Product Compliance

Manage Challenges Through Digitalization

Large number of requirements

Digitalization manages compliance requirements and structures compliance work.

Frequent regulatory changes

Digitalization automatically alerts users and updates information, classifications, and documents.

Individualized products

Digitalization automates processes such as the classification and assessment of each product.

Stakeholder demands

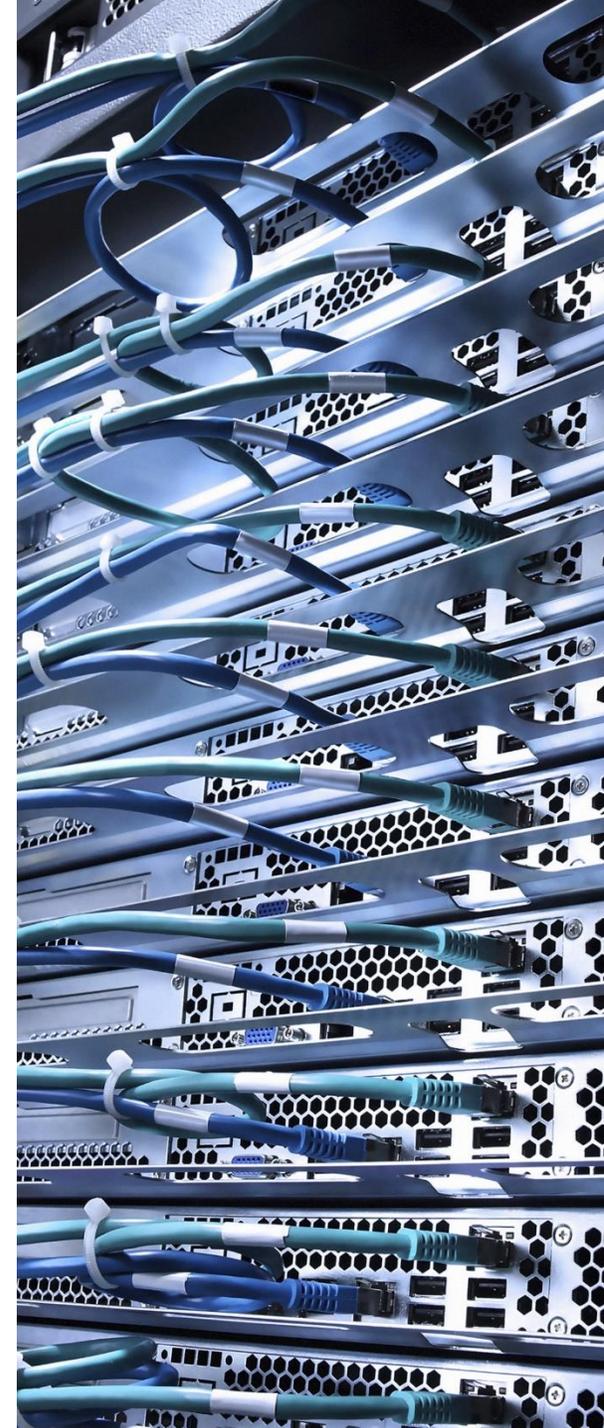

Digitalization makes information accessible and automates document creation and distribution.

Resource constraints

Digitalization automates compliance processes and embeds controls throughout the product lifecycle.

Complex supply chains

Digitalization streamlines information collection and communication along the supply chain.

SAP S/4HANA for Product Compliance

Solution Capabilities

Manage Global Product Safety and Compliance Throughout the Product Lifecycle

Product Marketability and Component Compliance

Make sure products and components comply with legal and stakeholder requirements to protect the right to market products and safeguard revenue.

