

Lean Selective Data Transition

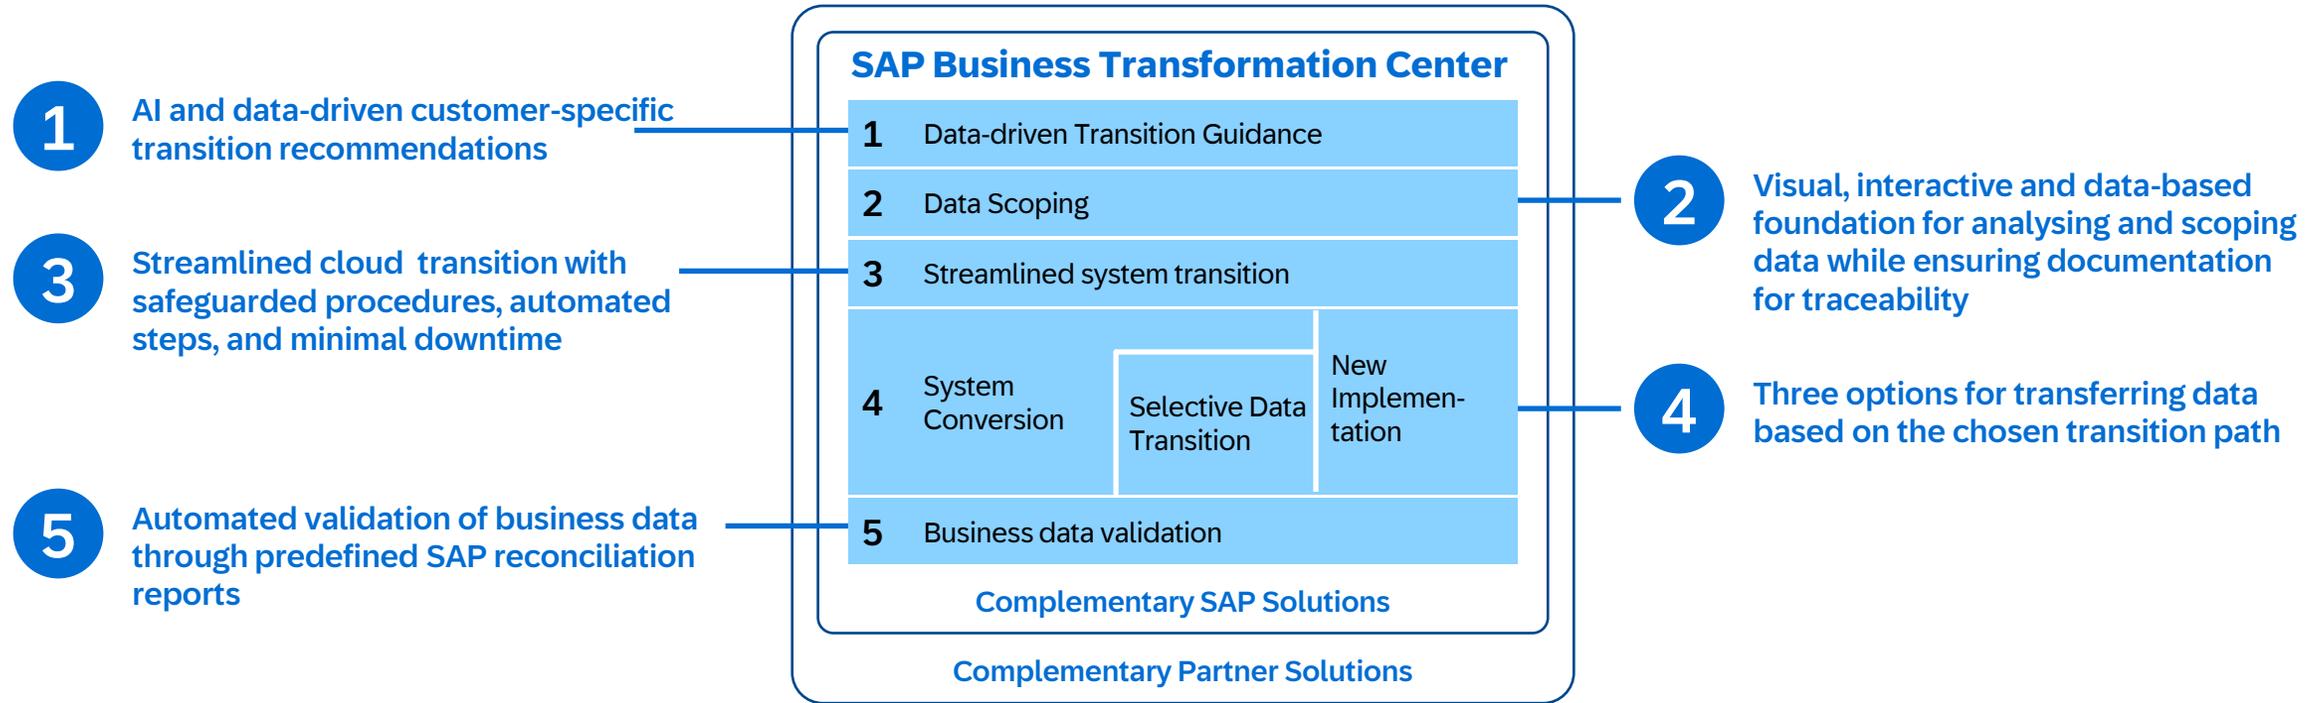

with the SAP Business Transformation Center

Thorsten Spihlmann, SAP SE
