

# Simplify the Journey to SAP HANA with GekkoBrain and Google Cloud

April 22nd, 2020

Alison Hettrick, Partner Technology  
Lead - Strategy & Architecture,  
Google Cloud

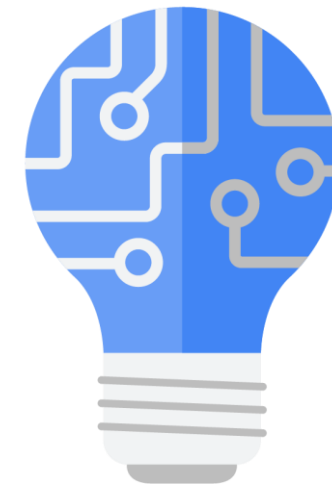

Jens Strandbygaard, CEO,  
GekkoBrain

# Challenges in driving change

Enterprise IT is  
**complex and costly**

Businesses demand  
**agility and innovation**

# Simplify the Journey to SAP on Google Cloud with Gekkobrain

01

Assess migration readiness and opportunities

02

Reduce time, effort and cost for migration

03

Visualize processes to improve and optimize your SAP investment

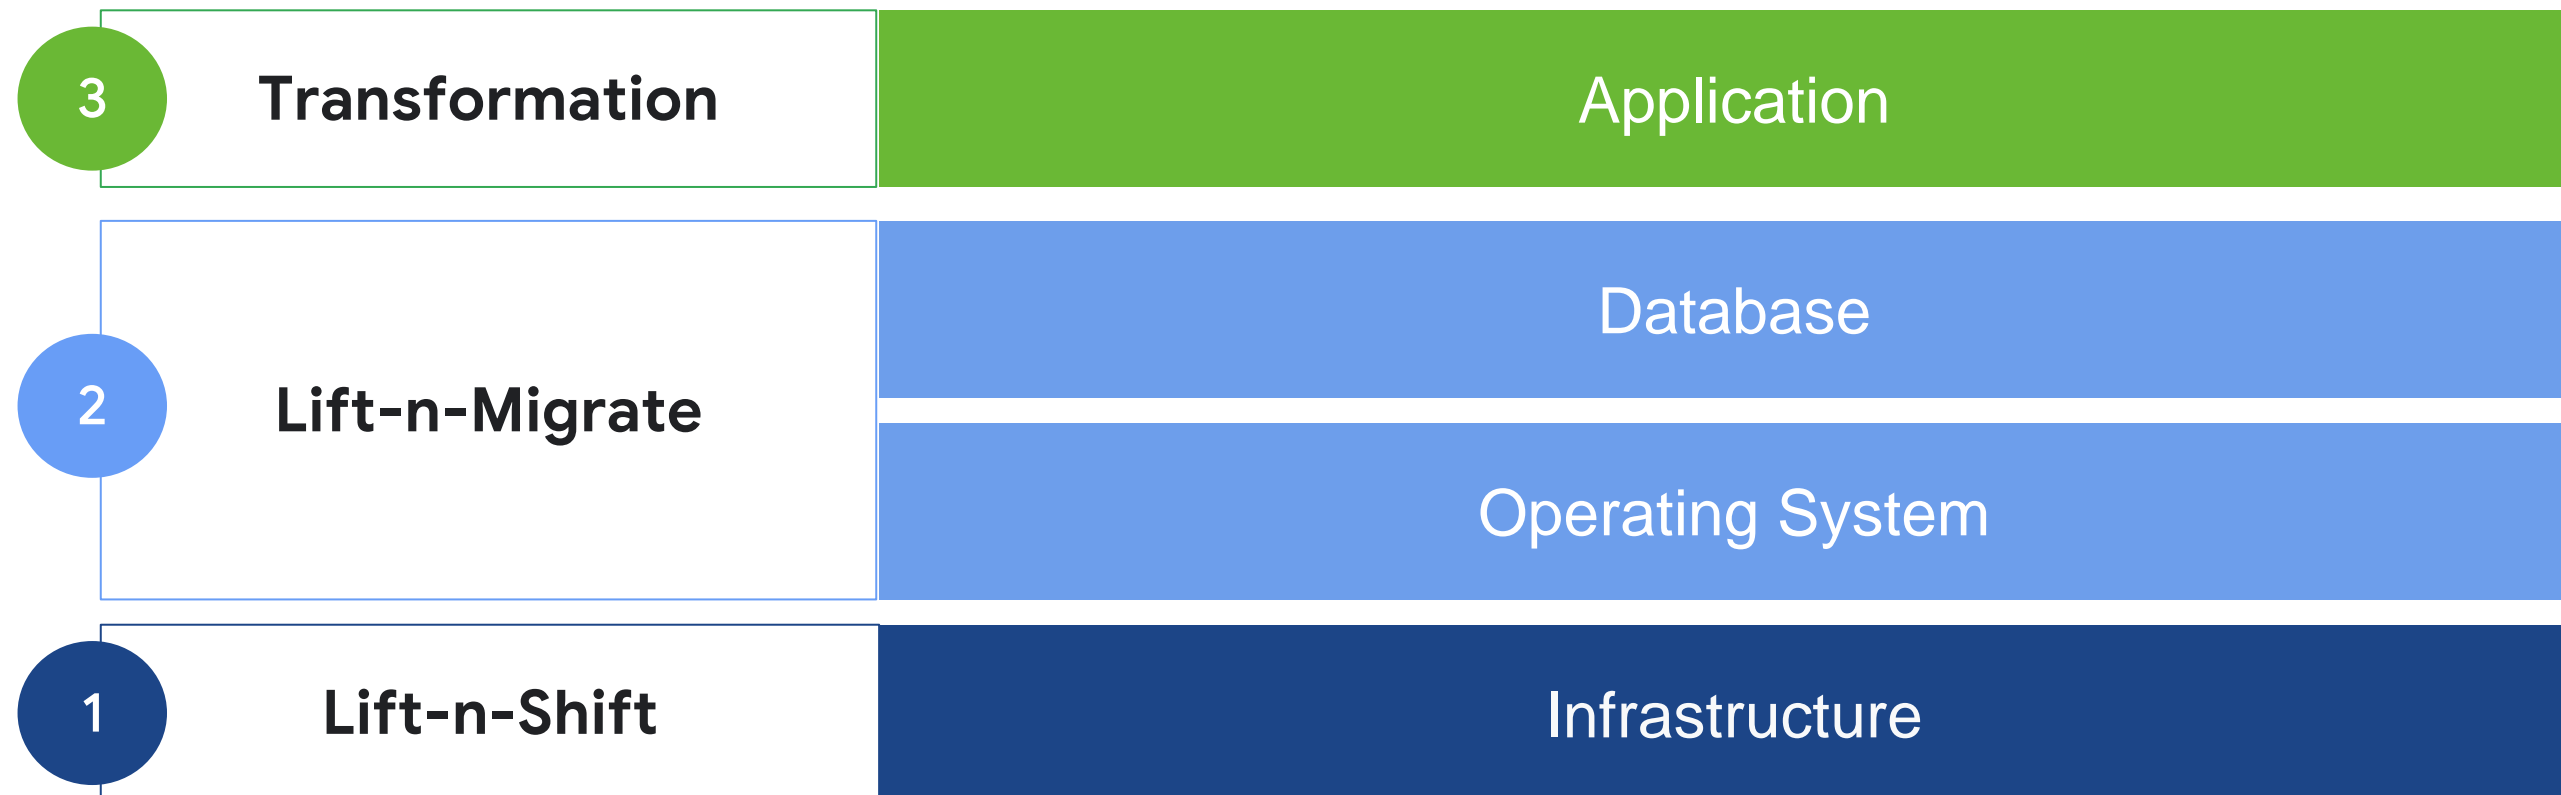

# To migrate --OR-- not to migrate

## Top of mind questions

- 1 - What are my options for migration?
- 2 - How much will this cost?
- 3 - How long will this take?
- 4- Where will my company benefit once this is done?