Compliance Document Management

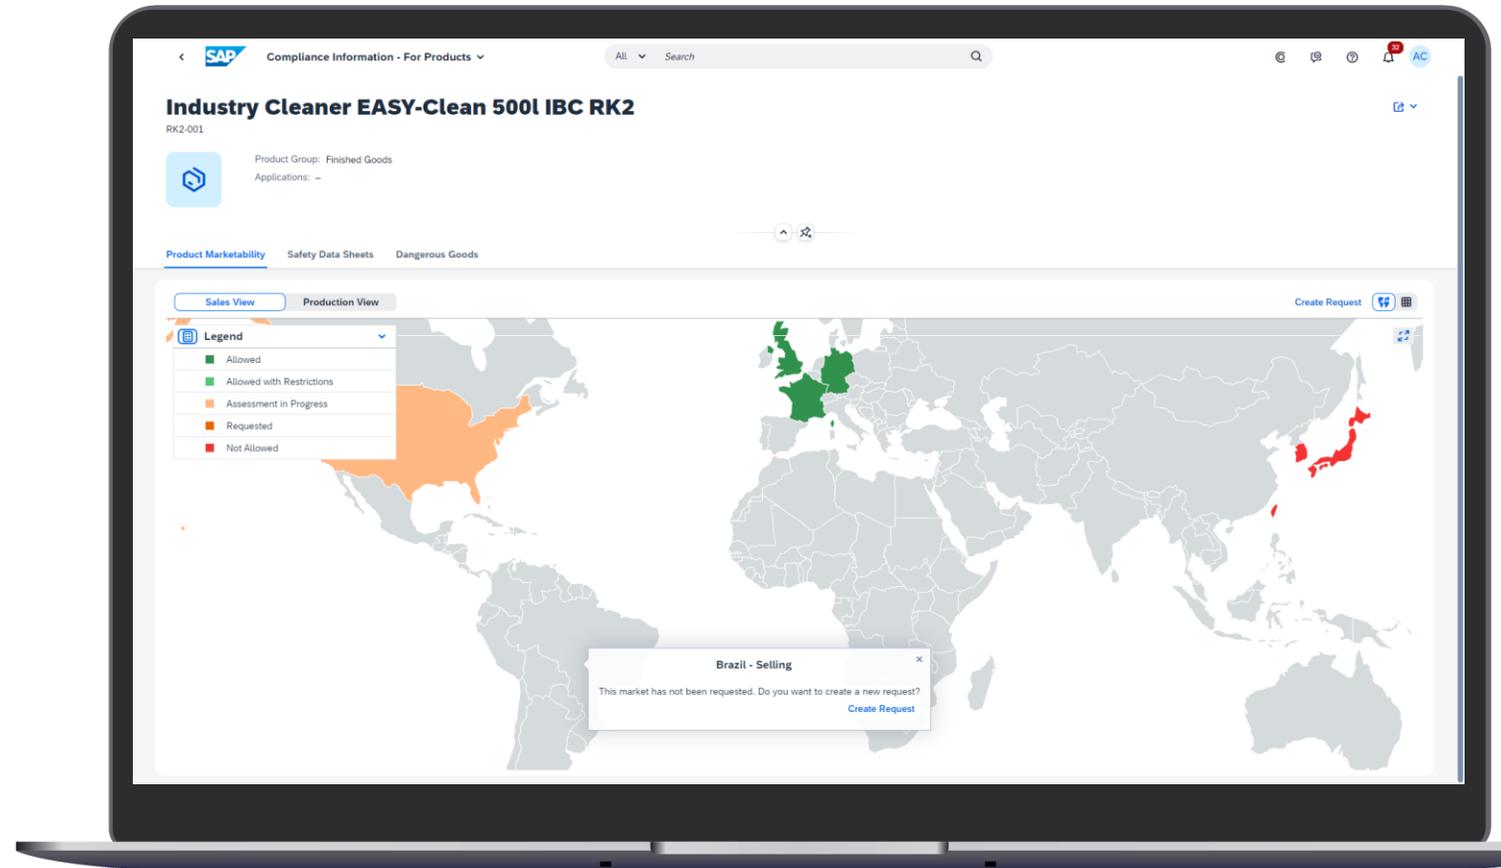

Provide compliant hazard communication, e.g. with safety data sheets and labels, to accelerate product introduction.

Dangerous Goods Management

Enable safe and compliant transportation of hazardous materials to protect brand value and avoid delivery delays.

Protect revenue and brand with embedded product and component compliance

- Central management of compliance data, requirements, and certificates
- Automatic triggering of compliance assessments
- Embedded regulatory content
- Automated compliance assessment
- Substance volume tracking
- Integrated marketability checks
- Compliance monitoring and analytics

Accelerate product introduction with compliant documents such as safety data sheets & labels

- Central management of safety data sheet and label* data and requirements
- Safety data sheet generation*
- Safety data sheet management per product and country
- Integrated safety data sheet checks
- Label printing via partner solutions*
- Automatic distribution of safety data sheets integrated in delivery processing
- Automatic redistribution of updated versions fulfilling legal requirements
- Monitoring of safety data sheet availability and shipments

* = planned

The screenshot displays the SAP Standard interface for monitoring shipments of Safety Data Sheets. The table lists various products, their shipment statuses, origins, and dates. The interface includes search filters for shipment status, origin, requested, shipped, and created dates. The table has columns for Product Name on SDS, Product, Shipment Status, Origin of SDS Shipment, Country/Region, Requested, and Shipped. Each row includes a 'Sender Details' section with information about the sender, recipient, and customer.

Product Name on SDS	Product	Shipment Status	Origin of SDS Shipment	Country/Region	Requested	Shipped
WHO hygienic handrub (OP22-04FG01 5l) Sender Details: 1 SDS Recipient: Barbara Meger Customer: Inlandskunde DE 1	OP22-04FG01	SDS Shipped	Subsequent Shipment	Germany	19.12.2022	19.12.2022
OP22-01 FG001 DG 40l Sender Details: 1 SDS Recipient: Barbara Meger Customer: Inlandskunde DE 1	OP22-01_FG001	SDS Shipped	Subsequent Shipment	Germany	19.12.2022	19.12.2022
OP22-01 FG001 DG 40l Sender Details: 1 SDS Recipient: Barbara Meger Customer: Inlandskunde DE 1	OP22-01_FG001	SDS Shipped	Subsequent Shipment	Germany	19.12.2022	19.12.2022
WHO hygienic handrub (OP22-06FG01 5l) Sender Details: 1 SDS Recipient: Barbara Meger Customer: Inlandskunde DE 1	OP22-06FG01_5L	SDS Shipped	Delivery	Germany	12.12.2022	12.12.2022
OP22-01 FG001 DG 40l Sender Details: 1 SDS Recipient: Barbara Meger Customer: Inlandskunde DE 1	OP22-01_FG001	SDS Shipped	Delivery	Germany	12.12.2022	12.12.2022

WHO hygienic handrub (OP22-03FG01 5l)	OP22-03FG01	SDS Shipped	Delivery	Germany	06.12.2022	06.12.2022