May 2025

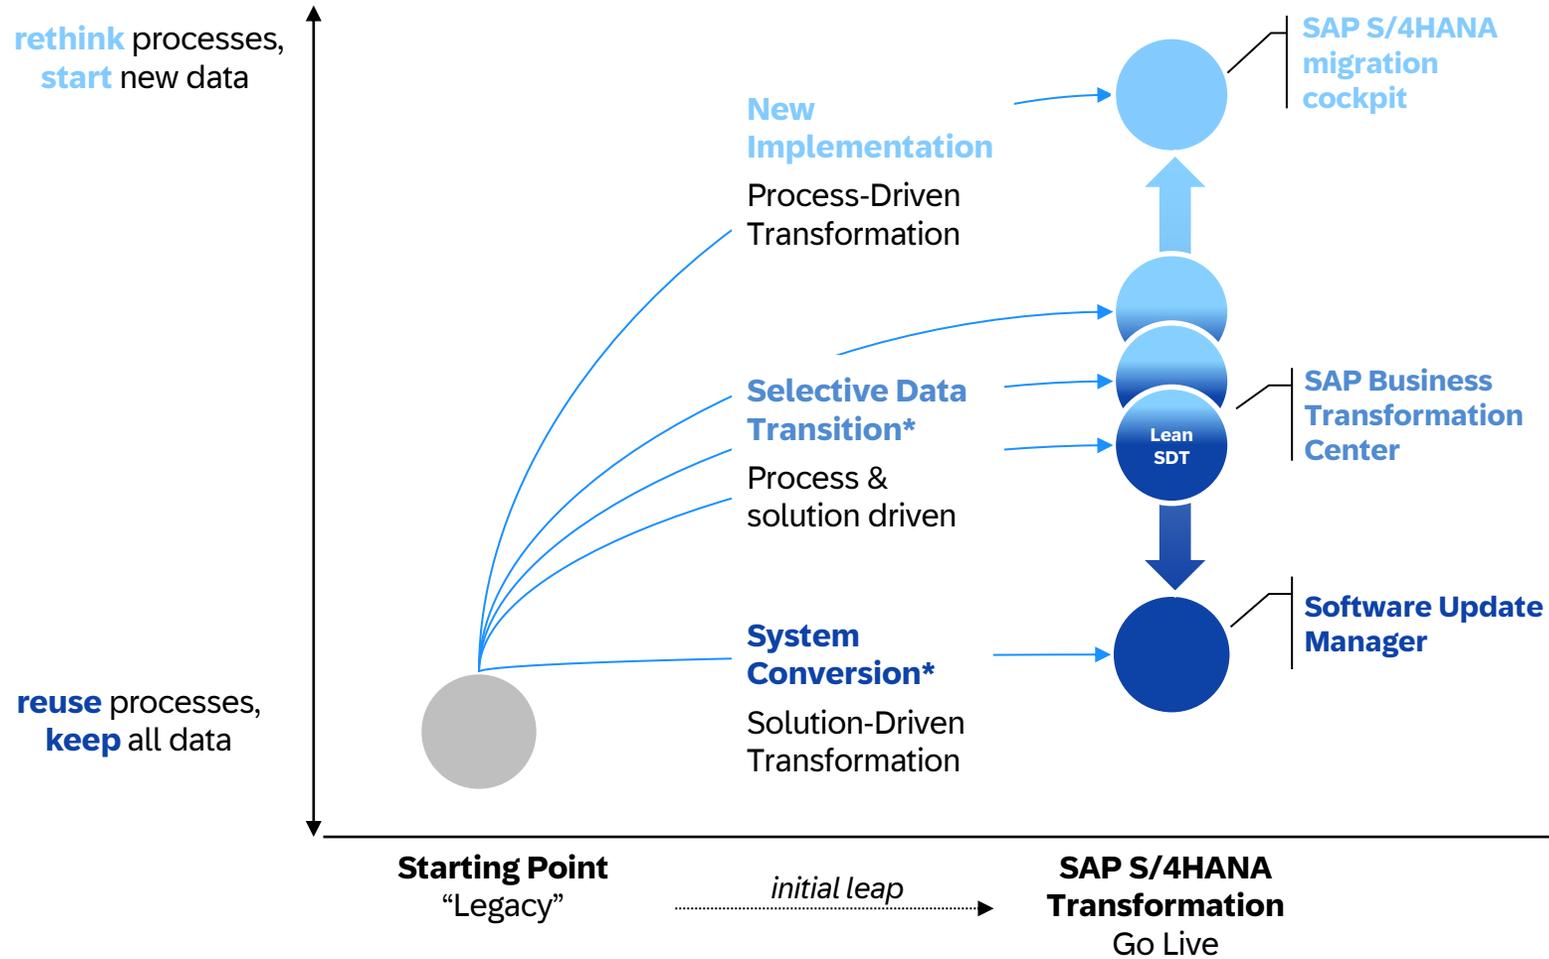

Accelerating the Cloud Transition with our SAP Transformation Portfolio

