test cycles and approach
- Outputs: Merged, compliant code in transport in target, transports and issues processing reports, change management integration

Why it matters:

- Solves the difficult challenge of S/4HANA ABAP dual-maintenance
- Enables continued business agility and innovation - *development restrictions, prolonged code freezes no longer necessary*
- Protects development teams and maintains strategic focus
- Program timeline, quality, and risk managed

Clean Core Assessment

Informed feasibility, design, approach, and planning for application modernization.

powered by
smartShift Intelligent Automation®

Clean Core Assessment

Clean-Core Analysis

What it delivers:

- Analysis to deeply understand existing code and mapping to future-state SAP architecture targets. Informs feasibility, design, approach optimization, and planning for application modernization
- Repository Analysis: classify and categorize objects, quantify technical bill of materials, and evaluate conversion complexity
- Target Analysis: identify business area, classical development pattern, and modern development pattern target(s)

Why it matters:

- Classical ABAP development is closely coupled to core SAP. It makes upgrades difficult, is hard to migrate, and does not support cloud
- Modern ABAP utilizes RESTful standards, is loosely coupled, is not a barrier to upgrades, and accommodates cloud and DevOps
- Moving from Classical ABAP to Modern ABAP unlocks business agility
- S/4HANA is optimized with modern SAP development standards and frameworks. Clean-Core Assessment prepares you for the future.

smartShift Overview - Global Customers

Recent S/4HANA Customer Success

Trusted solutions for the largest SAP customers in the world

- S/4HANA migration factory for 80+ system landscape
- Automation for S/4HANA, security, standardization, and performance
- Agile sprint methodology
- To date:
 - Over 60 projects completed
 - 10MM+ LoC, 100k+ objects remediated
 - Over 7MM EUR saved
 - MM of obsolete LoC safely decommissioned

JABIL

- ECC to S/4HANA
- 46K custom ABAP objects
- Dual Maintenance automated with smartShift Retrofit
 - Critical enabler of agile continuous development & test process

- Multi-wave ECC to S/4HANA rollout
- 42K custom ABAP objects/ 3.5MM lines of code
- Transformation and optimization
- Selective data/carve-out approach
- Automated Dual Maintenance with smartShift Retrofit ensuring continuous alignment ECC to S/4HANA

- Automation for 200k custom ABAP objects. Manual approach not feasible.
- 9 system consolidation to 3 templates + S/4HANA conversion
- Strategic development partner
 - Dual Maintenance
 - Clean-Core Modernization

smartShift Advantage

“smartShift works at industrial scale with virtually no errors. The defect rate is so low because they have automated everything and reduced the human touch as much as possible.”

Dilip Kumar

Global Supply Chain Platform Architect, Procter & Gamble