Enable safe and compliant transportation of dangerous goods

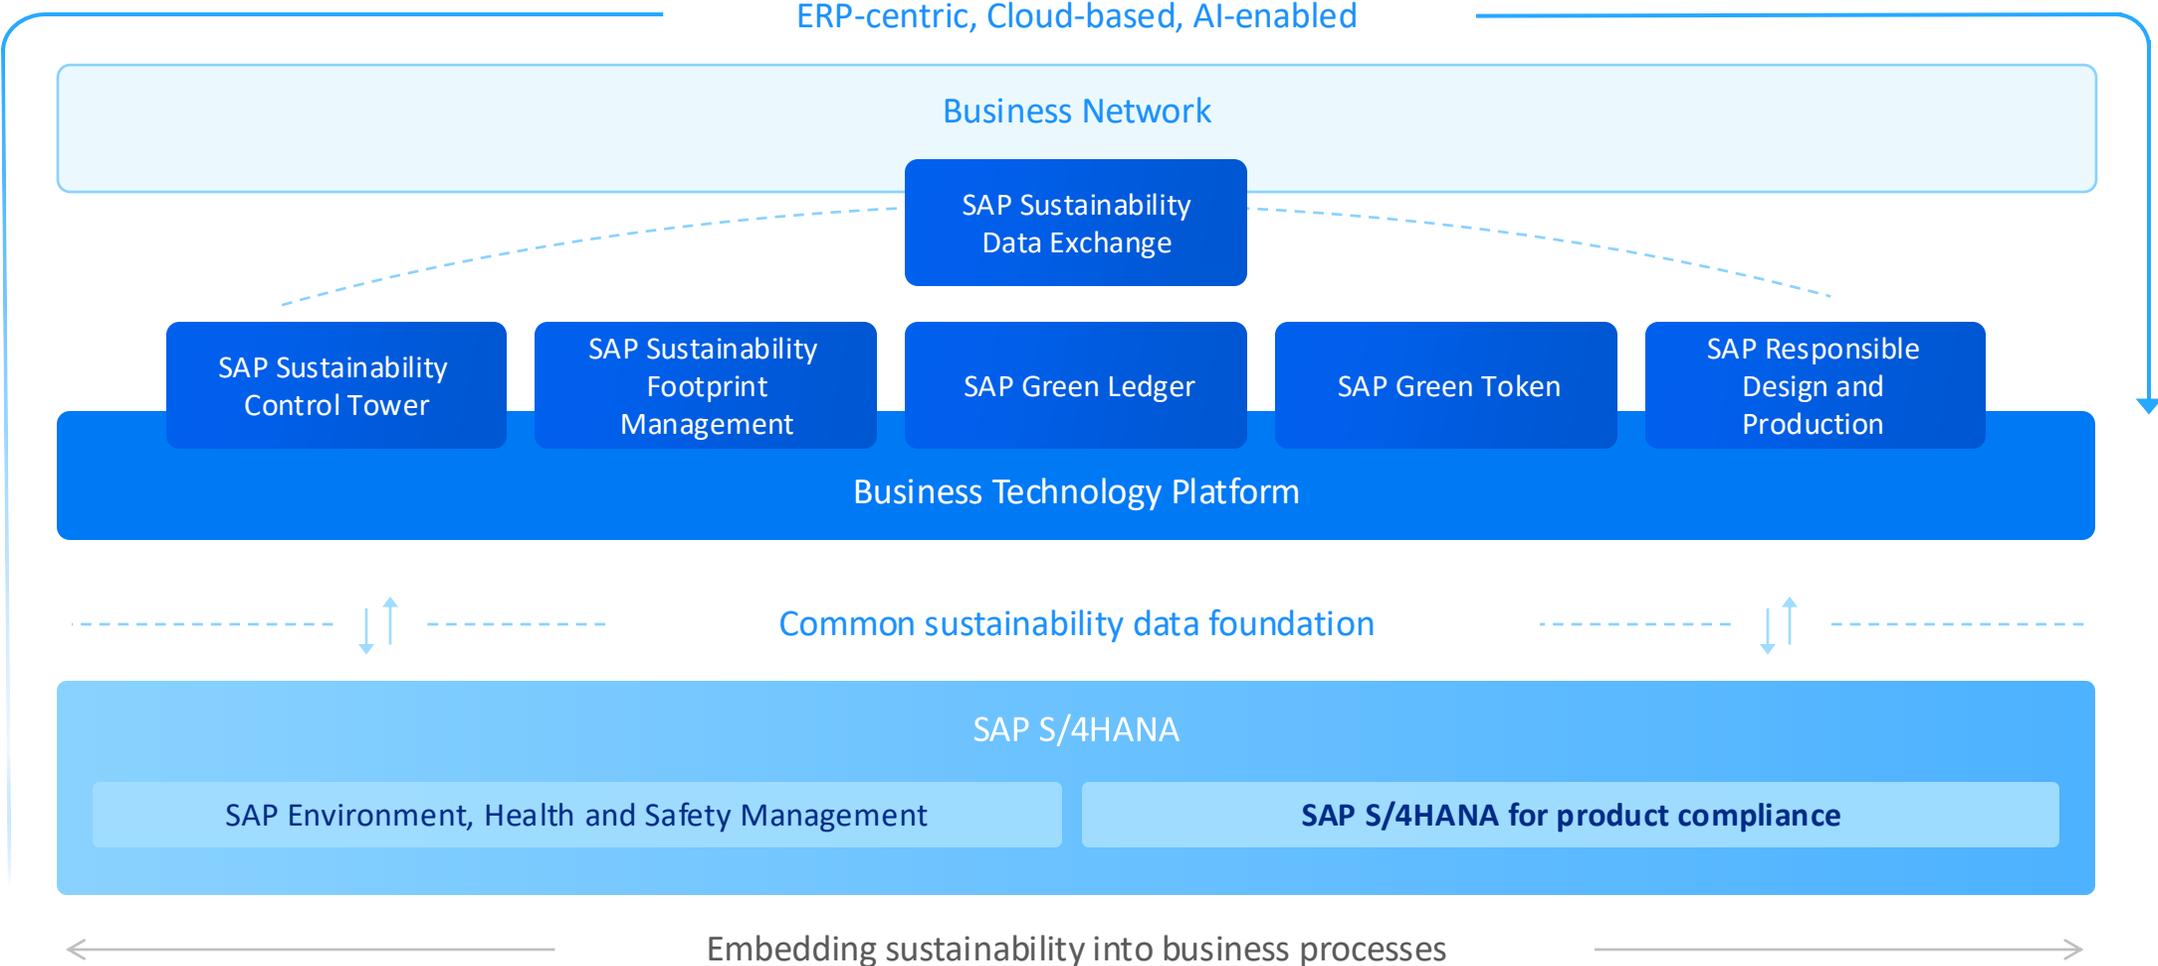

- Central management of dangerous goods requirements
- Dangerous goods classification for unpackaged and packaged products
- Embedded regulatory content
- Integrated dangerous goods checks
- Output of dangerous goods information on logistic documents
- Creation of specific dangerous goods documents
- Analytics

The screenshot displays the SAP interface for classifying a packaged dangerous good. The product is 'Varnish Remover lemon (drum 20l)'. The interface shows a table of regulations with columns for Regulation, Enclosure Variant, Transport Perm..., Description for Documents, Marking Text Description, Labels on Package, and Placards on Con... The table lists several regulations, including ADN 2021, ADR 2021, CFR 49 as of May 11th 2020, IATA-DGR 2022, IMDG Code 2020, NOM-002-SCT/2011, and RID 2021. Each row provides details on the enclosure variant, transport permission, and the corresponding marking text and labels.