Unified Transition Methodology

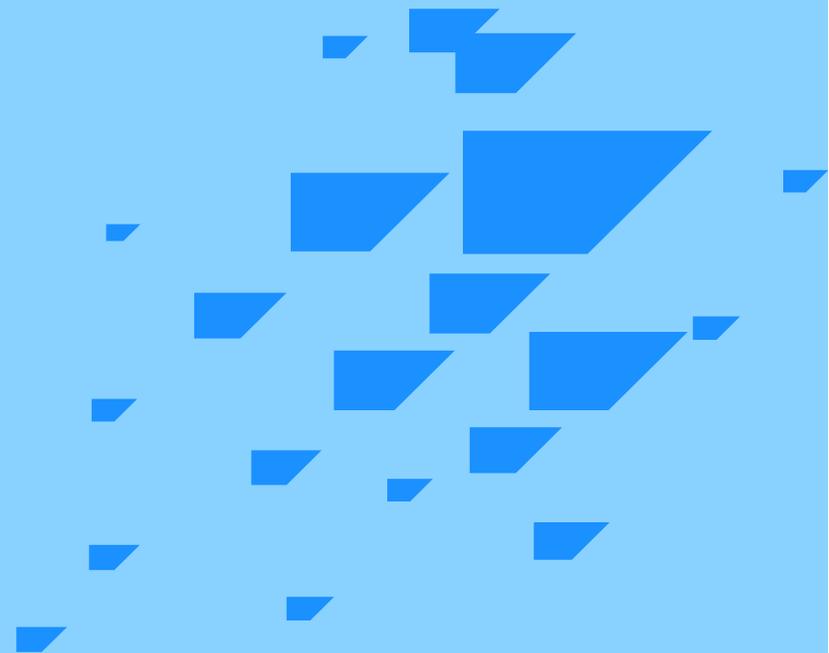

Unleash **Business Transformation** with a unified and guided transition methodology