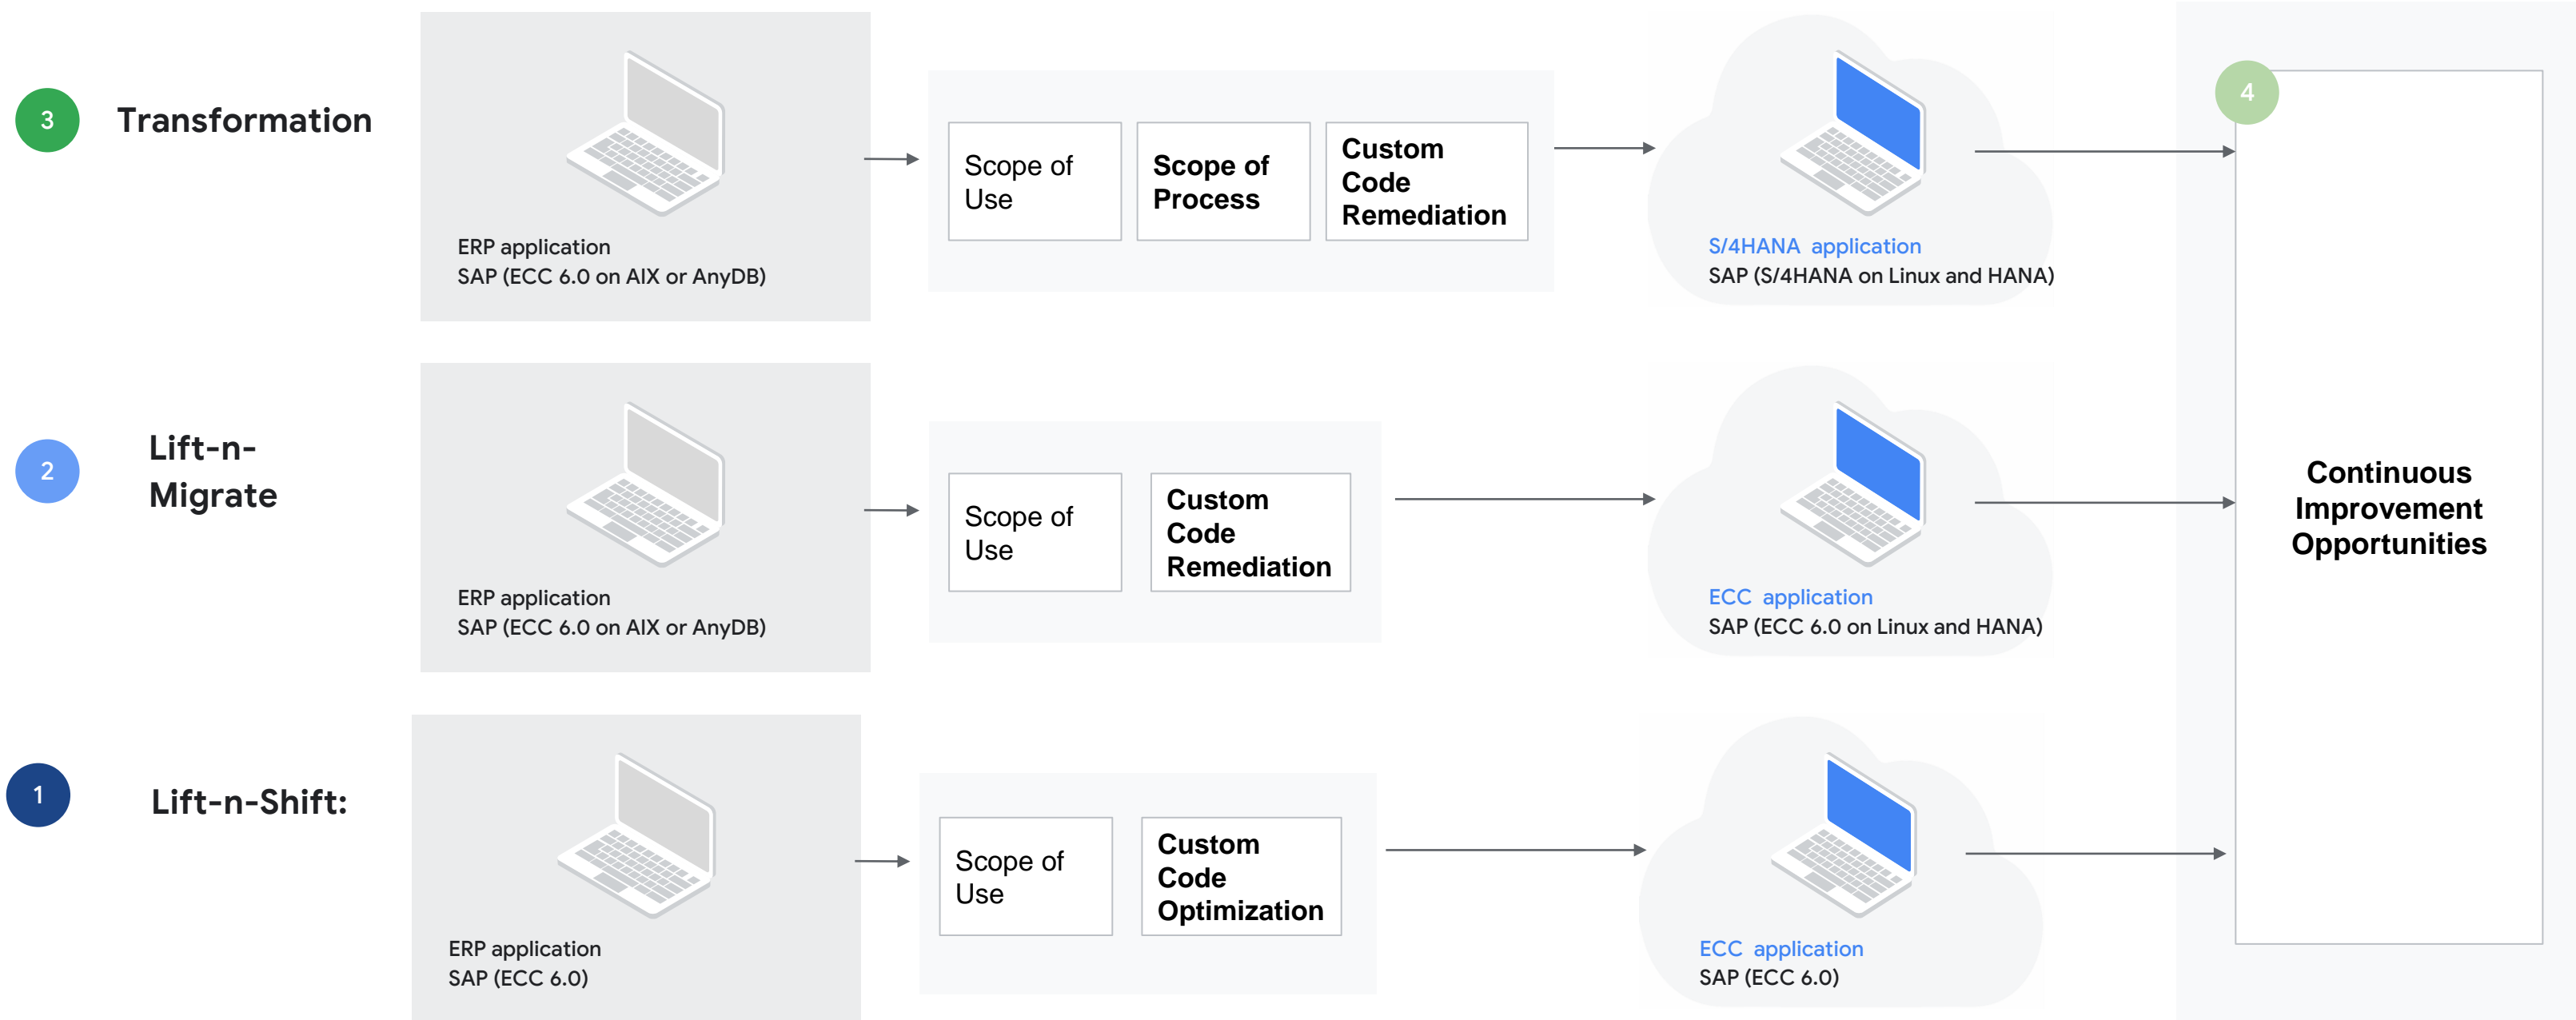

# Possible Strategies for SAP Migration to Cloud

Which strategy is right for you? How do you assess this?