Regulation	Enclosure Variant	Transport Perm...	Description for Documents	Marking Text Description	Labels on Package	Placards on Con...
<input type="checkbox"/> ADN 2021 Display Basic Classification	Packaging (P)	Allowed	UN 1993 FLAMMABLE LIQUID, N.O.S. (ethanol, isobutyl alcohol, propylene glycol), 3, II 1 Drum x 20 l	UN 1993 FLAMMABLE LIQUID, N.O.S. (ethanol, isobutyl alcohol, propylene glycol)		
<input type="checkbox"/> ADR 2021 Display Basic Classification	Packaging (P)	Allowed	UN 1993 FLAMMABLE LIQUID, N.O.S. (ethanol, isobutyl alcohol, propylene glycol), 3, II, (D/E) 1 Drum x 20 l	UN 1993 FLAMMABLE LIQUID, N.O.S. (ethanol, isobutyl alcohol, propylene glycol)

SAP Sustainability Solutions | Portfolio

Modular suite of SaaS solutions

SAP S/4HANA for Product Compliance – Benefits

Increase revenue

with real-time decision support before entering new markets

Accelerate product introduction

with streamlined product development and automated compliance assessments

Protect the brand and mitigate risks

with process integration, up-to-date information, and controls throughout the product lifecycle

Reduce compliance costs

by streamlining compliance processes with user experience, analytics, automation, and embedded content

Enable on-time delivery

with up-to-date compliance documents and safe transportation of dangerous goods

Increase visibility into compliance

with analytics, enabling quick responses to compliance inquiries

SAP S/4HANA for Product Compliance – Strategy

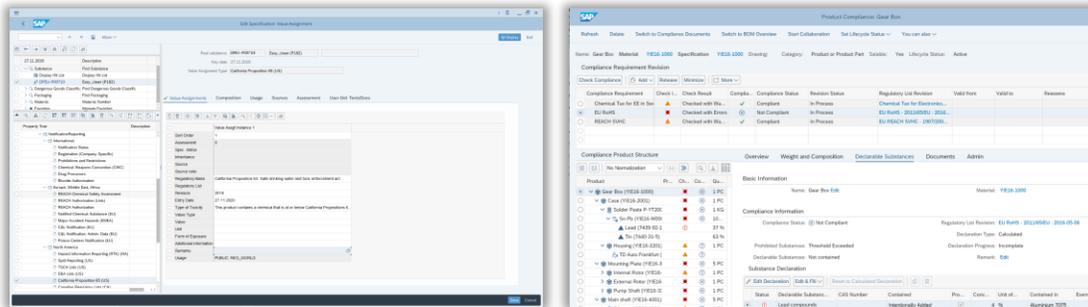

Complete **renewal** of the product compliance solution in SAP S/4HANA

- Streamline processes with **automated** compliance assessment
- Stay up-to-date with **embedded regulatory content**
- Mitigate risk with controls **integrated into end-to-end business processes** in the SAP Business Suite
- Increase efficiency with SAP Fiori based **user guidance** and **AI**
- Make compliance information easily accessible with **SAP HANA-based analytics**
- Choose your deployment favorite with the solution being available in the on-premise and private and public cloud editions of SAP S/4HANA

SAP S/4HANA for Product Compliance – 2 Sets of Capabilities in Private Cloud

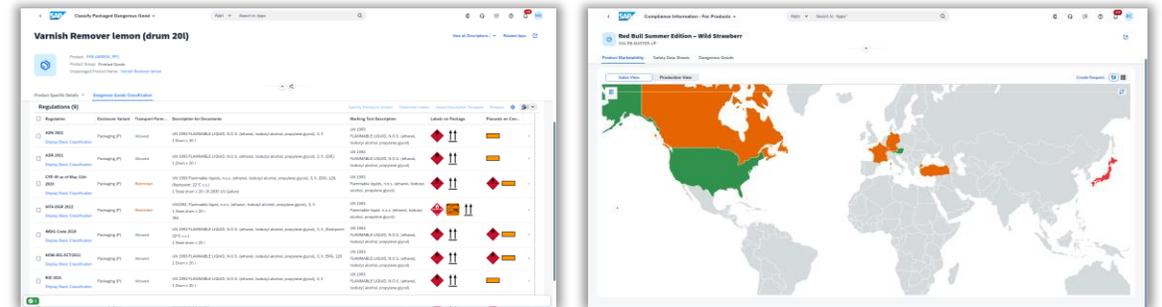

Existing (classic) capabilities*

- All features of the SAP ERP based product safety and product compliance solutions
- SAP GUI and Web Dynpro transactions
- Specification database, workbench approach
- Full scope, no functional enhancements

New capabilities

- New process model, SAP Fiori apps
- New data model, CDS-based
- New integration into product master, sales, delivery, procurement, transportation
- No full scope yet, innovation roadmap

Today customers have the choice. Once new capabilities support full scope and 3 – 4 years of additional transition period, existing classic capabilities will no longer be supported**.

* = Available only in on-premise and private cloud editions

** = Currently planned for the 2031 release

Feature Highlights CE2508/OP2025

SAP S/4HANA Cloud for product compliance 2508

Dangerous Goods Management: Mixed Loading Check Integration in Outbound Delivery and Transportation Management

With this feature, the mixed loading check is carried out in outbound deliveries and transportation management.

