

Speaker/Sponsor Presentation Portal: April 25

ASUG Southern California Chapter Meeting

Thank you for agreeing to speak at the upcoming **ASUG Southern California Chapter Meeting** on **April 25**. Please review the information below and contact [Kaaron Johnson](#) if you have any questions.

- Your breakout session is scheduled to run for the duration specified in your *Sponsorship Agreement* — please plan your presentation timing accordingly.
- We recommend saving 5-10 minutes for Q&A at the end of your session.
- Your presentation should provide educational content, with no more than four (4) slides allocated for corporate/sales information.
- Final presentations will be reviewed for content to ensure adherence to ASUG guidelines.

Please submit your presentation and supplementary presentation materials below.

Speaker Contact Name Rodrick H Meyer

Speaker Company CSG Software

Email Address csgsoftwareinc@gmail.com

Speaker Bio

Rod Meyer has a broad set of SAP Technology skills, honed over 28 years of field consulting and implementation experience. As the Team Lead and Product Owner for the only successful production migration of a multi-billion-dollar business unit using SAP Fashion Migration Cockpit, he is a process thought leader in the transition of SAP ECC applications to SAP S/4 HANA.

Over the last three years, he led the SAP Migration Cockpit co-innovation team at NIKE as a part of their Strategic Enterprise Capabilities (SEC) transformation program. His team coordinated SAP development teams in India, China, and Germany, NIKE Technology teams in Data Accessibility and Engineering, and NIKE Capability teams in Order Management and Direct Factory Sourcing.

Previously, Rod spent decades working on SAP projects in and around ERP Operations and Business Intelligence, focusing on global business process design in the Retail, Fashion, Consumer Products, High Technology, Telecommunications, Health Care, and the Industrial Manufacturing industries.

His specialized technical knowledge and experience includes best practices in data migration, production go live, project rescue, process globalization and quality validation procedures.