Transition Paths to SAP S/4HANA

* restricted to SAP S/4HANA Cloud Private Edition and SAP S/4HANA

**“smart is the new
simple”**

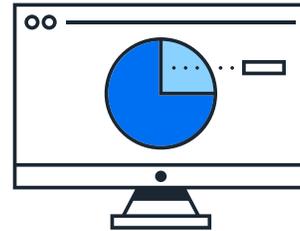

SAP Business Transformation Center | Lean Selective Data Transition

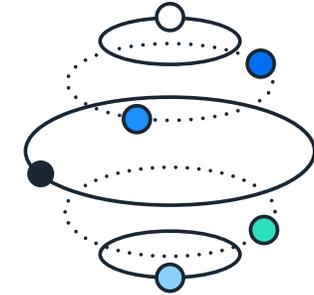

Speed up our customers' transition journey

01 Fast-Forward Your Transition
Reduce planning complexity and speed up migration and transformation projects

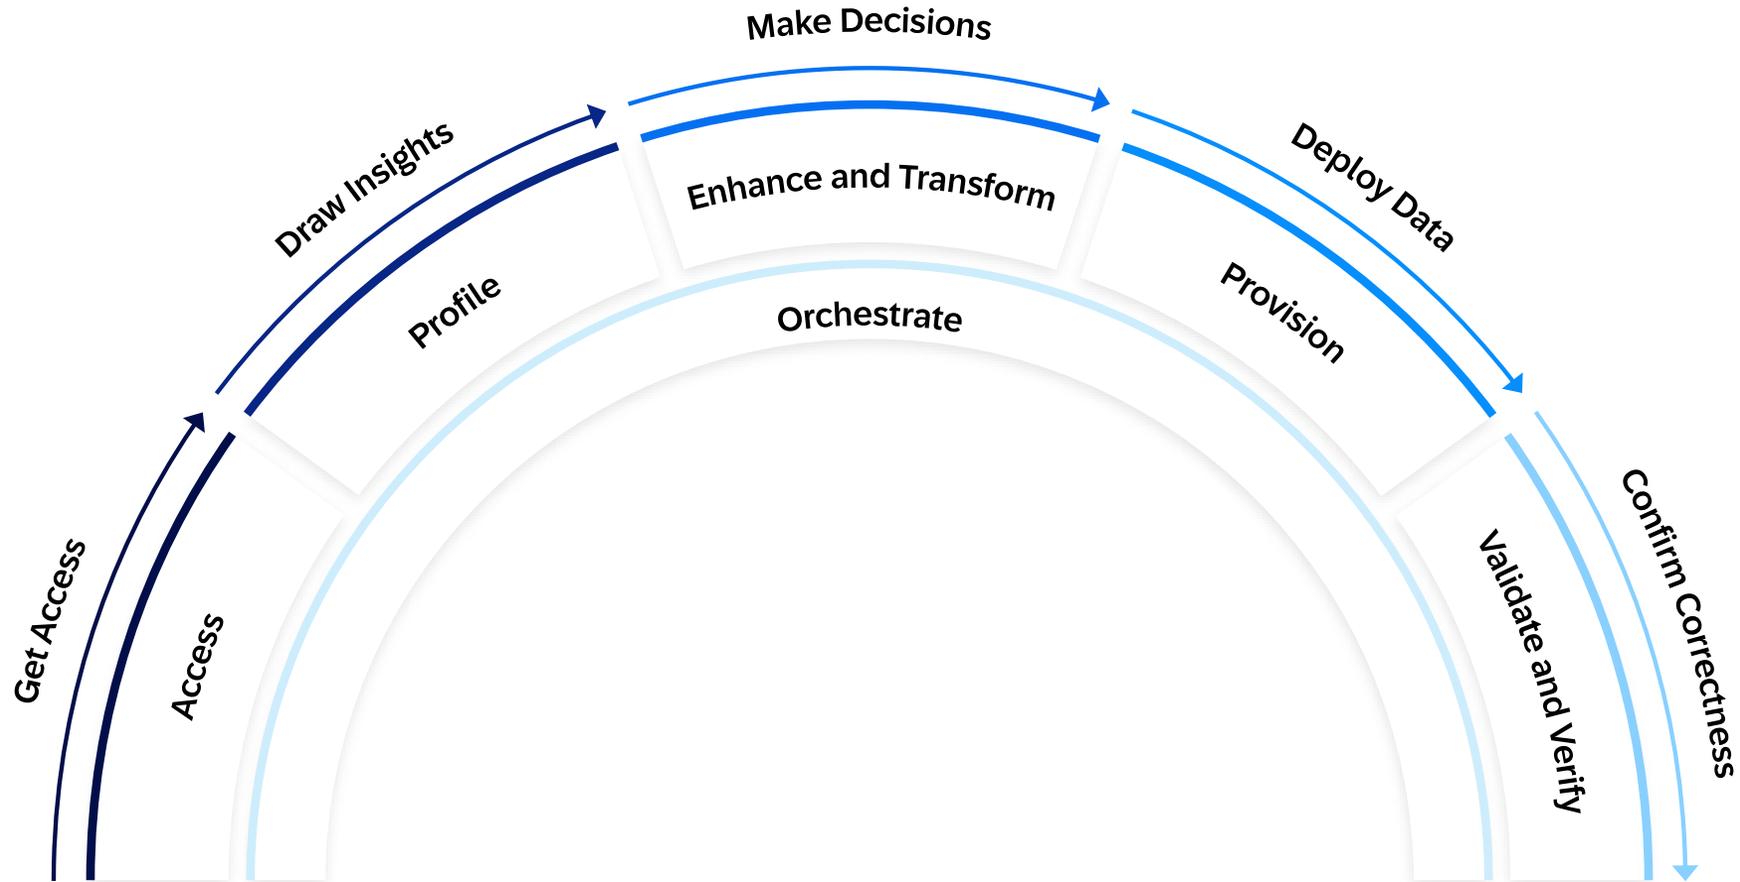

02 TCI reduction
Lower total cost of implementation and raise reliability through solution provisioning by SAP, included in SAP cloud service subscriptions, SAP Enterprise Support and RISE with SAP

03 Guided data migration and transformation
Simplify, accelerate and improve the customer experience with clear SAP guidance and recommendations