- Improved compliance with DG regulations IMDG and CFR49
- Checks occur when users save the outbound deliveries, freight units, freight orders and freight bookings
- Incompatibilities detected automatically initiate warning messages and set status to transport restricted

The screenshot shows the 'Analyze Delivery Logs' interface for delivery 59356. The top section displays the delivery number 59356 and its date (03.06.2025). Below this, there are fields for 'Volume: 340,000 L', 'Gross Weight: 340,000 KG', 'Warehouse: -', 'Shipping Point: Shipping Point 1010 (1010)', and 'Created By: Marianne Sigmund (CB9980002116)'. The main area is divided into 'Messages (9)' and 'Deliveries (1)'. The 'Messages' table lists various messages with columns for Document, Item, Message Type, Message Text, and Long Text A... The messages include information, errors, and warnings related to packing instructions, heat sources, and product compliance checks. The 'Deliveries' table shows a single delivery with columns for Delivery, Overall Status (Open), Ship-to Party (Inlandskunde DE 2 (10100002)), and Supplier.

The screenshot shows the 'Edit T42 Ocean Booking - D2D Door to Door 6200001202' interface. The top navigation bar includes options like 'Edit', 'Refresh', 'Copy', 'Other Copy Options', 'Schedule', 'Follow Up', 'Check', 'Subcontracting', 'Create Service Order', 'Fixing', 'Set Status', 'Load/Unload Plan Status (Stop)', 'Execution Status', 'Charges/Settlement', 'Cancel Document', and 'Display Settings'. The main area is divided into 'General Data', 'Business Partner', 'Items', 'Document Flow', 'Execution', 'Notes', 'Subcontracting', 'Attachments', 'Statuses', 'Blocking Information', 'Carrier Ranking', 'Charges', 'Output Management', 'Communication History', and 'Administrative Data'. The 'Items' table lists various items with columns for Item Hierarchy, Quantity, Unit of Measure, Gross Weight, Gross Volume, Product, Source Location, Loading Location, Destination Location, Unloading Location, FU or TU, Item Description, and Dangerous Goods Status (Description). The items include 'Ocean Freight Booking 6200001202', 'Container 1000020', 'TM42 FU Type 0 4100003664', and 'Product 20 PC8 Peroxide - 25L'. A pop-up window at the bottom shows a list of messages with columns for Message Type, Message Text, and a right arrow. The messages include errors and warnings related to CFR 49 and IMDG Code 2022.

SAP S/4HANA Cloud for product compliance 2508

Dangerous Goods Management: Classify Dangerous Goods packaged in Logistics Packing Instructions

With this feature you can classify dangerous goods which are packaged based on logistics packing instructions.

- Help ensure compliance with dangerous goods regulations
- New app “Classify Dangerous Goods in Packing Instructions”
- New app “Dangerous Good – Classification Details”
- New section in app “Dangerous Goods Information”

P69-PI: Acetone in 25L Steel Drum

P69-AC-UP-1A1-25L

Packing Instruction: P69-PI: Acetone in 25L Steel Drum (P69-AC-UP-1A1-25L)
Load Carrier: PSS-Packaging - 25L Steel Drum - 1A1 (PSS-DRM-1A1-25L)
Product in Product Master: P69 Acetone (P69-AC-UP)
Compliance View - Unpackaged: P69-AC-UP (1486)

Product Specific Details | **Dangerous Goods Classification**

SAP S/4HANA Cloud for product compliance 2508

Product Marketability / Dangerous Goods Management: Battery Attributes

With this feature, store the attributes for lithium metal, lithium ion and sodium ion batteries as basis for the dangerous goods classification

Value proposition

- Help ensure compliance with dangerous goods regulations for batteries

Capabilities

- New compliance requirement for battery attributes

The screenshot displays the SAP S/4HANA Cloud interface for managing regulatory data. The main heading is "World Dangerous Goods Battery Attributes" with the identifier "(P69-LITION-UP)". The interface includes an "Edit" button, a "Release" button, and a share icon. Below the heading, there is a compliance view: "Compliance View: P69-Lithium Ion Accu 48V 18Wh (P69-LIION-UP)". The "Applications" field is empty, and the "Processor" is listed as "Marianne Sigmund". A light blue banner indicates "In-progress version: Not used in checks." Below this, there are navigation arrows and a star icon. The "Assessments" and "Notes" tabs are visible. The main content area is titled "Battery Attributes (1)" and contains a table with the following data:

Battery Type	Battery Construction	Number of cells
Lithium ion batteries	Battery	-
Capacity: -		
Nominal Voltage: 48 V		
Nominal Energy: 18 Wh		
Lithium Content: 10 g		
Sodium Content: -		
State of Charge in % (SoC): -		
Exceeding 30% State of Charge: no		

SAP S/4HANA Cloud for product compliance 2508

Safety Data Sheet Management: Support of Branded Products in SDS Process

With this feature, foundational support for branded products in the safety data sheet (SDS) process is enabled.

Value proposition

- Ensure compliance and efficiently managing product information across multiple regions and languages
- Ability to utilize your brand in SDS generation

Capabilities

- Create and manage branded products
- Edit compliance information e.g. names, applications
- Enabled SDS shipment using brand name

The screenshot displays the SAP S/4HANA Cloud interface for managing compliance views. The main header shows 'Manage Compliance Views' with a search bar. The product 'P55 Easy Clean' (12559144) is highlighted, with a responsible unit of 'Permitted for all Responsible Units (S)'. A compliance view icon is shown, along with details for 'P55 Easy Clean (12559144)' and 'P55 Cleaning Mix (12559129)'. Below this, there are two sections: 'Branded Product Names (3)' and 'Related Compliance Views - Packaged Product (2)'. The 'Branded Product Names' table lists names in English (EN), German (DE), and English (EN) for the USA region. The 'Related Compliance Views' table lists views for 1L and 5L packaging sizes.

