# A Short Overview of Business Process Transformation

PUBLIC

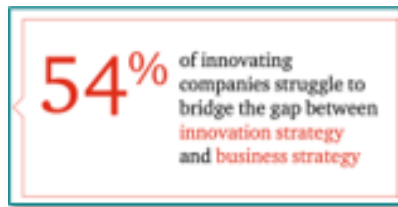

# Given all our rich data, why is business transformation so difficult?

This is most often due to the lack of...

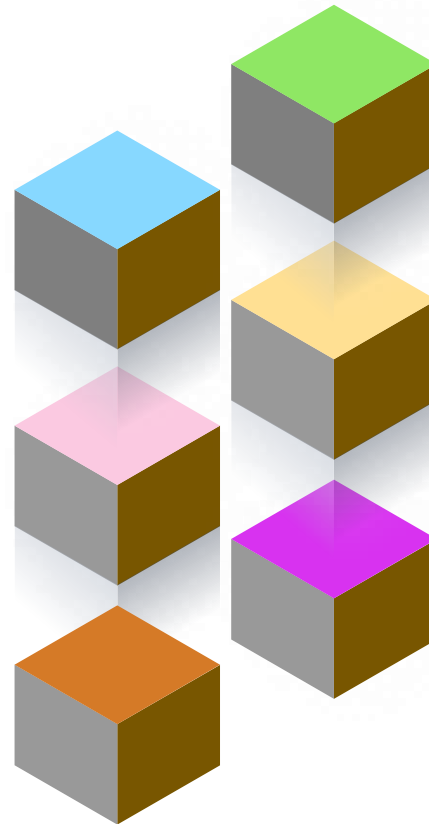

...clear goals and objectives

...strategic alignment

...organizational buy-in

...communication

...data visibility

...people focus (or, technology for technology's sake)

# Manual Processes and Limited Visibility Plague Business Transformation\*

**37%**

of execs say most/all of their processes are manual.

**ONLY 17%**

of execs say they have a clear, real-time view of overall costs.

**48%**

report low internal adoption of new process technology.

**44%**

say low adoption of new processes/technologies is a barrier to digital transformation.