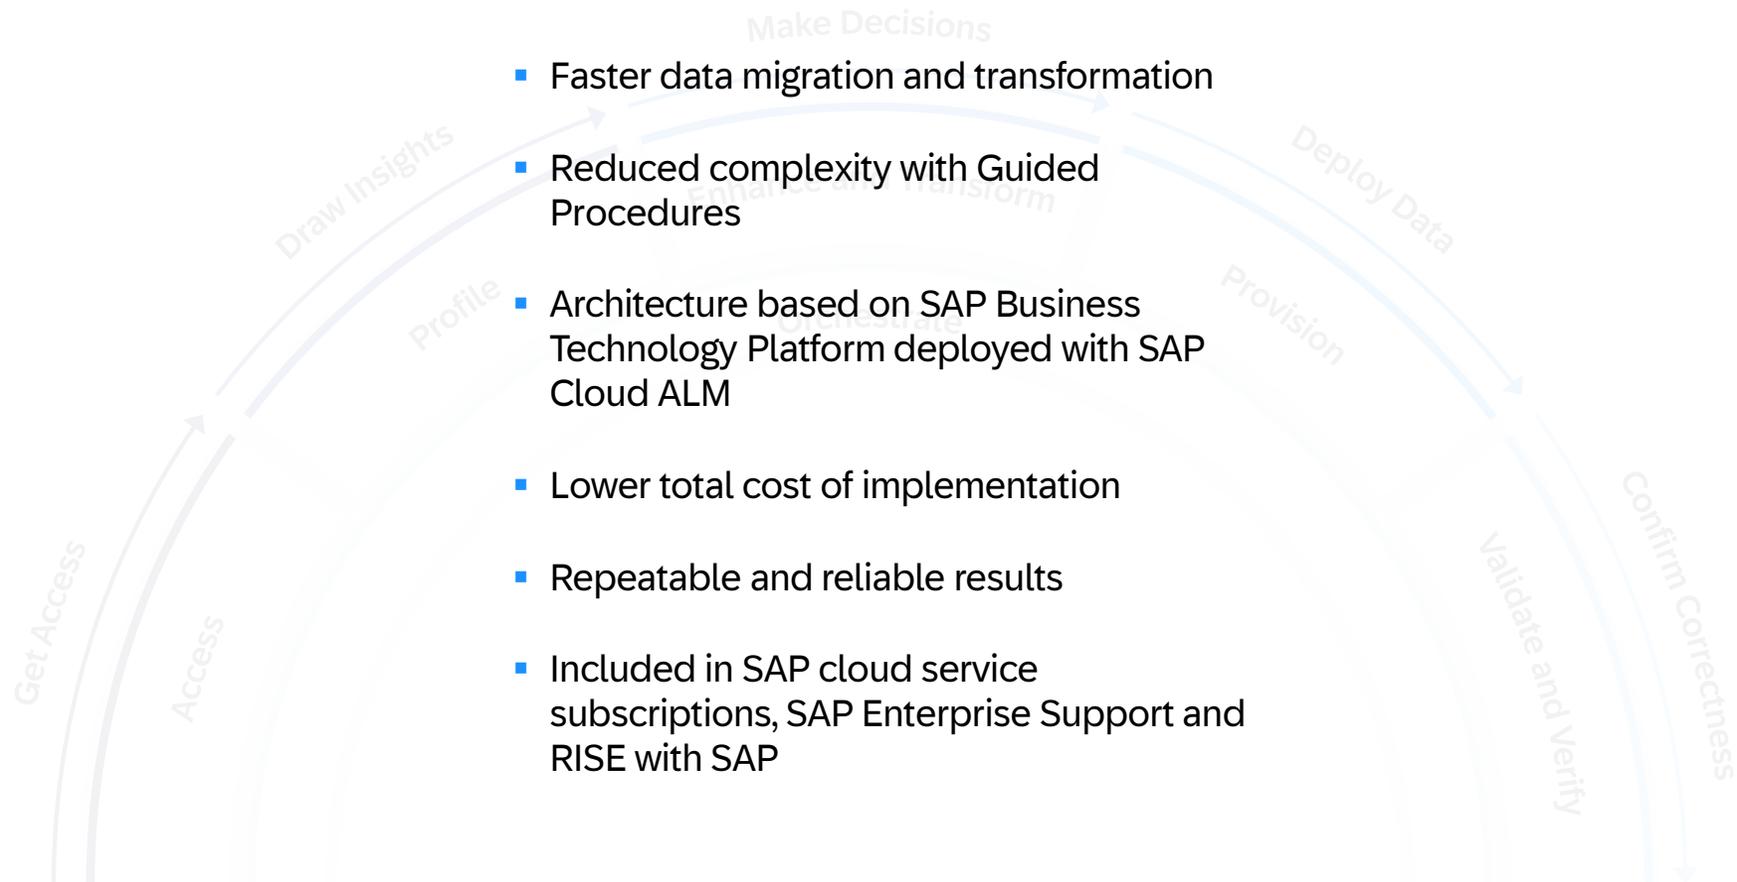

SAP Business Transformation Center | Lean Selective Data Transition

Managing an end-to-end guided process for data migration and transformation

SAP Business Transformation Center | Lean Selective Data Transition

Simplifying your journey from SAP ECC to SAP S/4HANA*

Scope and Availability

SAP Business Transformation Center is an SaaS cloud solution deployed with SAP Cloud ALM and included in SAP Service Cloud subscriptions and the SAP Enterprise Support agreement.

Lean selective data transition is an interactive end-to-end solution for use with SAP Business Transformation Center to capture the scope of data to transfer and execute your transition to SAP S/4HANA*.

Released in May 2024, you can expect continuous delivery of enhancements.

Objective

- Close the gap between new implementation and system conversion
- Reduce the amount of data to move across by selecting only relevant legacy data
- Start your new system with a clean core of data

Capabilities

With Lean Selective Data Transition, you can:

- Analyze the source system for structural anomalies
- Gain insights about used components and the data volumes behind them
- Get data-driven hints and recommendations to smooth the transition
- Define the data scope and create a blueprint for the transformation
- Leave behind unused company codes and obsolete business data with time slice
- Integration of SAP Cloud ALM project management and business data validation
- Use a single source of truth to transform the data you selected into SAP S/4HANA* and help ensure a seamless, reliable transition

Benefits

01 | **Unravel Complexity**
Reduce planning complexity and accelerate migration and transformation projects

02 | **Lower TCI**
Reduce total cost of implementation and gain higher reliability through solution provisioning by SAP

03 | **Guided data migration and transformation**
Rely on a streamlined experience guided by SAP support

SAP Business Transformation Center | Lean Selective Data Transition

Unlock Business Potential - Clean Foundation for Reduced TCO and Minimal Risks!