# Things to Consider - Scope & Complexity

# Introducing Gekkobrain with Google Cloud

Analyze and obtain a deeper understanding of custom code in your SAP landscape

Develop automated migration plans to optimize OR remediate custom code and its complexities for SAP migration (depending on scenario)

Optimize your migrated SAP processes running in Google Cloud for continuous improvement

Average savings of \$1,000,000 per project

# Gekkobrain Solution

Where it fits into Cloud and SAP migration strategies

	Scope	Gekkobrain Solution	Benefits	Continuous Improvement
3	Transformation	S/4HANA Assessment Automatic Business Process Discovery	Understand cost and time, assess system consolidation, choose path (greenfield/brownfield)	4 Business Process Analysis and troubleshooting for process optimization
2	Lift-n-Migrate	HANA Readiness Assessment Automatic Code Remediation	Understand cost and time, minimize manual efforts and migrate with automation	DevOps Custom Code Monitoring for performance optimization
1	Lift-n-Shift	Gekkobrain Code Quality Assessment	Optimize code for cloud operation for better performance and cost savings	

# Gekkobrain Solution

## Key Components & Capabilities

1

### Lift-n-Shift

#### Custom Code Quality Assessment

Detailed overview of custom code performance in production in less than 24 hours

2

### Lift-n-Migrate

#### HANA Readiness Assessment

Detailed budget and timeline for HANA migration in less than 24 hours

#### Automatic Code Remediation

Migrates and fixes more than 90% of HANA code issues automatically

3

### Transformation

#### S/4HANA Readiness Assessment

Timeline and budget for S/4HANA custom code remediation in less than 24 hours

#### FLows: Business Process Analysis

Automatic visualization of all business processes across multiple modules and systems in less than 1 week

Assess greenfield/brownfield options

Link processes with custom code

Save millions of dollars on consultants for manual process discovery

4

DevOps: Code Quality Optimization

HANA Readiness Monitoring

FLows: Business Process Deep Dive

# Customer Reference Examples

## Value and Benefits

1

### Lift-n-Shift

#### Custom Code Quality Assessment

Multiple custom code outsourcing vendors resulting in performance issues.

Gekkobrain DevOps deployed. 20% increased performance on select programs, 15% cost savings on external developers, major savings on compute

2

### Lift-n-Migrate

#### HANA Migration

35K custom code issues. 6 Developers for 10 months at 1.2M run-rate. Project overruns.

Gekkobrain deployed and analyzed and remediated relevant custom code for savings of US \$1M

3

### Transformation

#### S/4HANA Transformation

S/4HANA journey. Needed to understand scope and cost.