Language	Country / Region	Branded Product Name
English (EN)		Easy Clean ®
German (DE)		Einfach Rein
English (EN)	USA	Easy Clean ™

Compliance View	Product in Product Master
<input type="checkbox"/> P55 EASY CLEAN 1L (12559130)	P55 Easy Clean 1l (P55 EASY CLEAN 1L)
<input type="checkbox"/> P55_EASY_CLEAN_5L (12559115)	P55 Easy Clean 5l (P55_EASY_CLEAN_5L)

SAP S/4HANA Cloud for product compliance 2508

Safety Data Sheet Management: EU SDS Generation Functionality

With this feature, EU safety data sheet (SDS) generation covering sections 1-16, is provided.

- Integrated SDS generation with product compliance solution
- For selected scenarios and product groups
- Utilizing embedded GHS regulatory content
- Starter template following EU guideline is provided
- Customize template with Adobe Document Services
- Preview generated SDS

The screenshot displays the SAP S/4HANA Cloud interface for Safety Data Sheet Assessment. The top navigation bar shows 'SAP S/4HANA Cloud' and 'Safety Data Sheet Assessment'. The main content area is titled 'DE Safety Data Sheet (Jun 2020)' and 'Draft'. Below this, there is a 'Generate' button and a 'Copy D' button. The product information includes 'P55 Cleaning Mix (000000000872)', 'Compliance View: P55 Cleaning Mix (872)', 'Countries/Regions: Germany', 'Legal Area: European Union, (World)', 'Content Revision Date: -', and 'Processor: (No Processor)'. A note indicates 'In-progress version: Not used in checks. View Released Version'. Below this is a table titled 'Safety Data Sheets (3) Standard' with columns for 'Language' and 'Safety Data Sheet Status'. The table shows three entries: German (DE), English (EN), and Dutch (NL), all with a status of 'Missing'. The right side of the screenshot shows a preview of the generated SDS for 'P55 Industrial Cleaner'. The SDS header includes 'SAFETY DATA SHEET', 'according to Regulation (EC) No. 1907/2006', 'P55 Industrial Cleaner', 'Version: 0.0', 'Revision Date: 10.07.2025', and 'Page: 2/'. The SDS content includes 'Hazard pictograms' (four red diamond symbols: exclamation mark, skull and crossbones, flame, and hand/eye contact), 'Signal Word: Danger', 'Hazard Statements' (H224, H304, H315, H371, H336, H317, H319, H412), 'Supplemental Hazard Statements' (EUH070), 'Precautionary Statements - Prevention' (P210, P264), and 'Precautionary Statements - Response' (P305, P351).

Language	Safety Data Sheet Status
German DE	Missing
English EN	Missing
Dutch NL	Missing

SAP S/4HANA Cloud for product compliance 2508

Additional Features

Compliance Data Foundation

- Enable delivery of phrases, graphics, lists, listed substances, Compliance Requirement Versions for partners
- Continuous delivery of PMA and SDS compliance requirements

Product Marketability and Compliance

- Market Assessment API

Safety Data Sheet Management

- Management & shipment with multi-component products

Safety Data Sheet Authoring

- SDS generation for articles as such
- SDS data calculation support (APIs)

The image shows two overlapping screenshots of the SAP Business Accelerator Hub interface. The top screenshot displays the 'APIs on SAP Business Accelerator Hub' page, featuring a diagram of System 1 sending a 'Request' to an API, which then sends a 'Response' to System 2. Below the diagram, there is a definition of an API and a list of use cases: 'Connect business processes across your system', 'Integrate with external systems', and 'Develop your own dependent extensions or customizations'. The bottom screenshot shows the 'Product Market Assessment' API page, which includes a search bar, a 'GET /ProductMarketAssessment' endpoint, and a description: 'Create, read, update, or delete product market assessments with this synchronous inbound system'. The bottom screenshot also shows the 'Chemical Compliance Info Events' API page, with a description: 'Informs a remote system about requested calculation in a compliance view, known technically as chemical compliance info, in the tenant'. The interface includes navigation tabs like 'Overview', 'API Reference', 'Schema View', and 'API C'.

SAP S/4HANA for product compliance 2025

SAP S/4HANA Cloud Private Edition, product compliance

All capabilities

- All innovations from Public Cloud releases 2402, 2408, 2502, 2508

Dangerous Goods

- DG transport documents in Transportation Management

Product Marketability and Compliance

- IMDS interface: Enhance extensibility allowing customers to implement support for IMDS 15 compatibility (SAP S/4HANA PC Classic and downport to SAP (EHSM) PRC-DI)

The screenshot displays the SAP What's New Viewer interface. At the top, there is a navigation bar with the SAP logo and links for 'Help Portal', 'Products', 'SAP Learning Journeys', and 'What's New'. Below this, the page title is 'What's New Viewer - SAP S/4HANA and SAP S/4HANA Cloud Private Edition' with a language dropdown set to 'English'. A filter bar shows 'Line of Business: [No selection]', 'Solution Area: Product Compliance', 'Category: [No selection]', 'Type: [No selection]', 'Scope Item: [No selection]', and 'Availability: 2 s'. A 'Note' section provides guidance on using the viewer and mentions ABAP Platform updates up to September 2025. Below the note, the page size is set to 25, and it shows 1-25 of 66 items. A table with 12 selected columns lists the updates:

Line of Business	Solution Area	Solution Capability	Title	Document ID	Short Description	Category	Type
R+D/Engineering	Product Compliance	Dangerous Goods Management	Regulatory Content for Dangerous Goods	RD-12FF-578C	To support your business processes, SAP delivers compliance requirements as regulatory content. In Dangerous Goods Management , each compliance requirement contains data for a specific dangerous goods regulation. SAP continuously provides new and updated versions of these compliance requirements as regulatory content, ensuring you have the latest information to assist in classifying dangerous goods. With this feature, the regulatory content has been updated, changed, and enhanced. See More	Other	Cha
R+D/Engineering	Product Compliance	Dangerous Goods Management	Integration of Dangerous Goods Packing Instructions	RD-8010-8CB2	This feature enables you to view new packing instruction data for IMDG, ADR, RID, IATA, ADN 2025, ANTT 2023, ADG 2024, JT/T617.3 2018, NOM 2023, SANS 2022, NZS 2021, NCh382 2021 and UNRTDG. See More	App	Cha
R+D/Engineering	Product Compliance	Dangerous Goods Management	Regulation Specific Details for Dangerous Goods Compliance Requirements	RD-4845-AE6F	With this feature, 10 new regulation-specific fields are embedded in compliance requirements for dangerous goods management and can be seen in the View Regulatory Data - Dangerous Goods app as well. This feature allows for more efficient compliance with dangerous goods regulations by creating more complete declaration criteria, in preparation for transport, of products classified as dangerous goods. See More	App	Cha

Outlook and Roadmap

Product Compliance: Outlook 2026

Planned feature highlights for next release

SAP Labs preview

SAP S/4HANA Cloud Public Edition, product compliance 2602:

Dangerous Goods

- Classify Products which contain multiple Dangerous Goods
- Support for products in logistic packing instructions in the apps Compliance Information, Regulation Update, Dangerous Goods Information for the value chain

Safety Data Sheet Management

- Enhance SDS generation with specific data for most commercially used products and add support for change marks
- Manage SDS for branded products
- Trigger SDS shipment from sales order processing
- Public APIs for Hazardous Ingredients, GHS Classification, GHS Labeling

Product Compliance: Outlook 2026

Planned feature highlights for future release

SAP Labs preview

SAP S/4HANA Cloud Private Edition, product compliance 2025 FPS2:

Compliance Data Foundation

- Support of distributed system landscapes

Dangerous Goods

- Integration in logistics packing instruction/handling units in Sales, Outbound Delivery, and Transportation Management
- Integration of ADR 1.1.3.6 in Transportation Management

Product Compliance: Roadmap Topics 2026 and beyond

SAP Labs preview

Compliance data foundation

- Field / Node extensibility
- Mass data maintenance
- Support for regulatory content from 3rd party provider
- Support for electronic data exchange
- Product Structure, BOM sync, Basic Materials

Dangerous goods management

- Support for automated DG classification
- Integration into EWM processing
- Support of transport emergency cards
- Support of dangerous goods in equipment

Product Marketability

- Substance registrations management
- Substance volume tracking for additional business documents, and planned quantities
- Integration with IPD Specification Management
- Extended due diligence support (blocking, reporting, ...)
- Declarable substance, SVHC/RoHS support