SAP **ECC**

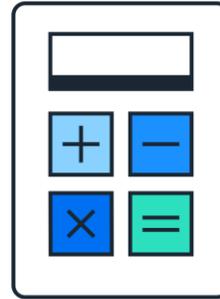

SAP **S/4HANA** Cloud Private Edition

SAP Business Transformation Center | Lean Selective Data Transition

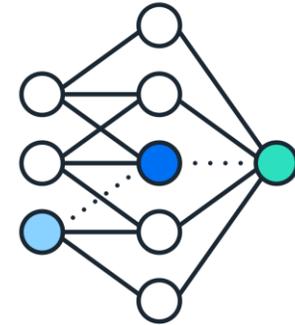

Unlocking value for our customers

01 Unlock Business Potential
Identify crucial business data to build a foundation for informed decisions, avoiding time wasted on irrelevant data cleanup.

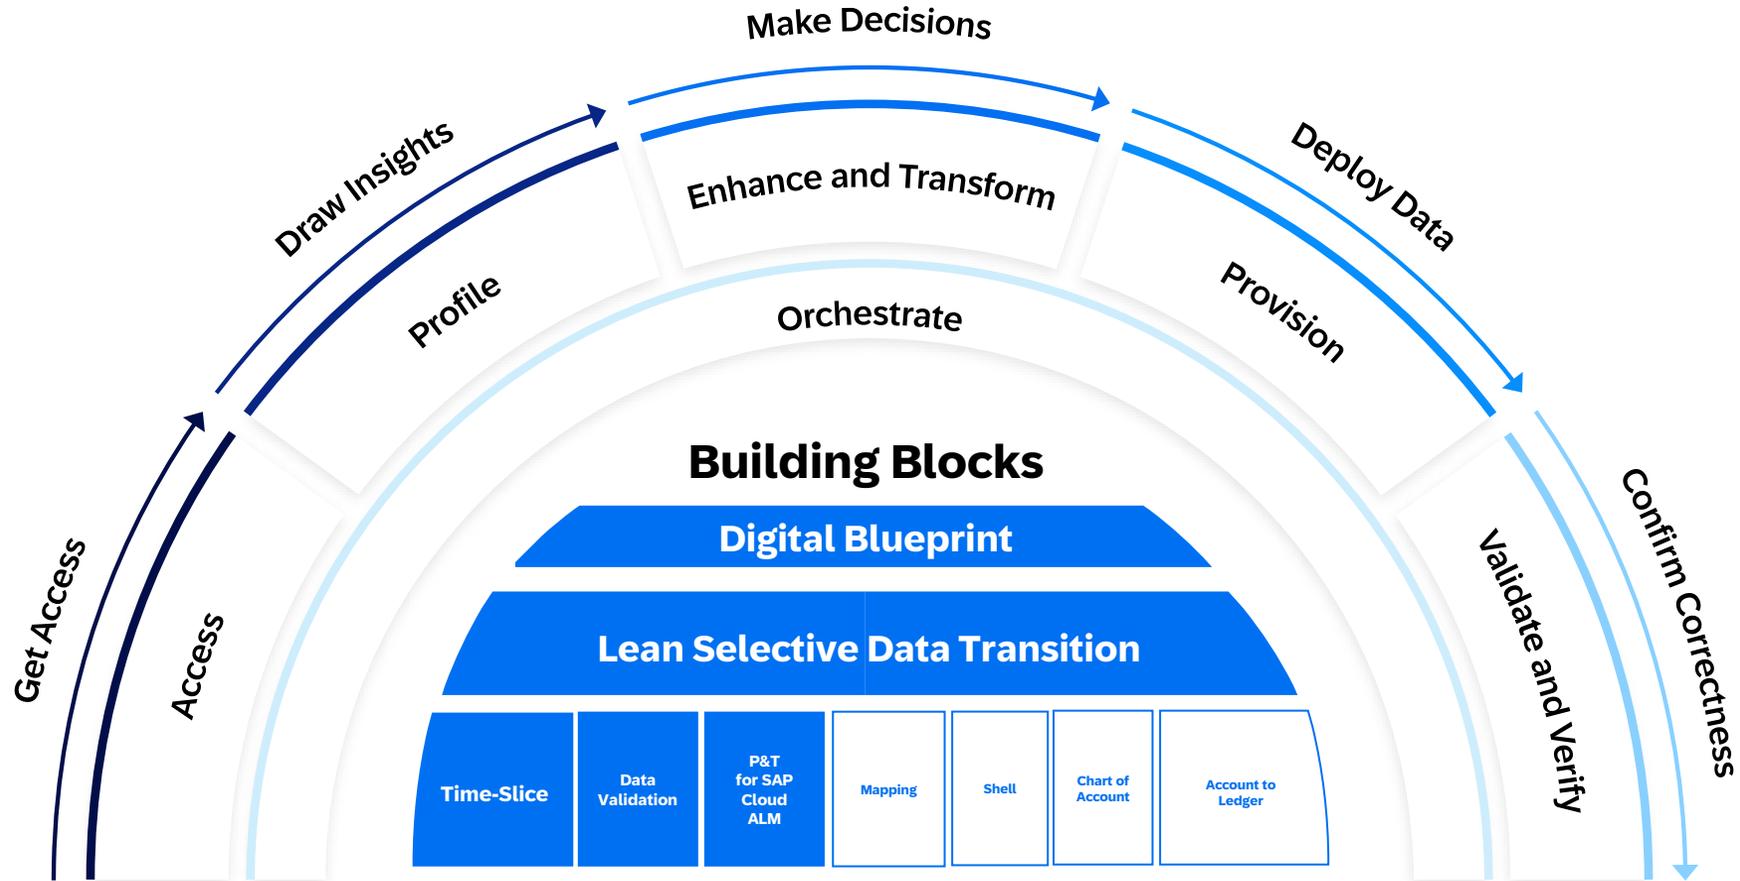

02 TCO reduction
Increase operational productivity and reduce costs: Minimize total cost of ownership by efficiently reducing memory extensions and simplifying future system upgrades

03 Clean foundation for Business AI
Ensure data is valid and relevant for AI to avoid unreliable or biased results in AI models.

SAP Business Transformation Center | Lean Selective Data Transition

Pioneering the next phase of evolution

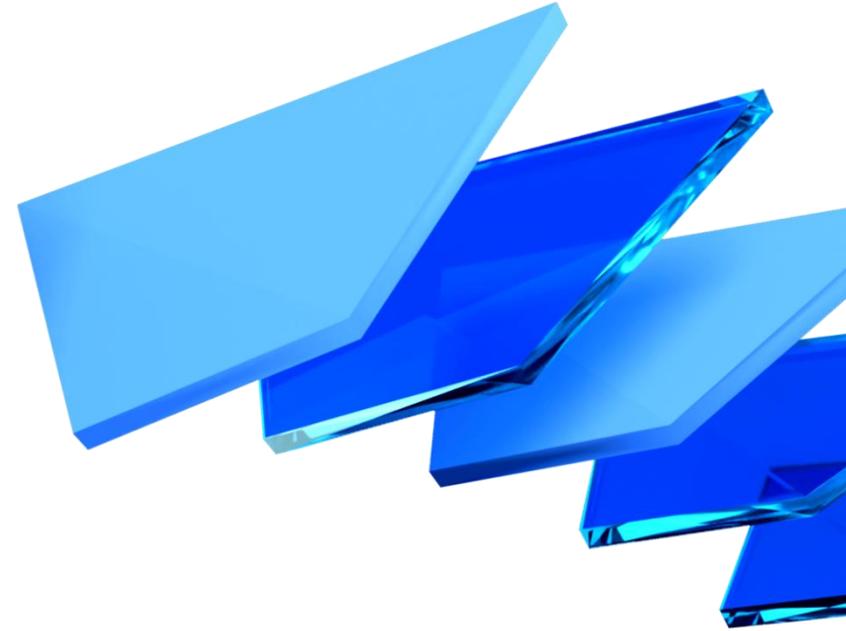

This is the current state of planning and may be changed by SAP at any time.