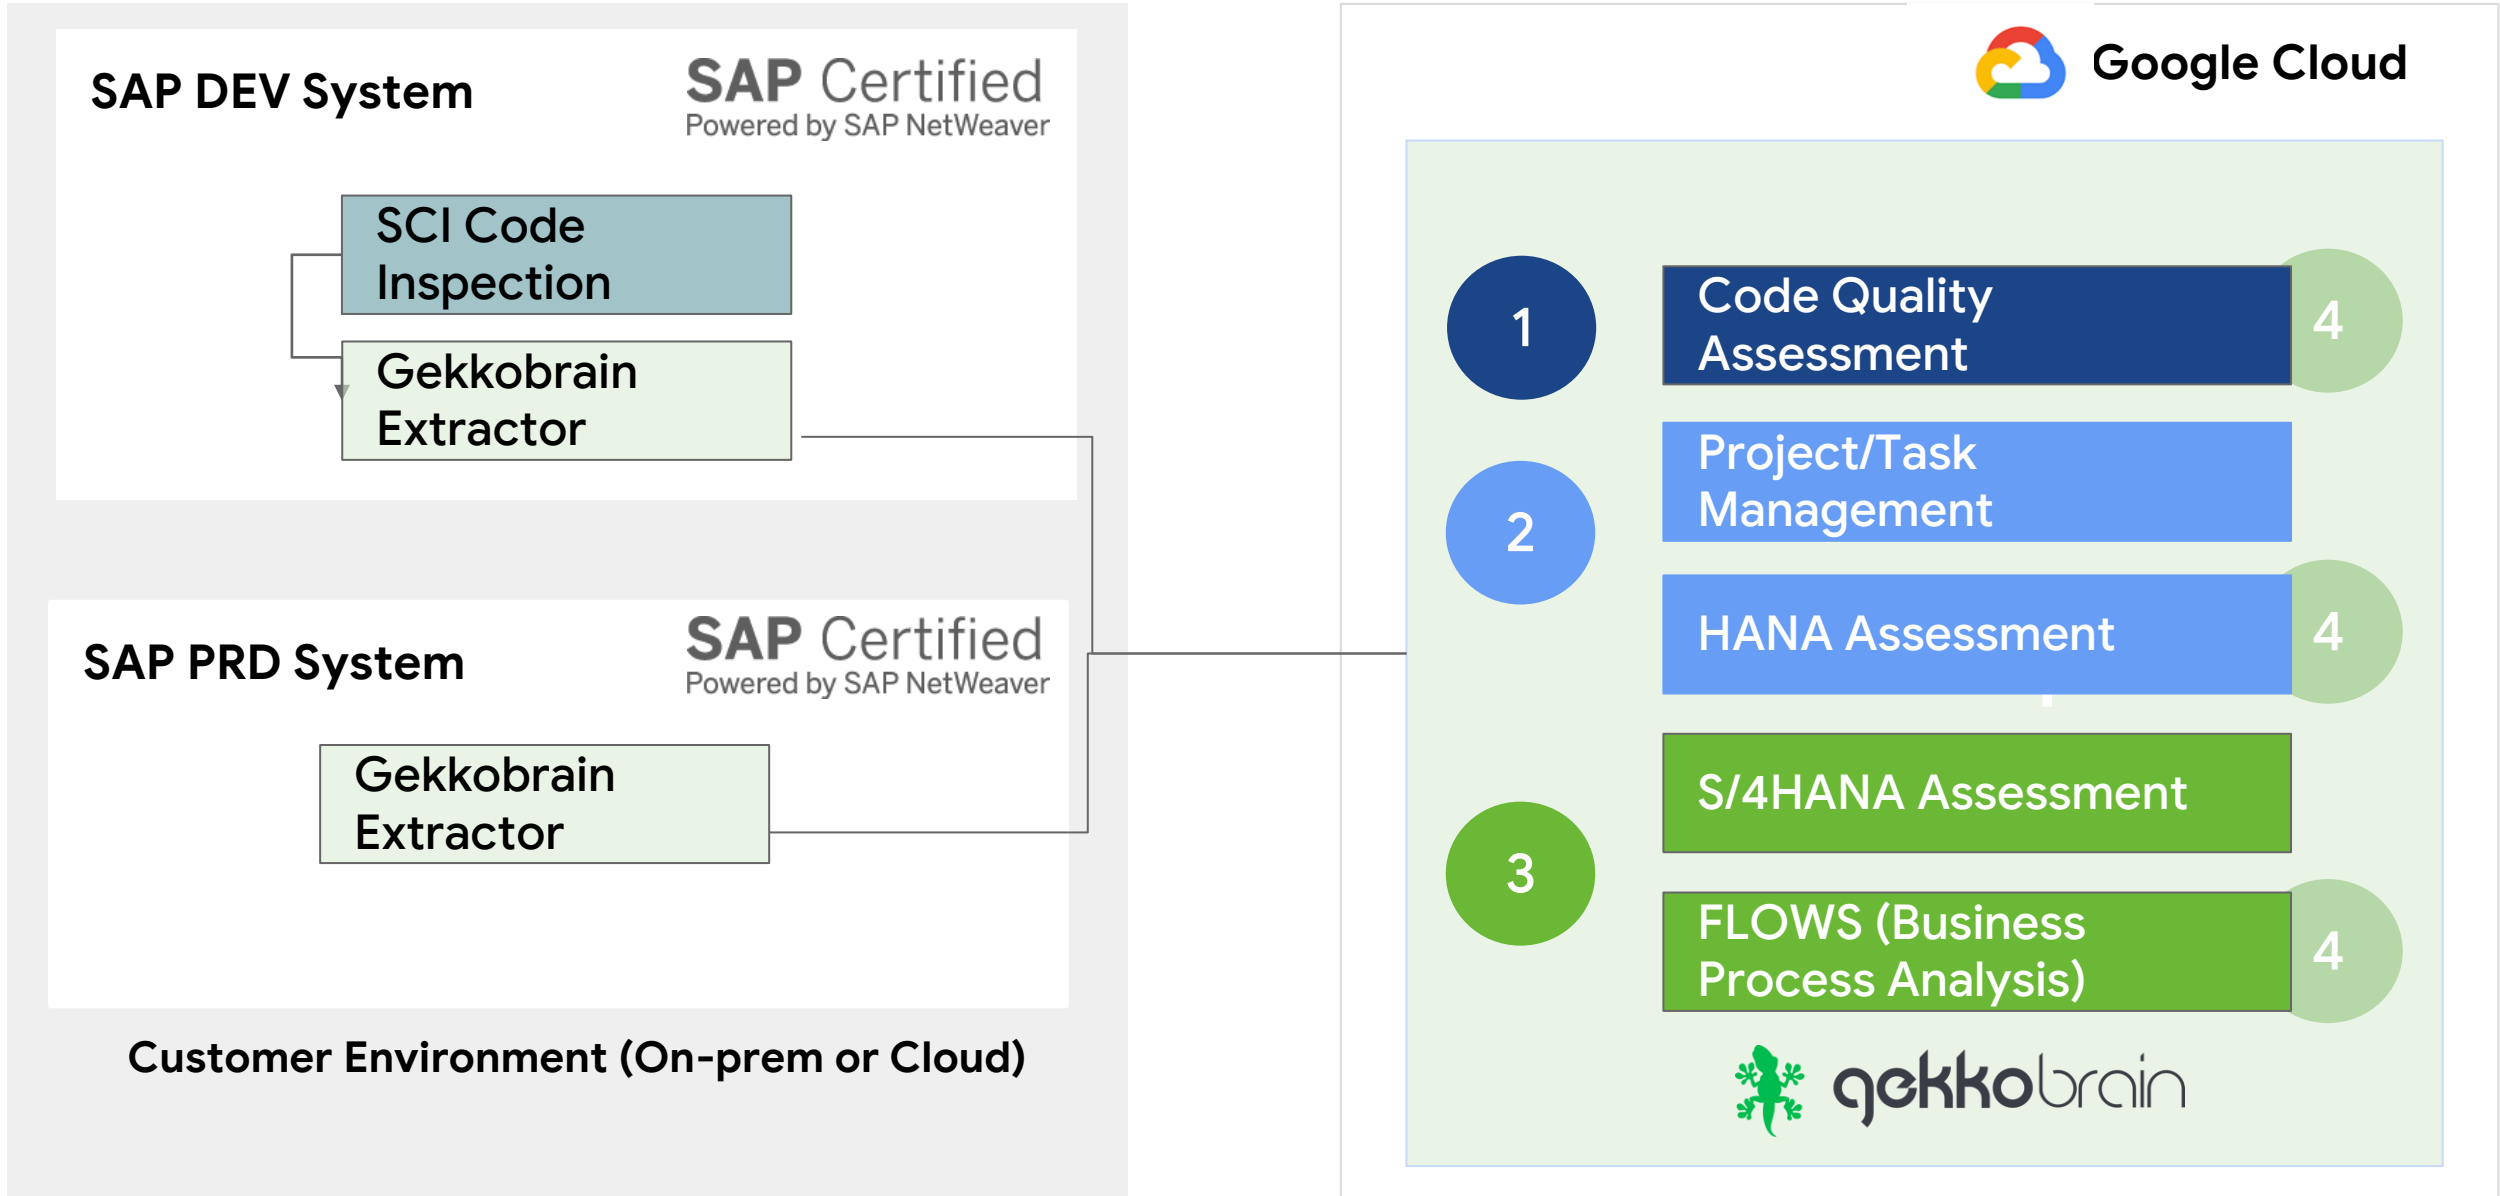

Gekkobrain deployed. Detailed overview of S/4HANA readiness, overlay of business processes from 2 countries. Major savings on external consulting, final decision on greenfield/brownfield and system consolidation.

# How does it work?

# Gekkobrain Solution

## Reference Architecture with Google Cloud

# GekkoBrain Demo

# Commitment to Customer Success

# Committed to your success

Commitment to solving the unique needs of your business.

Exceptional consumer response times

Customer Reliability Engineering, a white glove service

Cloud Acceleration Program (CAP) & Business Continuity Program

Senior GCP leadership focusing on your biggest challenges and committed to your success

# Free Assessment with Gekkobrain

## for SAP migration to Google Cloud

### Assessment Scope & Process

Review your requirements

Perform assessment and review findings

Understand value potential and savings

Align migration strategy and approach

Prepare project timeline