Compliance Document Management

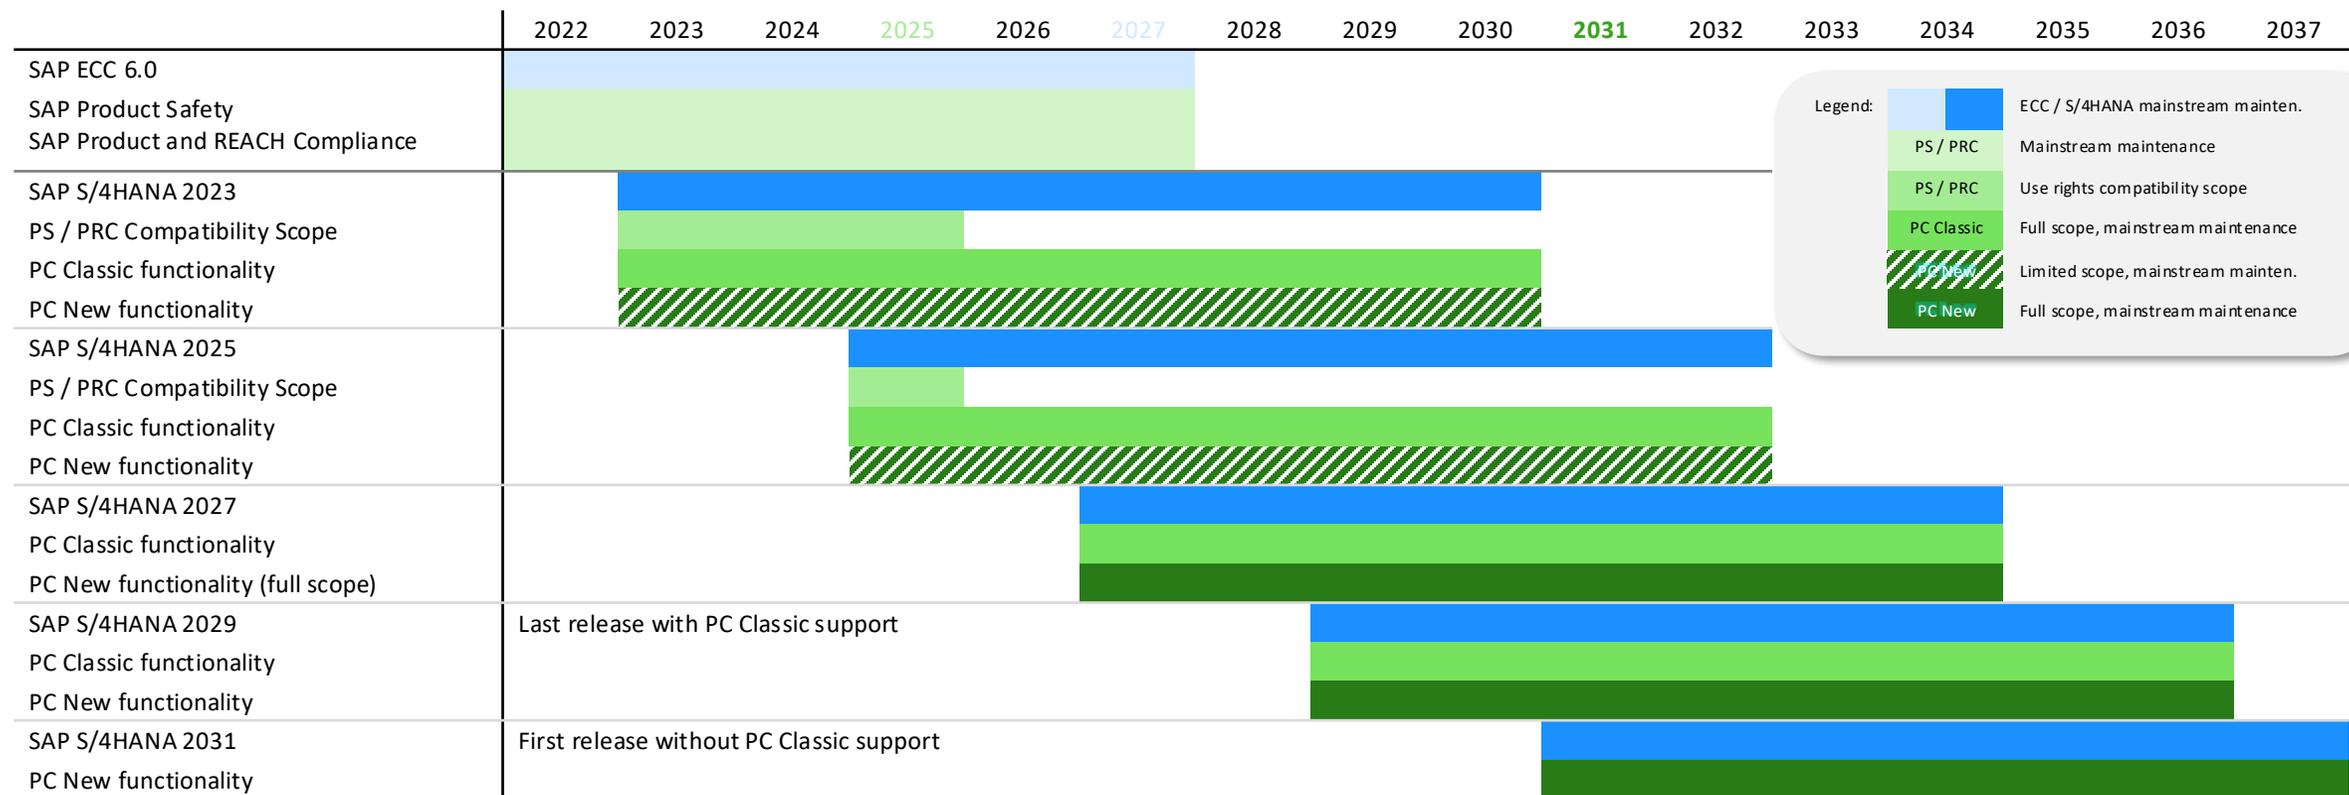

- Compliance information sheet
- Close gaps for integrated SDS authoring
- Support for SDS automation from content partner
- Automated label printing with partner solution

Product Compliance: Transition from ECC to S/4HANA

Availability, Use rights, and Mainstream maintenance

SAP Labs preview

Legend:

- █ ECC / S/4HANA mainstream mainten.
- █ PS / PRC Mainstream maintenance
- █ PS / PRC Use rights compatibility scope
- █ PC Classic Full scope, mainstream maintenance
- ▨ PC New Limited scope, mainstream mainten.
- █ PC New Full scope, mainstream maintenance

“PC Classic” functionality will be set to “deprecated” with SAP S/4HANA 2025 for the use case “Product Compliance”, and to “obsolete” or “decommissioned” with SAP S/4HANA 2031 - except for “Dangerous Goods Master Editing”, and “Phrase Management”. This functionality will be decommissioned on 31-December-2036 (for all SAP S/4HANA releases). You can continue to use deprecated objects and functionality in releases 2025, 2027, and 2029 without limitations. SAP will provide no maintenance support for decommissioned functionality.

Product Compliance: Start your S/4HANA Transition with Hybrid Scenario

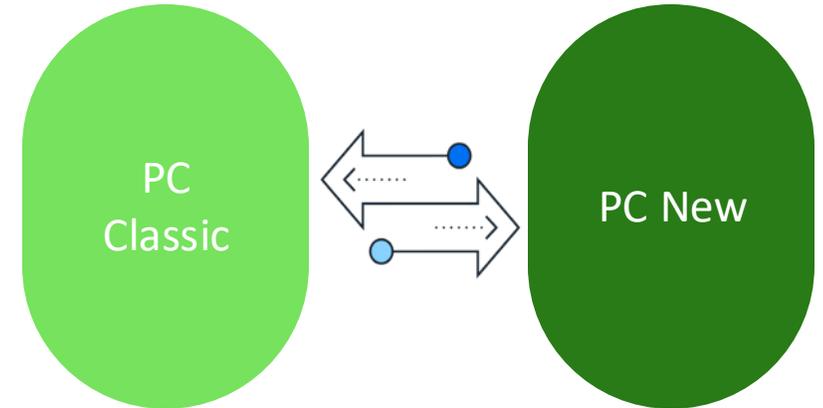

Hybrid scenario: Parallel use of classic and new capabilities

Benefits

- Support of full scope
- Ability to benefit from new functionality with its superior usability, process support, and embedded content
- Risk reduction due to stepwise migration to the new data model

Options

- Hybrid Adapter by 3E*
 - Process starts in classic or new solution with creation of products and compositions
 - Transfer of data to new solution for DG “final” classification to be used in checks and on documents
 - Transfer of data to classic for SDS document creation
 - Transfer of SDS document to new solution to be used in new SDS management and shipping
- PC Sync Tool and services by SAP Services / CIS*
 - Modular and extensible approach that can be adapted to customers’ needs
 - Multiple system scenarios (New+Classic in S4, Classic ECC/New S4, same or separate S4, ...)
 - Option to also support data migration
 - First 2 customers live, more projects started

*) Separate license required / Additional cost might incur