Public Roadmap

SAP Business Transformation Center | Lean Selective Data Transition

Key Takeaways

- Fast onboarding
- Jump-Start into blueprinting with quick decisions
- Automatic implementation (no-code)
- Immediate start of a test migration
- Guided and safeguarded execution
- Deployed with SAP Cloud ALM
- Part of your RISE with SAP contract

SAP Business Transformation Center | Lean Selective Data Transition

SAP Business Transformation Center | Lean Selective Data Transition

Shell-Driven Target System Build

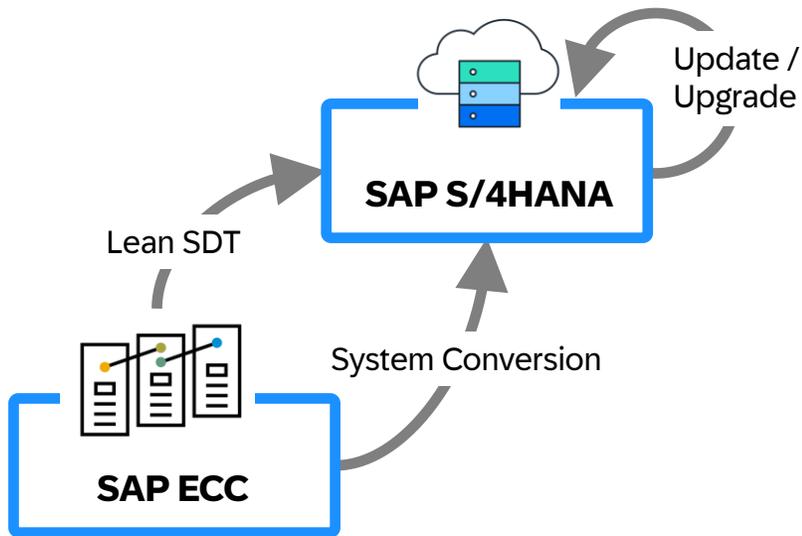

- Initial Target system based on ECC process implementation
- Shell copy service experienced as missing accelerator (consulting service or cumbersome work manual around)

- New Implementation: master data and open transactional data (SAP S/4HANA migration cockpit with API-based load)
- Selective Data Transition: master and all selected transactional data

Data Transition Validation | Overview

What is it about?

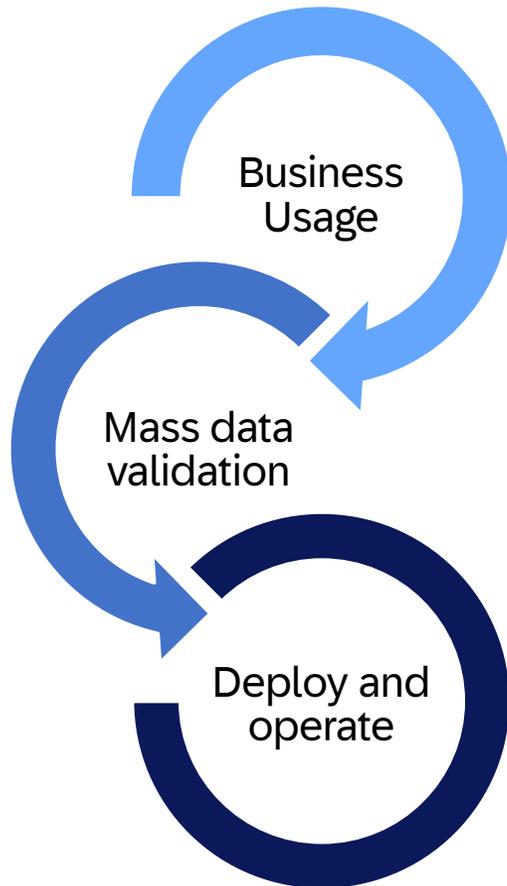

Data Transition Validation (DTV) is SAP's standard data comparison tool for transition scenarios

- allows data validation during a
 - **System Conversion** from SAP ECC to SAP S/4HANA
 - **Lean Selective Data Transition (SDT)** project with SAP Business Transformation Center
 - **Upgrade** to SAP S/4HANA 1709 (and higher)
- compares data *prior* and *post upgrade*, conversion or Selective Data Transition
- checks the quality of the migrated data and present the comparison results
- provides specific reports and transactions as pre-delivered content for validation
- tool is delivered as part of SAP BASIS software component (TCI-Note)

Data Transition Validation | Benefits

Why?

- **Usage - intuitive user interface**
 - allows business users to perform checks
 - validation on business level, not on technical level
 - avoids manual validation
- **Lever for mass business data validation**
 - reliable mechanism to validate huge amount of business data
 - execution on work item level for smaller and faster execution
 - pre-delivered content with SAP recommended tests
 - downtime reduction by eliminating manual spot check activities
- **Easy to deploy and operate**
 - no additional system required, DTV is executed in the respective system

Time & Effort
Saving

“All for One Group uses the SAP Business Transformation Center solution to provide companies with a simple and cost-effective way to selectively migrate to SAP S/4HANA. With this innovative approach, individual transformations can be designed efficiently and precisely, allowing companies to align their existing processes with the benefits of the latest SAP technology.”

Peter Engelage, Vice President ERP Privat Cloud Germany, All for One Group

Business Transformation Center part of Enterprise Support

“**SAP Business Transformation Center** significantly simplifies data migration and transformation, while offering customers and partners an **easy-to-use, guided user experience**. Combined with Kyndryl's deep expertise in data migration and application modernization services, together we enable and accelerate our customers' transformation into intelligent enterprises by setting up **cost-effective, reliable, and operationally sustainable processes** based on their unique needs.”

Michael Bradshaw, CIO, Kyndryl

“In an environment where digital development is of paramount importance, **SAP Business Transformation Center**, a cloud-based solution, enables companies to gain a detailed insight into the data of their SAP systems. The **digital blueprint**, the first feature of the solution, has simplified the often complicated journey from raw data to data insights. It is **very easy to run** and delivers results that can be quickly understood by both IT and business people. The blueprint analysis has helped our customers **easily discuss and determine the data scope** for their transition from SAP ECC to SAP S/4HANA.

With this offering and the **upcoming migration capabilities**, the SAP Business Transformation Center offers an **optimal complement to a standard system conversion** for customers who **do not want to retain all data** when migrating to SAP S/4HANA.”

Benjamin Krischer

Member of the Executive Board | Global Head of Landscape Transformation
cbs Corporate Business Solutions Unternehmensberatung GmbH

“**The SAP Business Transformation Center solution** greatly streamlines our process of migrating and transforming data, providing customers with a **user-friendly** and **guided** experience. In conjunction with a decades-long, unique partnership, it significantly speeds up BMW Group’s transformation into an intelligent enterprise by applying **sustainable** and **efficient** solutions and methodologies.”
